HARTLEPOOL ARTILLERY CORPS.—We subjoin a list of the officers who have been elected and submitted to the Lord-Lieutenant for the first two companies. A second and third company are in course of formation, and before very long will probably muster 400 or 500 strong. The Government are now erecting powerful batteries at Hartlepool, the great commercial importance of the two towns of Hartlepool and West Hartlepool rendering it essential that they should have some efficient protection. 1st Company: captain, William Charles Ward Jackson; first lieutenant, Thomas Bilk; second lieutenant, Ebenezer S. Jobson. 2nd Company: captain, Frederick Aklam Milbank; first lieutenant, John Mackenzie, H.M.C.; second lieutenant, Edward Turnbull.

KENT.

WOOLWICH ARSENAL.—It is stated that Lord Sydney has reconsidered his objections to sanction the appointment of various foremen as captains of companies, and the officers who were unanimously elected by ballot will be gazetted.

The whole of the artillery and rifle companies recently formed at the Royal Arsenal, Woolwich, will assemble on the parade-ground to-day, for inspection by Lord Sydney, the Lord-Lieutenant of Kent.

WOOLWICH DOCKYARD.—The proposal of raising an Artillery Corps of Volunteers in Her Majesty's Dockyard, Woolwich, having been submitted to the heads of departments by the mechanics and others serving in the Dockyard, and their proposition having been forwarded by the Commodore-Superintendent for the consideration of the Board of Admiralty, their lordships have signified their approval of its organisation. The first preliminary meeting on the subject was held on Wednesday evening in the Dockyard School-room for the purpose of adopting measures to carry out the proposition.

DEPTFORD DOCKYARD.—The rifle corps recently formed at this establishment will meet for drill in one of the large warehouses at the Victualling-yard. At a full meeting of the corps held last week, the following officers were appointed, subject to the approval of the Lord-Lieutenant:—captain, Mr. Wilkinson (store-receiver); lieutenant, Mr. Pembroke; ensign, Mr. Stubbings.

SHEERNESS.—On Friday last a meeting was held for the election of officers to serve in the Kent Artillery Volunteer Companies formed in this town, when the following gentlemen were unanimously nominated, and their names forwarded to the Lord-Lieutenant of the county for approval, viz.:—1st Company: captain, W. B. Robinson; first lieutenant, W. Secombe; second lieutenant, C. Stewart. 2nd Company: captain, J. S. Harper; first lieutenant, C. Pennell; second lieutenant, C. Hanbury. A communication has since been received from the lord-lieutenant intimating his intention of submitting the names of the above-mentioned gentlemen for Her Majesty's approval. Only young and able men are received, and consequently these companies promise to vie with any raised in the county. It is in contemplation to form a band, and steps are already being taken to accomplish so desirable an object.

LANCASHIRE.

An official meeting of the officers of the Artillery Volunteer forces of Liverpool was held on Friday week, by special summons of the Mayor, at the Town Hall. Colonel Bourne, Major Walter, Captains Melly, Wrigley, Bushby, Hornby, Turner, Robinson, Campbell, and Langton, of the 4th Division of Artillery; Captains M'Iver and Currie, of the Cunard Volunteers; and Brown, Hamilton, Sharman, Clay and Dyke, commanding other artillery forces, were present. Mr. W. Brown, late M.P. for South Lancashire, whose name has been foremost in the movement, was in attendance. Altogether there were 23 companies of artillery, numbering over 1500 efficient men, represented. The Mayor stated to this body of officers that, in obedience to the request of the Secretary at War, he would introduce to them Colonel M'Murdo, the officer appointed by Her Majesty's Government to arrange the details for the Volunteer service, whose immediate object was to arrange for the uniting the several existing companies into divisions, with a view to secure unity of action and the avoiding of unnecessary correspondence. Colonels Marriott and Fortescue, of the Royal Artillery, were also present as the officers of the district, whose duties are to inspect the forces and aid in their general efficient organisation. Colonel M'Murdo explained to the officers present the objects and purposes of the Government in reference to the Volunteer Artillery arm of the service, and made it clear to the officers commanding that, although it was necessary they should combine in divisions of 500, yet that their so doing was not intended in any way to interfere with the separate independence of each distinct company or force, and that the brigading would not in the slightest degree affect their original and separate existence as individual corps. The chief subject of discussion was the matter of small arms. Major Walter addressed Colonel M'Murdo at some length on this question, urging upon the Government the vital necessity of all Volunteer Artillery being at once supplied with the rifled carbine and sword bayonet. Major Walter observed that he had raised 640 men, that they had banded themselves together on a clearly expressed arrangement, which was that they were to be artillerymen, and that an artilleryman was armed with a carbine and bayonet. Now, to imagine that the forces collected together in Liverpool and other places would consent to march through the streets of a large city with an antiquated Roman sword, more like the instruments carried by the veterans of Drury Lane theatre in the march of *Blue Beard* than any weapon of modern warfare, was simply an absurdity. All the other officers present fully concurred in these opinions, and it was earnestly impressed upon Colonel M'Murdo that nothing short of a thorough rifled carbine, to be issued to the Volunteer Artillery, would keep the forces together, and maintain regularity and numerous attendance at gun drill. Resolutions were passed expressing the readiness of the several companies to brigade according to the expressed desire of the War Office, and enforcing the vital necessity of an immediate issue of carbines to the artillery forces. It was explained to Colonel M'Murdo that the 4th Division of Lancashire Artillery, being in itself a division of eight companies, under Colonel Bourne's command, formed a brigade of itself. The mayor afterwards entertained the assembled officers at a sumptuous luncheon. As an instance of the earnestness, so far, of the Lancashire Artillery Volunteers, it was named to Colonel M'Murdo that the eight companies of the 4th division had for several months past been regularly drilling three times a-week, and that but few members of the respective companies failed in their frequent attendance.

MIDDLESEX.

TOTTENHAM.—Information was received on Saturday last that the Queen has been graciously pleased to accept the services of this corps, which will rank as the 33rd Middlesex. The corps will comprise one captain (Mr. George Goss), one lieutenant, one ensign and 100 men. It is hoped that the present number of members (60) will shortly be considerably augmented by the accession of the gentlemen of Edmonton, in which parish there appears little prospect of raising a separate corps. Drill has been going on during the past month on three evenings of the week, and the members are making rapid progress under an experienced sergeant.

SURREY.

NORWOOD RIFLE CORPS.—An adjourned meeting was held on Monday evening, the 6th inst., in the hall of the Norwood Institute, to proceed with the necessary measures for forming a Volunteer Rifle Corps in connection with the Norwood Working-Men's Institute. Mr. Arthur Anderson presided, and opened the proceedings by proposing, as one of the regulations of the corps, that the members should provide their own uniforms; observing, that he considered it inconsistent with the spirit of any man occupying the honourable position of a Rifle Volunteer, and coming forward as a defender of his country, his hearth and home, to appear in clothes furnished to him at the expense of others. The sentiment was received by the men with cheers, and the proposed rule unanimously adopted. The other rules and regulations for the government of the corps, which had been drawn up by the committee, after explanation, were adopted, and it was decided that the corps should be designated "The Norwood Institute Rifle Volunteers." Upwards of 80 members, mostly fine young working-men, were enrolled, and a very considerable addition to that number it is expected will soon be made. Mr. Anderson was elected chairman of the committee and treasurer, Mr. W. E. Frank (President of the Working-Men's Institute), lieutenant, Mr. Ruston, ensign, Dr. A. B. Sharpe, M.D., secretary and surgeon, and Sergeant Holmes, late of the 7th Fusileers, has been appointed drill-sergeant. Drill commenced on Wednesday evening in the lecture-hall of the Institute. The Norwood Working-Men's Institute now consists of about 400 members, and is rapidly increasing.

WARWICKSHIRE.

BIRMINGHAM.—On Friday night the volunteers, comprising the company raised by Mr. Charles Ratcliff, brother of Sir John Ratcliff, late mayor, met that gentleman at the Town Hall. Captain J. Oliver Mason introduced Mr. Charles

Digitized by Google

Ratcliff, and congratulated the volunteers on their good fortune in having such a gentleman to act with them and to be their future captain, and concluded by giving them some excellent advice as to their future conduct and conformity to the discipline which would henceforth be required of them. Mr. Charles Ratcliff was very warmly received. After expressing his hope that his company would never disgrace the uniform they were about to wear, or be wanting in duty, Mr. C. Ratcliff then read the rules as approved by the Secretary at War, and stated that either Major Sandars or Captain Mason would give any explanations of them that any one present might require; but every one present appeared perfectly satisfied, and not a single inquiry was made. Ninety-six volunteers were then sworn in by Major Sandars and Captain Mason. This is the first example in England of a gentleman raising a company and clothing them at his own expense. The Volunteer Movement is progressing very satisfactorily, upwards of 1000 effective members being at present enrolled. The Gunmakers are forming a separate battalion, and 1000*l.* has been already subscribed towards expences.

RIFLE VOLUNTEERS.—The companies now raised in Birmingham, with the captains gazetted or proposed, are as follow:—1st Warwickshire, Captain Major Sanders, 100; 3rd Warwickshire, Captain J. O. Mason, 100; 6th Warwickshire, Captain T. A. Attwood, 100; 8th Warwickshire, Captain Thomas Lloyd, 100; 9th Warwickshire, Captain G. A. Everett, 100; 10th Warwickshire, (1st Gunmakers), Captain C. Richards, 100; 11th Warwickshire, Captain C. Ratcliff, 100; 12th Warwickshire, Captain Frederick Elkington, 100. Two other companies are being raised by Mr. Geo. Perton and Mr. J. B. Hebbert.

WILTSHIRE.

TROWBRIDGE.—The second company of the Wiltshire Volunteer Rifle Corps mustered in Trowbridge Barracks yard, on Tuesday, when they were drilled under the inspection of Lieut.-Colonel Luard, the officer appointed for that duty by the Government. The corps went cleverly through their evolutions, and previously to dismissal were addressed by the gallant inspector. He reminded the men significantly that silence in the ranks was essential to military discipline, and then pointed out the necessity of ready and submissive obedience by every grade of subordinates. He also intimated to the non-commissioned officers that their position was not one of nominal dignity merely, but that onerous duties were devolved upon them, which he confidently hoped they would efficiently discharge. Colonel Luard concluded by complimenting the officers and men of the corps on the smartness of their manœuvres, and intimated that he should forthwith represent to the proper authorities his high satisfaction with their proficiency, and recommend an immediate supply of arms. He hoped to have the honour and pleasure of inspecting them on a future occasion, when he hoped that both officers and men would be well up to the mark, and that the non-commissioned officers would then each be able to drill the squad under their individual command.

WORCESTERSHIRE.

The Worcestershire Militia have 8 staff-sergeants detached from the head-quarters, Worcester, employed in forwarding the drill-instruction of the Volunteer Rifle Companies within the county, viz.:—Kidderminster, 2 sergeants; Halesowen, 2 sergeants; Bewdley, 1 sergeant; Stourport, 1 sergeant; Pershore, 1 sergeant; Ledbury, 1 sergeant.

YORKSHIRE.

10TH WEST RIDING OF YORKSHIRE RIFLE VOLUNTEERS (Huddersfield).—On Saturday last the 11th inst. the second company of the above corps (100 strong) met in full force for the selection of officers, when it was unanimously agreed to nominate the following gentlemen for approval by the lord-lieutenant: Thomas Pearson Crossland, Esq., J.P., captain; Thomas Brook, Esq., of Colne Villa, lieutenant; Thomas Brooke, Esq., of Hanley, ensign; Frederick Greenwood, Esq., honorary surgeon. The 3rd and 4th companies of the same corps (both of which have almost attained the complement of 60 men,) made at the same time their choice of officers, as below:—3rd company: William Edward Hirst, Esq., captain; T. Learoyd, Esq., lieutenant; Joshua Day, Esq., ensign. 4th company: Bentley Shaw, Esq., J. P., captain; John Haigh, jun., Esq., lieutenant; Geo. H. Greenwood, Esq., ensign. These recently formed companies are most assiduous in their attention at drill, being most anxious to follow in the steps of the 1st corps, whose proficiency does great credit to their able drill instructor, Sergeant France.

We understand that the arrangements are nearly completed for the Volunteer Service Dinner to be held on the 7th March, in honour of Her Majesty's reception on that day of the officers of the Volunteer service. The dinner will include, besides officers who have attended the levee, members of the respective committees of the "National Rifle Association" and "Volunteer Service Club." It is by a joint-committee of these two bodies that the arrangements are being made. We understand that the dinner ticket is to be one guinea and a-half; and that suitable accommodation, after dinner, will be provided for ladies who may wish to be present. It is also proposed to give a ball in the new Flower Market at Covent Garden, on the same occasion.

The subjoined piece of legal information with respect to the question of Irish volunteering is supplied by *Saunders's Newsletter*:—"A very general opinion appears to prevail that there is no statutory power in existence for forming in Ireland Volunteer or Yeomanry corps. This is, however, a mistake, as the Act 42 George III., chap. 68, passed on the 22nd of June, 1802 (continuing an Act of the Irish Parliament, 37 George III.), clearly enables the Government to accept of the service of such corps. The first clause recites that it is 'An Act for encouraging and disciplining such corps of men as shall voluntarily enrol themselves under officers to be commissioned by His Majesty for the defence of this kingdom.' The sixth clause provides for the clothing and accoutrements of the officers and men at the expense of the Crown; and also provides for their payment on the same terms as the regular troops of the line, when called into service. No additional statutory powers are therefore necessary for enabling the Government to at once accept the services of any person who may offer to serve as a Volunteer in Ireland. The fact that the Act of 1802 is still in force has been already referred to by Mr. Cardwell in the House of Commons."

The following general order from the Horse Guards, sanctioning the appointment of non-commissioned officers to Volunteer Rifle corps, for the instruction of the Volunteers in the use of the rifle, has been issued:—"His Royal Highness the General Commanding-in-Chief has approved of non-commissioned officers of infantry being attached, as drill instructors, to corps of Rifle Volunteers. The men so employed will be returned on duty for the period of three months, should their services be so long required, and receive the pay of two shillings and sixpence a-day, and lodging, which will be paid by the corps.
(By command.) "G. A. WETHERALL, Adjutant-General."

3rd Company of Cinque Ports Artillery Volunteers—Henry Wise Harvey, to be Captain; Major William Prime Jones to be First Lieutenant; Morris Bowles Thompson to be Second Lieutenant; Charles Roberts, M.D., to be Honorary Surgeon.

2nd Company of Northamptonshire Volunteer Rifle Corps—John Wardlaw, Esq., late Captain in King's Own Light Infantry Militia to be Lieutenant.

2nd Monmouthshire, or 1st Newport Rifle Volunteers—The Hon. Frederick Courtenay Morgan, late Rifle Brigade, to be Captain; Sir George Ferdinand Radzivil Walker, Bart., to be Lieutenant; George Barclay, Gent., to be Ensign.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s*. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l*. 4*s* Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l*. 12*s*. Mappins' Travelling Dressing Bag for Ladies, 4*l*. 4*s*. The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

HERALDIC STUDIO, 4, OLD CAVENDISH STREET, W.—New Designs for Monograms and Armorial Bearings in every style. Arms, Crests, &c., found by sending Name and County. Sketch, 3*s*. 6*d*. Paintings, Seals, Dies, and every kind of Engraving, in a superior style, by D. T. BAKER.

N.B. Mr. BAKER's ten years' connection with the Heralds' College guarantees correctness and excellence of execution.

"EASTWARD HO!" and "HOME AGAIN," are at the Exchange Rooms, Nottingham.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 5*s*. 6*d*., 10*s*. 6*d*., and 21*s*. at UNWIN & ALBERT'S, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

BANDMASTER.—WANTS A SITUATION, a GERMAN BANDMASTER of the highest testimonials as to character and competency, whose regiment will shortly be disembodied. He can bring the principal part of the Band with him.—Letters addressed to A. B., care of Messrs. BOOSEY & SON, 28, Holles Street, London, W., will have immediate attention.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, FEBRUARY 18, 1860.

It was said by one of the ancient Greek statesmen, in reference to a newly-invented catapult, that such engines would not only kill brave men, but prove the grave of valour itself. It is fortunate that few men know what the effect of the missiles of war really are, and that when they first experience them they are not able to obey their natural instincts in the presence of death and imminent danger. No troops in the world ever yet stood an hour's cannonade in the open with ranks erect. Any officer who has seen service can tell how depressing to the *morale* of the men are the results of a heavy fire of shot and shell continued for any length of time in the ranks, even when lying down, and suffering but little from the fire. The natural desire on the soldier's part is, however, to advance on the guns, because he feels intuitively that it is the safest course for him to take; and he invariably grumbles when he is kept long inactive under fire. He takes his chance of getting through a shower of grape,—anything is better than that rush and roar of round shot, that shrill scream of the howitzer shell, the twittering whistle of the shrapnel, which comes incessantly upon him, bounding and bursting, tearing up the earth, splitting the trees, and grinding up bones and flesh into bloody pulp in an instant. Without adopting Jomini's theory that all men are equal in natural courage, we believe the action of these agencies are tolerably equable on most soldiery, though individuals will differ; just as some horses can never be made to stand fire, whilst others really rejoice in it, and nearly all may by training be rendered tolerably tractable at a field day or in an engagement. Now, the question which is to be solved by any future war—and we hope the solution may be long deferred, if it must come at last—in respect to these new inventions of war which are crowding on our notice from all sides, is this: will men preserve their discipline and steadiness under the new fire and novel engines of war which search them out from an unseen enemy? Many officers of experience own to themselves—and now and then to others—that they doubt whether sailors will stand to their guns when they are assailed by powerful shell fire, by molten iron, by massive shot hurled from broadsides so distant that the report of the guns can scarcely be heard by them. They remember how ships' decks were cleared for a time on the 17th Oct., 1854, by the shells of Fort Constantine—how the whole Allied army made a fiasco on 18th June—how our soldiers, injured by long trench-work, were thrown into disorder by a few flanking guns in the Redan—and, lastly, how the dogged Russian soldiery were just about to abandon the place they had held so long in consequence of the increasing power of the bombardment. If we alone increase the force and range and explosive power of our missiles, so that we shall be superior in these parts to any European or other State, it is to be apprehended that the result will not be of a pacific tendency. But if the whole of the civilised world advances on the same alignement, we may fairly conclude that we are marching towards a neutral land, beyond which even the rage for conquest will hardly induce the most warlike state to go, because she will not willingly outrage human nature, and oppose herself to the instincts of mankind. It is true that each nation has generally a nostrum of its own for taking the lives of its enemies; but the next war will establish the superiority of one or the other. Meantime, happy is that kingdom which, by rendering war most terrible, is contributing to the maintenance of peace—happier still the people which possess among its citizens men of untiring industry, great knowledge, practical skill, devotion, zeal, and capital, to institute most costly and extensive experiments at their own risk, the ultimate end of which, if successful, must be the great accumulation of material power by the state of which they are subjects. Whether Mr. Whitworth is proud of being permitted to accomplish the great facts he exhibited to us on Wednesday last or not, we at all events are proud of Mr. Whitworth. The first mechanical engineer of the greatest nation of mechanics in the world has given his skill, his experience, his time, and his money, to improve our present implements of war, and the greatness of the results he has achieved are such as might be expected from such labours. In the columns of a weekly journal like our own, devoted to many questions connected with the Services, we cannot give all the details of the very remarkable trials at Southport this week, which we should like to lay before our readers.

Southport is the Brighton of Liverpool and Manchester; it has plenty of strand and very little sea—unless a long way out. Looking south towards the sands at the mouth of the Mersey, the eye rests on a very curious coast-line of conical and jagged-ridged "dunes," which completely conceal the flat campaign country on the left from view. At some distance from the half-deserted town of lodging-houses, Mr. Whitworth has formed his little park of artillery. Two huts, sheltered in the midst of the sand-hills, afford shelter to his artillerymen and artificers—his ammunition and his implements. His guns, in wooden jackets, are left on the beach for the investigation of the inquiring seagulls. When undressed they look like equatorial telescopes mounted on light-wheeled carriages, except the 80-pounder, which is an unmistakeable "cannon." The guns which were used on Wednesday were two 3-pounders, one 12-pounder, one 80-pounder. They are all breech-loaders. Without diagrams it would be difficult to explain their action; but to our minds the system is simple, expeditious, and safe. Mr. Whitworth's principle of boring guns is well known. The horizontal section of the barrel shows a hexagon; the longitudinal section exhibits the hexagonal interior turned spirally from breech to muzzle, with the rifling given by the rounded edges of the sides of the hexagon. He maintains that, though velocity may be diminished by a quick pitch in rifling, a certain power of penetration is gained by the increased rotation on its axis or the spinning power of the ball, which is, in some instances, more than an equivalent for decreased range; but, in the guns under experiment, the pitch was moderate, and the range, as we shall see, very great. The bolts fired from these tubes are of various forms, according to the purpose they are intended to serve; but very lately Mr. Whitworth made the extraordinary discovery that, by diminishing the diameter of the shot towards the base he obtained a great increase of range. His bolt somewhat resembles a vertical section of a nine-pin, but it is shaved smoothly in six places along the greatest diameter, so as to fit the hexagonal spire of the barrel. The cartridge is inclosed in a tin case, and a pad of wax, on which the base of the bullet is placed, at the top of the cartridge, for the purpose of lubricating the barrel, and cleaning it out on being fired. The ignition of the powder is effected by a friction tube which is inserted into the vent in the centre of the movable breech-piece, and it is some little disadvantage that the tube is blown back with such force as to render it inadvisable to stand in rear of the gun. When the gun is discharged, three turns of the short leverage attached to the breech unscrews it and permits it to be opened on its hinge, so that the air blows through the tube, the tin case is taken out uninjured, a ball or bullet is put in, the cartridge is shoved after it, the breech is moved back, and screwed on with three turns of the wrist, the friction-tube is inserted, and the gun is ready for action.

The first shot was fired from the 80-pounder. This gun weighs four tons. It consists of a tube of what is called homogeneous iron, bored out in a spiral hexagon, over which are driven a series of bands of iron, driven on by hydraulic pressure, and tested continually till the maximum pressure which can be given without injuring the quality of the metal is attained; a second series of belts is then forced on the same way over the first, covering the parts of junction, and the finish of the piece is so good that the eye cannot detect on the exterior surface where one belt is in contact with another. The gun is about 9 feet long, and the breech-piece is of course ponderous, but we think the gun could be served at least as quickly as a 95 cwt. gun on the common principle. An 80lb bolt was placed in the gun, which was loaded with only 8oz. of Government-made powder. The discharge projected it at a low velocity 500 or 600 yards, where it struck the sand to the right of the line of fire, and ricochetted at an angle of 45° to the right, the second graze being about 200 yards from the first. It need hardly be stated that this experiment was merely made to let the few persons who were present "*see* a cannon shot in the air."

The practice from the 12-pounder gun was commenced at the target, which was placed at the first 1000 yards of the range—a 6-feet square of canvass with a 2-feet

Digitized by Google

bull's-eye; the gun is 6 feet long, bore 3 inches, the pitch, 1 inch in 40. The elevation was 1° 28′, the charge 28 oz. Ten shots were fired in succession, of which the first two were experimental to test the influence of the wind and atmosphere — but the second grazed the side of the target. The remainder all hit the target, and three of the eight were in the bull's-eye. The ricochet was irregular; but in one instance which was measured, the first graze was at 2200 yards; the second, at 3000 yards; and thence the ricochet diminished in spring till the ball stopped in the sand at 5600 yards from the muzzle. The accuracy of fire was not so remarkable as the great range attained by this gun, which would be able to shut up an ordinary 12-pounder gun at about three times the range of the latter, provided that at high elevations an aim can be taken at all commensurate with the range.

The 3-pounder was then tried—it is 1¼ inches in diameter; the pitch 1 in 40; length 5 feet 2 inches, with 10° elevation, and a charge of 7½ oz. of powder. The gun was directed to throw a shot over the first post, so as to ascertain where it would drop in the line of fire, which is marked by long poles at every 1000 yards up to 10,000, the intermediate distances being divided by shorter poles into 100 yards. The wind blew to the left of the line of fire. The first shot struck at 4171 yards; the second at 4179 yards; the third at 4224 yards, and the fourth at 4122 yards, the mean divergence from the line of fire being little over 12 feet. It need not be remarked how a column whose distance was ascertained, a standing camp, or a fort, would be ripped up by such an extraordinary fire. The elevation of the gun was then increased to 20 degrees; the first shot grazed at 6760 yards, the second at 6784 yards, the third at 6720 yards, the fourth at 6910 yards, the mean of divergence from the true line being only 9 yards. The elevation was thus increased to 35°, and the charge to 8 oz. It will be imagined that the shot at such elevation would imbed itself, but in most cases they burrowed through the sand, and bounded up and away a considerable distance. The first graze of the first shot was at 8970 yards; of the second, at 8930 yards; of the third at 9059 yards; and of the fourth, at 9164 yards. All these shots would have pitched into a space 22 yards broad and 234 yards long, and one could readily believe that Mr. Whitworth could make good his boast of lodging nine shots out of ten into a space 100 yards square, at the distance of 5000 yards. The range at low elevations gives no data from which to expect such prodigious results; but it is to be remarked that the effect of the heavier ordnance is by no means proportionate to that of the 3-pounders, and that there are evidently some secrets in the form of the shot and such matters in the larger calibres to be yet discovered by Mr. Whitworth's patience and exhaustive investigations.

The 68 (or 80) pounder at 5° with a charge of 12lbs. of powder was fired twice: the first shot, which weighed 90lbs., was thrown 2611 yards ere it grazed the strand, or rather scooped out of it a mass of sand and water, after which it ricochetted very directly at least 1800 yards further in successive bounds. The second and last shot struck the breach at 2539 yards, and only 4½ yards to the right of the true line of fire.

Let us just add that an ordinary excellent 65 cwt. gun only throws its shot with a charge of 10lbs. of powder, 2760 yards at 10°; that a 98 cwt. gun with 16lbs., at 8° can only project a shot 2557 yards. A 9-feet 18-pounder, however, at 40°, and a charge of 6lbs. has been found to range 4200 yards; and the sea-service mortars 13 inch with 25lbs. of powder at 45° throws a bomb 4850 yards.

These are results which it will demand careful study and inquiry to appreciate. A more interesting problem for artillery officers and scientific soldiers cannot be well presented to them. On Wednesday very few persons were present; but on the following day Sir John Burgoyne, the Hon. Capt. Wrottesley, R.E., and several officers were on the spot, and we have received the subjoined statement of the results at the moment of going to press:—

Southport, Feb. 15.

	No. of Experiments.	Angle of Elevation.	Range in yards.	Deviation in yards.
3-pdr. gun.	1	10°	4171	6 to the left.
	2	,,	4179	4 ,,
	3	,,	4224	5 ,,
	4	,,	4122	2 ,,
	5	20°	6760	5 ,,
	6	,,	6784	12 ,,
	7	,,	6720	14½ ,,
	8	,,	6910	2 ,,
	9	35°	8907	22 to the right
	10	,,	8930	10 to the left.
	11	,,	9059	11 to the right
	12	,,	9164	23½ ,,
68-pdr. gun	1	5°	2611	on the line.
	2	,,	2539	4½ to the right.

These results were far surpassed on the following day, February 17, as the table shows:

35°	9688	34 yds.	to the right
,,	9645	31	,,
,,	9611	89	,,
,,	9547	57	,,
,,	9503	72	,,
,,	9463	58	,,

In next week's GAZETTE we propose to make some remarks on the advantages and defects—for there are defects—in the extraordinary artillery which the skill, ability, and zeal of Mr. Whitworth have placed at the service of the country. It is not our intention to draw any minute comparisons, but to state in a broad, general way the uses of these various arms. There are, we believe, some howitzers in the Government stores which Mr. Whitworth rifled in 1850, that have never been used, because two burst under trial. One can send a bolt through thirty feet of water, and then penetrate many feet of timber. The maker is confident he could drive his bolts from them through the steel coat of either the Warrior or La Gloire. The experiment is assuredly deserving of trial, particularly as one celebrated gun has failed to penetrate the iron plates.

Under the newly-recognised rule, as regards the period of service on the Staff, a large number of vacancies will take place on the 1st of April next. Various rumours are afloat as to the successors of those who are about to resign, but the arrangements are not yet in a condition to allow of our giving any authentic information respecting them. Lord Seaton has returned to Ireland to wind up the affairs of his office, and will leave on the 1st of April; but his successor is not yet selected. The Adjutant-General Sir George Wetherall's period of service expired in December, but he will remain at the Horse Guards for some time longer; at least until some measures of military administration are settled, respecting which the want of his assistance would form a serious difficulty.

The command of the Dublin district will become vacant on the 1st of April by the promotion of Major-General Gascoigne to be Lieutenant-General.

The increase to the Royal Artillery will be made in the shape of two brigades, to be numbered the 15th and 16th respectively. The 15th Brigade will consist of 56 officers, 112 non-commissioned officers, trumpeters, drummers, and 1608 rank and file. The 16th Brigade will number 53 officers, 80 non-commissioned officers, &c., and 864 rank and filk. The promotions consequent on this augmentation will, in all probability, promote the Lieut.-Colonels, down to Colonel Kennedy, to be Colonels; the Captains, down to Brevet-Major Longden, to be Lieut.-Colonels; the Second Captains, down to Brevet-Major Penn, to be First Captains; and the Lieutenants, down to Lieut. Philip H. Sandilands, to be Second Captains.

An Assistant-Inspector of Volunteers will be stationed at each of the following places, viz., York, Birmingham, Canterbury, Plymouth, Winchester, and Edinburgh.

By the lamented death of General Sir William Napier, Lieut.-General Sir James Ferguson, Colonel of the 43rd Regiment, another of the gallant band forming the old Light Division, becomes a General; Major-General Gascoigne, Colonel of the 69th Regiment, a Lieut.-General; Colonel the Hon. A. Spencer, a Major-General; Lieut.-Colonel C. E. Michell, 54th Regiment, a Colonel; and Major Bruce, Staff-Officer of Pensioners, a Lieut.-Colonel in the Army.

The following regiments are to be increased by 100 men each, and fixed at a strength per regiment of 46 officers, 81 non-commissioned officers, and 1050 rank and file, making a total of all ranks of 1177, viz.—9th, 1st batt.; 10th, 1st batt.; 11th, 1st batt.; 11th, 2nd batt.; 12th, 2nd batt.; 14th, 2nd batt.; 15th, 1st batt.; 16th, 1st batt.; 16th, 2nd batt.; 17th, 2nd batt.; 18th, 2nd batt.; 19th, 2nd batt.; 20th, 2nd batt.; 21st, 2nd batt.; 22nd, 1st batt.; 24th, 2nd batt.; 25th, 2nd batt.; 26th, 29th, 30th, 32nd Light Infantry, 36th, 45th, 47th, 55th, 58th, 60th Rifles, 4th batt.; 76th, 78th, 84th, 86th, 96th, and Rifle Brigade, 1st batt. The other battalions not serving in India remain at 950 rank and file, with the same number of officers, with the exception of the 65th regiment, which numbers 1400 rank and file.

The following appointments have been made at the Coast-guard Office—Inspecting-Commanders: Commanders John Whyte to Chester, vice Grylls, deceased; Edward F. Dent, Kilrush Division, vice Wale, removed. Chief Officer: Lieutenant G. P. Heath to command Swanage Station, vice Osmer. Removal—Inspecting-Commander: Commander Geo. H. Wale from Kilrush to Galway, vice Clarke, period of service expired.

It is reported from India that all the local levies will be abolished.

The separate command of the 3rd Regiment of Hodson's Horse has ceased, and Lieut.-Colonel Hughes has gone back to his splendid regiment, the First Punjaub Cavalry.

THE DRILL OF MOUNTED RIFLE VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I have read with great interest the valuable suggestions of Colonel Conolly regarding the drill of Mounted Rifle Volunteers, which have appeared in your excellent paper. It is, however, evident that the gallant colonel is not aware of the progress which has been made in the organisation of corps of this description.

For several months past Mr. Acland, of Spudoncote, near Exeter, has been engaged in the organisation of a corps of Mounted Rifle Volunteers, and has induced other gentlemen in that part of the country to follow his example.

After a variety of practical experiments with a number of mounted yeomen, he has drawn up and caused to be printed, his suggestions on the subject of drill, applicable to rural Volunteers; these suggestions have been carefully examined by officers of the regular cavalry and infantry, and have been digested into a system of drill, which is now in print; the plates are being prepared, and the work will shortly be ready for publication by authority.

The principles adopted are in all main points similar to those recommended by Colonel Conolly but the details are somewhat different.

The Corps are not to be considered as "cavalry to be occasionally dismounted, but as infantry mounted, in order to move quickly." When mounted, the Volunteers will be formed in single rank, but when dismounted, instead of acting singly as recommended by Colonel Conolly, they will be formed in two ranks according to our infantry system. It is considered that two men skirmishing together, and mutually supporting each other, will work with more confidence than if they are separated. The Volunteers are, therefore, told off in double pairs, corresponding to the right and left files in the infantry formations; either pair may be dismounted while the other pair remains with the horses.

The divisions proposed by Colonel Conolly are extremely simple, but there are counties in England,—Devonshire with its narrow lanes for instance,—where they could not be used in flank movements. The drill adopted should be applicable to every description of country in which the Volunteers may be called upon to serve; for this reason, in the drill proposed by Mr. Acland, more attention has been paid to flank movements, twos and fours (the pairs and double pairs before alluded to) than to flank movements by divisions.

The real advantage of the so-called abolition of inversion is a question on which military authorities differ materially. The fact is that, in order to get rid of the name "inversion," a system is proposed, which consists of a series of actual inversions without the name. To make the system complete, the principle must be applied equally to *all* the fractional parts of a company, that is to say, in whatever formation a company may be taking ground to a flank, whether by divisions, sections, fours, twos, or single files, line should be formed to either hand in precisely the same manner without any regard to the original arrangement or relative positions of the men; consequently, a man in the course of the day may occupy successively every place in the company, from right to left, without departing from what is called in this system the "natural order." Now, if Squire Topboots commences the day on the right of his company, is then whisked round into the centre next to Bob Jones, then turns up four from the left by Tom Davis, and is finally torn from this bosom friend and left file farmer Blunt; you may tell him it is all right and in the "natural order," but it strikes me he will be infinitely more puzzled than if he had been taught two or three simple and invariable movements, which would enable him to form line in any direction without losing his favourite position on the right of his company, or being deprived of the society of his friend, farmer Blunt, who, of course, would be delighted to shed his last drop of blood by his side.

I confess I have tried hard to work out the details of a "non-inverting" system, and having lost myself in a maze of *intricate simplicities*, I have come to the conviction that *simple complication* is, if anything, less puzzling than *complicated simplicity*.

There are a few minor points which must be decided by further experiment and experience, such as the best method of carrying the rifle on horseback. The spur, too, causes a little difficulty. All Cavalry men say that mounted Volunteers *must* wear spurs; the great authorities at Hythe say a man *must* sit down on his heel when kneeling to fire, which, under the prickly circumstances, would, to say the least of it, be extremely uncomfortable. I have no doubt, however, that these slight difficulties will be overcome.

I am, sir, your obedient humble servant,

Feb. 16. D. LYSONS.

The *Mechanics' Magazine* states that the Government has adopted Captain Blakesly's method of construction for all large cannon. The saving of expense to the country will be enormous, the 70-pounders now in course of manufacture costing absolutely less than the Armstrong 12-pounders.

We (*Times*) are informed that Lord Elgin will undertake a second mission as Plenipotentiary to China, in the hope of being able, by the influence obtained in his former visit, to secure the ratification of the treaty of Tientsin, and obtain an entire cessation of hostilities.

RECORDS OF THE 52ND REGIMENT.*

If we pore with avidity over the glowing pages which tell of the deeds of some mythical Paladin of romance; if we love to read —as who does not?—the stirring lives of heroes of old; with what feelings must we regard the narrative of the performances of a regiment, characterised by our great military historian as "never surpassed in arms since arms were first borne by man," and so inseparably associated with the most glorious military achievements of our country, that we can hardly recount the one without rendering the meet homage of admiration and gratitude to the other?

Nor will the reader who, in such a spirit, undertakes the perusal of the book now lying before us be disappointed; while (to quote the words of the Preface) "the Army at large may derive from the perusal of this work the conviction that a system founded on intelligent appreciation of the several positions and the relative duties of the officers and men, and carried out with strict regard to the comfort of every individual concerned, is that alone which can raise the character of the British Army."

At the request of his brother officers,—a request conveyed to him "by the lips of a loved and much-honoured son, who fell while still mustered on the regimental rolls," and under the direction of a committee,—Captain Moorsom devoted himself to the task (which he has ably accomplished) of compiling the records of a regiment of which he himself had been no unworthy member; and it is with more than ordinary interest that we follow him in his narrative to the old but never-to-be-forgotten battle-grounds, and hear them ringing again to the tread of the men who made those fields glorious, though the smoke and thunder of war have long since rolled away from them, and the smiling corn is now dancing in golden waves over the heroes' quiet tombs.

Raised in 1755, the 52nd—then called the 54th—and commanded by Colonel Hepworth Lambton, passed several years peacefully enough, and it was not until 1775, at a little village called Lexington, a few miles from Boston, that they received their *baptême de feu*. From this day until the close of the late rebellion in India, except during the forty years' peace which succeeded the Peninsular War, their swords were scarcely sheathed; and stirring indeed is the account which Captain Moorsom gives of the achievements of the regiment throughout the many and arduous campaigns in which it took part;—In the American war; against Tippoo Sahib; through the Peninsula; at Waterloo; and latterly at the siege of Delhi, and in other affairs in India, the 52nd Regiment bore a part which fairly entitles it to publish its deeds to the world: but it is in the Peninsula especially that its services are most worthy of remark. In all the long accounts of glorious victories and hard-fought sieges in which the regiment was engaged, there is no incident more touching than the death of its old Colonel, Sir John Moore, under the walls of Corunna; while the fact of the narrative being given in the eloquent words of another officer of whom the 52nd have good reason to be proud—Sir William Napier†—enhances considerably the interest with which we peruse it.

But the death of Sir John Moore carries us back insensibly to a time which, in these days of preparations and volunteers, it is instructive to refer to,—a time when invasion was considered imminent, and when, amongst other brigades formed for the defence of our coast, perhaps the best disciplined and most effective was that assembled at Shorncliffe, under the command of Sir John Moore; and it would be well if every commanding officer would read the account given in this book of the measures taken by the gallant old soldier upon this occasion. The following paragraphs bearing upon the subject are, we consider, worthy of peculiar attention: Major-General Moore "permitted each commanding officer to fix upon the most convenient hours for drill, but required to be informed at what time the different corps were to be on parade, and he seldom failed to attend, by which means he became acquainted with the systems of the different regiments, and corrected any errors that existed. . . . . Notwithstanding the unremitting attention that was paid to drill, every pains was taken to have the brigade in the most efficient state to march against the enemy in the event of an invasion. The heavy baggage was put into store at Gravesend, and the officers were only permitted to retain in camp a small portmanteau each and their beds. One bât-horse per company was provided for the transport of officers' baggage, and tents were to be carried with the brigade in the proportion of one to thirty men. . . . . From the systematic arrangements which were adopted, the brigade was expected to be formed in column (with baggage packed, tents struck), and the whole ready to move off in one hour after receiving the preparatory order for march. . . . . Arrangements were made to enable the battalion to assemble at the shortest notice, either by day or night; and in order to accustom the soldiers to carry their knapsacks, the regiments marched a few miles into the country twice a week." (Pp. 63, 65, 66.) Now that we have our Himalayas and other noble steam transports, with their Sybarite saloons and luxurious fittings, it is amusing enough to read the account given by an officer of the 52nd, of a transport and its accommodation in 1803:—"The vessel I embarked in was called the Three Brothers, an old merchantman of about 200 tons. Captains James Reynett and Joseph Dobbs's companies, 200 strong, with seven officers, were the occupants of this vessel. The cabin had two berths on each side, one over the other, and these were, of course, chosen by the four senior officers, while the three juniors slept in cots swung to the beam only a few inches apart." (P. 81.) Captain Dobbs and his companions in misfortune remained on board this vessel *four months*, and we have further the satisfaction of learning that she foundered shortly afterwards in another voyage.

It would be impossible within our limits to attempt even to enumerate the different actions in which the 52nd were engaged, and which this volume describes; but for those who take an interest in the military achievements of the British Army, there is here a thrilling narrative of some of the most glorious passages of arms in our history; while the judicious manner in which Captain Moorsom has—to use his own words—"usually added a more peculiar account than the severe style of the Record contained," enables us to individualise ourselves with the regiment in all its movements, to follow it in imagination up the rugged breaches of Badajoz and St. Sebastian; to pass with it the weary nights on outlying picquet in the dark passes of the Pyrenees; nights weary, however, no longer, from the pleasing anecdote with which Captain Moorsom has enlivened them; and to stand with the devoted square on that "battle of giants"—Waterloo.

Not the least interesting or useful portion of the book is that which relates to the part taken by the regiment in the late war in India, where it was one of those which helped to wrest Delhi from the mutineers; and two men from its ranks, Bugler Hawthorn and Lance-Corporal Smith, accompanied Home and Salkeld on their desperate duty of blowing in the Cashmere Gate, receiving each the reward of a Victoria Cross for their gallantry.

Elsewhere in this terrible campaign the 52nd made itself honourably conspicuous. In the long list of names published in the "Appendix," of those who have contributed to the distinction of the 52nd Regiment, that of the son of the gallant author is one which will not be least honoured, or least affectionately regarded by those who are acquainted with the services he rendered in India, and at Lucknow more especially, near the Iron Bridge in which town he fell, on the 11th March, 1858, deplored by all who knew him as an able, gallant soldier, and mentioned by Sir James Outram, on whose staff he served, as "a most gallant and promising young officer, whose soldierlike zeal and acquirements rendered him an ornament to his profession."

It may, perhaps, be supposed that a work of this description, purporting only to give a record of the services of a particular regiment would be interesting only to those who are in some way connected with that regiment. We hope, however, that we have said enough to show it is not so, and that this book contains within it germs of universal popularity; and its value is heightened, and the proper comprehension of the incidents which it relates materially assisted by the peculiarly excellent plans and drawings with which it is embellished.

We will conclude this notice with a couple of anecdotes, selected from the many which the book contains; those which we have chosen refer to incidents during the Peninsular war, and go to prove what seems occasionally to have been somewhat forgotten or disregarded of late years—in the late war in India more particularly—that even during the most bloody strifes, war may be carried on after a humane and civilised fashion. It was the night after the battle of Fuentes d'Onor, and the armies occupied the opposite banks of a small stream. "'I am glad to see you here,' said the French field officer, on placing his pickets along the right bank, to a captain of the 52nd across the stream; 'we shall now understand each other. When you want water and our soldiers challenge, call out 'agua,' and you shall have it. Will you give your boys (*à vos enfants*) similar orders?' Of course this was done." (P. 144.)

The second anecdote relates to the same occasion: "Soon after dusk a French sergeant, a fine, handsome soldier, was brought in prisoner to the captain (J. F. Love) of the 52nd picket. The report made was that he had come over the line of sentries to take leave of a Spanish girl in the village, and was captured in the act. '*Eh, bien! capitaine!*' said the sergeant to Captain Love, '*c'est l'amour qui m'a fait votre prisonnier.*' '*Eh! bien donc!*' was the reply; '*pour cette fois-ci nous ne serons pas trop exigéants; retournez chez votre capitaine, et dites-lui qui si l'amour vous a joué un mauvais tour l'amour vous a dédommagé. Je m'appelle Love; vous ne l'oublierez pas de sitôt.*'" (P. 144.)

A correspondent of a country paper, in advocating very forcibly the merits of breech-loaders, states that no less than 800 stand of Enfields, belonging to the 86th Regiment, recently returned from India, were a short time since condemned, and the regiment had to be supplied with the pattern of 1856.

---

* *Historical Records of the 52nd Regiment (Oxfordshire Light Infantry), from the year 1755 to the year 1858.* Compiled under the direction of the Committee, and edited by W. S. Moorsom, M.I.C.E., late Captain 52nd Light Infantry, and D.Q.M.G. (London: 1860.)

† Just taken from us—struck off the strength of the Grand Army whose glorious deeds he gloriously commemorated.—[ED.]

THE QUEEN'S RECEPTION OF THE VOLUNTEERS.

The following are the official regulations respecting Her Majesty's reception of the officers of Volunteer corps on the 7th of March:—

The officers of Volunteer corps who are desirous of attending the Queen's Court, at St. James's Palace, on Wednesday the 7th of March next, should forthwith communicate their intention to the Lords-Lieutenant of the several counties in which their corps have been established.

A list of the officers who have thus signified their wish to be present will be transmitted by the Lord-Lieutenant of each county to the Secretary of State for the War Department.

These lists, which will distinguish the rank of each officer and the corps or company to which he belongs, will be forwarded to the Lord Chamberlain from the War Department, at latest, upon Monday the 5th of March.

The Lords-Lieutenant and the military authorities summoned to attend the Court, will enter the Palace at the entrée-entrance in the Ambassadors' Court, and will pass at once to the entrée-room.

The officers of Volunteers will enter the Palace at the usual corridor entrance, opposite Marlborough House, and will be shown at once to the room appointed for the assembling of their corps, where they will form into companies in the order in which they are to pass the Queen. In order to facilitate this arrangement, each officer will be furnished with a card on which is distinctly written his county, the number of his county in the Army List, and the name and number of his corps, company, or sub-division. Artillery should be specially marked on the cards of officers of Artillery Volunteer Corps.

The doors of the Palace will be opened at half-past twelve o'clock, and no officer can be admitted after a quarter before two o'clock.

Officers will appear in the uniforms approved for their corps by the Lords-Lieutenant.

They will pass before the Queen by regiments, companies, or sub-divisions, headed by the senior officer present.

The officers of each corps will be introduced by the Lords-Lieutenant of their counties, who will join them before entering the Throne Room. In the absence of the Lords-Lieutenant they will be introduced by the Under Secretary of State for the War Department. The officers will draw up in line before the Queen, and the senior officer of each corps or company present will hand a card containing the names of those about to pass before Her Majesty to the Lord-Lieutenant. This card will be passed to the Lord Chamberlain, who will read the names to the Queen. The officers will then pass on.

The various corps will take precedence according to their seniority in the Army List.

THE NAVY ESTIMATES.

We gave the principal heads of these Estimates in our last journal, and on Monday they were laid before the House of Commons by Lord Clarence Paget in a speech which has elicited marked praise from all quarters. Lord Clarence Paget observed that it was absolutely necessary that a country like this, with such extended territories and an immense commerce, should maintain a considerable number of ships, and that, supposing every other country should disarm, we should still be under the necessity of keeping up a large navy. He should confine his remarks, he said, to the present year, and to professional subjects, avoiding all questions of national policy. The Navy was now a new creation,—all nations had started fair, and it behoved us, therefore, to make efforts to restore our superiority. In order to give the House an idea of the navies which other nations possessed, he read a list of the French Navy, which had 34 ships of the line afloat and five building, 34 frigates afloat and 13 building, 5 iron-cased ships building, 17 corvettes afloat and 3 building, besides gunboats and small vessels, making in all 244 steam-ships; and most of those building might be launched in a few months. Russia had 9 steam-ships of the line afloat and 9 building, 18 steam-frigates afloat and 3 building, 10 steam-corvettes afloat and 11 building, and a number of smaller vessels, making 187 steam-ships afloat and 48 building—a total of 235 vessels. Unlike ourselves, both France and Russia could call out men to man their navies in a few weeks. He then stated the number of steam-vessels we had in commission on the 1st of December last (excluding sailing-vessels) at 244, of which number the force at home and in the Mediterranean consisted of 27 line-of-battle ships, 14 frigates and corvettes, and 29 sloops and gun-boats, in addition to block-ships, the number afloat and building, and the number he expected would be launched before the end of the year, including ten line-of-battle ships and 12 frigates. Lord Clarence then went through the several estimates, explaining them very fully, and commenting upon each. On the 10th vote he accounted for the programme of last year of the ships to be built falling short, and stated that it was proposed to build 39,934 tons during the ensuing financial year, besides converting four line-of-battle ships and four frigates. He claimed credit for effecting a real reduction in the vote for naval stores, &c., in the yards, without prejudice to the public service. In conclusion, he said it was with extreme pain he was instrumental in asking for such large sums of money, but it was the wish of the nation that our Navy should be maintained in sufficient force; and he referred to the suggestion of Mr. Cobden, that where the French had two ships we should have three. The Government felt bound, therefore, to continue their exertions to put our Navy on a sound footing. At the same time, although these large Estimates were asked for, they did not think themselves under an obligation, if the state of Europe and the world should justify a reduction of our naval force, although the House of Commons granted the money, to expend it. He moved the first vote of 85,500 men and boys in the fleet and coast-guard service, including 18,000 marines. Sir J. Pakington expressed his satisfaction at the statement of Lord Clarence, and, after some discussion, the vote was agreed to, as well as a vote of 3,476,757*l.* for wages of seamen and marines, and another of 1,458,087*l.* for victuals for the same.

THE EFFECT OF THE PURCHASE SYSTEM ON MEN WHO CANNOT PURCHASE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The following calculations may be of service to those who are about to take a part in the approaching debate on the abolition of the Purchase System. They have been made with great care:

There were on the 1st of Jan., 1856, 54 battalions of British troops, serving in India and in our colonies, whose promotion had not been effected in any way by the Crimean war, viz., 2nd, 5th, 6th, 8th, 10th, 11th, 12th, 15th, 16th, 22nd, 24th, 25th, 26th, 27th, 29th, 32nd, 35th, 36th, 37th, 40th, 43rd, 45th, 51st, 52nd, 53rd, 54th, 58th, 59th, 60th (3 battalions), 61st, 64th, 65th, 66th, 67th, 69th, 70th, 73rd, 74th, 75th, 76th, 78th, 80th, 81st, 83rd, 84th, 85th, 86th, 87th, 94th, 96th, 98th, 99th.

These battalions contained 179 field-officers and 612 captains. Out of these numbers but 7 field-officers and 85 captains had attained their respective ranks without purchase. No lieutenant-colonel actually in command of any one of these 54 battalions had attained that rank without the assistance of money.

The 85 captains who had obtained their companies without purchase averaged 13¼ years' service as subalterns. On the 1st Jan., 1856, these 85 officers averaged 19 years' service each. The senior captain had served 39 years, the junior, 9. The proportion of field-officers to captains was, amongst the men without money, 1 to 12; amongst the moneyed men, 1 to 3.

Of these 85 non-purchasing captains of the line, 15 had served between 30 and 40 years; 14 between 20 and 30 years.

These gentlemen were supposed to have had their promotion considerably accelerated by the operation of the Purchase System, which is said by its advocates to push forward the poor as well as the rich to high commands. Returns, however, prove that it rarely pushes the former forward beyond the rank of captain—never beyond that of major or brevet-lieutenant-colonel.

At that same date the Marine corps, in which purchase is unknown, offered the following more favourable statistics. There were in it 9 colonels-commandant, 18 lieut.-colonels, and 126 captains, showing a proportion of 1 field-officer to 4½ captains. The lieut.-colonels of Marines averaged 30 years' service each. The senior lieut.-colonel had served 34 years, the junior, 28.

The captains averaged, on attaining their rank, 12¾ years' service as subalterns. On the 1st of January, 1856, they averaged 18 years' service each. The senior captain had served 28 years, the junior 12.

It will be seen, therefore, if these calculations are accurate, that the captains of Marines, a non-purchasing corps, attain their rank considerably earlier than captains of the Line, who have not the means of purchasing. The officers of the Marines enter the service at 16 years of age, whilst the non-purchasing officers of the Line seldom get their first commissions under 25 or 30 years of age. It is impossible to reconcile these facts and figures with the theory that the purchase system is an advantage to the man who cannot, as well as to the man who can, purchase. The Marines had not in 1856 been augmented in consequence of the war, nor indeed for the preceding 20 years; nor had the casualties amongst them exceeded the casualties which usually occur in troops of the Line serving in India and in our colonies. The comparison, therefore, is a perfectly fair one.

The failure of the purchase system in providing the 54 battalions I have named with commanding officers in the vigour of life is notable. One lieut.-colonel had served 51 years; 7 had served between 40 and 50 years; 25, between 30 and 40. They averaged, *with purchase*, upwards of 31 years' service each. The lieut.-colonels of Marines, *without purchase*, did not average so much by one year, and none of them had served more than 34 years. In the Marines at that date there was no captain above 44 years of age, or lieutenant above 28. In the Line there were captains of 50 and 60 years of age.

It is the fashion to say—competent and reliable witnesses have constantly said it—that in the French army the regimental officers are much older than in our service. But such assertions ought only to be attended to when made on accurate calculation. Any man interested in the subject, may ascertain in a week what the exact age of the French regimental officers is, or was, at any particular date, for the statistics of the French army are easily accessible to every one. And if he will not take the trouble to do this, it is idle to listen to him whilst he tells tales of ludicrously fat French majors and grizzly French lieutenants. The French regimental officers have certainly not shown themselves incapacitated by age to do their duty.—Your obedient servant, H.

THE PURCHASE SYSTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your correspondent, Lieut.-General Briggs, is in error in supposing that it is still required of officers purchasing and selling promotion to declare that the regulation price of such promotion only has been paid.

For reasons best known to themselves, the military authorities have for some time discontinued this test, which used to run as follows:—"I do declare and certify, upon the word and honour of a gentleman, that I have not demanded or accepted, neither will I demand or accept—directly or indirectly—at any time or in any manner whatever, more than the sum of ———, being the price limited and fixed by Her Majesty's regulations as the full value of the said commission."

If this declaration was effectual in preventing the payment of sums above regulation, it is difficult to conceive why it was abolished. If the military authorities found it ineffectual, and became aware that large sums above regulation were paid in spite of it, it is more difficult still to imagine how they can plead ignorance of the existence of the very abuse which caused them to withdraw it.

Bath, Feb. 12. L. S. D.

VOLUNTEER EFFICIENCY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As you warmly and powerfully advocate the Volunteer movement, may I beg you will have the goodness to give insertion to the enclosed copy of a letter, written by Sir Harry Smith, which appeared in the *Glasgow Gazette* of the 11th inst., as it will show our patriotic Volunteers that one of our most distinguished and experienced generals, who has been more under fire in Europe, America, Asia, and Africa, than any other officer, considers they may soon be rendered an invaluable auxiliary force to our glorious army in successfully defending their country against all the nations of the earth combined against us.—I am, sir, your obedient servant, D. MACDOUGALL.

112, Eaton Square, Feb. 14.

FROM LIEUT.-GENERAL SIR HARRY SMITH, BART., THE HERO OF ALIWAL, &c., &c.

London, Feb. 7.

My Dear Old Comrade, Mr. Mackenzie,—I am ever delighted with anything which in any way identifies me with dear old Glasgow, where some of the happiest years of my life were spent amongst the most hospitable and warmest hearted people of Britain, from 1819 to 1825.

Remember the Glasgow Sharpshooters! They were raised much under my military auspices and advice. Drilled by the sergeants of the Rifle Brigade, in one month they were *soldiers*, adapted for any home service whatever—could *march*, *shoot*, and be *silent*.

An anecdote I will give you, known probably to no man living but myself. You will remember there was always a great spirit of emulation between the Volunteers and Yeomanry of Edinburgh and Glasgow. The Lord President of that day, Hope, was a staunch supporter of the Edinburgh. He was in Glasgow with his *Tail*, and I had the honour to dine with him, sitting on his right hand. After dinner he said—"I am very anxious to see the Glasgow Sharpshooters." "When you wish, my lord, I can readily have them turned out; will *to-morrow* at 10 o'clock suit your Lordship?" He replied—"I fear the thing is *impracticable*." "O," I said, "never mind that, my Lord; will the hour suit you?" "If possible, *yes*." I jumped up; got a scrap of paper from a waiter, and wrote thus: "Dear Hunter,—The Lord President wishes to see your corps to-morrow at 10 o'clock on the Calton Green." Shortly, I received this laconic reply: "*We will be there*.—Yours, S. Hunter."

I accompanied his Lordship and his *Tail*. There the Glasgow Sharpshooters were like veterans. After the field-day, which was a brilliant one, the Lord President walked up to old Colonel Sam Hunter; the regiment, at the time, presented arms, steady as rocks. His Lordship said—"Pray, Colonel Hunter, let the corps shoulder, order, and stand-at-ease." The Lord President then addressed a most laudatory speech to the Colonel, the officers, and men, towards the conclusion of which the men had all taken off their caps, and were mopping their heads with large bandana silk handkerchiefs; at the conclusion, the Colonel said—"I'm much obliged to your Lordship for your encomium. I hope we merit it. There's this, I'll venture to assert myself, there's nae battalion in his Majesty's service has more *silk wipes*." In returning with his Lordship he asked me how it was possible the battalion could turn out as they did—they must have been previously held in readiness? I assured his Lordship on the honour of a soldier, that there was no collusion with me and Colonel Hunter. "Then, Sir, how was it effected?" "My Lord," I said, "nothing is so simple. The companies are each formed from the inhabitants of adjacent streets from right to left, so that in ten minutes each company could be warned, and of course their assembly was most rapid." Now, as I possess the freedom of the city of Glasgow, I hope "Let Glasgow Flourish" may be exemplified in the present generation as in the past. My war-cry for England has ever been, *arm the people!* A reference to the history of all nations demonstrates the mighty power of *the loyal and gallant population of a country*. I speak from practical observation. The inhabitants of Monte Video, Buenos Ayres, in 1806-7—the Spanish guerillas during the war in the Peninsula—the armed people at New Orleans—three wars with the indomitable Kaffirs—and look at this moment at the Moors against the Spaniards. I quote all this to show the power of armed people; but let me not be misunderstood. Some of my gallant and experienced comrades who write upon the subject of the defence of England take as extreme and one-sided a view as some of our leading journals do on the other—the one declaring the inutility of Volunteers, the other that they are omnipotent. I ask either of these extremities—If you saw a large French army in battle array, which must occupy a large tract of country, with artillery, cavalry, and *their* sharpshooters, how do you propose to check their advance? I cannot conjecture the reply of either. But this I will assert and maintain, with my last breath—It is alone to be done by a combination of regular troops, as a barrier and a reserve, with swarms of riflemen everywhere as powerful—most powerful—auxiliaries. We must bear in mind that the distance from our coast to London is barely three days' march, hence the object of the enemy is to advance by a *coup de main*, to seize London. Could I say loose troops would stop them? No. But a combination would insure their defeat, and then let loose the sons of Britain, with this command—*Forward* and shoot; you shall all be supported at the requisite points. Should any enemy have the audacity to attempt our shores, could he avoid our ever invincible Navy, I as a General of some experience in war, would be proud to command a combined force as I have described, and "Let deeds show."

It has been to me a subject of melancholy to see a succession of dastardly parties assail our nation as they have done, interrupting our trade everywhere, agitating all classes, when the present movement of Volunteers, if previously resorted to, to arm the people, would have restored the confidence again established, and which ought never to be interrupted. England ought to be in a position always to treat with contempt the hostile demonstrations of her neighbours, whether made in reality, or by way of interrupting our tranquillity, our commerce, or with the invidious supposition that they can or could affect the honour of the nation. Depend upon it, my old, dear Rifle comrade, that so long as England is faithful to our glorious Queen, and to itself, she will stand as now, paramount among nations, and this generation will hand down to their successors, as our veterans have done to our predecessors, our country free and unshackled—ever ready to be friends, or ever ready to fight for our homes, *if the glove be cast at our feet*.

One word more. *Teaze* not our youths as Volunteers with the minutiæ of drill—a few things are alone necessary. To march in quick time, to march in column, form line, gain ground to the right and left, to advance again in line, to extend and occupy bridges or walls; a rallying square may be practised. Soldiers require these alone in the field. Then, to be *good shots*. Pluck enough they have, and, with prompt obedience, England's regular army so nobly supported, and its numbers so increased, can, may, and *will* defy the ——.

Let our watchword be, "Arm the People."

Ever faithfully yours, H. G. SMITH.

To Peter Mackenzie, Esq., *Gazette* Office, Glasgow.

THE VOLUNTEER UNIFORM.

The following circular has been issued:—

"War Office, 1860.

"SIR,—I am directed by Mr. Secretary Herbert to forward to you the enclosed specification of the uniform recommended for Artillery and Rifle Volunteers by the committee recently assembled at this office to consider the question.

"I am to add that pattern suits are deposited for general inspection in the waiting-room at this office, and that coloured drawings of them may be obtained from Mr. Ackermann, of Regent Street, London. I am, sir, your obedient servant,

"DE GREY AND RIPON."

SPECIFICATION FOR PATTERNS OF RIFLE VOLUNTEER CLOTHING.—(RECOMMENDED BY COMMITTEE.)

"TUNIC.—Brown and gray mixture, single-breasted, with fly one inch and three-quarters broad on the inside; collar of the same material, one inch and three-quarters high, rounded off in front; the sleeve to have an Austrian knot, the braid or cord to form a pointed cuff, three inches deep, the knot nine inches and three-quarters long and four inches in width, the edges trimmed with the same cord, to be of such colour as the corps may decide on; the skirt 10 and a-half inches deep for an officer or private, with a variation of half an inch longer or shorter for every inch in height; the back and skirt to be cut whole, and not to open; nine bronzed buttons in front, and two behind.

"TROUSERS.—Cut so as to be sewn into a band round the waist, large from hip to ankle and 17 inches round the bottom, trimmed with square cord down the side seam, of the same colour as that used on the tunic.

"CAP.—To be made of the same material as tunic, three and a quarter inches high in front, and four and-a-half inches at the back, with band of the same material round the head, the trimming to consist of two pieces of cord, same as on tunic, round top and bottom of band, and round edge of crown; small rosette on left side, of the same colour as braid; round peak, slightly drooping.

"BELTS.—Of dark brown leather, with pouch to contain 30 rounds of ammunition, and ball bag to slide on the waist belt, to contain 10 rounds of ammunition, caps, and oil bottle, bayonet frog on left side; on the large pouch a shoulder belt is fixed, so as to be perfectly level on the waist, passing under the right arm and over the left shoulder, fastening on the breast with a buckle.

"LEATHER GAITERS.—To be made of sheep skin, to match in colour with the pouch and belts; black enamelled facing at bottom, cut with a point behind, to form a continuation of boot; buttons of the same material.

"CLOAK.—To be made from the same material as tunic, cut two inches below the knee, forming a double-breasted coat, buttoning close to the neck, with stand or fall collar, having tabs buttoning over to protect the neck. A cape, 15 inches deep, fits on the shoulder, attached or detached at pleasure, and formed of double material; the inward part expanding, and when reversed forming a hood, to protect the head.

"ARTILLERY TUNIC.—Blue cloth, tweed, or serge. Single-breasted, with fly one inch and three-quarters broad on the inside, collar and cuffs of the same material, the collar one inch and three-quarters high, rounded off in front and corner of skirts also. The sleeves to have an Austrian knot, to form a cuff three inches deep at the point; the knots to be eight inches in depth, three inches and three-quarters in width, formed with black square cord and traced round with scarlet tracing braid; the collar edged with square cord and traced inside with scarlet braid; the tunic to be edged with scarlet cloth, one quarter of an inch in width; nine buttons in front and two behind the skirt, without opening behind; buttons of white metal, with raised pattern of gun in centre.

"TROUSERS.—Blue cloth, cut to fit a band round the waist, with side-pockets; large from hip to knee, small over the foot; edged down the side seam with black square cord and scarlet tracing braid, similar to collar and sleeve of the coat.

"GAITERS.—Made from black enamelled leather, 13 inches deep, six buttons down side, with strap and buckle on the top.

"CAP.—Of blue cloth, having scarlet cord round top and bottom, of oak-leaf band, and round inside of sunk crown; knot in centre of crown; black leather peak and chin strap.

"BELT.—Plain black leather, with frog for sword; snake-hook fastening.

"GREAT COAT.—Of blue cloth, similar in pattern to Rifle Volunteers."

VOLUNTEER REMINISCENCES.

The following interesting particulars of the old St. George's Volunteer Corps were related by Colonel the Honourable C. H. Lindsay:—The St. George Volunteer Regiment of Infantry was first embodied in 1794. The Lieut.-Colonel-Commandant was then Edward Foster, Esq., of Oxford Street. The Earl of Chesterfield was, however, soon afterwards appointed Colonel; Lord John Thynne, Lieut.-Colonel; R. Harrison, Esq., of South Audley Street, Major; F. A. Walter, Esq., Adjutant. There was provided for the use of the corps a parade ground and orderly room, with enclosed space for evening drill, quarters for the adjutant, a guard room, and magazine. The men were found with clothing, arms, and ammunition, and were paid for their attendance on field days, reviews, or ball practice, and also for guard mounting, which was taken in turn by the whole corps, about twenty on each night, with one commissioned officer. The corps consisted of ten companies, including grenadiers and light company. Each company, when complete, had sixty-four men and three officers, twenty drummers and fifers, and three armourers. The drummers had a weekly pay of 7*s.*, and the men received 2*s.* each for attendance on field days, &c., and 5*d.* for a pot of beer. Clothing, consisting of great coats, knapsacks haversacks, &c., &c., was allowed once in three years. About the year 1802 the regiment was disbanded, the parade given up, and the arms, &c., returned to the Tower. In the year 1805 they were re-embodied with the same staff-officers,—re-organised as the 1st English Volunteers, and were finally disbanded nearly fifty years ago. The parade which they had first was in North Audley Street, directly opposite to Green Street, where a church has since been erected; the second parade ground was in North Row, Park Lane, at the back of Norfolk Street. When they were first formed in 1794 their clothing consisted of blue long-tailed coats, double-breasted, with bright yellow facings, cocked hat for battalion company, white breeches, black gaiters up to the knee with white metal buttons, black velvet stocks, leather pigtails, red and white hackle feathers 12 inches long, and bright-barrelled firelocks. The grenadiers wore the bearskin caps with patch of red cloth behind, and white chain ornaments. The light infantry company had helmets of leather, something like those now worn by the London Fire Brigade, with a green feather attached; they were called the "Light Bobs," and the regiment, from their bright yellow facings, were called the "Canary Birds." When called out the second time they had an entire change of uniform—of scarlet jackets and deep-crown felt hats, with small tops; and being the first volunteer regiment raised in the country, they had on their buttons, "St. George, No. 1 Regiment," the figure 1 surmounted with a crown. The Government allowed 4000*l.* a-year for the support of the regiment. The officers wore blue pantaloons, Hessian boots with silk tassels. They were often reviewed by his Majesty George III. Bayswater was the place for ball-practice, at a tea-garden known as "Whale'r," near which was a conduit. The adjutant of the regiment met with an accident while in the execution of his duties, in consideration of which, and as a testimony to his professional abilities and integrity the regiment invested in consols, for the benefit of himself and heirs, 666*l.* 13*s.* 4*d.*, and at his death a stone was erected, also by the regiment, to commemorate his memory, in the burial-ground of St. George's, Bayswater Road. Most of the men who joined the volunteers at this period did so to protect them from serving in the militia, if drawn; but to be entitled to this privilege a volunteer was compelled to obtain from the adjutant a certificate to prove that he had attended drills and field-day at least twenty-six times during the year. The men on guard—when a fire broke out in the locality—used to turn out to assist at the fire, and the drums were beat to alarm the neighbourhood. It was customary on all thanksgiving and fast days for the members to assemble and march to the church of St. George's, Hanover Square, and whenever a member of the corps died he was invariably buried with military honours, at the expense of this the first regiment of English volunteers.

THE LONG GAME.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Finding by the Paris papers that the Emperor of the French has recently rewarded the French Captain Delvigne with a large pension, as the inventor of the elongated projectiles which constitute the great improvements in the rifle now adopted all over the globe, and that Captain Delvigne claimed these improvements so far back as 1840, you will perhaps allow me, through your columns, to submit in reply to this claim, that I laid before the British Government, many years previous to 1840, the improvements in question, and that they were not approved of by our Ordnance Committee until after they had been adopted by the French, as I can prove by official documents, as well as by the proceedings of a public meeting presided over by Colonel Sykes, M.P., at Willis's Rooms, the year before last, where the evidence of Lord Rosse was alluded to, as having witnessed various trials of these improvements at his seat in Ireland, in the year 1827.

How far this award to a foreigner for the invention of an old Peninsular campaigner is consistent with justice,* your readers must judge, as well as to the credit due to our Ordnance Committee for the rejection of such a valuable improvement in the art of war, when laid before them repeatedly by a British officer, and only recognising its value when it reaches them as a foreign importation after its adoption by the French army.

Quartermaster-General Sir Richard Airey is ready to state, if called upon, and, if necessary, to swear to it, that I fired my elongated rifle shot and shell, in their present perfect form, at Woolwich, in the summer of 1823. Captain Thomson, relative to Lord Raneiagh, can also testify to the fact.—I am, sir, yours, &c.,

JOHN NORTON,
Late Capt. 34th Regiment.

Rosherville, Feb. 4th.

* Surely Captain Norton cannot regard the conduct of the Emperor in rewarding one of his own officers for the invention of the conical ball as unjust. Captain Delvigne is a Frenchman. He probably has never heard of Captain Norton or his invention. In all likelihood the Emperor has never known of Captain Norton's claims to originality; and if our own Board of Ordnance did not appreciate these claims, it would be very hard to blame the Emperor of the French for similar indifference.—[ED.]

OUR VOLUNTEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It being admitted by every well-wisher of this truly patriotic force that their future efficiency, as a covering army in case of invasion, would be essentially enhanced by their being taught Light Infantry movements on a large scale, combined with Yeomanry Cavalry—might I suggest that when the Volunteer officers meet in London on the 6th prox.—prior to the Queen's special levee—they should arrange *inter se* the meeting of a delegates' committee to settle a time and place for a general muster near London, next July say, whereat one-third, or one-half of each corps might be present, to practise over many miles of broken ground light movements, under an officer of light drill repute—say Colonel Norcott of the Rifle Brigade.* With this view I would especially suggest the neighbourhood of Guildford as a fitting locale for such a rendezvous, for not only are there many lime quarries thereabouts, where they might practise rifle-shooting *safely;* but the fine undulating downs and heaths between Merrow and Albury, with their intermingled gorse covers and coppices, would afford to skirmishers, and supports, and picquets, the finest of fields for instruction; whilst the different railways converging Guildfordwards from all points of the compass would render it most convenient for all the various corps to assemble there; and, to crown this muster with *éclat*, let but Her Majesty be invited to review the Volunteers at the end of their ten days' training, and then I feel assured that such an *élan* will be given to this noble movement as will thenceforth stamp it with a glorious nationality that no time will efface. I am, sir, yours truly,

Feb. 11, 1860. EMERITUS.

IS RIFLE PRACTICE A "FARCE?"

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I am induced, from circumstances occurring under my notice, to ask the above question, and also whether some means should not be adopted for the suppression of an evil, already existing in the army, with regard to the use of a weapon the knowledge of the theory and practice of which is of the utmost importance to every soldier.

Before, however, relating the cause of my complaint, permit me to observe that, not only as an officer but as one holding the appointment of Assistant-Instructor of Musketry, I take, in all matters appertaining to the advancement of the soldier in the use of the rifle, a deep and absorbing interest; gladly would I behold the whole army attain the necessary proficiency to entitle them to rank as "marksmen;" and when, after much pains and trouble, I have the satisfaction of seeing a man (who at first was not only ignorant of its value as a weapon, but in a manner totally unacquainted with the manner in which it is used) become under my care at least a tolerably good shot, I take for its achievement no little credit to myself. But, sir, when a man is committed to my charge to undergo a course of training in rifle practice, who, at the "shortest" distance a soldier fires, can with difficulty distinguish the target, and who beyond that range has not even the least idea where the object to be fired at is placed; in a case of this kind, I cannot refrain from saying it is making a "farce" of the whole transaction. On a former occasion, having had under my instruction two men of this description, I reported the continuance of their practice as being not only dangerous, but perfectly useless; however, my report was not entertained, as I received orders that they should fire the usual number of rounds. In complying with this demand, I was obliged (however, unwillingly) to have recourse to the following simple but ludicrous expedient, viz., on each occasion when it came to the turn of these men to fire, I placed directly behind them the sergeant in charge of their station who (as the men themselves were unable) directed their rifles for them, in somewhat the following manner, "a little more to your right, a little more to your left, 'now,' fire."

I have a recruit at present at target practice, equally as blind. How he passed as medically fit, I cannot say, but there he is. Surely, to say nothing of the "absurdity" of such men as these undergoing a "course of instruction" with the rifle, it is at least a useless, nay, wilful waste of Government ammunition, without taking into consideration the dangers attendant thereon; and, as far as I can see, the only "advantage" to be gained thereby is that it affords no little merriment to the remainder of the men forming the station. Such, however, is the opinion of your obedient servant,

ASSISTANT-INSTRUCTOR.†

REWARDS FOR THE INDIAN CAMPAIGNS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I would beg to call your attention to the fact that men who were through all the fighting in Bengal are not to have one clasp for it—I mean the campaigns in Oude and the north, which were far more severe than that of Central India, for which a clasp is to be given. We get one for Lucknow, it being the grand place, but for the Rohilcund campaign, which you went through, and the Azimgurh field campaign, including the relief of that place, and for all the fearful fatigues that this force went through, nothing is the recompense, although it was distinctly stated there were to be clasps for Delhi, Lucknow, and all field service. We were with the flying column of Sir Hope Grant, and marched right through Oude, where there was both fighting and hard work, and neither this column nor that of Sir T. Franks now appears to be remembered. These two columns were doing the same work as Sir H. Rose's force at the same period. I am sure every one will be pleased by your taking this matter up. I remain, very faithfully yours,

Fort Pitt, Chatham. ONE WHO SERVED.

The clipper ship Donald M'Kay has been chartered by the government to convey about 1000 troops, with their wives and children, from Cork to the Mauritius, and to bring back soldiers to Portsmouth.

* This gallant officer left the brigade long since, and lately quitted the command of the depôt battalion at Winchester, exchanging to half-pay.—[ED.]

† Inability to distinguish objects at 150 yards is a serious defect in a soldier, but it would be imprudent to make the standard of sight too high for men otherwise qualified.—[ED.]

HER MAJESTY'S LEVEE.

(*From the Court Newsman.*)

Her Majesty the Queen held her first Levee this season at two o'clock on Wednesday afternoon, in St. James's Palace. The following naval and military officers were presented to Her Majesty:—Commander Armytage, R.N.; Colonel W. E. Baker; Lieutenant F. St. John Newdigate Barne; Major Paget Bayly, A.D.C.; Major-General George Bell; Surgeon-Major J. A. Bostock, M.D.; Lieutenant Chalmers, A.D.C.; Lord Colville; Lieut.-Colonel H. Hope Crealock; Earl de Grey and Ripon; Major Compton Dickins; Major W. S. Dickins, 20th Regiment; Captain Richard Ellison, A.D.C.; Captain J. F. Buller Elphinstone; Lieutenant F. E. H. Farquharson, 42nd Highlanders; Lieutenant E. Ward Fox; Major-General Foster; General Sir Robert Gardiner; Lieutenant H. Y. Gehle, Royal Engineers; Captain Gibbs; Captain T. E. Gordon; Major D. S. Greene; Lieutenant Basil Hall, R.N.; Lieutenant F. H. Harford, Scots Fusilier Guards; Major E. Harvey; Captain Henley; Captain R. Hodson, Royal Artillery; Lieut.-General Home, 56th Regiment; Colonel Hopkins, C.B., Royal Marines; Colonel Horsford; Cornet J. W. Hozier; Major Kemball; Colonel Clark Kennedy; Rear-Admiral Hon. Sir Henry Keppel, K.C.B.; Lieut.-Colonel Keppel; Brigadier-General George St. Patrick Lawrence; Lieutenant M'Gillivray; Lieutenant J. Ronald Macleay; Lieutenant R. V. Malden; Deputy Commissary-General Maturin; Lieut.-Colonel G. A. Maude; Rear-Admiral Sir Alexander Milne; Captain George Hay Moncrieff, Scots Fusilier Guards; Lieut.-Colonel the Hon. Roger Mostyn, Scots Fusilier Guards; Lieut.-Colonel Henry Wylie Norma; Lieut.-General Oldfield, K.H.; Captain William Paget; Lieut.-General Sir John Pennefather, K.C.B.; Major Rowley Platt, 46th Regiment; Major Whitworth Porter; Major J. F. Richardson, C.B.; Lieutenant R. V. Riddell; Colonel William John Ridley; Commander Michael C. Seymour, R.N.; Lieutenant Leopold Seymour; Lieutenant the Honourable Charles John Shore, Scots Fusilier Guards; Lieut.-General Sir Frederic Smith; Captain James W. Smith; Assistant-Surgeon F. H. Smith; Cornet John J. Spedding; Lieutenant R. A. Stevenson; Mr. Taylor, C.B., Inspector-General of Hospitals; Lieutenant Jocelyn Henry Watkin Thomas, Scots Fusilier Guards; Lieut.-Colonel A. Thompson; Lieutenant the Marquis of Tullibardine, Scots Fusilier Guards; Mr. R. H. S. Vyvyan, Hon. Corps of Gentlemen-at-Arms; Major-General Walker; Lieut.-Colonel Sir William Wallace; Lieut.-Colonel Spencer Westmacott; Lieutenant W. W. Woodward, Secretary of State for India; Commodore Yelverton.

THE STEAM RAMS.

Captain Selwyn, R.N., has sent the following note, which suggests considerations that well deserve attention at the present juncture, to the *Mechanics' Magazine*:—

GENTLEMEN,—Will you allow me to ask a few questions of those who talk so loudly and write so persistently of steam iron-coated rams as war ships? What would be the folly which could induce the captain of a line-of-battle ship, having steam at command, to wait to be run into by a *frigate* whose character would be easily distinguished while still miles distant? But supposing that the speed of the "ram" should be sufficiently superior to enable her to overtake her enemy, and administer a *crashing* blow at a speed of (say) 12 knots, for with less she could scarcely catch up with the chase, what would be the result? Not to speak of masts and yards coming down in the "ram," I am afraid "involuntary locomotion" would be the order of the day. I doubt whether engines or boilers would remain in their accustomed places; as for the screw shaft it would double up like a piece of macaroni, and, perhaps, before the crew of the "ram" could say whether with them it was heads or tails, the captain of the line-of-battle ship might send his more numerous crew to bring them to their senses, by a little gentle bleeding—for, of course, in such a case the recipient of the shock is likely to be the least shocked of the two. Also, when one has run (as Marryat says the nigger did) his head through a door, does it not sometimes prove an awkard collar to get rid of? To speak seriously, if in a frigate I had the power of running into a line-of-battle ship, I should very much hesitate to use it, and I should think it much more feasible to take such a mode of proceeding in the case of iron, unarmed, and comparatively low transports. Supposing these iron-cased vessels not to roll too much, and to be really of high speed, both which points are open to much doubt, it is in destroying troop-carrying transports, while fleet met fleet elsewhere, that their services would be more especially valuable, for we must not forget that France will possess the means of transporting 50,000 men at a different time to a different locality from that where the naval struggle must take place; 50,000 men, that is, might be sent to sack London or Liverpool, while the fleets were fighting off Cherbourg or Portland, and, what is more, re-embark before any portion of our fleet could be spared to look after them.

THE INSTITUTION OF NAVAL ARCHITECTS, established January 16th, 1860, under the presidency of the Duke of Northumberland, with the Earl of Ellenborough, the Earl of Hardwicke, Sir Francis Baring, Bart., the Right Hon. H. T. L. Corry, Sir James Graham, Bart, the Right Hon. Sidney Herbert, Lord Clarence Paget, C.B., Sir John Pakington, Bart., R. Abethell, Esq., T. Chapman, Esq., Duncan Dunbar, Esq., J. Laird, Esq., T. Lloyd, Esq., Rev. H. Moseley, M.A., J. Penn, Esq., J. Scott Russell, Esq., Isaac Watts, Esq., Rev. Joseph Woolley, LL.D., as vice-presidents, has met with considerable favour, and will no doubt prove of great service to the country by its investigations and papers. We wish it every success. One of its objects is the carrying out by the collective agency of the Institution of such experimental and other inquiries as may be deemed essential to the promotion of the science and art of shipbuilding, but are of too great magnitude for private persons to undertake individually.

An exceedingly accurate and expressive portrait of the late Director-General of the Army Medical Department has been published by Mr. de Mouxy, photographer, of 19, Strand. The many friends of Mr. Thomas Alexander could have no better souvenir. The photograph is to the very life n face, and look, and bearing.

THE DOCKYARDS OF ENGLAND AND FRANCE.

We give below a comparative statement of the Dockyard Areas of England and France, with available land annexed, together with the number of building slips and docks :

ENGLAND.

	Area.	Slips.	Docks.	Docks Building.
	Acres.			
Deptford	38	5	2	—
Woolwich	56	6	3	—
Chatham	95	8	4	—
* St. Mary's Island, &c. ...	284	—	—	—
Sherness	57	1	5	—
Portsmouth	115	5	9	2
Devonport	71	6	5	—
Keyham	73	—	3	—
Pembroke	77	13	1	—
Total	866	44	32	2

FRANCE.

	Area	Slips	Slips building.	Docks.	Docks building.
	Acres				
Cherbourg ...	256	12	—	7	—
Brest	131	12	—	4	—
L'Orient	106	16	2	1	1
Rochefort	132	13	1	2	1
Toulon	240	20	—	3	5
Total...	865	73	3	17	7

The above tabular statement shows the dockyard acreage possessed by each of the great western powers now straining every nerve to obtain the supremacy of the seas. France has 73 building slips, England only 44. We seem, however, to have an advantage in docks, for fitting and repairs—while the acreage is again in favour of France, for we cannot consistently swell our amount by including the 284 acres of St. Mary's Island, which are unappropriated. If France had the same maritime resources as England, and equal money-power, she has available space in her national yards to build nearly two ships to our one. As it is we must be prepared for a gigantic expansion of the French navy, for our neighbours, according to the statements of the Secretary to the Admiralty, have 160,000 loads of timber in store for building purposes, while our yards never were so bare of that important material as at present.

"No flinching" is a well-known British motto, and the struggle now going on between the shipwrights of England and France is a struggle for "breeches pocket" supremacy. If the day should ever come when the struggle will be for naval supremacy, we shall have to "shell out" after a different fashion; but no matter, we do not fear the result.

THE COMPTROLLER OF THE NAVY.—In reference to the change of nomenclature, which we announced some time back, we extract the following from a contemporary:—The chief cause of the misapprehension which has existed in the public mind about the precise character of the office of Surveyor to the Navy is, that until the appointment of Sir Wm. Symonds the Surveyors were shipwrights. The last Comptroller of the Navy was Sir Byam Martin, under whom were three professional surveyors—Mr. Tucker, Mr. Roberts, and Sir Robert Seppings. These three gentlemen were responsible for all the designs of ships, and the mechanical operations of the dockyards. The Comptroller was chairman of the Navy Board, the members of the board being the heads of the other naval departments. His duties were therefore more extended than those now attaching to the office. Sir James Graham and his wise colleagues in office in 1832 thought fit to abolish these offices, and to entrust to a seaman without professional advisers the whole responsibility of designing and constructing the ships of the Royal Navy. This was a task to which he felt himself unequal, but he would not avow it; and although he immediately called to his aid an active foreman of shipwrights, he appointed him in the office nominally as a second-class clerk, that is, in a non-professional position. When Sir B. Walker was invited to become the successor of Sir Wm. Symonds, he would only accept the office on the condition that a gentleman eminent as a man of science, and as a shipwright, should be appointed to assist him in conjunction with the former assistant of Sir Wm. Symonds. This gentleman, Isaac Watts, Esq., one of the vice-presidents of the Institution of Naval Architects, is now, therefore, and will be until some more suitable title is found for him, Chief Assistant Comptroller of the Navy.—*Mechanics' Magazine.*

Messrs. Gautheer de Rougemont, guardian of Longwood and of Napoleon's tomb, N. Salomon, Vice-Consul of France, W. G. Kimball, United States Consul, Captain Masselin, and J. C. Moneschal on the 20th December last, in great state assembled in the Valley of Napoleon, and thence proceeded to the tomb, where Captain Masselin detached a piece of stone from the masonry. M de Rougemont presented the fragment to Mr. Kimball, and made a speech, in which he said it would show that France preserves the sentiment she felt for the United States which animated her at the time of the American war. Whereupon Mr. Kimball declared that he was penetrated with the most profound gratitude towards His Majesty the Emperor Napoleon III., and that the "venerated relic" should figure in the monument to be erected to one of the most illustrious and virtuous men God had ever sent upon earth—to the friend of France. Our readers will wonder what all this means. Well, it appears, according to the *Moniteur de l'Armée*, that a committee are getting up a subscription for a public monument to Washington in America, and that they applied to the Emperor for leave to get a piece of stone out of Napoleon I.'s empty tomb to put into it. The Emperor, who has a fine sense of humour, as the Liverpool merchants may remember, acceded to their request. Hence these little speeches and this "*cérémonie touchante*" in a British Island. The "*précieuse relique*" (a stone) was put in a case, sealed with the Imperial arms, and sent to "the *American Government.*" One is almost tempted to regret that our Transatlantic brethren were not within reach of Napoleon I.'s arms *tempore* Washington—the friend of France.

* This land adjoins Chatham Dockyard, but is unappropriated.

NAVAL ORGANISATION.

A Correspondent suggests that the following system would go far to make and keep the Navy a healthy working popular service, where officers would be, to a great extent, the builders of their own fortunes, and the country zealously served, from one of the strongest impulses of our nature.

Never allow the commanders' list to exceed a certain number, but by an order in council.

Pay lieutenants (or, rather captains, giving them the social benefit of their Army comparative rank) according to *service time made good, i. e.*, served for, or one year in three allowed for unavoidable half-pay, or waiting service. Reward these officers, when occasion calls for, by granting them so much service time, which would increase their pay. and push them forward to certain promotion.

Establish the following staff offices to be competed for, granting one year's time for the fact of passing, and three years for two served in staff duties :—

Gunnery officers, who have now little or no inducement to qualify for the duty.

Surveying officers, who are at present pitched on a good deal at hap-hazard, qualified or not.

Navigating officers (that is, to assist the captain of the ship in navigating), who now, as masters, are obtained principally from the Merchant Service in very scanty and precarious supplies, and are altogether in an unfair and unseemly position, never being able (except in retirement) to rise above a rank junior to even an *acting lieutenancy*, and flag-lieutenants, whose qualifications for a post relative to that of an aide-de-camp is at present, in most cases, simply that of being closely related to the flag officers under whom they are immediately serving.

If necessary, and to make the thing popular, and excite emulation, admit a limited number of competitives from the Merchant Service of young men who can prove themselves gentlemen by education, and good sailors by experience. Give masters of upwards of twelve years' sea-service commander's rank, and make them and others who may qualify, available to serve in that rank as navigating officers of line-of-battle ships, or otherwise, as expedient, being at the same time considered qualified to command in their turn. Place all other masters on lieutenants', or rather captains' lists, and consider them available, if willing, to serve on the staff in the navigational branch; but no staff duty ought to be compulsory. Cadets and midshipmen are literally crammed with navigation at present, and after passing for lieutenants, need never again refer to the subject. Commanders of Government vessels ought to have every assistance in navigating them; but the chief responsibility ought to rest with the chief authority on board.

We need not then be employing not only extra boatswains and gunners to do the duty of junior commissioned officers, but leading petty officers, which is a fact not generally known. With respect to manning the Navy, his opinion is it will never be efficiently or effectually done, but by bringing up boys in the service. Merchant seamen (he thinks) are ill-qualified and unwilling, and there are too many foreigners at present in the Merchant Service to make it available even as a reliable contingent.

AUSTRALIAN VOLUNTEER RIFLE CORPS.

An extract from a Melbourne paper shows the present strength of the Volunteers in Victoria. They have been formed only in Melbourne and Geelong, on the shores of the bay of Port Phillip, and therefore give no idea of the force which could be raised should occasion require. The volunteers were first called out about the commencement of the war with Russia, and have continued to increase in strength and efficiency up to the present time. The members receive their arms and uniform from Government and comprise persons of all grades of society. The artillery are extremely well drilled, and have many men in them who have served since the formation of the corps. The mounted force are probably the best horsed in the world. Despatches confirming these statements have been forwarded to the Home authorities by both his Excellency the Governor, Sir H. Barkly, and Major-General MacArthur. The former gentleman some few months ago obtained the sanction of Her Majesty to the title of "Royal" being added to the designation of these regiments. The Colonial Parliament has voted a large sum to place the harbour of Port Phillip in a state of defence, and to procure arms of the best description. Captain Clarke, R.E., late Surveyor-General of Victoria, has been commissioned to procure, through the Home Government, this supply. By an Act of the Colonial Legislature, confirmed by Her Majesty, the officers of the volunteers rank next under the corresponding grade of Her Majesty's forces in the colonies.

Return of the strength of the Victoria Volunteer Corps, Melbourne, December 12, 1859 :—Staff. Colonel George Dean Pitt, Assistant-Deputy-Adjutant-General, Her Majesty's Forces; Captain C. H. Hall; Captain W. A. D. Pitt; Clerk, Peter Dwyer, and Armourer, M. G. Flanagan. There are 5 divisions and 14 companies, consisting of 4 lieutenant-colonels, 2 majors, 10 captains, 5 lieutenants, 8 acting-lieutenants, 15 second lieutenants, 3 adjutants, 3 surgeons, 2 assistant-surgeons, 4 sergeant-majors, 5 drill instructors, 11 drill sergeants, 26 sergeants, 24 corporals, 3 buglers, and 1475 privates—total 1600. This includes a total of 436 in the artillery, 82 in the naval volunteers, 113 in the cavalry, and 969 in the rifle corps.

In the House of Commons on Thursday evening M. W. Ewart asked whether the Committee of Council on Education could authorise or encourage a system of military drill in schools which had participated in the education grant? Mr. Lowe replied that the management of these schools was not in the hands of the Committee of Privy Council, but of the local committee of management. It was therefore impossible for the Committee of Council to take any direct steps in the matter. The question was could they take any indirect steps. Grants were made on certain conditions, which were strictly of an educational character; and however desirable the object might be, the Committee of Council would not be justified in extending those conditions to other subjects of a different nature. The wisest course was for the committee to confine itself to its original object.

THE AUSTRIAN NAVY.—A letter from Pola in the *Militär-Zeitung*, says :—"The screw-frigate Donau, bearing the flag of the commander of the Adriatic squadron, will be shortly docked; the frigate Schwarzenberg, and the schooner Saida, have sailed on a cruise. The screw-frigates Radetzky and Adria, the sailing-frigate Novara, the corvettes Carolina and Diana, the screw-corvette Erzherzog Friedrich, the screw-schooner Seemöve, and the steamer Curtatone, are in port. The Bellona (artillery practice-ship), and the frigate Venus, bearing the flag of the admiral of the port, and which has a school for sailors and midshipmen, are also here. The ship of the line Kaiser has got in her masts, and will shortly be ready for sea.

Among the parliamentary papers printed this week has been the correspondence between the Treasury and the Admiralty respecting the superannuation of Sir Richard Bromley, the Accountant-General of the Navy. Happily the ill-health which rendered his retirement probable some months since has now disappeared, and the Civil Service is not deprived of one of its most distinguished members, nor the Navy of one of its most useful guardians.

The detachments of H.M. 6th and 19th, which were out watching the Nepaul rebels, have returned to Azimghur and Goruckpore; and H.M. 54th head-quarters have gone back to Fyzabad. The brigade commands, such as those of Brigadier Holdich, &c., will be or are broken up already. In the recent operations our men of the Rifle Brigade, who fell in with the Goorkhas, outmarched them speedily if not easily.

A sudden squall of wind and snow burst over Portsmouth on Monday afternoon. An upper portion of a wall in the dockyard, which had been erected to prevent the escape of convicts in that direction, was blown into the street.

Obituary.

At the ripe age of 74, on Sunday last, Sir William Napier breathed his last. This event took place at his residence, Scinde House, Clapham Park. Distinguished in the field as a gallant and successful soldier, he was no less famed in the gentler walks of literature, illustrating with his pen the history of that profession already honoured by the deeds of his sword. Sir William Francis Patrick Napier, K.C.B., was born at Castletown, Kildare, Ireland, in 1785. He was the third son of Colonel the Hon. George Napier, by his second wife, Lady Sarah Lennox (seventh daughter of the second Duke of Richmond), and brother to the late Generals Sir Charles James Napier and Sir George Thomas Napier. He entered the army as ensign in 1800; became lieutenant in April of the following year, and captain June 2, 1804. He served at the siege of Copenhagen and battle of Kioge in 1807; in Sir John Moore's campaign in Spain in 1808-9, and in the subsequent war in the Spanish peninsula from 1809 to its termination in 1814. He was present in 1810 at the combat of Almeida, on the Coa, where he was wounded, and at the battle of Busaco. In 1811, during Massena's retreat from Portugal, he was engaged in several combats, and was severely wounded. He attained rank of major, May 30, 1811. He was engaged in the battle of Salamanca in July, 1812. He became lieutenant-colonel, November 22, 1813. He was at the passage of the Huebra in November, 1812, and of the Bidassoa in October, 1813. He was engaged in the combat of Vera, at the battles of the Nivelle, and the Nive, and was wounded in defending the churchyard of Arcangues. He was again engaged in the battle of Orthes. He served also in the campaign of 1815. In 1828 Sir William commenced the publication of his "History of the War in the Peninsula and the South of France, from the year 1807 to the year 1814." He attained the rank of colonel, July 22, 1830, and that of major-general November 23, 1841. From April 1842, to January, 1848, he was lieutenant-governor of the island of Guernsey, and in 1848 was created a Knight Commander of the Order of the Bath. In 1848 he published "The Conquest of Scinde." He became lieutenant-general, November 11, 1851; colonel of the 22nd Regiment of Foot, September 19, 1853; and general, Oct. 17, 1859. In 1851 he published his "History of General Sir Charles Napier's Administration of Scinde and Campaign in the Cutchee Hills," and in 1855, "English Battles and Sieges in the Peninsula." Besides several other works, he has also published "The Life and Opinions of the late Sir Charles Napier, by Sir William Napier." Sir William Napier married in 1812 the second daughter of the late Hon. General H. E. Fox, uncle to the third Lord Holland. Sir William Napier's "History of the War in the Peninsula" cost the author sixteen years of continuous labour. He was himself a witness of several of the series of operations, and was engaged in many of the battles. His wide acquaintance with military men enabled him to consult many distinguished officers, English and French, and he was especially supplied with materials and documents by the Duke of Wellington and Marshal Soult. The correspondence of Joseph Bonaparte, while King of Spain, a large portion of which was in cypher, also formed part of the materials used in this important history. All these documents and letters Lady Napier arranged, and with a rare sagacity and patience she deciphered the secret writing. She also made out all Sir William Napier's rough, interlined manuscripts, which were almost illegible to himself, and wrote out the whole work fair for the printers. Sir William Napier mentions these facts in the preface to the edition of 1851, and in paying this tribute to Lady Napier observes that this amount of labour was accomplished without her having for a moment neglected the care and education of a large family. The funeral of General Sir William Napier took place yesterday at the Cemetery, Norwood, at twelve o'clock. We wish that our space enabled us to express the sentiments we entertained for the gallant soldier who is no more. He may well be called the English Thucidydes.

FUNERAL OF THE LATE ARMY MEDICAL DIRECTOR.—The accounts of the sudden and unexpected death of Dr. Alexander were received in his native town of Prestonpans with deep and universal sorrow. This picturesque sea-coast village, in the neighbourhood of Edinburgh, where his respected parents and immediate relatives reside, was a never-failing source of interest to him; and during the eventful life which he so earnestly devoted to the service of his country, whenever he was relieved from duty, he, with

Digitized by Google

joyous feelings, returned to the home of his boyhood, and, with childlike simplicity, lived in the midst of his affectionate family, recalling the associations of his early days. As in the discharge of his public duty Dr. Alexander was always the steady friend and champion of the soldier, in private he was ever ready, with a generous heart and a liberal hand, to minister to the necessities of the poor; and many in his native place who were relieved by him when in want and in sickness live to bless his memory. His remains were removed to Prestonpans, and laid in the family burying-ground, on Monday, the 6th inst. The scene was a most solemn one: the places of business were closed, the whole of the inhabitants followed the procession to the grave; and the fishermen—a numerous and respectable class of the community, in whom he took a deep interest—gave up their avocations at sea, to enable them to pay a last mark of respect to one whom they were proud to claim as a townsman. His body was lowered into the tomb amid the deepest manifestations of grief. —(*From the Daily News.*)

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BRUCE—Feb. 9, at Woolwich, the wife of Captain Bruce, Royal Artillery, of a son.

Funds Invested..... £847,000
Annual Income..... 116,000
Claims paid..... 1,150,000

BONUS YEAR.—Persons Assuring on or before the 25th March next will be entitled to one full year's share in the profits then to be divided. The Bonuses become vested after payment of the *Third* premium. The Profits will be divided in every *Fifth* year after the 25th March next.

No extra premium is charged for service in any Volunteer Corps within the United Kingdom during peace or war. B. HALL TODD, Secretary and Actuary.

BONUS DIVISION.

GLOBE INSURANCE, CORNHILL & CHARING CROSS, LONDON, S.W.
ESTABLISHED 1803.

Capital One Million, All paid-up and Invested.

The following are examples of the PROFITS accruing on Globe Participating Life Policies under the BONUS declared as at 31st December, 1858:—

AGE at Date of Policy.	Original Sum Insured.	Original Annual Premium.	Complete Years in force.	Bonus applied— By Addition to Policy.	Bonus applied— By payment in CASH.
25 Yrs.	£1000	£21 9 2	6 Years.	£72	£27 17
35 ,,	1000	28 2 6	6 ,,	72	32 15
40 ,,	1000	32 15 0	6 ,,	72	35 7
50 ,,	1000	45 12 6	6 ,,	72	42 9

(*Policies of One to Five complete Years Participate in proportion.*)

The above Profits are equivalent—if added to the Policy—to a Reversionary Sum at death equal to One Pound Four Shillings per Cent. per Annum on the Sum Insured for each of the completed years of the Policy:—Or, If taken as an Immediate Cash Payment, is, at most ages, considerably more than One Year's Premium.

The Bonus Periods are FIVE Years, and the Rates of Life Premiums, whether *With* or *Without* Profits, very economical.

FIRE, LIFE, ANNUITY, and REVERSIONARY business transacted. WILLIAM NEWMARCH, Secretary.

*** No Charge for Volunteer and Militia Corps.

For upwards of thirty years No Extra Premium has been charged by the Globe for service in the Militia and in Volunteer Corps in the United Kingdom.

V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.—HER MAJESTY'S GOVERNMENT having, with the sanction of Parliament, determined on establishing a Reserve Volunteer Force of Seamen trained to the Use of Arms:

THIS IS TO GIVE NOTICE,

That any Seaman possessing the following qualifications may be inrolled as a Royal Naval Volunteer in the Reserve Force, and will thereupon be entitled to the advantages and be subject to the obligations mentioned below:—

QUALIFICATIONS FOR THE RESERVE.

1. A Volunteer must be a British subject:
2. He must be free from infirmity:
3. He must not be over thirty-five years of age:
4. He must within the ten years previous to his joining the Reserve have been five years at sea, one year of that time as an A.B.

ADVANTAGES OF THE RESERVE.

1. A Volunteer will at once receive an annual payment or retainer of 6*l.*, payable quarterly:
2. He will, if he fulfils his obligations and is in the Reserve the requisite time, receive a pension of not less than 12*l.* a year whenever he becomes incapacitated from earning a livelihood, or at sixty years of age if not previously incapacitated:
3. He may elect either to take the whole pension himself, or to take a smaller pension for himself during his life, and to allow his wife a pension after his death, for the remainder of her life:
4. He will not, on account of belonging to the Reserve, forfeit any interest in any Friendly or Benefit Society:
5. His travelling expenses, to and from the place of drill will, when necessary, be provided:
6. He will, during drill, receive, in addition to the retaining fee, the same pay, victualling, and allowances as a seaman of the fleet, according to his rating:
7. He will, if called out on actual service, receive the same pay, allowances, and victuals, and have the same prospect of promotion and prize money, as a continuous service seaman of the fleet, according to his rating, and he will on joining receive the same clothing, bedding, and mess traps:
8. He will, if wounded or injured in actual service, receive the same pension as a seaman in the Navy of the same rating:
9. He will be eligible to the Coast Guard Service and Greenwich Hospital:
10. He may quit the Reserve, if not at the time called out for actual service, at the end of every five years; he may also quit it, when not called out, on paying back the retainers he has received; or, without payment, if he passes an examination as a Master or Mate, and obtains bonâ fide employment as Master or Mate.

OBLIGATIONS OF THE RESERVE.

1. A Volunteer must attend drill for twenty-eight days each year; he may do so, so far as the convenience of the public service will permit, at a time and place convenient to himself; but he cannot in any case take less than seven days' drill at any one time:
2. He must not, without special permission, proceed on a voyage that will occupy more than six months:
3. He must appear before some Shipping Master once in every six months, unless he has leave to be abroad longer, and he must report every change of residence, and employment:
4. In order to earn a Pension he must continue in the Reserve as long as he is physically competent to serve, and he must also have been in the force fifteen years if engaged above thirty, or twenty years if engaged under thirty. In reckoning this time actual service in the fleet will count double:
5. Volunteers may be called upon for actual service in the Navy by Royal Proclamation. It is intended to exercise this power only when an emergency requires a sudden increase in the Naval Force of the country:
6. A Volunteer may in the first instance be called out for three years. If there is then actual war, and he is then serving in one of Her Majesty's ships, he may be required to serve for two years longer; but for the additional two years he will receive 2*d.* a day additional pay:
7. Volunteers when on drill or actual service will be subject to Naval Discipline:
8. A Volunteer who fails to fulfil the obligations of the Reserve will forfeit his claim to Retainer and Pension, and if he fails to join when called out for actual service may be treated as a Straggler or Deserter from the Navy.

The Inrolment commenced on 1st January, 1860.

Full Information and detailed conditions may be obtained on application to the Shipping Master at any Port in the United Kingdom, or to the Officers of Customs in the Channel Islands and Isle of Man.

V. R.

RESERVE FORCE OF ROYAL NAVAL VOLUNTEERS.

LEAVE FOR LONG VOYAGES.

Special Leave for Voyages exceeding Six Months will be granted to ALL VOLUNTEERS on the following Conditions:—

1. The Leave is to be for one ship, and for one voyage only at a time, and to be renewed for each voyage. The ports or countries at which the ship is to touch must be all specified, or if any of these are not specified the voyage must be limited by the articles to twelve months.
2. The Volunteer must have completed his twenty-eight days' drill for the year before the Leave will be given.
3. On an emergency the Reserve may be called out for service at home or *abroad*. If the Volunteer is then abroad, he must, if summoned, join any of H. M. ships abroad; under the same penalties, in case of refusal, as in case of refusal to join in the United Kingdom.
4. The arrears of retainer due will be paid on the Volunteer's return in the ship for which Leave is given.
5. The Admiralty reserve power to withhold this Leave if at any time on an emergency the Volunteers are required for the defence of the country. They also reserve power to withhold the Leave at the end of each Volunteer's first five years of service, when he may, if he pleases, quit the force.
6. Subject to these reservations, it is the intention of the Admiralty to grant Leave upon the above conditions for the first five years of the service of each Volunteer who joins the Reserve under the present Regulations.

AGE OF ADMISSION. During the year 1860 the age of admission will be extended from 35 to 40.

*** *For further Information apply to a Shipping Master.*

HAYDN'S DICTIONARY OF DATES.

Published this day, in 1 vol. demy 8vo. price 18s. cloth,

HAYDN'S DICTIONARY OF DATES. Comprehending Remarkable Occurrences, Ancient and Modern—the Foundation, Laws, and Governments of Countries—their Progress in Civilisation, Industry, and Science—their Achievements in Arms—their Civil, Military, and Religious Institutions—the Origin and Advance of Human Arts and Inventions, with copious details relating to the BRITISH EMPIRE. The whole comprehending a body of Information, Classical, Political, and Domestic, from the earliest accounts to the present time. NINTH EDITION, revised and greatly enlarged by BENJAMIN VINCENT, Assistant Secretary and Keeper of the Library of the Royal Institution of Great Britain.

In this Edition about Five Hundred new articles have been inserted; a very great number of articles have been re-written; and in order still more to adapt the work to educational purposes, numerous biographical, geographical, literary, and scientific details have been supplied.

*** "A volume containing upwards of 15,000 articles, and, perhaps, more than 15 times 15,000 facts. What the London Directory is to the merchant, this Dictionary of Dates will be found to be to those who are searching after information, whether classical, political, domestic, or general."—*Times*.

SEAMANSHIP AND NAVAL DUTIES.

In post 8vo. price 9s. cloth extra,

SEAMANSHIP AND NAVAL DUTIES. By A. H. ALSTON, Lieut. Royal Navy. With 200 Practical Illustrations, comprising in detail the Fitting out of a Man-of-War; her Management under all Circumstances at Sea; and the Employment of her Resources in all Cases of General Service.

"Hitherto 'Manuals of Naval Duties' have been for the most part mere copies of old publications, which, from the great recent improvements in the Service are necessarily obsolete. Aware of this, Lieut. Alston, qualified by the experience of a regular course of training and much service abroad, has produced this comprehensive and practical work, which will supply a want needed by all young Navy Officers.

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

NEW WORK BY HANS BUSK.

In case, price 3s. linen mounted,

HANS BUSK'S TABULAR ARRANGEMENT OF THE COMPANY DRILL. Embracing the latest Regulations for the Line, Militia, and Volunteers.

Each evolution is here arranged in so lucid a manner as to be intelligible at a glance. The use of this admirable table will save many weary hours in the drill-yard, and will materially lessen the labour of instructors.

New Editions of "Hans Busk's Rifle Books" are as under, viz.:—

RIFLE VOLUNTEERS: HOW TO DRILL THEM. Seventh Edition, boards, 1s. 0d.

RIFLE (THE), AND HOW TO USE IT. Sixth Edition, half-bound, 2s. 6d.

RIFLE TARGET REGISTER (THE). Demy 8vo. cloth limp, 8½d. and 1s.

Hans Busk's Books are universally acknowledged throughout Europe and America to be the very best plain and practical treatises that have yet appeared on the subject of the Rifle. They furnish all the information that the tyro can need, and in so clear and lucid a manner *as to be intelligible to all.*

London: ROUTLEDGE, WARNE, & ROUTLEDGE, Farringdon Street, E.C.

SIR JOHN FRANKLIN.

This day is published, with Eight Illustrations, price 2s. 6d.

THE CAREER, LAST VOYAGE, AND FATE OF SIR JOHN FRANKLIN.

By Captain SHERARD OSBORN.

BRADBURY & EVANS, 11, Bouverie Street, E.C.

NEW FIRST-CLASS NEWSPAPER FOR THE COLONIES.

"THE ENGLISH MAIL," a Newspaper specially prepared for Circulation throughout Australia and New Zealand. Published in time for despatch by the Mails which leave England (*via* Marseilles) for Australia on the 18th of every month.

The want of a well-edited and first-class newspaper for the Australian colonies—one which shall give the news of the month, Domestic, Commercial, and Foreign, easily arranged in the order of its significance and occurrence, and clearly condensed for its ready perusal by colonists eager to know what is going on at home—has led to the starting of *The English Mail.*

To the Australian colonists *The English Mail* cannot fail to be of the greatest service. It claims to be their "reporter," as it were, to note and impartially record all events of public interest relating to Australia, occurring in this country. Special reports of Meetings of Banks, Mining and Insurance Companies, Postal Communication, Mail Service, &c., will find a place in its columns; and it enjoys the advantage of an exclusive connection with the "General Association for the Australian Colonies," established at the Australian and New Zealand Rooms, Jerusalem Coffee House, Cornhill.

Although *The English Mail* is specially intended for Australian circulation, yet owing to the general character and perfect arrangement of its Miscellaneous News, it has found readers elsewhere—in India, China, Canada, and the Cape of Good Hope, and even at home—and it may fairly be considered as *the Englishman's Newspaper Abroad.*

Arrangements have been made to ensure an ample distribution of the paper throughout the various townships in each of the Colonies, as well as at home; and with the assurance of an extensive circulation, it is confidently recommended as a most valuable medium for Advertisements, *Home* and *Colonial.* Price 8d. (Postage to Australia *viâ* Marseilles, 3d. extra).

SUBSCRIBERS' NAMES for copies of *The English Mail*, intended for transmission to Australia, must be sent in later than the day previous to publication; and must be accompanied by Postage Stamps for the full price of the paper (either with or without postage).

ADVERTISEMENTS will be received up to the evening of the 15th of each month. The charge for six lines is 2s. 6d.; 6d. a line after.

Office for Advertisements and Subscriptions, No. 1, Bride's Avenue, Fleet Street, E.C.

London: ROBERT HARDWICKE, 192, Piccadilly, W.

CHARLES KNIGHT'S ENGLAND.

THE SIX VOLUMES OF THE

POPULAR HISTORY OF ENGLAND, which are now completed, bring down the annals of our country TO THE CLOSE OF THE AMERICAN WAR.

The work is issued in monthly parts, price 1s., with steel and woodcut illustrations. Part 48 and Vol. VI. are now published. The work will be completed in 8 Vols.

"THE POPULAR HISTORY OF ENGLAND OF CHARLES KNIGHT is of a somewhat higher price (comparing it with works issuing in penny numbers); but the plates, as well as the paper, are greatly superior, and its literary merits are of a very high order. Indeed, nothing has ever appeared superior, if anything has been published equal to the account of the state of commerce, government, and society at different periods."—*Lord Brougham's Address on Popular Literature, at the Meeting of the National Association for the Promotion of Social Science*, October 12, 1858.

BRADBURY & EVANS, 11, Bouverie St., Fleet St., E.C.

THE SIXTH VOLUME OF CHARLES KNIGHT'S POPULAR HISTORY OF ENGLAND is published this day, bringing the History down to the end of the American War. Price 9s.

"This is the History for English youth."—*Times*, Jan. 12.

BRADBURY & EVANS, 11, Bouverie St., Fleet Street, E.C.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

Patrons:—

Her Most Gracious Majesty the Queen.
His Royal Highness the Prince Consort.

At every Examination for Naval Cadetships since May, 1857, Pupils from this Establishment have taken the first or second places. Those Pupils who have entered the Army and Military Colleges have been equally successful.—Applications to be addressed to the Rev. E. Burney, M.A., Gosport.

ROYAL NAVAL ESTABLISHMENT,

Eastern Parade, Southsea.

CONDUCTED BY Mr. THOMAS EASTMAN, R.N.

MR. EASTMAN offers advantages which cannot be obtained in Establishments for general education, since he receives Naval Pupils only, whom he instructs in the courses exactly required.

Pupils are taught Steam and Rigging, the latter from a model of a line-of-battle-ship, 24 feet in length.

346 Gentlemen have passed as Naval Cadets, and upwards of 250 as Marine Cadets, &c.

Eastern Parade is situate a few yards from the beach and Southsea Castle, commanding close and uninterrupted views of the Channel, the Isle of Wight, and Spithead.

☞ A seaman rigger is attached to the Establishment.

ROYAL NAVAL ESTABLISHMENT,

Eastern Parade, Southsea.

CONDUCTED BY MR. THOMAS EASTMAN, R.N.

The following Gentlemen have passed from this Establishment since June, 1859:—Messrs. Alexander, G. A. Ellis, Garnier, Mallory, Hoghton, Boddom, Maycock, Gillum, Osborne, Nuthall, O'Brien, Bedingfield, Powell, Hodges, Jackson, Lysons, Browne, Roberts, Hunt, Walters, Pascoe, Pugh, Freeland, Jaffray, Lord Albert Clinton, Messrs. Weld, Fairfax, Hutchinson, Atkinson, Brabazon, Law, Hazel, Needham, Gibson, Abbot, Smith, Nottidge, Chambrè, Forder, Smart, Bird, Giles, Rust, Compton, Russell, Thompson, Mitchell, Haswell, Ellis, Hawes, Calder, Hebden, Tully, Hyman, Milman, Hough, Dugdale, Coddington, Gissing, Lindeman Bancroft, Campbell, Lambert. 346 gentlemen have passed from this Establishment as Naval Cadets, including 116 under the Admiralty Regulation of 23rd February, 1857.

NAVAL CADETS.

Reduction of Examination and Age. New Regulations for Entry into Her Majesty's Service.

MESSRS. GALT & CO., Portsmouth, will be glad to forward, on application, the New Admiralty Regulations and other information necessary for passing the R.N. College.

Outfitters by appointment to H.S.H. the Prince of Leiningen.

NAVAL CADETS.

OF THE 50 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, on the 13th December, SIXTEEN were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gataker, Steavenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. Johnson, Naval Instructor; W. Bell, Chaplain; J. A. Burrow, Chaplain and Naval Instructor.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, officers who had read at this Establishment have twice come out first on the list.

Apply to Captain Lendy, Sunbury, S.W.

EDUCATION.—BRIGHTON.

FRENCH, GERMAN, AND CLASSICAL SCHOOL, 15, Eaton Place, Kemp Town.

Principal—Mr. L. W. SCUDAMORE, B.A.

Pupils prepared for the Army, Civil Service, Oxford and Cambridge Examinations, &c. French and German constantly spoken. Terms moderate. References to the friends of pupils, many of whom have taken high places at the above Examinations.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major Corte, The Cedars, Putney, S.W.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved Enfield-pattern Rifle, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

George H. Daw, Gun-maker and Contractor, 57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"New Gun.—Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times.*

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (New Model), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

Saml. Colt, 14, Pall Mall, S.W., or through any respectable Agency.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. De la Cour, 327, High Street, Chatham.

THE NEW REGULATION BRIDLE.

A. DAVIS,
MILITARY SADDLER,
33, STRAND, W.C., AND AT ALDERSHOT CAMP.

OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. Davis for an Estimate *for Complete* Regulation or Private Outfit in Saddlery.

A. Davis, 33, Strand, W.C.

TO OFFICERS IN HER MAJESTY'S ARMY AND NAVY.

MATTHEW WILDSMITH having been favoured with the patronage of many Gentlemen in Her Majesty's Forces has paid special attention to the production of a BOOT that should combine strength with ease and comfort. He is now happy to announce that he has succeeded in obtaining a leather specially prepared which he can with confidence recommend for military use, being light in weight, pliable, and very durable. Indian and Foreign Orders executed with despatch.—1, Sherard Street, Regent Street, W., rear of County Fire Office.

TO VOLUNTEER RIFLE CORPS.

BOOSEY & SONS' MILITARY BAND INSTRUMENTS, Reed and Brass, as well as Bugles, Drums, and Fifes, have been used and approved of by almost every regiment in the service, at home and abroad. Those regiments that contemplate the formation of a band, are invited to apply to the firm, who will be happy to recommend them competent bandmasters, and render any further assistance that may be required.

Boosey & Sons, Holles Street, London, W.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

DIVING APPARATUS.

C. E. HEINKE, Submarine Engineer, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. Kerr & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

William Donald, Proprietor.

THE LONDON.—To the ARMY and NAVY.—The attention of Officers is especially drawn to the advantages offered in these elegant and spacious saloons, which fulfil all the requirements of a west-end club of the most aristocratic and exclusive character.

L'on trouve dans la Salle de Lecture, non seulement les meilleurs Journeaux Anglais, mais aussi Allemand, Français, et Belge.

F. Sawyer, Fleet Street, E.C.

ALLSOPP'S PALE ALE, recommended by BARON LIEBIG and all the Faculty, may now be had in the Finest Condition direct from the New Brewery at Burton-on-Trent, of Messrs. Harrington Parker, & Co., who have Reduced the Price of this highly esteemed beverage to

4*s.* 6*d.* per dozen Imperial Pints.
2*s.* 9*d.* ditto Imperial half-pints.

Messrs. Harrington Parker, & Co., also supply ALLSOPP'S ALES in Casks of 18 Gallons and upwards, 5½ Pall Mall, S.W., Dec, 31, 1859.

PARISIAN PAPER HANGINGS AND INTERIOR DECORATIONS, at

Jackson & Graham's, 35, 37, and 38, Oxford Street, W.

SUPERIOR BEDSTEADS, BEDDING, AND CHAMBER FURNITURE.

JACKSON & GRAHAM respectfully inform the public that they have largely extended this department of their business by devoting three spacious show-rooms (each 120 feet long) exclusively to the display of Bedsteads of various woods, with furniture en suite, of a superior class, together with Brass and Iron Bedsteads of every size and description. Illustrated price-lists of Brass and Iron Bedsteads and Bedding may be had on application.—Show-rooms, 35, 37, & 38, Oxford Street, Preston Place, and Newman Yard, W., adjoining.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, Hill & Millard, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,

James Coulson & Co.,

Beg to intimate that their only London Depôt is at No. 46, Pall Mall, S.W.,
A few doors West of the Army and Navy Club.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. Carr, Chemist, 171, High Holborn, London, W.C., in bottles, 1*s.* each.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

Arthur Hill Hassall, M.D.,
Analyst of "The Lancet" Sanatory Commission, Author of "Adulterations Detected." "The Urine in Health and Disease," &c.
Wimpole Street, 20th January, 1860.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
And pronounced by Her Majesty's Laundress to be
THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
Wotherspoon & Co., Glasgow and London.

PARIS CHOICE PERFUMERY.

ED. PINAUD'S Perfumes, Fancy Soaps, Pomades, Philocomes, Aromatic and Oriental Vinegar, Cosmetics, Elixir, Dentifrice, &c., &c., to be had of all Chemists and Perfumers throughout the Country. Wholesale Depot, and for Export, 27, Cannon Street West, London, E.C.

GLYCERINE SOAP, unscented, natural colour, in 1*s.* packets, the pleasantest and best soap for the skin. Price's non-guttering bed-room candles, in boxes 1*s.* and 3*s.* Candlesticks, 1*s.* and 2*s.* 6*d.*

Price's Patent Candle Company (Limited), London.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener,* and *Field.* In boxes, 1*s.*, 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of Price's Patent Candle Company, Limited.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, Horatio Morgan, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

THE BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND

Are at all times to be obtained of

PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of Crosse & Blackwell, 21, Soho Square, London, W.

GAY & SONS' DRESSING-CASES are the best and most reasonable.

113, High Holborn, W.C. Established 1820.

Printed by Joseph Smith, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. Bradbury & Evans, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street North, Strand, in the county of Middlesex.—Saturday, February 18, 1860.

EVER since his celebrated lecture on "Life in Russia," Sir Robert Peel has maintained a silence, which was dignified, because profound. We are almost sorry that the irritation against Sergeant-Major Parry, Messrs. Balls, Butt, and Bodkin, was so powerful as to overpower all other considerations in the mind of the Honourable Member for Tamworth, when weighed against the love of a skirmish with the Templars, or indulgence in the celestial wrath which animates all good men against the *gens togata*. Not but that we had an amusing speech at the expense of the Volunteers, it is true; but much more was it at the cost of the Hon. Baronet's reputation—as a public man. How dangerous are the ways of that Commons House of Parliament! How the Syrens of the Treasury benches unite with the Furies of the Opposition to wheedle with their smiles, their "laughter," "loud laughter," "long-continued laughter," the reckless young humorist to his ruin; and when they have laughed their fill, and know that the record of his pleasant offences is on its way to the printing press, how callously they shrug their shoulders, and say, "what a very injudicious speech Peel's was!" or talk about it in the smoking-room, and deplore the "grand mistake" they have just applauded in the body of the House! There are thousands of men in and out of the House who laughed at the speech because it expressed sentiments, which in face of the general inclinations of the nation, of the wishes of Her Majesty, and of the solemn sanction of Parliament, they had not the courage to utter in public in reference to the Volunteers. In fact, Sir Robert "shot their cats" for them, and they have no fear of being taken up by the police for the acts which afforded them infinite satisfaction. *Ebrius ac certe petulans*—one may enter the House late at night and slay many cats, but when he wakes in the morning and finds that the deceased had numerous friends, very powerful of tooth and claw and tongue, he may regret his unfortunate indulgence in a taste for the long-range jokes which have drawn on him such formidable antagonists. The Volunteers just now are strong enough in the national support—in a good cause and in the countenance of their Sovereign—to bear these postprandial "saps" with equanimity, and even with good temper; and Lord Elcho might, if he were so inclined, with a little help from Hansard, a small amount of very recent historical research, and a limited use of sarcasm and synthesis, make quite as amusing an onslaught on Sir Robert Peel as the latter made on the Volunteers. In one respect indeed the Honourable Baronet deserves praise rather than censure. The bombast and folly talked at some meetings have been disgraceful to those who uttered and listened to them; and it is a pity they were reported, though there is little chance of their being carried abroad to expose the country to ridicule, and to jeopardise our reputation as a sober, sensible people. When some valorous Briton gets up to inform his audience that he and his eleven men would make a hundred Frenchmen fly, he should be treated as the Gallic champion was treated by Sir John de Courcy. Let the Volunteers remember that ridicule is harmless so long as there is no basis for it but in the caprice, malignity, or jocosity of the utterer; but that it is powerful indeed to cleave through bone and flesh, and wound the spirit at such time as it is sustained by a basis of truth and by the general appreciation of its justice. They may, we think, now fairly pass by Sir Robert Peel's pasquinade without further notice. We hope the Volunteers will not be inclined to regard the regulations for their *levée* at Court as indicative of any desire to slight them in higher quarters. From some communications addressed to us it would seem as if the Volunteer officers are disappointed and annoyed because they will not be presented in the usual way to the Queen; but we may remind them that there are no such ceremonies as presentations *en masse* to Her Majesty, and that in some instances it would be impossible consistently with the usages and customs of the Court to give to certain members of their body the privilege of free *entrée* into every foreign Court. It is no disparagement to the movement to say that there are a few to whom the commission of officers has been given in some corps to whom it would scarcely be possible to grant such a right. Within the last few days we saw that a Lord-Lieutenant of a county had been obliged to resist the wish of a corps to make a canteen-keeper their officer. But other Lord-Lieutenants have not been so scrupulous. The main objection to a general presentation, independent of the great fatigue to the Queen, is indicated in the above remark, which contains the only reason we have heard to justify the intended departure from the usual forms of a *levée*. In fact, the whole matter comes to this—Gentlemen who would be entitled to presentation at Court will not be prevented going to Court on ordinary occasions because they are Volunteer officers; and gentlemen who are not entitled to expect the honour of a presentation to Her Majesty in their private capacity and ordinary station, shall not be considered as having acquired that right in virtue of their being Volunteer officers. It is, nevertheless, to be regretted that on a very singular, heart-stirring, and significant occasion, some warmer recognition could not be made to the whole of the Volunteers, through their officers, of the worth of the spirit by which they have been animated, and that the stiff armour of Court ceremonial should constrain and, to our minds, disfigure very considerably a very graceful act, in which the feelings of the nation are largely in unison with the sentiments which have animated Her Majesty to bestow such a mark of favour on the Volunteers.

THE FORTIFICATION SCHEME.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The recommendations of the Royal Commission upon the subject of national defence will undoubtedly demand and receive great attention. Its importance no one is likely to dispute, although, being composed of a majority of engineers, the Commission may be expected to be biassed in favour of elaborate fortifications. The sum of 10,000,000*l.*, said to be the amount required to put us in a state of security, rather favours the idea.

But, sir, the great object to be desired is to prevent surprise. I have no wish to see Portsmouth or Plymouth made impregnable at an enormous cost. All that is necessary for the protection of our naval arsenals is that they should be surrounded by works that would hold an enemy at bay until succour could be brought to their relief. Site is more important in many instances than extent, and wherever elevated spots present themselves, such places might be judiciously fortified with some of Whitworth's or Armstrong's guns, and the enemy kept at a distance and prevented from firing our dockyards with projectiles.

Taking this view of the subject, I wish to draw your attention to the extensive "works" now in progress at Portsmouth, and upon which a very large portion of the 10,000,000*l.* will probably be expended. As you are doubtless aware, the fortifications at Hilsea (the portion of the scheme to which I desire to introduce to your notice at present) are intended to protect the northern extremity of the Isle of Portsea. The defences will consist of three huge bastions, with flanking batteries armed with heavy guns, and at the extremities of these "works," that is to say, on the shore of Langston Harbour on the east, and Portsmouth Harbour on the west, two demi-bastions will be erected. The entire line is to be constructed in the most solid manner, and in front a deep moat, 150 feet wide, will add to its watery defences to the position. But in addition, there are to be three triangular out-works of enormous extent, in advance of the main line, and to be connected therewith by drawbridges, covertways, &c.

These works will be strongly placed behind a creek, which it is intended to widen and deepen so as to admit of the passage of gunboats to and fro from Langston to Portsmouth harbours; and if to the above obstacles we add the thousands of acres of mud, sea slush, and other slimy difficulties that an enemy advancing upon Portsmouth would have to overcome, we have said enough to show the serious difficulties he would meet with at this point.

And now, sir, I am going to suppose what I know is a monstrous and unheard-of flight of fancy, a stretch of the imagination. But, nevertheless, let us suppose an impossibility if you like—that is, that an enemy not liking to take the trouble to carry the Hilsea defences, prefers taking possession of Portsdown hill, a commanding position, and as most of your readers know, is conveniently planted at a distance of about 2000 yards from these batteries and earthworks.

I will not stay to inquire by what absurd combination of impossibilities an enemy finds himself upon our virgin soil, or by what miracle a few thousand French or Russian artilleryists may some day find themselves looking down from the heights of Portsdown hill, not only upon the Hilsea forts, but also upon our chief naval arsenal, and the scores of splendid screw liners, that may then be lying in ordinary and reserve in the harbour all but at their feet below.

But having accepted the disagreeable idea for the moment, let us imagine what would be the consequences to us, nationally, if an enemy well suppled with rifled advance, half as destructive as Armstrong's or Whitworth's, had possession Portsdown hill for a day, or even for a few hours.

Why, not a ship—nor a shed—in Portsmouth Yard, or Harbour, would be out of range of the fire of the guns of an enemy planted on the hill, while the guns at Hilsea forts would be unable to render the least assistance. In a word, Portsmouth dockyard—the ships, stores, and valuable materials might be destroyed with ease, all the bastions, demi-bastions at Helsea notwithstanding.

I know it is argued, that in the event of such an absurdity, as an invasion of our shores, nothing would be easier than to send a few men to the "hill," raise defences, and render it difficult of capture. But it really seems nonsense to reason in this way; for if the position is the Key of Portsmouth, on the land side, and is so easily made impregnable, why not do so? If two or three redoubts or batteries armed with guns of 5-mile range, and terrible accuracy of fire, would not only secure the approaches to our chief naval arsenal but protect the lakes, the harbour, and the dockyard itself—it does seem absurd not to erect them. If a few thousands of pounds spent upon the "hill" are equivalent to millions spent upon the plain, why don't we strengthen our position and save our money? But even supposing the works at Hilsea are necessary for the defence of that portion of the Isle of Portsea, and I am not denying their utility, in this respect, why leave it to chance or the fortune of war, or any other slippery jade to get hold of Portsdown hill, and shell the arsenal ships, ay, and even the Hilsea forts to "smash" without, as it appears to me, the least chance of getting a shot to bear in return. I am, sir, obediently yours,

COUP DE BONHEUR.

Portsmouth, Feb. 24th.

THE PURCHASE SYSTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I believe your remarks on the subject of purchase in the Army are generally concurred in, but if the system is to be continued at all, it must be confined to the strictly legitimate line, or most certainly before long such an *exposé* will take place as will shake it down in spite of the powerful influence of its present supporters. A regulation ought to be at once made that no officer should be purchased over by a junior in the same regiment; this would soften somewhat the annoyance an officer must naturally feel at seeing one who has served under him for some years suddenly made his superior; and, besides, generally an officer might be selected from the whole Army to purchase senior to those who would be passed over; a rule of this sort would also have the effect of putting a stop to the large sums of money being paid over regulation, as is now the case. Besides the many objections to the system itself, there are, as you are aware, very many abuses of it, and which, indeed, have rendered it the more intolerable; one case of this kind is the permitting a commanding officer of a regiment (a full Colonel) to retire on half-pay, and bring in another officer to sell a very short time, perhaps two or three months only, before he is sure of being promoted a Major-General, thus making the steps go by purchase instead of its being a non-purchase promotion throughout the regiment, as it would be if he remained. This too is not only a most glaring injustice, and grumbled at *by every one*, but it is also impossible for the authorities at the Horse Guards to pretend to be ignorant as to the Colonel's object in making such an arrangement. The Commander-in-Chief, his military secretary, as also all other military men, know as well what it means as if the application were made in the following words:—"As the officers for *purchase* in the regiment under my command have agreed to give me 1500*l.* on my making a vacancy, to go by purchase, in the regiment, I have the honour to request that I may be permitted to retire on half pay, and that an officer may be brought in to sell." This is a case specially calling for interference, and it is somewhat surprising that the authorities have ever allowed it, as in the event of any disappointed man bringing it before the public, it is not likely that the Horse Guards would be held blameless.—I am, &c.,

AN OBSERVER.

Digitized by Google

THE ARMY.

7th Dragoon Guards. Captain Welstead is about to retire from the service, and Lieutenant Wentworth purchases the troop.

6th Dragoons. Cornet J. T. Fitz Simon has qualified as an interpreter in Hindostanee.

8th Hussars. Lieutenant Goldsworthy has passed an examination in Hindostanee.

5th Lancers. The head-quarter (fourth and last) division, consisting of one squadron of the 5th Royal Irish Lancers, embarked at the North Wall on the 20th, on board the Windsor, freight ship, for Liverpool, thence to march to Aldershot. The following officers have embarked with this division :—Lieut. Colonel Sullivan, commanding; Lieutenant Murphy and Cornet Vandeleur, Lieutenant and Adjutant Weaver, Paymaster Dyer, Surgeon Huish, Assistant Surgeon Atkinson, Quartermaster Griffiths, Riding Master Rant, and Acting Veterinary Surgeon Mills. Major G. E. Hillier, of this regiment, having been appointed by his Excellency the Lord-Lieutenant an assistant inspector general of the constabulary force in Ireland, will soon retire from the army. Major Hillier is a very able and experienced officer, and a better appointment could hardly have been made.

12th Lancers. The depôt will shortly leave Maidstone to meet the regiment on its return from India.

14th Light Dragoons. Lieutenant Gowan has leave to precede his regiment to England.

Royal Artillery. The Coast Brigade [of Artillery will be entrusted with the duties of providing from the stores the necessary guns and ammunition required by the several Volunteer artillery corps. The stations of the Brigade are as follows :—Head-quarters, Woolwich—Major Campbell, Adjutant Cole, and Lieutenant and Quartermaster Anderson; Tower of London—Captain M'Gorrery; Ireland — Captains Handyside, Henry, and Lieutenant M'Murray; Western District—Captain Henry, Lieutenants Kettle and Thomson; South-Eastern District—Captains M'Kenzie and Sweeney, Lieutenants Macgillivray and Scott; South-Western District—Captain Rogan and Lieutenant Phillips; North Britain—Captain Elliott.

Royal Engineers. Colonel Burgman has proceeded to the Mauritius from Guernsey; Lieut.-Colonel Dill has returned to England from the Cape of Good Hope on sick leave: Captain E. M. Grain has left to assume the command of the 20th company at Swan River; and Major Du Cane has proceeded for service in the West Indies.

Grenadier Guards. 1st. Battalion move from Wellington Barracks to the St. George's, Kensington, and Magazine Barracks; 2nd Battalion from Windsor to Portman-street and St. John's Wood Barracks on the 3rd of April; the 3rd Battalion remains in Dublin till September.

The Earl of Sefton, who is about to retire from the 3rd battalion of the Grenadier Guards, has, according to custom amongst the officers of the regiment, presented his companions in arms with a magnificent souvenir for the mess-room. In order to combine the useful with the ornamental, the noble earl has had constructed a very large and elaborate silver and ebony clock of chaste design, and appropriately supported at the corners by military figures in chased silver, to which the further interest is attached that they are all portraits of soldiers in the regiment who had distinguished themselves throughout the Crimean war, and more especially in "the soldiers' battle," at Inkerman. These brave fellows are not "un-named demi-gods;" their names are Elger, Bancroft, Baldwin, and King.

Coldstream Guards. 1st. Battalion move from Portman-street and St. John's Wood Barracks to Wellington Barracks; 2nd Battalion from the Tower of London to Windsor, April 3.

Scots Fusilier Guards. 1st. Battalion from St. George's, Kensington, and Magazine Barracks, to Wellington Barracks; 2nd Battalion from Wellington Barracks to the Tower of London.

5th Fusiliers. 1st Batallion. The death of Dr. Cameron of this corps is announced as having occurred at Bombay. Lieutenant E. S. Lewis has arrived in England. Assistant-Surgeon Whitty has leave home from India.

6th Regiment. Captain Mosse has leave to England.

9th Regiment. 1st battalion.—The head quarters arrived at Corfu, on the 13th instant, and disembarked. The remainder of the battalion, numbering about 350 of all ranks, are awaiting embarkation in the Indiana at Portsmouth.

14th. Regiment. The troop-ship Perseverance, carrying the 1st battalion of the 9th Regiment, arrived at Corfu on Monday the 13th inst., and as soon as possible proceeded to disembark the troops, all of whom appeared to be in good health and spirits. The arrival of the Perseverance has been looked forward to for some time past, as it was known that she would bring out the "relief" for the 14th Regiment, under orders to proceed to the West Indies. The latter regiment, the destination of which is, we understand, Jamaica, is in a state of readiness, and will embark almost immediately in the Perseverance. Jamaica, once identified with sickness and death, is now perhaps one of the pleasantest military stations in the West Indies, a fact the knowledge of which may serve to comfort the relatives of those proceeding thither. The first impression on the mind of a European landing at Port Royal is, we confess, not a very favourable one; nor is it likely to be removed by a visit to the cemetery, or by reading the inscriptions upon the monuments in the church. The latter, however, arises in a great measure from the singular custom once prevailing of always recording by inscription the cause of death, when yellow fever happened to be that cause, and leaving out all mention of the particular cause of death in every other case. The result of this is to impress the visitor with the notion that all the deaths that have occurred in Port Royal have been caused by "that dreadful scourge," as it is called. If a practice similar to this prevailed in any given locality in England, with respect to deaths resulting from consumption, the effect of it would be to impress visitors with the idea that the locality in question was visited above all others by that disease. The heat at Jamaica is great, but always daily attempered by the sea breeze yclept the doctor; and many Europeans have lived there in the enjoyment of good health by attention to the ordinary precautions necessary to a residence in the tropics. The troops stationed up the country have nothing to complain of on the score of climate, as the use of blankets and bed-room fires testifies. The 14th Regiment carries with it the good wishes of all the community at Corfu; and its departure will be deservedly regretted by the society of this island.

28th Regiment. Major Godley is about to retire from the service. Lieutenant M'Cormack obtains the vacant Company.

33rd Regiment. Lieutenant Statham has qualified himself as an interpreter in Hindostanee.

37th Regiment. Lieutenant Reece and Ensign Hodgkinson have been granted leave to England.

55th Regiment. Captain Parke of this regiment was assessed in 450*l.* damages by a Dublin Jury last week for repeating a statement that Licutenant Bell, formerly in the regiment, had taken a gold chain from a house of ill-fame in Dublin. Mr. Bell admitted taking the chain, but he said he did so without knowing it, having attached it to his watch when in the house, and having forgotten to take it off till he had left.

78th Highlanders.—Move to Edinburgh from Fort George, to be stationed at the Castle.

88th Regiment. Lieut.-Colonel Maynard has arrived in England on leave.

1st West India Regiment.—The following Garrison Order has been issued at Nassau :—Brigade Office, Nassau, Jan. 12, 1860.—Garrison Orders.—No. 1. Lieut.-Colonel Bourchier takes the earliest opportunity of expressing his thanks to Major Fletcher, the officers, non-commissioned officers, and men of the 1st West India Regiment for the prompt manner in which they turned out and lent their efforts to arrest the extension of the late fire at Fort Charlotte. Such occasions as these test the discipline of a corps in a high degree; the more so when, as in the instance referred to, the danger of an explosion from the proximity of the flames to the depôt magazine of the garrison might have been regarded as imminent. Where all were zealous, the conduct of Ensign Bourke, 1st West India Regiment, was most conspicuous, who, assisted by Company Sergeant-Major Mason, and a party of four men, placed wet blankets over the most exposed portion of the roof of the magazine; and it will be the duty of, as well as most gratifying to Lieut.-Colonel Bourchier, in bringing the circumstances under the notice of His Royal Highness the General Commanding-in-Chief, to call attention thereto. Nor can Lieut.-Colonel Bourchier omit from the number of those who deserve special mention the names of Deputy-Assistant-Commissary-General Hackman, and Mr. W. J. Clark, Clerk of Works, Royal Engineer Department, who, when the several officers of the regiment were engaged in making arrangements for the distribution, &c., of the men, accompanied him to the magazine and ascertained that no danger of an explosion was to be apprehended from any injury the walls might have sustained, or from the presence of any sparks from the building destroyed, situated within a few feet only of the magazine. The result of this examination was so satisfactory that the troops remained in camp, and the panic which existed amongst the inhabitants of the town was entirely removed. By order, (signed) W. H. Strachan, Lieutenant, Acting Fort Adjutant.

Batta for Persia.—In the House of Commons on Tuesday evening, Mr. Adam asked the Secretary of State for India if he would state the substance of any communication which he had lately received from the government of India, regarding the payment of extra batta to the troops engaged in the Persian war; and, whether Her Majesty's Government were prepared now to recommend the payment of such batta. Sir C. Wood replied that a short time ago a recommendation had been made on this subject by the government of India. The value of batta obtained in Persia was small in amount, and the Government considered that the forces engaged in that expedition by land and sea had an equitable claim for six months' batta. Under the arrangement devised one-half of the amount was to be paid out of the Indian revenue, and one-half out of the revenue of this country. He had made application to his right hon. friend (Mr. S. Herbert) to know whether the War-Office was prepared to carry out its part of the arrangement; and, although he had received no official answer, he believed the application would be acceded to.

The General Commanding-in-Chief, accompanied by the Right Hon. Sidney Herbert, Secretary of State for War, on Tuesday visited the Armstrong gun factory, and the pattern room where some of the guns are deposited in Woolwich Arsenal.

The ceremony of laying the foundation stone of the Crimean Memorial at Brompton Barracks, which was to have taken place yesterday, has been postponed, in consequence of His Royal Highness the Duke of Cambridge not being able to be present, and it is now understood that his Royal Highness will perform the ceremony on Thursday next, the 1st of March. The whole of the officers of the Royal Engineers, at present serving in Great Britain and Ireland, have been forwarded invitations to be present on the occasion, and extensive preparations are in progress at Brompton Barracks to give *eclât* to the proceedings.

Lieutenant A. E. Oakes, of the 41st Madras Native Infantry, has been sentenced by a European General Court Martial assembled at Rangoon, to be cashiered, and the sentence has been approved and confirmed by the Commander-in-Chief.

The Surveying Expedition to New Zealand.—The officers and men of the Royal Engineers who have been selected to proceed to New Zealand for the purpose of making a survey of that colony are expected to embark during the ensuing week, the vessel taking up for their conveyance being the Nugget. The 6th (Captain Mould's) company of Royal Engineers, at present in New Zealand, will return to England on the arrival of the detachment. The expedition will take out every description of sapping and mining implements, surveying instruments, portable India-rubber pontoon boats for crossing the streams, waterproof tents, photographic apparatus, &c. The detachment will be absent from England some considerable time, and during the time the engineers are employed on the surveying duties, they will be allowed a considerable augmentation of their regimental pay. The men have all been supplied with proper clothing by the Government, and all their necessaries will be furnished them gratuitously. An inspection of the detachment has been made at the Royal Engineer establishment, Brompton.

Chatham Garrison.—The first of the brigade field-days of the season took place on Monday morning last, on which occasion the entire force of the garrison marched to Chatham Lines, where the troops were reviewed by Major-General Eyre commanding the district. The troops on the ground included the three battalions of infantry, including 17 depots of East India regiments, the depot of the St. Helena regiment, the corps of Royal and Indian Engineers, and the battalion of Royal Marine Light Infantry, the entire force numbering about 5,000 troops of all ranks, with upwards of 100 officers. The General arrived on the ground at 11 o'clock, and immediately put the troops through a variety of manœuvres incidental to a brigade field-day, all of which were executed with great steadiness and precision. The garrison is now very strong, and recruiting for the several corps is proceeding very briskly. The East India and China depots have been recruited up to their required strength, and the three battalions now number nearly 5,000 bayonets. Recruiting for the Chatham division of Royal Marines is also proceeding very briskly, notwithstanding the reduction of the bounty, and the division is now about 200 men above its proper strength.

Presentation of Testimonials to Non-Commissioned Officers.—A valuable gold watch and chain has been presented by the non-commissioned officers of Chatham garrison to Sergeant-Major J. Russell, for many years chief clerk in the garrison brigade-office, on the occasion of his quitting the service. The testimonial was presented on Saturday evening last, in the non-commissioned officers' mess-room, Chatham Barracks, in the presence of a large number of the non-commissioned officers belonging to the various branches of the service. The following is the inscription engraved on the inside of the watch :—"Presented to Sergeant-Major John Russell, by the non-commissioned officers of the garrison of Chatham, as a token of their esteem and regard, Feb. 18, 1860." Sergeant-Major Russell has been upwards of twenty years in the service, during the whole of which period he has borne a most exemplary character. A massive silver goblet has also been presented by the 27th Company of Royal Engineers, at Chatham, to Colour-Sergeant J. Morant, R.E., on the occasion of his proceeding to New Zealand with the surveying expedition. The testimonial bears a suitable inscription.

Royal Engineers' Library.—A number of beautifully-executed maps and plates of incidents connected with the Crimean campaign, have been presented to the non-commissioned officers' library at the Royal Engineers' establishment, Chatham, by the War Department.

Canterbury.—The Soldiers' Institute, which is kept up entirely by funds supplied by the citizens of Canterbury, is in so flourishing a state that two more rooms have been added to it during the present week. Its success is said to result from the absence from it of all religious instruction. It is a religious institution, because all its arrangements tend to keep men from vicious habits. But it is used as a club-house, and not as a church. Men of all creeds meet there in harmony; and when religious instruction is given they assemble at the barracks, and not in the Soldiers' Institute. We believe the principle adopted to be a sound one. The military cemetery is being entirely changed in appearance; it will soon be one of the ornaments of the city. The dean and chapter have behaved very liberally in the matter, and by their co-operation a great work has been carried out. It is very creditable to the garrison that the men made a special request that they might be called upon for funds to put the cemetery in a becoming condition. The health of the troops continues excellent, and their conduct highly exemplary.

On Saturday evening last the non-commissioned officers and men belonging to the No. 11 Company of the 98th Regiment assembled in the company's room in the Infantry Barracks, for the purpose of presenting a testimonial to Colour-sergeant John Mara, on his retirement from the Service. The testimonial (which was presented by Colour-sergeant Bryan, on behalf of the company) was a richly-chased silver cup, representing a beautiful rose surrounded by a wreath of laurels, &c. On the reverse side were the lines :

> This simple cup, with many a wish,
> We give, and wish him well;
> There's heartfelt meaning in the words,
> "Farewell! old friend, farewell!"

Colour-sergeant Mara, who wears the good-conduct medal, and is in receipt of the 15*l.* gratuity, is a brave and meritorious non-commissioned officer, and much respected by his comrades in arms. He has been twenty-one years in the Service, and nineteen years a non-commissioned office. He was in India during the mutiny of 1858-9, and lost all his effects while returning in the Eastern Monarch, on the burning of that ship off Portsmouth, on the 3rd of June last. He now leaves Her Majesty's service with the well wishes of the non-commissioned officers and men of the regiment in which he so honourably distinguished himself.

It appears that instructions have lately been issued from the War Office, placing the Queen's troops serving at Hong Kong on the colonial scale of allowances instead of the Indian. The privations and monotonous life of officers and troops destined to serve in that unhealthy colony entitle them at least to allowances equal to the Indian scale. Ceylon and other parts of India are perfect sanatoriums compared with Hong Kong; provisions, servants, &c., are also only about one-half the cost. This fact of course increases the injustice, and on what grounds the authorities at the War Office arrived at their conclusion we cannot conceive. Surely they could have obtained the evidence of gentlemen who had been resident there, competent to give an unbiassed opinion on the subject.

WAR-OFFICE, PALL MALL, Feb. 21.

6th Regiment of Dragoon Guards—Captain Cecil Frederic Holder, from 1st Dragoons, to be Captain, vice Astley, who exchanges; Cornet John Buchan Hepburn to be Lieutenant, by purchase, vice Uniacke, promoted.

7th Dragoon Guards—Joseph Thomas Cammilleri, Gent., to be Cornet, without purchase, vice Erskine, promoted.

1st Dragoons—Captain Francis Nathaniel Astley, from the 6th Dragoon Guards, to be Captain, vice Holder, who

exchanges; Cornet Carr Stuart Glyn to be Lieutenant, by purchase, vice Graburn, who retires.

3rd Light Dragoons—William Perceval Maxwell, Gent., to be Cornet, by purchase, vice Higgins, who retires.

9th Light Dragoons—Lieutenant James Goldie to be Captain, by purchase, vice Head, who retires; Cornet Frederick Robert Cameron Crofton to be Lieutenant, by purchase, vice Goldie.

13th Light Dragoons—Major Arthur Tremayne to be Lieutenant-Colonel, by purchase, vice Holden, who retires; Captain Edward Lennox Jervis to be Major, by purchase, vice Tremayne; Lieutenant William Atkinson to be Captain, by purchase, vice Jervis; Cornet George Croft Huddleston to be Lieutenant, by purchase, vice Atkinson.

15th Light Dragoons—Ensign Hugh Humphrys, from the 20th Foot, to be Cornet, paying the difference between Infantry and Cavalry, vice Broun, promoted.

17th Light Dragoons—Major Robert White to be Lieutenant-Colonel, by purchase, vice Learmouth, who retires; Captain Lewis Edward Knight to be Major, by purchase, vice White; Lieutenant Charles Waymouth to be Captain, by purchase, vice Knight.

Royal Engineers—Brevet-Colonel Charles Edmund Wilkinson to be Colonel, vice Rose, deceased; Brevet-Major Arthur Henry Freeling, on the seconded list, to be Lieutenant-Colonel; Brevet-Major Harry St. George Ord, on the seconded list, to be Lieutenant-Colonel; Brevet-Major Hampden Clement Blamire Moody to be Lieutenant-Colonel, vice Wilkinson; Second Captain and Brevet-Major Charles Hubert Sedley to be Captain, vice Moody; Lieutenant Robert Nicholl Dawson to be Second Captain, vice Sedley. The date of the promotion of Captain S. B. Farrell, Captain C. W. Barry, and Second Captain J. P. Maquay to be antedated to Nov. 28, 1859.

Military Train—Ensign Wilkinson Shaw, from 15th Foot, to be Lieutenant, by purchase, vice Neville, who has retired; James Simpson, Gent., to be Ensign, without purchase, vice Adams, promoted.

3rd Regiment of Foot—Surgeon Joseph Burke, having completed 20 years' full-pay service, to be Surgeon-Major under the Royal Warrant of Oct. 1, 1858.

4th Foot—The third Christian name of Ensign Hepburn, appointed in *Gazette* of 6th January, 1860, is Buchan.

6th Foot—Captain John Jennings Kendall, from the 44th Foot, to be Captain, vice Mansergh, who exchanges.

11th Foot—Major Augustus Frederick Jenner to be Lieutenant-Colonel, without purchase, vice Brevet-Colonel Singleton, retired on full pay; Major and Brevet-Colonel Charles Wise, from half-pay unattached, to be Major, vice Jenner; Captain John Roe to be Major, by purchase, vice Brevet-Colonel Wise, who retires; Lieutenant Abraham Martin to be Captain, by purchase, vice Roe; Ensign William Arthur Irwin to be Lieutenant, by purchase, vice Martin; Edward Lee Street, Gent., to be Ensign, by purchase, vice S. C. Dixon, promoted.

15th Foot—Lieutenant William Robert Estridge Durrant, from the 96th Foot, to be Lieutenant, vice Mostyn, who exchanges.

18th Foot—Ensign George Lawson Hall Poole to be Lieutenant, by purchase, vice William Hill James, appointed to the 31st Foot; Ensign William Edward Twyning to be Lieutenant, by purchase, vice Le Brun, who has retired; Ensign Edward Ashurst Marsland to be Lieutenant, by purchase, vice Kemp, promoted; Robert Bent Farwell, Esq., to be Paymaster, vice Preston, placed upon half-pay.

22nd Foot—Lieutenant Ernest Theodore Evans, from the 2nd West India Regiment, to be Lieutenant, vice Burt, who exchanges.

23rd Foot—Ensign Henry Frederick Seagram to be Lieutenant, by purchase, vice Bloxsome, who retires.

24th Foot—Captain George Lake Hedley, from the 94th Foot, to be Captain, vice Tovey, who exchanges; Quartermaster-Sergeant James Hawkins to be Quartermaster, vice Cusack, appointed Lieutenant and Adjutant.

25th Foot—Ensign Horace William Scriven to be Instructor of Musketry; Ensign Henry Wilkinson to be Quartermaster.

26th Foot—Lieutenant George Wilbraham Northey to be Captain, by purchase, vice Hardinge, who retires; Ensign Lancelot Allgood Gregson to be Lieutenant, by purchase, vice Northey; Archibald Duffield Eden, Gent., to be Ensign, by purchase, vice Gregson.

28th Foot—Ensign Edward Brett to be Lieutenant, without purchase, vice Wade, deceased.

32nd Foot—Major Granville George Chetwynd Stapylton, from the 98th Foot, to be Major, vice Brevet-Lieutenant-Colonel Bell, who exchanges.

33rd Foot—Lieutenant Charles Whateley Willis to be Captain, by purchase, vice Rogers, who retires; Ensign William Henry Gore to be Lieutenant, by purchase, vice Twining, who retires.

44th Foot—Captain John Loftus Otway Mansergh, from the 6th Foot, to be Captain, vice Kendall, who exchanges.

45th Foot—Brevet-Colonel Henry Anderson, from Invalid Depot, at Chatham, to be Major, vice Brevet-Colonel Shaw, who exchanges; Ensign Oscar William de Thoren, from the 90th Foot, to be Ensign, vice Nolan, who exchanges.

46th Foot—Lieutenant-Colonel Charles Clement Deacon, C.B., from the 61st Foot, to be Lieutenant-Colonel, vice Brevet-Colonel Alexander Maxwell, C.B., who retires upon half-pay.

49th Foot—Captain Fanshawe William Gostling to be Major, by purchase, vice Brevet-Lieutenant-Colonel White, who retires; Lieutenant William Madan to be Captain, by purchase, vice Gostling; Lieutenant William Magee, from half-pay, late Land Transport Corps, to be Lieutenant, vice Cahill, promoted to an Unattached Company, without purchase; Ensign Robert Oliver Aldworth to be Lieutenant, by purchase, vice Madan.

52nd Foot—Lieutenant Charles Middleton Prendergast to be Adjutant, vice Julian, promoted.

56th Foot—Lieutenant James Fleming Baxter to be Captain, by purchase, vice Tolcher, who retires; Ensign John Charley to be Lieutenant, by purchase, vice Baxter.

58th Foot—The Christian names of Captain Hingeston are William Henry, and not Henry only, as hitherto stated.

60th Foot—Lieutenant Francis Vernon Northey to be Instructor of Musketry.

75th Foot—Assistant-Surgeon Robert Woods has been permitted to resign his commission.

79th Foot—The surname of the Officer promoted on the 6th of December, 1859, is Mackesy, and not Mackesey, as then stated.

80th Foot—Captain Henry Rowland, from the 3rd West India Regiment, to be Captain, vice Batcheler, who exchanges.

83rd Foot—Lieutenant Henry Gandy to be Captain by purchase, vice Wyvill, who retires.

84th Foot—Lieutenant Montgomery Williams to be Captain, by purchase, vice Keats, who retires; Ensign William Frank Wheatley to be Lieutenant, by purchase, vice Williams; George Edward Montagu, Gent., to be Ensign, by purchase, vice Wheatley.

87th Foot—Ensign Robert Edward Colborne Jarvis, from the 100th Foot, to be Ensign, vice Storey, promoted.

90th Foot—Ensign Richard Albert Nolan, from the 45th Foot, to be Ensign, vice De Thoren, who exchanges.

91st Foot—William Darling Candwell, Gent., to be Ensign, by purchase, vice Leatham, appointed to the 75th Foot.

93rd Foot—Ensign William Fullarton Fullarton to be Lieutenant, by purchase, vice Deans — Campbell, who retires.

94th Foot—Captain James Tennent Tovey, from the 24th Foot, to be Captain, vice Hedley, who exchanges.

96th Foot—Lieutenant Robert Algeo Mostyn, from the 15th Foot, to be Lieutenant, vice Durrant, who exchanges.

97th Foot—Ensign Robert Thompson to be Lieutenant, by purchase, vice Lowe, who retires.

98th Foot—Brevet-Lieutenant-Colonel William Bell, from the 32nd Foot, to be Major, vice Stapylton, who exchanges; Archibald Rowan Hamilton, Gent., to be Ensign, by purchase, vice Onslow, appointed to the 43rd Foot.

100th Foot—Ensign Frederick Morris to be Lieutenant, without purchase, vice Rykert, deceased; Sergeant-Major Arthur Taylor to be Ensign, without purchase, vice Skinner, appointed to the 38th Foot.

Rifle Brigade—The Hon. Charles Gounter Legge to be Ensign, by purchase, vice Myers, promoted.

2nd West India Regiment—Lieutenant George Henry Burt, from the 22nd Foot, to be Lieutenant, vice Evans, who exchanges.

3rd West India Regiment—Captain Horatio Pettus Batcheler, from the 80th Foot, to be Captain, vice Rowland, who exchanges; Lieutenant Henry James Rainsford has been permitted to retire from the service by the sale of his commission.

Depôt Battalion.

Major Henry James Buchanan, from half-pay unattached, to be Major, vice Brevet-Lieutenant-Colonel Fanshawe, who exchanges.

Surgeon Alexander Gibb, M.D., having completed 20 years' full-pay service, to be Surgeon-Major, under the Royal Warrant of the 1st October, 1858.

Invalid Depôt (Chatham).

Brevet-Lieutenant-Colonel Henry John Shaw, from the 45th Foot, to be Major-Superintendent, vice Brevet-Colonel Anderson, who exchanges.

Recruiting District.

Major and Brevet-Colonel Richard Gardiner, from the 76th Foot, to be Inspecting Field Officer, vice Brevet-Colonel Thomas A. Drought, promoted to the rank of Major-General.

Hospital Staff.

Surgeon John Stuart Smith, M.D., having completed 20 years' full-pay service, to be Surgeon-Major, under the Royal Warrant of the 1st October, 1858.

Surgeon George Murray Webster, M.D., having completed 20 years' full-pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

Surgeon James Alexander Fraser, M.D., having completed 20 years' full-pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

To be Assistant-Surgeons to the Forces—Austen Bruen, Gent.; Francis Falwasser, Gent.; Robert Waters, M.D.; John Butler Hamilton, M.B.; Edward Denham Tomlinson, Gent.; John James Chappell, M.D.; Matthew James Edward Fagan, M.D.; William Cherry, Gent.; Samuel Edward Maunsell, Gent.; Edward Knapp Würtele Smith, M.D.; William Traill, M.D.; Nicholas Avent, Gent.; Martin Joseph Burke, M.D., vice Creasey, appointed to the 25th Foot; William Christy Robinson, Gent., vice Markey, appointed to 25th Foot; John Wales, Gent., vice White, appointed to 1st Foot; Joseph Francis Ashby, Gent., vice Carson, appointed to the 2nd Foot; James Robert Gaussen, M.B., vice M'Gilp, deceased; John Livingstone Power, Gent., vice M'Farland, appointed to the 77th Foot; Patrick Walter Stafford, Gent.; Thomas Henry White, M.D.; William Henry Hill, Gent.; Thomas Quinlan, Gent.; Owen Owen, Gent.; James Ferguson, Gent.; Edward Joseph Boulton, Gent.; James Stevenson, Gent.; George Elmsly Will, Gent.

Brevet.

Brevet-Colonel John Singleton, retired full-pay 11th Foot, to be Major-General, the rank being honorary only.

The under-mentioned promotions to take place consequent on the death of General Sir William Francis Patrick Napier, K.C.B., Colonel of the 22nd Regiment, on the 12th of February, 1860:—

Lieut.-General Sir James Fergusson, K.C.B., Colonel of the 43rd Regiment, to be General.

Major-General Ernest Frederick Gascoigne, Colonel of the 69th Foot, to be Lieut.-General.

Brevet-Colonel the Honourable Augustus Almoric Spencer, C.B., half-pay 44th Foot, to be Major-General.

Lieut.-Colonel Charles Edward Michel, 54th Foot, to be Colonel.

Brevet-Major John Bruce, Captain half-pay 56th Foot, Staff-officer of Pensioners, with the local rank of Lieut.-Colonel in Western Australia, to be Lieut.-Colonel.

Captain Robert Frederick Mountain, Royal Artillery, to be Major.

Memorandum.—The exchange between Lieut. Reginald Brocas, 75th Foot, and Lieutenant Francis Rawdon Macnamara, 93rd Foot, as stated in the *Gazette* of the 3rd February, 1860, has been cancelled.

SHORNCLIFFE CAMP.

In consequence of the wet condition of the north-western part of the camp, working parties from the 47th Regiment and the 2nd Royal Cheshire Regiment of Militia have been for some days tile-draining that portion of the camp under the direction of the Royal Engineer Corps. This, when effectually completed, will be a great improvement to the camp, and afford a clean and dry place for exercise.

On Tuesday last the whole of the regiments in camp, under the command of General Mansel, paraded in full marching order, and afterwards marched to Hythe, returning by way of Saltwood and Newington. There have been but one or two deaths since last October; this, in such a numerous body of men, consisting of three strong regiments of Infantry, a company of Royal Engineers, four batteries of the Royal Artillery, a regiment of Militia Artillery, a squadron of Heavy Cavalry, and a battalion of the Military Train, is sufficient to show the healthy state of the camp.

In consequence of Excise information having been laid, and penalties obtained against three of the officers, mess masters, for selling spirits to others than the officers, members of the respective messes of the different regiments, a general order was issued on Wednesday last, prohibiting the sale of ardent spirits in any of the canteens or non-commissioned officers' mess-rooms in the camp, and warning them that they will be subject to domiciliary visits from the Excise, and also from the provosts for the purpose of detecting any infringement of this order. The mess-masters above alluded to, were convicted of selling spirits without a licence, before a full bench of magistrates at Hythe last week, and fined in the mitigated penalty of 12*l.* 10*s.*, and costs 2*l.* 10*s.*, each.

The Antrim Regiment of Artillery have during the past week been exercised with the 18-pounder field battery guns, on camp, and also at the different martello towers in the vicinity. On Thursday a great deal of experimental and practice gunnery took place at Forts Sutherland and Twiss, near Hythe, the guns being worked by detachments of the Antrim Regiment.

Much dissatisfaction continues to be caused amongst the non-commissioned officers and private soldiers on the camp, in consequence of the general order now in force preventing them from going to Folkestone, a little more than a mile from the camp, or to Hythe, about three miles away, without having a pass for that purpose; the soldiers complain that by this regulation they are to a certain extent driven to the village of Sandgate for all they require extra, and for the clothing and food for their wives and families, while the much cheaper market of Folkestone is closed against them unless they are continually asking for passes, which any one conversant with military matters must know are very sparingly granted, and not very frequently repeated to the same parties. A relaxation in this order would be of advantage to the non-commissioned officers and privates, and to a certain extent benefit the tradesmen of Folkestone and Hythe without seriously interfering with those of Sandgate.

ARMY PURCHASE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Your correspondent, "H," in last Saturday's paper, intends your readers to conclude that non-purchasing officers in the line are not promoted so rapidly as those in the Marines, and that, *therefore*, the purchase system does not benefit non-purchasing officers. No one knows better than the author of this statement that the conclusion is false, for he all along admits that to the rank of captain the purchase system does materially aid the promotion of non-purchasers. He himself shows seven Majors promoted without purchase in the portion of the army which he takes for his computations; and as to there being no Lieut.-Colonels promoted without purchase, if he will renew his examination of "Hart's Army List" on the date which he has chosen, he will find probably as many Lieut.-Colonels who have been promoted without having purchased a single step, as of purchasers of every step upwards.

But the laborious and uselessly minute tables which he has got you to publish have no bearing whatever upon the point which he wishes to impress upon the public. It is a simple case of comparative mortality between two bodies of men, the one consisting of 791, and the other of 153. The 120 captains of Marines on the 1st of January, 1856, had succeeded to that rank owing to a corresponding number of previous death vacancies and retirements of superior ranks to full or half pay. The 85 non-purchasing captains of the line on the same day had succeeded to death vacancies only. Purchase had as little effect in the one case as in the other. It is never alleged or pretended that purchase *creates* promotion for non-purchasers; their advantage from it is in the rapid rise which it gives them to the position of seniority, which entitles them to the death vacancies. In all other respects they are exactly in the category of the Marines or any other non-purchasing corps.

It is stated by "H." that first commissions are seldom granted to non-purchasing officers till they are 25 or 30 years of age. I fear this is one of the many misrepresentations made by him to have effect where it cannot be questioned, with a hedge in reserve for those who know, as he does, that it can be only to non-commissioned officers that commissions can be granted at these ages. I have the honour to be, sir, Your very obedient servant,

I.

Canton Field Allowance.—Lord Burghley put a question in the House on Tuesday evening as to when the field allowance claimed by the officers of the Artillery and of the Line, who were sent in the year 1857 to the attack of Canton, in lieu of the consolidated allowance which they were ordered in April, 1859, to refund, was to be paid. Mr. S. Herbert said that part of the allowance which was due to officers who remained in China had been paid to them there, while those who came to England had for the most part applied at the War Office and received payment, and any officers who had not yet received the allowance who would make application at the War Office, would find the money forthcoming.

THE NAVY.

ADMIRALTY, FEB. 18.—APPOINTMENTS.—Chief Engineers G. Weeks (1847), to the Cumberland, 70, at Sheerness, for service in the Severn, 51, screw steam frigate, at Chatham; W. G. Barr (1852), to the Asia, 84, at Portsmouth, for service in the Immortalité, 50, screw steam frigate, at Pembroke; and A. M'Innes (1847), to the Virago, 6, paddle-wheel steam sloop, at Devonport.

Acting Chief Engineer J. W. German, to the Cumberland, for service in the Charybdis, 21, screw steam corvette, at Chatham.

First-class Assistant Engineer W. J. Brown, to the Victoria and Albert, 2, steam yatcht, at Portsmouth, for service in the Elfin, steam yacht, at Portsmouth.

Third-class Assistant Engineer, M. B. Kelly, to the Cumberland, for temporary charge of the machinery of the Wasp, 13, screw steam-sloop, at Sheerness.

Acting third-class Assistant Engineers J. Bell (b), to the Cumberland, for service in the Meeanee, 80, screw steamship at Sheerness; and A. B. M'Luckie, to the Victoria and Albert.

FEB. 21.—Lieutenants T. W. Chapman, to the Centurion; Walter S. D. Kantzau, to the Nile; George Morice, to the Flying Fish; Richard Chambers, to the Hawke.

Surgeons James Flanagan, to the Firefly; Robert Bernard, to the Trafalgar.

Master F. Skead, to the Firefly.

Second Master F. B. Christian, to the Firefly.

Master's Assistant F. J. Gray, to the Firefly.

Assistant Paymaster W. H. M. Arnold, to the Wellington.

Assistant Paymaster in charge Charles A. Shapcote, to the Firefly.

First Class Assistant Engineer Charles J. Sergant, to the Firefly.

Second Class Assistant Engineers Ed. P. Read, to the Wellington, as supernumary; Henry Knight, confirmed, of the Hawke, for service in the Magpie (additional).

Third Class Assistant Engineer G. H. Newbury, to the Firefly.

Acting Third Class Assistant Engineers Daniel Wishart, to the Firefly; Hugh Duncan, for temporary service, to the Wellington, as supernumerary.

FEB. 22.—Lieutenants R. Sheepshanks to the Excellent; A. Jacob, to the Snail; E. H. B. Hartwell, to the Aboukir; H. F. Campbell, to the Royal Albert (additional) for disposal; C. A. G. Bridge, to the Algiers; and G. Powys, to the Hero.

Chief-Engineer S. Harris, to the Wellington, for charge of the machinery of the Brunswick, upon that ship being paid off.

First Class Assistant-Engineer H. Cook, promoted to the Banterer.

Second Class Assistant-Engineer J. Singer, promoted to the Orion.

Acting Third Class Assistant-Engineer E. Chambers, to the Fisgard, for service in the Bustler.

FEB. 23.—Master J. Kellock (1841), to the Hogue, 60, screw steam-ship, on coast-guard service, at Greenock.

First Class Assistant-Engineer R. Madge, to the Fisgard, 42, at Woolwich, for charge of the machinery of the Griffin.

Lieutenant Algernon C. F. Heneage, flag-lieutenant to Rear-Admiral the Hon. Sir Henry Keppel, K.C.B., Commander-in-Chief on the Cape of Good Hope station.

Ariadne, 26, screw, Captain Vansittart, made her final and most successful trial on Thursday, at the measured distance in Stokes Bay. The trial had been looked forward to with more than ordinary interest, as a test of the results to be obtained by cutting off the leading corners of the Admiralty screw. The trial was superintended by Captain Gordon, of the steam reserve; Mr. Dinnen, Admiralty engineer; Mr. Murdock, inspector of machinery afloat; and Mr. Miller, assistant engineer of her Majesty's dockyard, Portsmouth. Mr. Warrener represented the Messrs. Maudsley, the makers of the engines. The trial was made under the following circumstances: — The vessel's draught, 22 ft. 2 in. aft, 20 ft. 4 in. forward; revolutions (average), 61; steam pressure, 21½ lb.; vacuum, 25; pitch of screw, 25; diameter of screw, 20 ft.; weight of screw, 12 tons; force of wind, 4. The following were the results:—First run, with the tide, 14¼ knots; second run, against the tide 11; third run, with the tide, 15; fourth run, against the tide, 10¼; fifth run, with the tide, 15¼; sixth run, against the tide, 11¼; giving an average of 13 1-10 knots an hour.

Bacchante, 51, screw, steamed out of the basin at Portsmouth on Thursday morning, and berthed alongside the Victorious, hulk, in the harbour. She will take her trial on Monday next, on which occasion the patent steering apparatus, the invention of Admiral Fanshawe Martin, will be tried.

Brilliant, 26, which has been fitted at Chatham for a training-ship for the Naval Coast Volunteers, is completed, and is ordered to proceed to the Thames on Monday next. She has been supplied with her guns, consisting of 10 32-pounders, each of 50 cwt., which will be placed on her main deck.

Brunswick, 80, Capt. E. Ommanney, got up steam in Plymouth Sound on Tuesday, and proceeded to Devonport dockyard to be dismantled. Her sails were unbent, top-gallant masts struck, and running gear unrove the same day.

Bullfinch screw gun-boat, Lieut.-Commander James, at Portsmouth, was on Thursday engaged on a trial of a private screw propeller, at the measured mile in Stokes Bay.

Cameleon, 17, screw steam-vessel, after being launched at Deptford will be removed to Woolwich yard for completion. She is a similar vessel to the Mutine, recently completed, and is constructed with a view to speed.

Castor, 36, intended for a training-ship for the Naval Volunteers, is to be commenced at Chatham as soon as the Brilliant has been removed to London. She is to be supplied, with 18 32-pounders, each of 56 cwt.

Centurion, 80, screw, Captain Rogers, at Devonport, was paid wages in advance on Tuesday.

The Dee, steam store-vessel, Master Commander Pullen, is ordered to leave Woolwich with a full cargo of machinery for vessels completing at the western yards.

Donegal, 101, screw, Captain H. Broadhead, was daily expected at Devonport. Her crew will be paid wages and granted leave. On her arrival there a court-martial will assemble for the trial of a seaman named Sullivan, for striking one of the officers.

Firefly is ordered to be got ready for immediate service.

Heron. The distribution of proceeds received, and tonnage bounty awarded, for the Governor Paris, captured on the 2nd July, 1858, by Her Majesty's ship Heron, will commence on Thursday, the 23rd inst., in the prize branch of the department of the "Accountant-General of the Navy, Admiralty, Somerset House;" and that in reference to a vessel, supposed Mary Elizabeth, captured on 11th of July, 1858, by her Majesty's ship Heron, on the same day.

Himalaya, with the men and guns for China, arrived at Alexandria on the 29th ult., but none of the troops were landed for several days until the arrival at Suez of the Berenice. She left Aden on the 29th ult.

Immortalité, 51, screw, on Thursday hauled out of No. 7 dock at Portsmouth, and was placed in the steam-basin.

Pigmy, 3, paddle, Master-Commanding William Johnstone arrived at Portsmouth on Thursday, with invalids from the Channel Squadron at Portland.

Prince of Wales, 131, screw, has been placed in No. 7 Dock at Portsmouth.

Princess Royal, 91, screw. This ship has now been further opened up and examined, and her defects are greater than was expected. Many of her planks are positively rotten, and we fear that most of the ships that have been lengthened lately will be found at no distant date equally defective.

Racehorse, coal depôt, was taken out of dock at Devonport on Tuesday.

Rhadamanthus, steam store-ship, Master-Commanding Sturdee, arrived at Devonport on Tuesday, from Woolwich and Portsmouth, with machinery.

Sanspariel, 70, Captain Wilmot, C.B., got up steam in Hamoaze on Wednesday and, proceeding round the Breakwater, anchored in the Sound. On passing the Impregnable, she saluted the flag of Port-Admiral Sir Barrington Reynolds. Admiral Superintendent Sir Thomas Pasley, Admiral Kingcome, and other officers, were on board.

Shamrock and Lark, gun-boats, were to be taken out of dock at Devonport yesterday, and the Porcupine and Redwing taken in the same tide.

Vesuvius, 6, paddle sloop, Commodore Wise, recently returned from the West Coast of Africa, was paid off at Woolwich dockyard on Wednesday, and granted leave of absence. The Vesuvius has been highly successful on the slave-preventive service, and the officers and crew will share a large amount of prize-money.

Victoria, 121, screw. This remarkably fine ship is receiving her machinery in the steam basin at Portsmouth. It would appear that we are expanding the dimensions of our ships beyond the capabilities of our docks to receive them, for it is rumoured that no dock in the chief naval arsenal is sufficiently capacious to admit of the Victoria being coppered in. When we recollect that our "faithful ally" has half-a-dozen docks in his new arsenal at Cherbourg capable of receiving the Victoria, we feel almost ashamed to repeat a whisper we have heard, viz., that it will be necessary to send this last specimen of naval architecture either to the Peninsular and Oriental Company's Dock at Southampton, or else to Keyham, to receive her copper.

Victoria and Albert yacht is about to be admitted into the steam basin at Portsmouth for the purpose of being fitted with an apparatus for superheating steam.

Victory, Admiral Bowles, C.B., commander-in-chief at Portsmouth, mustered and inspected the officers and crew of the flag-ship Victory on Wednesday, as well as the officers belonging to the various tenders, who met on board the Victory for the purpose. The gallant admiral paid a high compliment to officers and men, expressing his great satisfaction at the general discipline and steadiness which he had observed on all occasions from the moment his flag was hoisted until the now nearly-completed term of his command. The gallant admiral then bade them all a hearty farewell.

Viper. Tuesday's *Gazette* gives notice that the distribution of proceeds received and tonnage bounty awarded for the St. Andrew, captured on the 20th of June, 1858, by her Majesty's ship Viper, will commence on Monday, the 27th February, at the prize branch of the department of the Accountant-General of the Navy, Admiralty, Somerset-house. The following are the shares due to an individual in the several classes:—Flag share, 94*l.* 15*s.* 4*d.*; lieutenant commanding, 85*l.* 1*s.* 6*d.*; fourth class, 71*l.* 5*s.* 2*d.*; fifth class, 30*l.* 11*s.*; sixth class, 35*l.* 12*s.* 7*d.*; seventh class, 23*l.* 15*s.* 1*d.*; eighth class, 11*l.* 17*s.* 6*d.*; ninth class, 7*l.* 18*s.* 4*d.*: tenth class, 3*l.* 19*s.* 2*d.*

Virago, 6, paddle, Commander W. Dunn, was paid wages at Devonport on Monday.

The Channel fleet, consisting of the Royal Albert, Edgar, Donegal, Algiers, Trafalgar, Queen, Mersey, Melponeme, and Diadem, left Portland at noon on Thursday, under sail for Lisbon.

The flag ship Hannibal received orders by the Perseverance to proceed to Malta, and will probably leave Corfu on Saturday, the 18th inst. On the departure of the Hannibal, Captain Thompson, of the St. Jean D'Acre, will be senior officer, and have under his orders the London, Liffey, and Assurance, their number being probably afterwards increased by the Exmouth. After a short delay at Malta, the Hannibal will proceed to Gibraltar.

Several experiments have recently been carried out at Woolwich dockyard, in the presence of the Commodore Superintendent and other officers of the establishment, for the purpose of testing the efficiency of an entire new system of ocean telegraphing, invented by Mr. Ward, of Auburn, United States, and intended to supersede his former plan, which consisted of five small lamps arranged in a diamond form. The new system consists of three lanterns, each having four squares, and lighted with four candles; and the operation of working the signals is performed by means of cords attached to the glass shades. The experiments proved that the signals could be distinctly read at a distance of two miles, the light produced being remarkably brilliant.

Mr. Bertram, who for many years was foreman at the steam-factory department at Woolwich dockyard, has applied to the War Department relative to the application of his plan of welded iron for the manufacture of guns. The inventor has obtained patents from the French, American, Belgian, and Russian governments, and his system is now in use at the Butterley Foundry, Derbyshire.

FINLAY'S PATENT.—In the recent series of heavy gales it has occurred to us to look over the shipping intelligence, in order to see how many sailors lost their lives by being washed or jerked off booms and yards, and although the returns rarely specify the precise nature of the accident which led to such losses, we have clear statements that about 45 men were injured or drowned from the cause alluded to. Notwithstanding the prejudices which exist among some of the old school, we think experience is strongly in favour of Captain R. Finlay's excellent plan of reefing and furling sails, particularly in short-handed coasters. The patent has been found applicable to large clippers, and there can be no question that it would save lives—not to talk of canvas and cordage—if it were adopted in our merchant service. Into men-of-war the patent need not hope to come for many a long day yet, as there are special reasons against its adoption, though it is clear men would not be so much exposed in ships where it is used as they would be in disabled steam-ships, in which it might be desirable or necessary to make sail without the aid of the apparatus.

THE SOUTH FORELAND LIGHTHOUSE.—Upon the South Foreland, which marks the southern extremity of the Goodwin Sands, there has been a lighthouse from the days of Queen Elizabeth up to the passing hour. It seems difficult to believe, in these days of scientific progress, that as late as 1793 the only light that served to guide mariners past the sea of tribulation below this headland, came from coal fires, burnt in an open grate upon the summit of a tower. In fact, the same contrivance that served from the days of Ptolemy Philadelphus, three hundred years before the Christian era, down to the invention of Argand lamps and magnifying lenses—viz., a pitch pot, or an open grate with a wood or coal fire—was the simple means by which the rich vessels, London bound, from all parts of the earth, were guided past the southern tail of the Goodwin Sands as late as 1793. We now know that the luminous beams flung across the channel from England to France from this lighthouse is done nightly, as easily as a gas-lamp flings its rays across a street. We believe, indeed, that pharcology had reached perfection, and that the latest improvements upon the dioptric and catoptric methods of illumination left nothing to be desired. Some recent experiments have nevertheless been tried with the magnetic light. Eye witnesses describe the magnetic light, seen from the sea, as intense, like a little sun, and like that luminary it "sets" from the convexity of the earth. At 30 miles it does not appear to be the least dimmed, and it even penetrates haze and fog so as to indicate its "whereabouts." Although the light itself is only a "spark" of about a quarter of an inch long, it is too vivid to be stared at with an unprotected eye. Seen through black goggles, a beautiful cone of light may be observed falling from the upper carbon to the lower, very different in intensity to the glare of a murky coal fire, or even the luminous band of light from a reflector. From all we can hear, the *new light*, if it can be rendered manageable, is as superior to the dioptric as that is to the coal fire beacon; and we wait with some anxiety for further particulars.

COAST GUARD APPOINTMENTS.—Captain W. H. Kennedy, Deputy-Comptroller-General of Coast Guard, whose 5 years expired on the 8th of April, 1859, and who was granted an extension of one year from that date, is to continue to hold that appointment until 31st December next. Captain W. H. Kennedy married the only daughter of the late Admiral Sir C. Paget, uncle to Lord Clarence Paget, the present Secretary to the Admiralty.

STATIONS OF THE ROYAL NAVY IN COMMISSION.

With the dates of Commission of the Officers in Command.

Aboukir, 90, sc., Capt. D. Curry, 1846, Channel Squadron.
Acorn, 12, Com. R. B. Pearse, 1856, East Indies.
Actæon, 26, surv.-v., Com. J. Ward (b), 1858, East Indies.
Adventure, sc. store-ship, Com. E. Lacy, 1856, East Indies.
Agamemnon, 91, sc. Capt. T. Hope, 1852, Mediterranean.
Ajax, 60, sc. Capt. J. M. M'Niell Boyd, 1856, Coast Guard.
Alacrity, 4, sc., Com. J. K. E. Baird, 1857, Mediterranean.
Alecto, 5, st.-ves., Com. H. J. Raby, V.C. 1855, Coast of Africa.
Alert, 17, sc., Com. W. A. R. Pearse, 1855, Pacific.
Algerine, sc. gunboat, Lieut.-Com. W. Arthur, 1854, East Indies.
Algiers, 91 sc., Capt. G. W. D. O'Callaghan, 1846, Channel Squadron.
Amethyst, 26, Capt. S. Grenfell, 1853, Pacific.
Amphion, 36, sc., Rear-Admiral C. Talbot, Capt. T. Cochran, 1857, Channel Squadron.
Arachne, 18, Com. J. E. Montgomerie, 1855, N. America and West Indies.
Archer, 13, sc., Capt. R. W. Courteney, 1859, Coast of Africa.
Ardent, 3, st.-v., Com. J. E. Parish, 1857, S. E. Coast of America.
Argus, 6, st.-v., Com. H. F. W. Ingram, 1856, Mediterranean.
Ariadne, 26, sc., Capt. E. W. Vansittart, 1856, Portsmouth.
Arrogant, 47, sc., Commod. W. Edmonstone, 1853, Ascension.
Asia, 84, Capt. G. T. Gordon, 1846, Portsmouth.
Assistance, sc. store-ship, Com. C. J. Balfour, 1859, East Indies.
Assurance, 4, sc., Com. C. M. Aynsley, 1856, Mediterranean.
Atalanta, 16, Com. T. M. S. Pasley, 1855, N. America and W. Indies.
Atholl, 4, Com. E. Wilson, 1845, Greenock.
Banshee, 2, steam-vessel, Com. C. A. Campbell, 1858, Mediterranean.
Banterer, sc. gunboat, Lieut.-Com. East Indies.
Beagle, 4, sc., Com. E. Hay, 1858, East Indies.
Black Eagle, st.-yac., Mast.-Com. J. E. Petley, 1844, particular service.
Blenheim, 60, sc., Capt. F. Scott, C.B., 1848, Coast Guard.
Boscawen, 70, Rear-Admiral the Hon. Sir F. W. Grey, K.C.B., Capt. R. A. Powell, C.B., 1855, Cape of Good Hope.
Bouncer, 2, sc. gunboat, Lieut.-Com. A. R. Owen, 1852, East Indies.
Brilliant, Com. C. H. Gardner, 1848, Naval Reserve Training Ship.
Brisk, 16, sc., Capt. A. F. R. D'Horsey, 1857, Cape of Good Hope.
Britannia, training-ship, Capt. R. Harris, 1849, Portsmouth.
Brune, st.-ves., Lieut.-Com. E. F. Lodder, 1854, Coast of Africa.
Brunswick, 80, sc., Capt. E. Ommanney, 1846, Devonport.
Buffalo, screw, Mas.-Com. A. Brown, 1854, particular service.
Bustard, 2, sc. gunboat, Lieut.-Com. F. W. Hallowes, 1856, E. Indies.
Buzzard, 6, st.-v., Com. F. Peel, 1855, S.E. Coast of America.
Cadmus, 21, sc., Capt. H. S. Hillyar, C.B., 1854, Mediterranean.
Cæsar, 90, sc., Capt. T. H. Mason, 1849, Mediterranean.
Calypso, 18, Capt. F. B. Montresor, 1851, Pacific.
Cambrian, 40, Capt. J. J. M'Cleverty, C.B. 1848, East Indies.
Cambridge, gunnery-ship, Capt. A. W. Jerningham, 1851, Devonport.
Camilla, 16, Com. G. T. Colville, 1855, East Indies.
Caradoc, 2, st.-ves., Lieut.-Com. C. M. Buckle, 1847, Mediterranean.
Castor, Com. J. Palmer, 1855, Naval Reserve Training Ship.
Centaur, 6, st.-v., Com. E. D'o, D'a, Alpin, 1853, East Indies.
Centurion, 80, sc., Capt. H. D. Rogers, C.B., 1846, Devonport.
Chesapeake, 51, sc., Rear-Admiral J. Hope, C.B., Capt. G. O. Willis, 1856, East Indies.
Clio, 22, screw, Capt. T. Miller, 1855, Pacific.

Wellington, 72, Capt. R. S. Robinson, 1840, Devonport.
Woodcock, 2, sc. gunboat, Lieut.-Com. G. S. Bosanquet, 1855, East Indies.

A CONGRESS OF SHIPBUILDERS.—A series of meetings of shipbuilders, and of gentlemen interested in naval architecture, will be held in London next week, on Thursday, Friday, and Saturday, the 1st, 2nd, and 3rd of March, at the Society of Arts, John Street, Adelphi, for the purpose of inaugrating the new Institution of Naval Architects. On Thursday and Friday, morning and evening meetings will be held each day at 11 A.M. and 7 P.M. respectively, and on Saturday a morning meeting only at 11 A.M. At the first meeting, on the morning of Thursday, the Right Hon. Sir John Pakington, G.C.B., will preside and deliver an address to the Institution. The speech of the right hon. gentleman will be followed by the reading of papers by the Rev. J. Woolley, LL.D., Mr. Scott Russell, and Mr. Grantham. In Mr. Grantham's paper, which will treat of the strength of iron ships, the case of the Royal Charter will be elaborately investigated. At the evening meeting on Thursday the Earl of Hardwicke will preside; and at subsequent meetings it is expected that the chair will be taken by Mr. Sidney Herbert, Lord Clarence Paget, and Mr. H. Corry. On these occasions numerous professional papers will be read by Mr. Joseph Maudslay, Mr. White, of West Cowes, Prof. Airy, Astronomer Royal, and other distinguished gentlemen. A paper on chain cables, by Mr. Lenox, the manufacturer of all the chain cables used by the Admiralty, is expected to excite much atttention. The celebrated wave-line theory of shipbuilding will also be described; and as every paper will de discussed, the meetings will doubtless possess very great interest. We are informed that the attendance will not be exclusively limited to Members and Associates of the Institution, but that other gentlemen interested in the progress of the royal and mercantile navies will have tickets furnished them by the Secretary to the Institution, whose address is 166, Fleet Street, London.

PRIVATE THEATRICALS AT WEYMOUTH. — These entertainments, which have been so fashionable during the past winter, have nowhere been more successful than at Weymouth, where some performances were given last week, the principal actors being the officers of the Royal Engineers and of the Bedfordshire Militia. The plays of *Love in Humble Life* and *A Thumping Legacy*, were, according to the local accounts admirably given; but the chief attraction and the greatest success was a piece called *One Good Turn Deserves Another*, written by Captain Otway, the author sustaining a principal part. All the notabilities of the town and county were present, and at the conclusion of the dramatic performances a ball took place which was remarkable for its brilliancy.

VOLUNTEER COMMISSION FEES.—Colonel North put a question in the House of Commons on Tuesday, if the fees to be paid by officers of the Volunteer corps for their commissions would be the same in all counties; and, if so, what amount they would be called upon to pay? Mr. S. Herbert, in replying, said he had no authority to adjudicate upon what the amount of the fees should be; but in 1853, when there was a great difference about the fees claimed with respect to militia appointments, a commission was issued to consider what the scale should be, and they fixed upon 2*l.* 2*s.* as the fee for field officers, and 1*l.* 1*s.* for officers of a lower rank. He intended to make a similar recommendation with respect to Volunteer officers, but of course it would rest with the lords-lieutenants of the different counties to determine whether they would sanction that scale.

THE MILITIA.

LIMERICK.—The second division (three companies) of the Royal Limerick County Regiment of Militia, arrived at Cork, from Portsmouth, per the Dodo steamer, on the 19th inst., having sailed from the latter port on the 17th. The following officers have arrived with this division, viz. :—Major T. Wallnutt, commanding; Captains W. Massy and W. Brownrigg; Lieutenants C. O'Connor and D. Power; Ensigns L. M'Craith, R. Reeves, and P. Murphy; Captain and Adjutant R. B. Low, Paymaster E. C. Bell, Quartermaster E. Powell, and Assistant-Surgeon P. Enright.

Between the 15th and 20th inst., 95 men have volunteered into the Line from the Royal Dublin Militia, quartered in the Citadel, Plymouth, under the command of Lieut.-Colonel Musters. The Royal Dublin Militia is preparing to leave, and will probably sail from Plymouth early in March for Dublin, where they will be disembodied.

East Suffolk Artillery Regiment of Militia—Captain C. Bruce to be Adjutant, from Jan 4., 1860.

Tower Hamlets—W. Turquand, Esq., to be Deputy Lieutenant.

Royal South Lincoln Militia—Lieutenant E. D. Johnson has been struck off the strength of the regiment, having been absent without leave from the last training.

4th or Royal South Middlesex Regiment of Militia—H. Powell, Gent., late Captain, Victoria (Melbourne) Rifles, to be Lieutenant, vice Rutherford, resigned.

Memorandum.—2nd or Edmonton Royal Rifle Regiment of Middlesex Militia—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Captain T. E. H. Platt.

1st Devon Regiment of Militia—A. Martyn to be Ensign; F. B. S. Beamish to be Ensign.

2nd Devon Regiment of Militia—H. Smith to be Lieutenant, vice Whipple, resigned; E. Holberton to be Ensign, vice Barber, resigned.

Norfolk Artillery Regiment of Militia—E. H. G. Stracey, Gent., to be second Lieutenant, vice Count M. G. De Wezele, promoted.

Cambridgeshire Militia—John Vance, Esq., to be Surgeon, vice Masters, resigned; Feb. 14.

2nd Regiment (Light Infantry) of West York Militia—Walter Beaumont, Gent., to be Lieutenant, vice Foster Gray, resigned.

Royal Wilts Militia—Reginald Croft Lever, Gent., to be Assistant Surgeon, vice Bayntun, resigned; Nov. 24.

Hampshire Yeomanry Cavalry—William Fox, Gent., to be Cornet, vice Hatherell, resigned; Feb. 21.

MILITIA ARTILLERY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I read in the ARMY AND NAVY GAZETTE of the 21st inst., that it is the intention of Government to disembody the whole of the Militia by the 1st of April. Surely this is not intended to apply to the Militia Artillery, many small regiments of which are now in so high a state of efficiency. An artilleryman, more than any other soldier, is not made in a day; and, without disparagement to the Artillery Volunteers, I may, I think, be allowed to say that it will require years of the training they will receive to enable them to bear comparison with the long-embodied regiments of Militia Artillery now about (if the intention of Government is carried out as regards them) to be rendered useless in the service of their country.

The enormous fortifications in course of erection require the aid of artillerymen for their completion (in gun-mounting, &c., &c.). Government has now at its disposal men as well fitted for this work as any to be found. Only the other day a detachment of Militia Artillery from this place were sent to Dublin and back, a distance of nearly 400 miles, in order to mount a battery of guns, there being, apparently, no available artillerymen nearer at hand.

The Line regiments of Militia, now about to be disembodied, will be naturally replaced by the regiments on their way home from India, such cannot be the case with the Artillery, as none, I believe, are ordered back; in fact, large reinforcements are now being sent to China.

For some time to come a large artillery force will be required there and in India. Might not the Artillery Militia be considered as a permanent *corps de réserve*, an *efficient* auxilliary to the defences of our shores, and a force to aid in the completion of the works for that defence, undertaken on so large a scale, but still so far from being perfected; as a nursery to the Royal Artillery, too, they would be of great use, in securing on an emergency drilled soldiers instead of raw recruits. I am, sir, your obedient servant,

Cork. AN OLD GUNNER.

FRENCH NAVY.

An outrage committed by the people of Tullear-Baie, Madagascar, on a French ship, is likely to be considered an insult to the national flag.

In an excellent article in the *Revue Contemporaine*, by M. de Mondy, on the French navy, there are some admissions to which we would invite attention. The writer declares that there is no desire in France to contest with England the domination of the seas, but "we wish to struggle only for their independence—the interest of France is to keep its marine on a respectable footing without anything of exaggeration. England has placed herself beyond the reach of danger by preparing means proportionate to the coasts and colonies she has to defend; if France were in the same position peace would be very hard to break. Each year will unite the two peoples more intimately by commingling their interests, and, bound by mutual respect, they will no longer think of any attack one upon the other." At the same time, the writer urges very strongly the necessity of placing the navy on a footing which shall place it in a state of readiness for war.

VOLUNTEERS.

METROPOLITAN.

THE CENTRAL LONDON VOLUNTEER RIFLE CORPS.—On Tuesday evening an aggregate meeting of the residents of the Inns of Court and Chancery, and of the inhabitants of St. Andrew's, Holborn, and the adjoining parishes, was held in the theatre of the Mechanics' Institution, Southampton Buildings, for the purpose of extending the Central London Volunteer Rifle Corps. The theatre was well filled, and the chair was taken by Sir Morton Peto, M.P. Mr. Walters read a paper, detailing the rise and progress of the corps, and stating that about 300*l.* had been raised. The following resolutions were agreed to:—"That this meeting highly approves of the formation of Volunteer corps in this country, believing that in their establishment the best security for the peace and prosperity of the nation is attained."—"That for the purpose of effectually aiding the movement, it is expedient that the residents in the Inns of Court and Chancery, and their vicinity, and the parishioners of St. Andrew's, Holborn, above Bars, St. George the Martyr, and St. Sepulchre, Middlesex, should enrol themselves as members of the Central London Volunteer Rifle Corps."—"That to meet the expenses attendant on the formation of the corps, a subscription be at once opened, and that a deputation do wait upon the inhabitants of the district to solicit their aid and co-operation."

ST. GEORGE'S RIFLES.—On Tuesday morning, Lieut.-Colonel the Hon. C. H. Lindsay took his rapidly-increasing regiment out for a march, headed, as usual, by its brass band. The morning was beautiful and dry, and the volunteers marched with the greatest precision and spirit up Piccadilly, Regent Street, Oxford Street, into Hyde Park, where Lieut.-Colonel Lindsay put them through a variety of movements. The regiment returned to Burlington House at 10 o'clock. On Saturday afternoon the St. George's will parade at 4 o'clock at Devonshire House, Piccadilly, in full dress, for the purpose of marching out.

HAMPSHIRE.

The Portsmouth Volunteers still "hang fire" upon the subject of their uniform. The corps is composed of a very fine body of men of all classes, well up in drill, and their movements are equal to anyMilitia regiment. But the men as well as the officers object to the uniform insisted upon by the Lord Lieutenant, and the consequence is that most of the influential members are threatening to withdraw from the corps, and indeed it is feared that the companies will soon be reduced to mere skeletons. They have no objection to be dressed as soldiers, but not as "Guys." A similar feeling is exhibited at Southampton by the Volunteers in that city, the corps refusing to dress in the uniform inflicted upon them by the Lord-Lieutenant; and we further hear that in consequence his Lordship has threatened to disband them. Thus, the two leading towns in this county will be deprived of the services of their Volunteers upon a mere question of the colour of their uniforms; surely, there is something very arbitrary in this sort of conduct on the part of the Lord-Lieutenant of the county.

KENT.

A communication has been received at Chatham from Viscount Sydney, the lord-lieutenant of the county, in which his lordship has refused to appoint Mr. J. Budden captain of the Chatham Volunteer Rifle Corps, to which he had been nominated by the company, the reason assigned by the lord-lieutenant being that he is the proprietor of the barrack canteens at the garrison, and therefore is not, in the estimation of his lordship, a fit person to fill the post of a captain of a Volunteer company.

WILTSHIRE.

MELKSHAM.—On Monday evening J. B. Caldwell, Esq., J.P., entertained the officers and men of the local Volunteer Rifle Corps at dinner in the Town Hall. The guests, including the honorary members and several clergymen and gentlemen resident in the neighbourhood, numbered about 120, and previously to the dinner the corps were mustered in the market-place for an hour's drill, through the evolutions of which they went very creditably, considering the short time since they commenced practice.

TROWBRIDGE.—The full complement of rifles for the No. 2 company of the Wilts Volunteers have been received, and after being numbered and respectively assigned to the members of the corps, have been deposited in the police-court, where they are arranged in racks behind the magistrates' bench. An excellent plot for target-practice has been obtained. The corps is a fine body of men, most of them tall young fellows, and all of them well up in drill—a circumstance largely owing to the valuable services of the officers and sergeant-major of the Antrim Rifles at present stationed in Trowbridge Barracks.

YORKSHIRE.

INSPECTION OF THE YORK RIFLE CORPS.—On Monday afternoon last, the York Rifle Corps mustered in the Guildhall, whence they proceeded, headed by their excellent band, to a field in the rear of the house occupied by Major Briggs, in Bootham, for the purpose of undergoing the ordeal of an inspection, by the newly appointed Assistant-Inspector of Volunteer Rifle Corps for the Northern District. The day was intensely cold, and a smart storm of snow fell during the whole of the inspection, but notwithstanding the unfavourable weather, and the short notice given to muster, above 100 rank and file were present. The inspector for this district is Major G. B. Harman, formerly of the 34th Regiment. He saw considerable service in the Crimea, and for gallant conduct at the storming of the Redan, in which he received seven wounds, he was promoted and received his majority. After the corps had been put through a few light infantry movements and the manual exercise by their commanding officer, Major Harman, addressing the two companies th[illegible]plimented Major Briggs and Serjeant-Major Crawford on had[illegible]ry excellent state of discipline and efficiency in drill that n[illegible]sp[illegible]n that day exhibited. This was the first corps he had since his appointment, and he hoped they were a fair specimen of what he had yet to see. The marching through the streets he had carefully watched, and he was much surprised to see the steadiness and soldier-like bearing of the individual members of the corps, which would have been a credit to any regiment of the line. Similar commendatory remarks would apply also to the manœuvres just gone through, and the manual exercise. After praising the neat uniform worn by the corps, the Inspector recommended particular attention to the various infantry movements, and concluded by stating the great pleasure he should have in reporting favourably of the general state of efficiency of the corps to the Inspector-General. The volunteers were then marched back into the city, accompanied by the band. They proceeded into Parliament Street, where they were dismissed, after being thanked by Major Briggs for the attention and exertion manifested by the corps whilst being inspected. On Thursday last 75 rifles were received from the Tower to equip the 2nd Company of the above corps.

DRIFFIELD.—At a meeting of the members of the rifle corps recently formed at this place, a specimen of the Hull Rifle uniform was exhibited, and it was unanimously decided to adopt a similar pattern for the Driffield corps, which now numbers about fifty strong.

BRIDLINGTON.—The artillery and rifle corps in this district are making remarkable progress. On Saturday evening last the members of the former corps at Bridlington Quay were summoned by sound of bugle to drill for the first time in their elegant uniform. The device on the caps and belts of the officers and men consists of two guns unlimbered, crossed, with a wheel in front, supporting the crown, and the word "Burlington," below. This latter, we believe, is a great privilege, inasmuch as no other volunteer artillery corps has been permitted to take the name of the town in which it has been formed.

NORTH RIDING VOLUNTEER RIFLE CORPS.—At a meeting held at Richmond, on Wednesday, the 15th inst., Lord Zetland (Lord-Lieutenant of the North Riding) in the chair, it was unanimously agreed that the colour of the uniform of this corps should be grey.

VOLUNTEER MOVEMENT.—On Wednesday last a detachment of the Royal Artillery left Shorncliff for Dover, for the purpose of bringing to Folkestone a 12-pounder garrison gun for the use and practice in gunnery of the 3rd or Folkestone Company of Kent Artillery Volunteers. The first gun-drill took place next evening, Thursday, under the superintendence of Sergeant Whiston, R. A., specially at Folkestone for the purpose of instructing the Company in gun-drill. The Company were dressed in their uniform, and between fifty and sixty were present; Captain Sweeney, R. A., lately appointed to the Coast Defence Brigade of Artillery, and who has since the formation of the Company taken great interest in its progress, was also present.

HAMPSHIRE.—5th Company of the Hampshire Rifle Volunteers—Sir D. T. Cunynghame, Bart., to be Captain-Commandant.

NORTHAMPTONSHIRE.—4th Company of the Northamptonshire Volunteer Rifle Corps—W. A. Barr, Esq., M.D., to be Captain.

CORNWALL.—1st Section of Cornwall Artillery Volunteers—W. Pace to be Honorary Assistant-Surgeon.

2nd Section of Cornwall Artillery Volunteers—W. Pace to be Honorary Assistant-Surgeon.

SUSSEX.—5th Sussex Rifle Volunteers—Major A. R. Margary, late 53rd Regiment, to be Captain.

STAFFORDSHIRE.—1st Company of Staffordshire Rifle Volunteers—W. Hopkins, Gent., to be Honorary Assistant-Surgeon.

12th Company of Staffordshire Rifle Volunteers—B. Whitehouse, Gent., to be Lieutenant; T. Waterhouse, Gent., to be Ensign.

GLOUCESTERSHIRE.—Gloucestershire Rifle Volunteers—7th Company: W. Dalton, Gent., to be Honorary Asssistant-Surgeon.

BERKSHIRE.—Berks Rifle Volunteers—1st Company: W. M. Atkins, Gent., to be Ensign, vice Simonds, deceased.

LINCOLNSHIRE.—Lincolnshire Rifle Volunteers—4th Company: F. L. Hopkins, Esq., to be Captain; T. Wright, Gent., to be Lieutenant; W. Gee, Gent., to be Ensign. 5th Company: Lieut.-Colonel R. Cautley, Bengal Retired List, to be Captain; R. N. Newcomb, Esq., to be Lieutenant; J. Phillips, jun., Gent., to be Ensign.

YORKSHIRE.—3rd North Riding of Yorkshire Rifle Volunteers—W. C. Worsley, Esq., to be Captain; A. Stevens, Esq., to be Lieutenant; G. Legard, Esq., to be Ensign.

WILTSHIRE.—Wiltshire Volunteer Rifle Corps—2nd Company: T. Clark, Esq., to be Captain; W. P. Clark, Esq., to be Lieutenant; J. G. Foley, Esq., to be Ensign. 3rd Company: W. T. K. P. Keene, Esq., to be Captain. 4th Company: D. H. Clutterbuck, Esq., to be Captain.

GLAMORGANSHIRE.—Glamorganshire Rifle Volunteers—11th Company: J. C. Nicholl, Esq., to be Captain; J. Brogden, Gent., to be Lieutenant; H. Randall, Gent., to be Ensign. 14th Company: T. B. Powell, Esq., to be Captain: T. Davies, Gent., to be Lieutenant; F. Davies, Gent., to be Ensign. 15th Company: J. H. Rowland, Esq., to be Captain; W. G. Jones, Gent., to be Lieutenant; P. H. Rowland, Gent., to be Ensign.

KENT.—Kent Rifle Volunteers—15th Company: Sir E. Filmer, Bart., to be Captain; D. A. Monro, Esq., to be Lieutenant; T. Balston, Gent., to be Ensign. 16th Company: J. D. Dyke, Esq., to be Captain; W. F. Baring, Gent., to be Lieutenant; W. W. Gascoyne, Gent., to be Ensign.

Kent Artillery Volunteers—9th Subdivision: W. Tongue, Gent., to be First Lieutenant; M. M. Braund, Gent., to be Second Lieutenant.

LANCASHIRE.—2nd Lancashire Rifle Volunteers—Lieutenant W. Harrison to be Captain; Lieutenent A. I. Robinson to be Captain; Ensign J. Johnston to be Lieutenant, vice Robinson promoted; Ensign J. Eccles to be Lieutenant, vice Harrison promoted; L. Porter, Gent., to be Lieutenant, W. H. Hornby, jun., Gent., to be Lieutenant; A. W. Paterson, Gent., to be Ensign, vice Eccles, promoted; J. Yates, Gent., to be Ensign; R. Parkinson, Gent., to be Ensign.

1st Lancashire Artillery Volunteers—R. B. Houghton, Gent., to be Second Lieutenant.

MIDDLESEX.—16th Middlesex Rifle Volunteers—Captain C. E. Murray to be Captain-Commandant.

West Middlesex Rifle Volunteer Corps—W. A. Kinnebrook, Gent., to be Lieutenant; J. W. Bridgman, Gent., to be Lieutenant; J. Williamson, Gent., to be Ensign; G. Richardson, Gent., to be Ensign.

19th Middlesex Rifle Volunteers—J. Martineau, Esq., to be Captain; F. J. Furnivall, Gent., to be Lieutenant; J. Fotheringham, Gent., to be Lieutenant; G. M. Hantler Gent., to be Ensign.

The Inns of Court Rifle Volunteer Corps—W. B. Brewster, Esq., late Captain, Rifle Brigade, to be Major.

27th Middlesex Rifle Volunteers—W. Ennis, Esq., late Captain 11th Hussars, to be Captain-Commandant.

SURREY.—12th Company of Surrey Rifle Volunteers—W. M. Cockrane, Esq., to be Captain.

13th Company of Surrey Rifle Volunteers—W. H. Gill, Esq., (as Frankland) Major in the Rifle Brigade, to be Captain; R. L. Mangles, V.C., E. I. C. S., to be Lieutenant; W. M, Molyneux, Esq., to be Ensign.

South London Rifle Volunteer Company—North Brixton Company: R. H. Bristowe, Gent., to be Ensign. New Cross Company: J. M. Cottrell, Gent., to be Ensign. Newington Company: J. D. Doulton, Gent., to be Ensign.

6th Devon Artillery Volunteers—R. B. Cleland to be Captain; J. R. Davy to be First Lieutenant; J. Hughes to be Second Lieutenant.

DORSETSHIRE.—2nd Dorsetshire Artillery Volunteers—J. T. Leather, Gent., to be Captain; E. D. Beaufort, Gent., to be First Lieutenant; W. Powell, Gent., to be Second Lieutenant.

3rd Dorsetshire Rifle Volunteers—E. L. Kindersley, Esq., to be Captain; T. Coombs, Gent., to be Lieutenant; R. Devenish, Gent., to be Ensign; G. Panton, Gent., to be Honorary Assistant Surgeon; the Rev. W. B. L. Hawkins, clerk, to be Honorary Chaplain.

SUFFOLK.—6th Suffolk or Stowmarket Rifle Corps—W. R. Tyrell, Esq., to be Captain; H. A. Oakes, Gent., to be Lieutenant; T. M. Golding, Gent., to be Ensign.

LANARKSHIRE.—Lanarkshire Artillery Volunteers—9th Company: W. B. Dick, Esq., to be Captain; A. Whitelaw, Gent., to be First Lieutenant; G. Black, Gent., to be Second Lieutenant.

Lanarkshire Rifle Volunteers—19th Corps (Glasgow 2nd Northern Battalion): J. C. M'Ewan, Gent., to be Ensign in the 36th Company, vice Shirreff, resigned. 42nd Company (Uddingstone): J. Wilkie, Esq., to be Captain; J. Gray, Gent., to be Lieutenant; T. Scott, Gent., to be Ensign. 44th Company (Blantyre): J. Reid, Esq., to be Captain; J. H. Watkins, Gent., to be Lieutenant; R. V. Reid, Jun., Gent., to be Ensign. 46th Company: A. Henderson, Esq., to be Captain; J. C. Webster, Gent., to be Lieutenant; M. Johnston, Gent., to be Ensign. 47th Company: J. Mowat, Esq., to be Captain; W. Smith, Gent., to be Lieutenant; J. O. Munro, Gent., to be Ensign. 53rd Company: H. Campbell, Esq., to be Captain; G. Langlands, Gent., to be Lieutenant.

ROSS-SHIRE.—Ross-shire Volunteers—3rd Company: Sir J. J. R. Mackenzie, Bart., to be Captain; A. G. Mackenzie, Esq., to be Lieutenant; R. G. Mackenzie, Esq., to be Ensign; A. R. Mackenzie, Esq., to be Honorary Surgeon.

HAVERFORDWEST.—Haverfordwest Volunteer Rifle Corps—R. Carrow, Gent., to be Lieutenant.

DERBYSHIRE.—8th Derbyshire Volunteer Rifles—J. Sleigh, Esq., to be Lieutenant.

The following appointment is substituted for that which appeared in the *Gazette* of the 3rd February inst.:—

Derbyshire Volunteer Rifles—8th Company: R. D. Goodwin, Esq., to be Honorary Surgeon.

AYRSHIRE.—6th Company Ayrshire Rifle Volunteers—H. Brown, Gent., to be Captain; H. Crawford, Gent., to be Lieutenant; W. F. Love, Gent., to be Ensign.

The following appointment is substituted for that which appeared in the *Gazette* of the 14th February, inst.:—

Ayrshire Artillery Volunteers—2nd Company: W. B. M'Kissoch, Gent., to be Second Lieutenant.

2nd Sussex Rifle Volunteers—Rodolph Alexander Hankey, Gent., to be Ensign; Feb. 14.

2nd Cumberland Rifle Volunteers—Joseph Fletcher, Esq., to be Captain-Commandant; Feb. 14.

3rd Company of Cheshire Artillery Volunteers—Francis William Reynolds, Esq., to be Captain; Daniel Roberts, Gent., to be First Lieutenant; Henry Pooley, Gent., to be Second Lieutenant; Feb. 10.

11th Cornwall Rifle Volunteers—Humphry Willyams to be Captain; Francis Hearle Cock to be Lieutenant; Edwin Parkyn to be Ensign; Feb. 13.

12th Cornwall Rifle Volunteers—Edward Collins to be Captain; James Henderson to be Lieutenant; Arthur Willyams, to be Ensign; Feb. 13.

2nd North Riding of Yorkshire Rifle Voluuteer Company—Sir George William Denys, Bart., to be Captain; Edward Leopold Denys, Esq., to be Lieutenant; John George Mc Collah, Gent., to be Honorary-Surgeon; Feb. 18.

Hallamshire Rifle Volunteer Corps—William Bragge, Esq., to be Captain; Ensign John Devonshire Ellis to be Lieutenant; Joseph Brown, Gent., to be Ensign; Frederick George Wood to be Ensign, vice Ellis, promoted; Feb. 18.

Third West Riding of Yorkshire Rifle Volunteers (Bradford)—Captain Samuel Cunliffe Lister to be Major-Commandant; Lieutenant Henry William Salt to be Captain, vice Lister, promoted; Lieutenant Abraham Briggs Foster to be Captain; Lieutenant Henry Sagar Hirst to be Captain; Ensign John Foster to be Lieutenant, vice Hirst, promoted; Ensign George Bankart to be Lieutenant; Ensign Samuel Milne Smith to be Lieutenant; Edward Salt, Gent., to be Ensign; Feb. 21.

7th West Riding of Yorkshire Rifle Volunteers (Halifax)—Capt. Edward Akroyd to be Major-Commandant.

16th Company of West Riding of Yorkshire Rifle Volunteers (Harrogate)—John James Harrison, Esq., to be Captain; Joseph Holt, Gent., to be Lieutenant; Henry Drury, Gent., to be Ensign; Feb. 21.

Memorandum—Another Company has been added to the Hallamshire Rifle Volunteer Corps.

The 7th, 8th, 13th, and 14th Companies of West Riding of Yorkshire Rifle Volunteers have been formed into a Battalion, to be called the 7th West Riding of Yorkshire Rifle Volunteers.

The 5th, 6th, and two additional Companies have been

Digitized by Google

formed into a Battalion, to be called the 3rd West Riding of Yorkshire Rifle Volunteers.

Wiltshire Volunteer Rifle Corps—3rd Company—Charles Richard Luce, Gent., to be Lieutenant; John Alexander Handy, Gent., to be Ensign; Feb. 20.

4th Company of Cinque Ports Artillery Volunteers—Edward William Venables Vernon Harcourt, Esq., to be Captain; William Scrivens, Esq., to be First Lieutenant; John Gibbs, Esq., to be Second Lieutenants; Frederick Ticehurst, Esq., to be Honorary Assistant-Surgeon; Feb. 20.

Glamorganshire Rifle Volunteers—9th Company—Griffith Llewellyn, Esq., to be Captain; William Price Sturve, Gent., to be Lieutenant; George Young, Gent., to be Ensign, Feb. 17.

1st Lincolnshire Rifle Volunteers—The Rev. Edmund Roberts Larken to be Honorary Chaplain; Feb. 18.

Staffordshire Rifle Volunteer Corps—4th Company—Frederick Atcherley Edwards, Esq., to be Honorary Assistant Surgeon; Feb. 18. Edward Deniss Moore, Esq., to be Honorary-Assistant Surgeon; Feb. 21.

12th Company—William Mott Hancox, Gent., to be Honorary Assistant Surgeon; Feb. 18.

18th Company—Benjamin St. John Mathews, Esq., to be Captain; Feb. 21.

19th Company—Francis Willington, Esq., to be Captain; Robert Whately Nevill, Gent., to be Lieutenant; John Webster Mayou, Gent., to be Ensign; Feb. 21.

5th Lancashire Artillery Volunteers—Captain Robert Raynsford Jackson to be Captain Commandant; James Barlow Stewardson Sturdy, Esq., to be Captain; John Walmsley, Gent., to be First Lieutenant; Hiram Craven Coulthard, Gent., to be Second Lieutenant; Feb. 10.

1st Lancashire Rifle Volunteers—Captain Nathaniel George Philips Bousfield to be Captain Commandant; Feb. 17. Lieutenant George Hunter Robertson to be Captain; Ensign John Lord Howard to be Lieutenant; Ensign George Butler Henshall to be Lieutenant; Feb. 11.

6th Lancashire Rifle Volunteers—Lieutenant Edward Stanley Heywood to be Captain, vice Ashton, promoted; Ensign Fenton Mangnall to be Lieutenant, vice Heywood, promoted: John Bradshaw, the younger, Gent., to be Ensign, vice Mangnall, promoted; Feb. 11.

11th Lancashire Rifle Volunteers—Joseph Bray Gilbertson, Esq., M.D., to be Assistant-Surgeon; Feb. 15. Captain Henry Newsham Pedder to be Captain-Commandant; Feb. 17.

15th Lancashire Rifle Volunteers—Thomas Henry Willans, Esq., to be Surgeon; Feb. 10.

19th Lancashire Rifle Volunteers—Captain George Alexander Mackenzie, to be Captain-Commandant; Feb. 14. Anthony Cumming, jun., Gent., to be Lieutenant; Samuel Plain Greensheilds, Gent., to be Ensign; Hugh Perkins, Gent., to be Ensign; Feb. 10.

26th Lancashire Rifle Volunteers—John Thompson, Esq., to be Captain; James Wood, Gent., to be Lieutenant; Maskell William Peace, Gent., to be Ensign; Walter Fawkes Mackenzie, Gent., to be Assistant-Surgeon; Feb. 9.

27th Lancashire Rifle Volunteers—Lieutenant Arthur Bailey to be Captain; Ensign James Cross Ormrod to be Lieutenant, vice Arthur Bailey, promoted; George Fell, Gent., to be Ensign, vice James Cross Ormrod, promoted; Feb. 10.

43rd Lancashire Rifle Volunteers—William Slingsby, Esq., to be Captain; John Slagg the younger, Gent., to be Lieutenant; Feb. 11.

Dumbartonshire Rifle Volunteers—1st Company—Alexander H. Dennistoun, Esq., to be Captain; Colin Dunlop Wilson, Gent., to be Lieutenant; James Honeyman, Gent., to be Ensign; Feb. 18.

2nd Company—Archibald Campbell Colquhoun, Esq., to be Captain; John Leckie Ewing, Gent., to be Lieutenant; Hugh Kirkwood, Gent., to be Ensign; Feb. 8.

3rd Company—Matthew Gray, Esq., to be Captain; Thomas Logan Stillie, Gent., to be Lieutenant; Edward M'Intyre, Gent., to be Ensign; Feb. 8.

4th Company—Archibald Orr Ewing, Esq., to be Captain; Jas. Campbell, jun., Gent., to be Lieutenant; Thomas Roxburgh, Gent., to be Ensign; Feb. 8.

5th Company—Mathew Clark, Esq., to be Captain; Feb. 8.

6th Company—John Macausland, Esq., to be Captain; William Paterson, Gent., to be Lieutenant; William Graham, Gent., to be Ensign; Feb. 8.

1st or Gareloch Subdivision—John Cabbell, Gent., to be Lieutenant; Robert Bennett Browne, Gent., to be Ensign; Feb. 16.

2nd or Lass Subdivision—Montague J. Marin, Gent., to be Lieutenant; Alexander Macniren, Gent., to be Ensign; Feb. 8.

Dumbartonshire Artillery Volunteers—1st Company—James Galbraith, Esq., to be Captain; John Honeyman, jun., Gent., to be First Lieutenant; William Reid, Gent., to be Second Lieutenant; Feb. 9.

Haverfordwest Volunteer Rifle Corps—John Harvey, the younger, Gent., to be Ensign; Feb. 15.

6th Company of Surrey Rifle Volunteers—John Newburgh Higinbotham, Esq., to be Lieutenant; Robert Hamilton Few, Esq., to be Ensign; Charles William Izod, Surgeon, to be Honorary Surgeon; Feb. 22.

Newtown, or 1st Montgomeryshire Rifle Volunteers—John Price Drew, Esq., to be Captain; Richard Edward Jones, Esq., to be Lieutenant; David Lloyd, Gent., to be Ensign; Richard Jones, Esq., to be Honorary Surgeon; Feb. 19.

Lanarkshire Rifle Volunteers—19th Corps Glasgow 2nd Northern Battalion—Donald Dewar, Esq., M.D., to be Surgeon; Feb. 20.

29th Company (Coatbridge). Thomas Jackson, Esq., to be Captain; George Pollok, Gent., to be Lieutenant; John Maxwell, Gent., to be Ensign; Feb. 22.

50th Company. John Wallis Kerr, Esq., to be Captain; Archibald Wilson, Gent., to be Ensign; Feb. 20.

54th Company. Thomas Steel, Esq., to be Captain; William Morier, Gent., to be Lieutenant; Peter Fulton, Gent., to be Ensign; Feb. 22.

58th Company—James Thomson, Esq., to be Captain; Hugh Colquhoun, Gent., to be Lieutenant; Robert McCallum, Gent., to be Ensign; Feb. 22.

1st Subdivision of Kincardineshire Rifle Volunteers—Walter Dingwall, Esq., to be Lieutenant; William Alexander, Gent., to be Ensign; Jan. 31.

4th Berwickshire Rifle Volunteers—George Warrender, Esq., to be Captain; William Broomfield, jun., Esq., to be Lieutenant; James Nesbit, Esq., to be Ensign.

6th Aberdeenshire Artillery Volunteers—John Blaikie, Esq., to be Captain; Peter Duguid, Esq., to be First Lieutenant; Thomas Blaikie, Esq., to be Second Lieutenant; Feb. 9.

5th Aberdeenshire Artilley Volunteers—Lewis Chalmers, Esq., to be Captain; George Wallace, Esq., to be First Lieutenant; Dr. John Mellis to be Second Lieutenant; Feb. 15.

1st Aberdeenshire Rifle Volunteers—The Hon. Arthur Gordon, C.M.G., to be Captain-Commandant; George Shepherd to be Lieutenant; John Grant to be Lieutenant; Alexander Davidson to be Ensign; Alexander Brebner to be Ensign; Feb. 15.

Memorandum.—7th Aberdeenshire Rifle Volunteers—Her Majesty has been graciously pleased to accept the resignation of Lieutenant John Blaikie; Feb. 9.

Renfrewshire Volunteer Rifles—4th Company—The surname of the former Ensign, and now Lieutenant in this Company, is Tassie, and not Jassei, as gazetted on the 17th current.

7th Company—Instead of John Graham, Gent., to be Captain, as gazetted on the 17th current, read John Graham, Esq., to be Captain; Feb. 15.

ROYAL VOLUNTEER BALL.

The Volunteer Movement has now extended itself throughout the land, and it may be fairly anticipated that before Midsummer England will possess 100,000 trained riflemen, ready to respond to any call that may be made upon their patriotic services. The Queen has marked her sense of the promptitude and spirit of the people by a direct approbation of it in her Speech from the Throne, and by the special reception of the officers of the various corps at a Court to be held in St. James's Palace, on Wednesday, the 7th of March. This compliment, although necessarily confined to the officers of the different regiments, is, of course, intended to apply to the whole of the volunteer corps; and the evening of the day appointed for the *levée* has been most appropriately selected for a *fête*, probably to be given in the New Floral Hall, adjoining the Royal Italian Opera House—a building which has been chosen from the remarkable advantages which it possesses over all other public places in the metropolis—affording a space equal to double that of the Guidhall of the City of London, and capable of containing Westminster Hall within its gigantic span.

Her Majesty the Queen has marked her approval of the idea by desiring that an announcement should be made that the ball is under her own especial patronage, in addition to that of the Prince Consort, and the Prince of Wales—the latter of whom will appear for the first time as the patron of any public festivity. His Royal Highness the Duke of Cambridge, as Commander-in-Chief, encourages the *fête* with his sanction; and the Duchess of Cambridge and the Princess Mary allow their names to head a long list of lady-patronesses, among whom will be found the Duchess of Wellington, Viscountess Palmerston, and almost all the ladies of distinction in political and fashionable circles.

As there is scarcely a member of the higher families of the kingdom who is not in some degree associated with the patriotic movement, and as a large attendance of the officers of the Army is expected, it is fully anticipated that the number of persons present will exceed 4000.

Mr. Gye, with whom it is understood the first idea of this *fête* originated, may be complimented on having selected the only place in London where such an assemblage could be brought together. The beauty of the new Floral Hall, its capability of decoration for such a purpose, and, above all, its capacity, render it the best adapted place in all Europe for such an entertainment; it is accessible on all sides, and affords those ready facilities for entrance and exit which experience has shown to be so desirable on the occasion of *fêtes* partaking of a national character. All the arrangements are of a very complete order. The refreshments will be supplied by Gunter, and the tickets are at a price within the reach of all.

A committee, composed of the commanding officers of the several Volunteer corps of the London district, have undertaken the supervision of the general arrangements, through whom, as well as through the commanding officers of all the provincial regiments, the Volunteers will obtain vouchers for themselves and their friends. Other persons not Volunteers will have to apply to some one of the lady-patronesses entitled to dispense vouchers.

RIFLE RECRUITS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Regarding the Assistant-Instructor's letter, allow me to say that I have known several soldiers, whose eyesight was always unexceptionable for every other duty, unable to lay an Enfield Rifle correctly, especially at long distances, partly (as a previous Correspondent writes) from inability to close one eye; and, in other instances, from a temporary nervous failure of the will over the functions of the eyes, either from the glare of the sun, or from excitement or awkwardness. For the former inconvenience a handkerchief covering the eye, whilst firing, invariably answers; hence the forage-cap might well have a broad peak. For the latter failing, an interval of rest for ten or fifteen minutes after the march to the range, total abstinence from the "pipe" till after practice, and, above all, a tolerably full stomach both for the *Recruit* and the *Instructor*, will work marvels, I'll be bound, in most instances. Whilst on this subject, I think a good end in these "sharpshooting days" would be served by a specially rigid scrutiny of the heart's action, and the eye and its appendages in recruits, rejecting as a general rule the "watery fishy eye," though sometimes well up to the mark in shooting, and the restless winking eyelids and "nictitating" iris, unless found able to concentrate the vision along a rifle at a distant point—a test, by the way, which should be applied now-a-days to all recruits. In fact, all future riflemen should be able after a few days to assume that wide-awake "fixidity" of gaze, the Free-masonry sign of the British *militaire*,—none others have an eye fit for the "long range," or at least likely to last so long. Whilst on the subject, I may practically add, for the information of Volunteers, that the additional indispensables for rifle practice successfully carried out, are a thick square-toed easy boot, with a sole able to support the buttock when kneeling, a knee-cap (only capriciously adopted in her Majesty's service, by the way), a loose trowser, with strap and buckle behind, a loose single-breast and shoulder and sleeve to tunic, a firm left-handed grasp of the rifle to the shoulder, and finally, worth repeating, a hearty meal before marching for the practice-ground; for never, after many years' observation in many ways, have I seen good practice from an empty stomach.

EXPERS.

WHICH IS THE RIGHT DRILL BOOK?

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As I see that the discussion on this subject still continues, perhaps you will permit me to inform your readers that both the drill books are drawn up by the same person. If "Volunteer" will expend another sixpence in the purchase of the third or fourth edition of the "Drill and Rifle Instruction for the Corps of Rifle Volunteers," and if he and his sergeant will turn to the preface, on page iii. they will perceive that the author is Colonel D. Lysons, Assistant-Adjutant-General. Now, the "Field Exercise and Evolutions of Infantry," called by "Volunteer's" sergeant, the "Adjutant-General's book at *3s. 6d.*," was revised by a committee composed of the following officers, Lieut.-General Sir Frederick Love, K.C.B., Inspector-General of Infantry; Colonel Lysons, C. B., Assistant Adjutant-General; Colonel Sir Thomas Troubridge, C.B., A.D.C. Deputy Adjutant-General; Colonel Pipon, Assistant Adjutant-General; and Major Gillie, 7th Fusiliers; and for reasons with which I need not trouble you, the literary portion of the work was undertaken by Col. Lysons. Naturally, then, when Mr. Herbert requested the Commander-in-Chief to furnish him with a drill-book suitable to Volunteers, H.R.H. employed this officer to prepare it. With these facts before us, "Volunteer's" criticism upon "this double government" of "War Office versus Horse Guards" becomes especially valuable. It would indeed be invidious to institute a comparison between the acumen of the sergeant, who could imagine that the Secretary of State for War would employ a civilian to draw up a drill-book for an important force, and the innocence of the "Volunteer" who could believe him. It is enough to say *arcades ambo!*

I am, sir, your obedient servant,

A CAPTAIN OF VOLUNTEERS.

VOLUNTEER DRILLS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Will you kindly instruct us Riflemen what really is required by Government to constitute an "effective?"—24 drills in the year, say the printed rules; but what is a drill? Our sergeant, an old Line rifleman, will have it that it is a four hours' affair, and that he shall only return those as effective who have attended twenty-four of four hours, or, if taken in smaller doses, as many as will complete that amount of time, say ninety-six, for example, of one hour. Other authorities contend that it only means twenty-four drills of the usual length.* I read somewhere that the requisite was twenty-four drills of not less then two hours. Who is right? The discrepancy of opinion is sufficient evidence that great ignorance exists; will you, therefore, by a few lines in your next publication, dispel it.—I am, sir, &c.

Reigate, Feb. 23, 1860. FIFTH SURREY.

THE VOLUNTEER STOCKS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I cannot help feeling amazed and astonished that notwithstanding the outcry against the use of the *stock* in the Army, every one of the Rifle Volunteer Corps, without exception I believe, has adopted it.

If before the introduction of the rifle the stock was a positive nuisance, now it is a positive disadvantage, as no man can shoot properly in the kneeling position with a stock round his throat; as, in this constrained position, the throat must be free, or the blood rushes to the head, and clouds the sight.

For satisfactory shooting with a rifle a soldier's neck should be free, and he should have the free use of his legs and arms, for which purpose the trowsers and tunic should be made quite loose.

We were in great hopes that out of the numerous Volunteer Rifle Companies some of them would have hit upon the *beau ideal* of what a soldier's dress ought to be, and we regret to see that very few real improvements have yet been made. Those Volunteers who adopted the loose trowsers and loose tunic have gone much to the mark. Why copy the dress of the Army, which is almost universally condemned as being unserviceable? It is good for neither hot nor cold climates.

I congratulate the Manchester Volunteers on having improved as much as it is possible on that vile head-dress—the shako—which is neither sightly nor serviceable: it has lately been discarded in time of war. Then why continue the Prussian abomination at all?

If Government were to offer a prize for the best head-dress, tunic, trowsers, boot, forage-cap, &c., to be laid before a board properly selected, then there would be some chance of arriving at the proper dress for the British Army, according to modern ideas and experience.

But at the same time I cannot help thinking that, if some of the Rifle Volunteers cannot hit upon a serviceable, easy, and, at the same time, sightly dress, it is hardly fair to expect the Horse Guards to institute such a dress for soldiers, contending with the difficulties which they meet with.

If the *intelligence of the country* cannot do it, I am afraid the case is a hopeless one.—Your obedient servant,

MODERN RIFLEMAN.

* This is the correct view, but it by no means follows that a Volunteer may not be returned as "ineffective" after much longer drill, or as "effective," at an earlier stage, according to his proficiency.—ED.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s*. 6*d*. per quarter, or 26*s*. per annum, payable in advance; and the postage—uniformly 1*d*. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.
[Late "Household Words" Office.]

ROYAL VOLUNTEER BALL.
Under the immediate Patronage of
Her Most Gracious MAJESTY the QUEEN.
His Royal Highness the PRINCE CONSORT.
His Royal Highness the PRINCE of WALES.
His Royal Highness the DUKE of CAMBRIDGE, Commander-in-Chief.
Her Royal Highness the DUCHESS of CAMBRIDGE.
Her Royal Highness the PRINCESS MARY of CAMBRIDGE.

LADIES PATRONESSES.

Her Grace the Duchess of Sutherland
Her Grace the Duchess of Argyle
Her Grace the Duchess of Wellington
Her Grace the Duchess of Montrose
The Marchioness of Downshire
The Countess of Derby
The Countess of Kinnoull
The Countess of Shrewsbury
The Countess (Frances) Waldegrave
The Countess Beauchamp
The Countess Constance Grosvenor
The Countess of Uxbridge
Viscountess Palmerston
The Dowager Lady Panmure
Lady Elcho
Lady Saltoun
Lady William Powlett
Lady Laura Meyrick
Lady Alfred Churchill
Lady Armytage
The Hon. Mrs. Sidney Herbert
The Hon. Mrs. Smyth Vereker
The Hon. Mrs. Curzon

A further list of Ladies Patronesses will be published on Monday.

COMMITTEE OF MANAGEMENT.

The Earl Grosvenor, Lieutenant-Colonel of the Westminster Volunteer Corps.
Viscount Ranelagh, Lieutenant-Colonel of the South Middlesex Volunteer Corps.
Lord Elcho, Lieutenant-Colonel of the Scottish Volunteer Corps.
Lord Colville, Lieutenant-Colonel of the Honourable Artillery Company Volunteer Corps.
Lieutenant-Colonel the Hon. C. Lindsay, Lieutenant Colonel of the St. George's Volunteer Corps.

The ROYAL VOLUNTEER BALL will take place, under the immediate sanction and patronage of her Majesty, on WEDNESDAY, March 7, 1860, being the day which her Majesty the Queen has specially appointed to hold a Levée to receive the Patriotic Volunteers from the different parts of the kingdom.

The Ball will be given in the New Floral Hall, Covent-garden, which building has recently been completed, and from its great dimensions, its form, and general arrangement, will, when decorated for the above special occasion, form a ball-room of unsurpassed grandeur.

A raised gallery will be erected for the exclusive accommodation of the Ladies Patronesses.

It is proposed to give, out of the proceeds of the Ball, four prizes for the four best rifle shots, to be contested during the ensuing summer, by the Volunteers of the London district. Each prize will be of the value of 25 guineas. The winners of these four prizes are then to compete for a fifth prize of the value of 100 guineas.

Further details of the entertainment will be published next week.

TICKETS.

Gentlemen, being volunteers, may obtain vouchers for their tickets through the commanding officer of their respective corps, or through the Committee of Management.

Each volunteer who may wish to be accompanied by a lady, will, through the same source, be furnished with a voucher for a double ticket.

Gentlemen, not being members of any volunteer corps, as well as ladies who desire to be present, will please to apply for vouchers to either of the Ladies Patronnesses or to the Committee of Management.

Every lady and gentleman's name must be inscribed on their tickets, as the tickets are not transferable.

Dancing will commence at ten o'clock. Refreshments will be supplied during the evening by the Messrs. Gunter, of Berkeley-square. At one o'clock the supper will be served by Messrs. Staples.

Tickets for the Ball, 25*s*. each; which will include refreshments, supper, and wine. The vouchers must be exchanged for tickets on or before Saturday, March 3, at the Floral Hall, Bow-street, Covent Garden; or at the Libraries of Mr. Mitchell, 33, Old Bond-street, and Mr. Sams, 1, St. James's-street.

N.B. As the number of tickets to be issued is, of necessity, limited, preference will be given to those who first present their vouchers for exchange.

HANOVER SQUARE ROOMS.

MRS. HERBERT begs to announce that her GRAND FULL DRESS BALL will take place NEXT THURSDAY, MARCH 1st. Ladies' Tickets, 7*s*. 6*d*.; Gentlemen's ditto, 10*s*. 6*d*.; to be had at the Rooms. W. M. Packer's Band. Commence at Half-past Eleven.

MR. ALBERT SMITH with his CHINA REPAIRED and MONT BLANC REVISITED, 1859. Every Night (but Saturday) at 8, and TUESDAY and SATURDAY Afternoons at 3 o'clock. Stalls 3*s*., which can be taken at the Box Office, Egyptian Hall, daily, from 11 till 5; Area 2*s*., Gallery 1*s*.

THE ARMY PRINTING OFFICE, 102 & 114, HIGH STREET, PORTSMOUTH.—HENRY LEWIS.—Company Ledgers, Pay Books, Order and Day Books, Defaulter Sheets, District and Garrison Forms.

DOUDNEY & SONS' RIFLE SUITS.—1ST SURREY, 4*l*. 2*s*.; SOUTH MIDDLESEX, 4*l*. 10*s*.; RIFLE BRIGADE, 4*l*.—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette*, Nov. 12.

Price 21*s*. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l*. 4*s*. Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l*. 12*s*. Mappins' Travelling Dressing Bag for Ladies, 4*l*. 4*s*. The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

HERALDIC STUDIO, 4, OLD CAVENDISH STREET, W.—New Designs for Monograms and Armorial Bearings in every style. Arms, Crests, &c., found by sending Name and County. Sketch, 3*s*. 6*d*. Paintings, Seals, Dies, and every kind of Engraving, in a superior style, by D. T. BAKER.

N.B. Mr. BAKER's ten years' connection with the Heralds' College guarantees correctness and excellence of execution.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 3*s*. 6*d*., 10*s*. 6*d*., and 21*s*. at UNWIN & ALBERT's, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

NOTICES TO CORRESPONDENTS.

An OLD SOLDIER's letter has been referred to a quarter where it is certain to receive attention.

R. T. B.'s able but voluminous paper is not suited to our views or to our columns. It is left for him at the office, with the Editor's thanks.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

In consequence of an unusual press of matter, many interesting Communications and much Correspondence must stand over till next week.

Army & Navy Gazette.

LONDON, SATURDAY, FEBRUARY 25, 1860.

If artillery be still in its infancy, it is difficult to determine who are to be its nurses, or under what system of education the tremendous giant is to be brought up. It is obvious from the recent experiments with Armstrong's and Whitworth's guns, that the attempt made to establish a superiority of range and accuracy on the side of infantry provided with arms of precision over field-artillery, has been unsuccessful, and that the cannon relying on weight of metal can overpower as before its ancient enemy, and bids fair to withstand the deadly foes which hitherto were irresistible against unaided artillery, viz., the cavalry charge and dash of infantry. But these advantages are accompanied by certain conditions which almost amount to defects. There is great increase of expense—there is the necessity of special ammunition being carried in a special way—there is the loss of accuracy in ricochet fire—there is the diminution of power in discharging grape, shrapnel, and common case with effect—and there is the nicety of mechanism, in addition to the requirement on the part of the gunners of a certain skill over and above that necessary to handle ordinary field artillery or guns of position. As between Mr. Whitworth and Sir William Armstrong the case stands thus, so far as we know, and our knowledge on the point is not altogether condensed in the remarks made by Mr. Sidney Herbert, in his clear, unlaboured, and unostentatious exposition last week of the reasons which justified him in asking Parliament "for the largest estimates ever proposed in time of peace."—Mr. Whitworth has invented a gun which throws its shot farther than any engine of war has ever yet been able to force a projectile. Sir W. Armstrong has invented or adapted a gun which throws shells and shot with greater precision, and at the same time to a greater range, than any other cannon in the world. We believe, at least, there is no tube, whether it be that of the French rifled gun, or of the United States' cannon, which combines long range and extraordinary accuracy in the discharge of shell and shot to such an extent. It will be observed, then, that Mr. Whitworth excels in range of shot, and that Sir W. Armstrong is unrivalled in the propulsion of shot and shell, the latter being by far the more terrible missile of the two. "But," says Mr. Whitworth, "I have not yet turned my attention to the manufacture and discharge of shell." And Sir William Armstrong rejoins, according to Mr. Sidney Herbert, "I promise you that when I make a gun for range only, I shall do something very decisive with Mr. Whitworth, but as yet I have always made shell guns." In reference to this implied controversy it is only necessary to say, that it is natural to suppose a gun which throws a shot to a great distance will throw a shell with proportionate force, and of course equal range. That supposition may however be quite fallacious, if it should prove that the form of the bore of the gun offers impediments to the successful realisation of the conditions on which the construction of effective shells depends. If a body of troops—a city—or an ordinary fortress—should be attacked by long-range artillery, there can be no question that, with light pieces at high elevations, a shell bursting into many fragments must be infinitely more destructive to life, and much more intimidating and terrifying, than a solid bolt or shot. Mr. Whitworth, however, is content to do one thing at a time. With a 3-pounder at 35° elevation and eight ounces of powder he throws a bolt which defies gravity and resistance for five-and-a-half miles, and falls deep into the earth at the end of its flight. That is a great result; and it is evident if the number of those small pieces were very great, and the objects sought to be hit were a stationary mass, they would produce destructive effects. But, as against stone-works, or even earth-works, those small bolts would make little more impression than arrows fired into an archery butt. It is the heavy concussion of large shot, fired at low elevations, and with comparatively small charges of powder, which generally produces the most destructive effects on masonry; whilst, on revetted earthen ramparts and gabionades, no missile is so efficacious as shell bursting continuously in the face of the revetments. If Mr. Whitworth appeals to his great range alone, we meet him frankly, and, with the fullest recognition of his great merits and of his very extraordinary achievements, we tell him that in our opinion great range of light shot at high elevation is not so formidable by any means as sure practice of heavier shot and shell at much shorter distances. With considerable diffidence, also, we beg to point out to Mr. Whitworth two difficulties against which he must bring his mechanical genius and his indefatigable resolution to bear; one is, the large allowance to be made by the gunners for the influence of strong side-winds on his bolts; the other—and a serious one—the great deflection which occurs in the ricochet after the first graze. Artillerymen will understand how very important it is that ricochet should be as much as possible in the true line of fire. It is our conviction that the importance of very long range from guns at high elevations has been much exaggerated, if the range be obtained by long bolts and not by shell. Reason about it as mechanics, philosophers, or metaphysicians may, there is some strange repugnance, if not inability, in man to direct implements of destruction against unseen foes. Hang mantlets up in embrasures, and the keen, watchful rifleman, watching the black muzzle in the pit, slackens his fire at once in spite of himself! Let darkness come on, and the rage of combatants can only be maintained by carcases and fireballs or the flash of the gun! Point out the smoke of a huge city five miles distant, indicate its domes and cupolas and spires to the peering gunner, and tell him to "fire at that," and he will find some force stronger than his will, and almost than his discipline, which cools his blood and paralyses his arm! When Lord Clyde led out the women and children from the Residency Garrison at Lucknow, over an open space, within a few hundred yards of the enemy's guns and myriads of sepoys, he adopted the expedient of raising up a long screen of frail cotton cloth and bags to mask their march. Scarcely a shot was fired at them by the enemy close at hand! But it is said we must fit our new guns with telescopes. The expedient would still be unsuccessful. If any one doubts it, let him walk to some hill five miles away from a great city, with a good glass in his hand, and select some point for attack. Then let him examine his own sensations, and ascertain whether he would have much confidence in his 3-pounder bolt, and would work his imaginary gun with energy against the mark, and he may rest assured he has at that moment a pretty certain index to the state of his feelings in actual warfare. Until Mr. Whitworth has proved the adaptability of his guns for firing shell, and the power of his larger ordnance to obtain considerable ranges at low elevations, he may consider that his beautiful principle has not received its full practical development for purposes of warfare; whilst Sir W. Armstrong must admit that, as yet, his worthy and liberal rival has beaten him in the matter of range, which is one that must always have most important relations to the power of artillery. Mr. Whitworth has proved that his heavy gun throws a shot which maintains its initial velocity for a great length of time, and we doubt not he will yet get great proportionate range from his 80-pounder. His lineal accuracy is very great at the lower trajectories of the light guns, and it will, of course, be exceeded by the heavy ordnance. We cannot help thinking that it would, meantime, be advisable for the Government to institute some comparative experiments on the merits of the two systems, and give a helping hand to the uncertain and wandering footsteps of the infant Hercules, whose first impress has obliterated the traditions of the greatest branch of scientific warfare.

We believe that there will be an examination for direct commissions at Chelsea immediately after the Easter week. No day has been actually fixed, but candidates will do well to attend to the above intimation.

No further appointments will be made to the staff of inspecting officers of Volunteers at present. The announcement that Captain Eagar had been actually made Deputy Assistant-Adjutant-General was, at all events, premature, but the post is provided for in the estimates. We can only regret that Colonel McMurdo has not procured the assistance of such an able and

Digitized by Google

experienced officer; for the task which devolves on him, energetic, zealous, and thoroughly qualified as he is, must be very onerous and difficult.

It gives us great satisfaction to learn that very considerable success has attended the praiseworthy efforts of those gentlemen who conceived the idea of founding a memorial to the late Sir James McGrigor. There never was an officer at the head of the Army Medical Department who did more good to his branch of the Service, or conferred larger benefits on the soldiers and officers of the Queen all over the world, and his memory well deserves the mark of respect which it is intended to confer upon the name of a most valuable public servant, an able administrator, an unostentatious but real reformer. Let any one who understands the question consider the condition of military surgeons as it was when Sir James McGrigor became head of the department, and compare it with their present status, and he must admit that the ameliorations and reforms for which he paved the way, and to many of which he gave moving force, have been of the largest and most advantageous character, and entitle their inaugurater and promoter to the lasting gratitude of the profession. It is pleasant to read the names in the subscription list, for it shows that Sir James McGrigor has not been forgotten by the Army surgeons. We congratulate Sir Andrew Smith, Sir John Hall, Dr. Burrell, Mr. Wyatt, and those who are acting with them, on the fruits of their labours, and heartily wish them a still larger development. No greater stimulus could be given to such men as Sir James McGrigor or Thomas Alexander, than to feel that when they had passed away, those among whom they had laboured would seek to perpetuate the memory of their good deeds and solid services.

The composition of the Chinese Staff shows that Lord Clyde is not forgetful of his old officers and friends, at the same time that it is a most efficient body. We see Colonels Mackenzie and Ross, of the old Highland Brigade, and formerly on the Quarter-Master-General's staff at Balaklava, in charge of the Chinese force in higher grades of the department. Captain George Allgood, the Assistant Quarter-Master-General of Lord Clyde's head-quarters, is also on the staff—no more active or zealous officer in the service. The appointment of Colonel Haythorne will be most agreeable to all who know the merits of that excellent soldier. Lieut.-Col. Stephenson, C.B., has seen much service in the Crimea and elsewhere, and Lumsden is a man whose name goes far and wide through India, and on whose career many eyes are fixed in great expectancy. In fact, if the expedition fail, it cannot be unsuccessful on account of any incompetency on the staff, for most of them have already gained by actual experience in the field the knowledge in which our Crimean staff was at first so disastrously deficient.

It is with very great satisfaction we direct the notice of our readers to a very graceful act on the part of the people of Weston-super-Mare to one of the most distinguished officers in our army, East or West. Lieut.-Colonel Norman is old enough to have fought in some seventy odd engagements, though he is not thirty-three years of age, and did not enter the service till 1844. He is Deputy Adjutant-General of the Army in the East Indies—that is, the actual Adjutant-General in the field—and served in that capacity before Delhi, after the death of Colonel Chester and the wounds of Chamberlayne had left the way clear till the close of the siege, after which he joined Sir Colin Campbell, and was present with him as Adjutant-General through all the operations which crushed rebellion in the north-west provinces. He has lately come home after a long absence, and has had the gratification of receiving the riband of Companion of the Bath from the hands of his Sovereign at Windsor. It is curious to remark, as indicative of the peculiarities of the Indian Service that the officer who is a Lieut.-Col. according to local rank, and C.B., is second on the list of Lieutenants of the 31st Regiment Bengal Light Infantry, one of the few faithful representatives of that vast army.

It may be interesting at this juncture to know that experiments are now being made each day at Toulon, on board the frigate Impératrice Eugénie, on French coals of different provinces, particularly on those of Graissessac, and of the basin of the Loire, some of which are prepared by a new and economical process for consumption in steam-furnaces.

It is curious to observe that there is at this moment in the Sardinian port of Genoa an officer of the French Navy, Lieutenant David, who fills the functions of "Captain of the Port."

Sir Charles Trevelyan, Governor of Madras, visited the French Governor of Pondicherry, the Commissary-General of Marine, Durand d'Ubraye, on 9th and 10th January, and was entertained at a grand banquet, at which various toasts expressive of national good-will were proposed.

As officers of the French Army and Navy have, from time to time, used titles of nobility to which they are supposed to have no legal claim, the Ministers of War and of Marine have addressed circulars to the officers commanding in both Services, to the effect that those who call themselves noble in their corps or ships shall prove their right to their titles, or be obliged to abandon the use of honorific denominations to which they are not entitled.

The ships Phlégéton and Durance have been engaged in supplying the wants of the Franco-Spanish force in Cochin-China, and active hostilities are about to be pushed vigorously against the Court of Hué.

The Neapolitan frigate Torquato Tasso was lost at Giulia Nova on the 10th inst. The crew are supposed to be saved.

It is stated that Admiral Fanshawe will very probably succeed Sir Barrington Reynolds, at Devonport, next May, in which month the latter gallant admiral's period of service will expire.

A return was issued yesterday, on the motion of Sir De Lacy Evans, of the cornetcies vacant in each cavalry regiment on the 1st of January last. The total vacancies were 65, of which 5 were in the 2nd Life Guards, 4 each in the 1st Dragoons, 8th Hussars, and 11th Hussars; 2 each in the 2nd Dragoons, 4th Light Dragoons, 15th Hussars, and 16th Lancers. The 2nd Dragoon Guards, 3rd Light Dragoons, and 9th and 12th Lancers were full, and all the other regiments wanted 3 cornets each. A correspondence between the War Office and the Treasury respecting the reduction of the price of cavalry commissions to the rate now paid in the infantry was also made public. We have in this journal more than once alluded to this correspondence so fully that we do not desire now to recur to it. The result, as announced by us in our last number, and since by Mr. Sidney Herbert in the House of Commons, is, that all commissions, save in the Household troops, are to be in future fixed at infantry prices, but that the abolition of forage stoppages from officers of cavalry are retained, pending the success of the new scheme of commissions in inducing officers to take service in the cavalry.

In his able speech on the Army Estimates Mr. Sidney Herbert is reported to have made some allusions to the statements which appeared in THE ARMY AND NAVY GAZETTE; in reference to the unsoundness of certain of the Armstrong gun-carriages shipped on board the Himalaya for China. We never stated that "the wood was, so rotten the screws fell out." The assertion was, that the hooks used in hoisting up the carriages sunk into the wood-work. Mr. Sidney Herbert says, "on the evidence of the captain of the ship, who had no interest in the matter"—he is a very excellent naval officer—"that there was no sign of decay about the limber; that as the whole weight of the limber pressed upon an iron bar [where?] which was not meant to bear it, of course it gave way." Does "*it*" mean the bar or the limber? Why was the limber made to press its weight upon an iron bar not made to bear it? How was Captain Seccombe moved to examine the state of the limber? The statement, as reported, offers a singular contrast to the general lucidity of the speech on the Army Estimates. For our own part we shall be satisfied that we were misinformed *when* the officers of the Royal Artillery, who actually superintended the hoisting in and shipping of the guns in person, state that *all* the woodwork of all the carriages was sound,—that nothing broke—that the clamps of the tackles did not sink into the wood. Mr. Sidney Herbert admits the failure of an "*it*"—we are afraid "it" is dual, if it be not plural. But there is, at all events, another set of artillery carriages on board the ship, and we hope that the guns may have a fair time of it across the Desert, and an effective *rôle*, if needs must be that one should be played, on their way to Pekin.

THE LONG GAME.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I find by your observations on my letter headed "The Long Game," that, from some obscurity in it, my meaning was misunderstood. Nothing could be farther from my thoughts than to reflect upon the good sense, discrimination, and generosity of the Emperor of the French in rewarding so intelligent and hard-working an officer as Captain Delvigne, and by heading my letter with the words "Long Game," words so well known and acted on by certain men of the *law*, I did mean to reflect on the strange conduct of successive British Governments in ignoring my claim to the invention of the *elongated* shot and percussion rifle shell, which I offered to my country through the War Department as far back as the summer of 1823. Captain Delvigne, by his statement in the *Spectateur Militaire* of December, 1830, honourably disclaims all pretension to the invention of the *elongated* percussion shell. As for the rifle called Minié or Enfield, I lay no claim whatever to it or any other rifle, except, perhaps, to one with *three elliptic* grooves, which I submitted to the War Department in the year 1828, and which the select committee at Woolwich rejected because it had *only* three grooves. They, however, afterwards, on mature deliberation, introduced a *foreign* rifle with *two* grooves! I satisfactorily used a German rifle of a proper strength and weight having thirteen grooves, and of the "Brown Bess" calibre, as far back as the year 1824, for firing my elongated shot and rifle shells, being at that time stationed with my late regiment, the 34th, at Enniskillen.

I am, sir, your obedient servant,

Rosherville, Feb. 20. JOHN NORTON.

LATEST INTELLIGENCE.

HOUSE OF COMMONS.—FRIDAY.

Mr. Wyld asked if Her Majesty's Government had received any information of the decree of Her Most Catholic Majesty the Queen of Spain, by which the title of the Duke of Tetuan has been conferred upon Marshal O'Donnell, together with the territory of Morocco upon which the victory of Tetuan was gained.

Lord J. Russell replied that the Government had received intelligence that the Queen of Spain had created Marshal O'Donnell Duke of Tetuan; but their information did not lead them to believe that the honour was accompanied with any grant of territory. The Spanish Government demanded the retention of Tetuan as part of the terms of a treaty of peace.

VOLUNTEER RIFLE CORPS.

Mr. Edwin James asked whether Her Majesty's Government intended to order any Battalions or Regiments of the Volunteer Rifle Corps now formed and in course of formation, during the ensuing summer, to the Camp at Aldershot, or any other encampment, in the same manner and for the same purposes as Regiments of the Line and Militia Regiments have been encamped?

Sir Robert Peel wished to put another question connected with the same subject. The Secretary of War in introducing the Army Estimates, having expressed a hope that the Volunteer force would become part of the permanent military establishment, and that when an augmentation of batteries should take place it might become a substitute for the Royal Artillery, he begged to ask whether the Articles of War applied to the Volunteers, and whether those already enrolled were subject to the military code and discipline which governed the British Army?

Mr. Sidney Herbert said he must have expressed himself very obscurely if his words could bear the construction which the honourable baronet put upon them. Unquestionably the Volunteer force was not subject to the Articles of War. Nothing could be more preposterous than to suppose that the Government intended to take the Volunteers from their homes and send them to Aldershot.

Sir Edward Grogan asked the Secretary to the Admiralty whether it was intended to carry into effect the spirit of the late naval warrant as regards medical officers in the Navy, by granting to those officers, when serving afloat, naval rank and uniform, with the distinctive badges of rank, corresponding to the military rank granted to them by this warrant, both afloat and when serving with Her Majesty's forces ashore?

Lord C. Paget said that the terms of the Navy warrant had been carried out with regard to the pay and the rank of medical officers; and with respect to the uniform, the Admiralty were waiting only until the decision of the House the other night upon the increase of pay of masters and engineers should be carried into effect, before taking the question into consideration.

General Peel called upon the Secretary for War to give some information relative to the expedition to China. If the statement in the *Times* of Monday last were correct, that the military force of the expedition was to amount to 20,000 men, including 14 regiments of the line, the sum of 500,000*l.* taken in the army estimates on account of the expedition, would not pay even the cost of the transportation of stores.

Mr. Conyngham wished to call the attention of the Secretary of War to another subject before he answered the right hon. general's question. The matter referred to an officer, who was indebted to a considerable amount to one of his constituents. (Laughter.) He wanted to know whether it was the privilege of officers in the Indian service not to pay their debts, as distinguished from officers in the Queen's service. In another case in which a Queen's officer was indebted to one of his constituents, after some correspondence with the Horse Guards, he obtained payment of the debt with the utmost promptitude.—(Laughter and cries of "Oh!")

Sir C. Wood stated in reply to the right hon. general, that one company of Engineers, together with the 3rd Buffs and the 67th Regiment of Foot, had already been sent from India to China. Two squadrons of the Dragoon Guards, 3 battalions of Artillery, horsed, and one battalion without horses, and the 31st, 44th, and 99th Regiments of Infantry, were under orders to proceed to China. He had received information from the Horse Guards, that the 3rd battalion of the 60th Regiment would, if necessary, proceed from Madras, and the 1st battalion of the 13th Regiment would proceed from Calcutta. The amount of the depôts at home was 17,550. At the same time he must state that the information from the Indian government did not correspond with that from the Horse Guards. As regards the question of the hon. member for Brighton, he begged to state that the practice was this—when a demand was made on an officer it was forwarded to him, but the Indian Government did not feel called upon to convert itself into a legal tribunal for the purpose of enforcing the claim. (Hear, hear.) If the transaction, however, involved anything discreditable, the India Board would, of course, interpose.

LORD ELGIN V. ADMIRAL SEYMOUR.

Admiral Seymour adverting to the statemant made by Lord Elgin in the House of Lords, declared it was inaccurate—he would not use another word; but he made this declaration solemnly.

Major Cumming Bruce, whilst defending the veracity of his noble relative, suggested that the Government should appoint a commission to determine the question in dispute.

Sir J. Pakington expressed a hope that the matter would be carried no further.

Lord J. Russell expressed his conviction that Lord Elgin was incapable of stating anything but what he believed to be true. The difference between his noble friend and the gallant admiral was doubtless owing to a misapprehension of circumstances which had occurred some time since at a distance of several thousands of miles.

The resumed debate on Mr. Du Cane's motion occupied the rest of the night.

The House of Lords was occupied with discussing the question of preaching in theatres.

NAVY ESTIMATES.

In the first number of a series of pamphlets, called "The Piccadilly Papers," just published by Mr. Robert Hardwicke, 192, Piccadilly, there is an able, if somewhat discursive, review of the enormous sums which have been spent by the Admiralty on our Navy within the last few years. But the pamphlet is a misnomer. It is entitled "The Great Increase of Public Expenditure, and How to Check it;" whereas, its contents relate merely to the increased estimates for the Navy, and the only mode suggested for checking their enlargement is the doubtful plan of a permanent Finance Committee. As specimens of style and argument, the following passages are not unfavourable quotations :—

"In the War Department, past mismanagement has been rather a question of *personnel* than *matériel*. The Duke of Newcastle was put aside, and Lord Panmure launched from his Haslar repose,—all to 'take care of Doub.' Every officer in command was damned in turn. Except Brown Bess, the *matériel* was excellent, and she might indeed be regarded as *personnel*, and placed with the other old women. But in the Navy nobody was ever to blame : it was *things*, never *persons*, that were at fault. And so it is still. Batteries, gunboats, and even screw-liners may go to the devil; and now 'the Surveyor' (rebaptised as the 'Controller of the Navy,' although quite free from all imputation of sin) is to try it on with rams! What next, and next? Ask any naval officer his opinion of the rams. He shakes his head. Will they go as fast as they say in the newspapers? He don't believe it. *How* will they go then, you ask? Very likely to the bottom! Will they be able to run down ships, as they say? Perhaps, *if* the ships will stand to be run down. How will they behave in a pitching, rolling sea? Pitch and roll head down, and sink. Who approves of them? They say, *not* Sir Baldwin Walker at any rate!!! And yet they are being built, and he is 'the Controller of the Navy.' Is ALL THIS SO OR NOT? IF IT IS, WHAT DO YOU THINK OF IT? Can you wonder the Navy Estimates are thirteen millions!"

The writer is inclined to regard the administration of the Army with much greater favour than that of the Navy; and indeed it is somewhat remarkable that in one branch of the Services where the Parliament has a mediatized influence, and in which the Crown still maintains a considerable share of its powers and prerogatives, there should be a more ready concession to the wishes of the House of Commons than in the administration of the other branch, which is regulated by a Board, dependent for its existence on the will of Parliament. There is some force in the following passages :—

"Only think what has been thrown upon the 'Surveyor of the Navy' during the last ten years. The Navy Estimates rose from five or six millions to twenty at the Russian war. Need we wonder that floating batteries were built and found of no use? and that gunboats followed in shoals, to be 'hauled up' at Haslar? What public company, or commercial man, with a business increasing from five millions to twenty per annum, would not think of dividing the responsibility, by adding fresh heads to the management, or taking in at least one new partner? What would even be said, if all that relates to the rifle and great gun in the Army were left under one single man's management? Can we wonder that a ship built at one dockyard costs a totally different rate per ton than at another? or that the accounts in both cases are probably unreliable? Need we be surprised that after steamers were long discouraged, then a fleet of iron vessels were suddenly launched, and their unfitness for war only discovered afterwards? that floating batteries, gunboats, small ships and large ships, and, lastly, rams, have each had a spasmodic and fitful turn at the royal dockyards? and that, notwithstanding, the constant cry of inventors has been that nothing has any chance at the Admiralty!

"Look, on the other hand, at the *Great Eastern*. Here is a doubtful scheme, probably a failure; but it affects comparatively a few persons. How serious would have been the results if all the merchant-shipping yards had been under one single man's management, and some dozen Great Easterns had been built. Thus it is in the Navy. Seppings was great; Symonds was great; Walker is, no doubt, great. But why adopt a Popish system of infallibility, when we might have a concensus of divines? They manage things better in France; there they have a Board of Construction. They do not leave it to a Symonds to build broad bottoms, but set his face steadfastly for years against steam-vessels. They do not impose upon a Walker a labour beyond any single man's power, and leave him to take up with batteries one day, with gunboats another, with ships of the line after that, and at last to ride his hobby on great black rams!"

We may be permitted to suggest to the author, that a question can be made quite emphatic enough for ordinary readers, without the introduction of the name of the Evil One, to which he is very partial.

In addition to the appointment of a permanent Finance Committee, it is recommended as one of the means of checking the increase of our expenditure, to *raise* the scale of pay of our sailors, and in time of war to *increase* the whole wages of the fleet; in a word, there is much in the pamphlet about the increase of our estimates, but the way, "how to Check it," is not so clearly shown—or at best it is only a tentative and empirical way. It may be very true that the House of Commons is somewhat to blame for lavish expenditure, but it is surely not unreasonable to expect from the heads of departments some assistance in lightening our burdens.

The Oriental arrived at Madras on 3rd January from Rangoon viâ the Northern Ports, and left again on the 8th at daybreak with Defiance in tow for Cocanada and Moulmein, whence she will also return direct to Madras.

OCCASIONAL THOUGHTS ON MILITARY SUBJECTS.

THE VOLUNTEER MOVEMENT.

Those persons who have carefully noticed the expression of public opinion for some years, cannot but have read statements, some of them by military men, to the effect that the inhabitants of at least England are the most unwarlike people in Europe. It is strange that such an assertion should have been made by military men who, at the very same moment, would have been ready to maintain that the British Army is the best army in the world; or, in other words, that out of the worst materials had been manufactured the very best article.

The explanation of this paradox is, that unmilitary has been mistaken for unwarlike. The inborn freedom of an Englishman may, and doubtless has, rendered him averse to subject his actions to the strict control of military discipline, aggravated as it was,—but now, thanks to the present Commander-in-Chief, it no longer is,—by the apprehension of falling under the degrading punishment of the lash, or his body to the buckram restriction of military dress. In this sense an Englishman is not military; but look at him as a boy at school fighting out his quarrels with his fists, not with his tongue, or on a stage at a country fair, bearing, as calmly as if he had no feeling, all the hard knocks of a cudgel match, or in the ring as a prize-fighter, and would anyone then call him unwarlike?

The Englishman does not wish to disturb the tranquillity of other countries, and he values the blessing of his own. Foreigners need not then fear that he will willingly go over to them to prove that he has military qualities; but should they come over to him with hostile intentions, depend upon it he will soon prove that he possesses warlike qualities. It will be readily believed, then, that in common with many of my countrymen I have observed with the utmost satisfaction the progress of the Volunteer Movement, as affording a demonstrative proof that the old stock of England are as capable as the new stock of America, descended from them, to take care of their own; or, in other words, are determined not to be pushed out of their warm nest like a sparrow's nestling by the knowing cuckoo, from whatever region he may migrate. Another reason which has doubtless assisted in impressing upon the minds of military men a certain contempt for the Volunteer soldier, is the ease with which a small number of soldiers generally disperse a mob; but here it should be remembered that to look at death through a halter is very different from contemplating it as a casualty consequent on the performance of duty, and the real difference between the two sets of men in this case is a moral one; namely, that the one is arranged on the side of law, and the other against it. This difference is indeed as perceptible in other countries as it is in England, until the passions of the people have been so excited by long oppression and injustice that they at length rise above all thoughts of law and punishment, and are ready to face death in whatever form it may appear. Thank God! in this happy country, no such motives for violent resistance to constituted authority can now exist, and hence it is that in a mob no one is ever sure that his neighbour shares his feelings or will stand by him to the end; an uncertainty which makes him dread his friends almost as much as his enemies, and deprives him of all real moral courage.

But, after all, it is probable that the unfavourable opinion expressed by some,—not by all,—military men of a Volunteer force, is due to the natural jealousy which is often observed to exist in the minds of the members of any profession towards all interlopers. With what horror, for example, does the regular physician regard the unlicensed practitioner, who, whatever may be his merits, is stigmatised as a quack; the barrister, the attorney who intrudes into his path; or the divine, the itinerant preacher? It is so with the professional soldier: he has been trained to do military work in one particular way, and he cannot be brought to believe that any military work can be done except in his way and by him only.

In vain are the examples of Switzerland and America quoted to the contrary: indeed, it is probable that few consider fully the weight of the argument in favour of a national force of Militia and of Volunteers, from which, according to the records of the wars (civil wars they may be called) between England and the latter country, the present inhabitants have principally sprung.

We have indeed almost forgotten how energetically and successfully the colonists resisted the military power of Great Britain in the War of Independence; and still less do we keep before us the fact that, though much of their success was doubtless due to the transcendant abilities of Washington, and the undaunted courage and persevering hardihood of his self-created generals, much of our failure may be traced, not only to the want of capacity, but also to the vanity and presumption of some of our generals, who affected to look, as now, with contempt on an army of irregulars. J. G. P.

(To be Continued.)

COLONEL NORMAN, C. B.—The inhabitants of Weston-super-Mare have just presented a congratulatory address to Lieut.-Colonel H. W. Norman, C.B., Deputy Adjutant-General of the Bengal Army, on occasion of his arrival in that town on a visit to his aged mother and relatives. The address, which places on honourable record that gallant officer's exploits at the siege of Delhi, as well as his previous services under Lord Gough and Sir Charles Napier, is signed by the Earl of Cavan, A. W. Kinglake, Esq., and all the leading inhabitants of the town of Weston-super-Mare. It will be remembered that immediately on his return to England, Her Majesty invited the gallant Colonel to Windsor Castle, and he was presented to Her Majesty by H.R.H. the Duke of Cambridge at the last *levée*. It is interesting to know that more than ten years ago the late Sir C. J. Napier predicted the future eminence of the young officer who, though now scarcely thirty-one years of age, has seen as much active service as many men twenty years his senior.—*Morning Chronicle.*

The Peninsular and Oriental steam transport Pottinger left Madras on the 3rd January for Poree, whence she proceeded for Singapore, with a regiment of Native Infantry on board, and the ship Tubal Cain in tow. She will return direct from thence with the relieved corps.

MILITARY PUNISHMENTS AND MILITARY DISCIPLINE.

(Continued from page 95.)

It has been urged, and strongly urged, that the labour of prisoners should be made as far as possible reproductive, for two reasons—firstly in order to reduce the cost of maintenance of the individual, and secondly for the purpose of giving to the man himself habits of industry and a means of honest livelihood when discharged from jail. Such remarks apply with force to the civilian, but not so to the soldier. The latter has been already taught, and perhaps perfected in the branch for which his services are required, namely the profession of arms,—artillery, cavalry, or line, as the case may be,—and public money has been expended in teaching him his business as a soldier. Now, in the majority of instances, this man before he enlisted had no occupation of any kind; and, to stop in the midst of his military career to teach him a trade, especially whilst under the sentence of a court-martial, would be a plan ill-calculated to deter from the commission of crime. To make a man a tailor or a shoemaker, a weaver or carpenter, would be to give him the means of earning his livelihood in situations where, simply as a labourer, he could but indifferently exist. It would be holding out to him an extra inducement to desert when in the colonies, where he could not readily be replaced. Desertion already constitutes one of the most frequent of military offences, and such a proceeding would tend greatly to its increase. No, the soldier must be rigidly dealt with whilst in goal. His situation there must be made as irksome and disagreeable as possible. Stone-breaking and oakum-picking, even, do not exercise a sufficiently deterring influence. They do well enough as they are at present employed, viz., as supplemental occupations, but they are of themselves insufficient. The man so occupied reduces the heap upon one side, and adds to that upon the other. There is some result from his labour, and in contemplating it he feels more or less satisfaction. With shot exercise, upon the contrary, there is none whatever. The longer the soldier is engaged at it the more disgusted does he become—he finds no relief from the tedium of monotony. Shot exercise, moreover, is a form of punishment that is applicable to all frames and to any given number of men. It can be adopted equally during peace as war, and in every quarter of the globe, with an uniformity of system, and without any cost, the material necessary in cannon shot being present in every place equally with the soldier himself. Other objections against it have been raised upon the score of its being prejudicial to the soldier's health, in consequence of its having a tendency to the production of frost-bite and rupture—of frost-bite in severe weather from the contact of the hand with the mass of cold iron, and of hernia from the efforts made in lifting being thrown upon the abdominal muscles. The first objection is at once removed by the employment of stout woollen mits when at drill; and the second by obliging the man to lift the shot standing immediately over it, keeping his heels together at the time, and raising the weight close to the body. Thus performed, the muscles of the belly are not brought into play at all, and remain lax, those of the arms, shoulders, back, and loins only being engaged in lifting the weight. Shot drill is a punishment, too, which the soldier dislikes beyond conception, and as such is a most useful adjunct to prison discipline; it moreover acts beneficially upon the individual by increasing the development of his muscular system.

We have next to consider the subject of "restrictive diet," and that we believe to be one of the most (if not the most) important of all the different forms of discipline enforced upon the soldier. There is an old saying that the way to a man's heart is down his throat; and, taking the heart in its allegorical sense to mean "the feelings," we believe—nay, we are sure, that the impression made upon the individual, and his distaste for gaol are greatly influenced by the description of food which he therein receives. Upon the first establishment of military prisons, the diet of the soldier was varied, and so palateable as to exercise no kind of deterring influence whatever. It consisted one day of pork and peas; a second of molasses and rice; a third of suet pudding; a fourth of peas pudding; a fifth of bread and milk; a sixth of potatoes and milk, and so on, producing no kind of distaste or dislike. After a while, however (upon the occasion of the failure of the potato crop in Ireland), Indian corn came to be introduced, and it was employed in the Irish prisons as the chief article of food. In 1850 a systematic course of experiments were carried out, in order to test its efficiency, in the Dublin District Military Prison, and the results were so satisfactory, that it was proposed that it should be adopted generally as the sole article for the dinner meal, and, discarding all other substances but oatmeal and bread, that the soldier should be fed entirely upon it so long as he remains in the second and third classes, but that the man in the first class should receive a meat dinner upon Sundays, thus affording each one an additional inducement to seek promotion.

The scale of dietary proposed then was the following, viz., for breakfast, 8 oz. of oatmeal made into 2 lbs. 2 oz. of stirabout; for dinner, 9 oz. of Indian meal made into 2 lbs. 6 oz. of stirabout; and for supper 8 oz. of bread, with half a pint of milk at each meal. This was, accordingly, first tried in the Military Prison at Dublin for three months, from the 1st of March to the 31st of May, 1850, and the report furnished by the surgeons of the different regiments whose men had been subjected to it proved its sufficiency, both as to quality and quantity. A further trial of this diet was therefore ordered to be made in all the other prisons, and detailed reports furnished by the governors and medical officers as to the general effect upon the health of the prisoners. These were unanimously in its favour. The Secretary of State for War therefore, upon a consideration of these reports, directed its general adoption; the principle laid down by the Committee on Military Imprisonment being, that the diet of military offenders should be limited to such quality and quantity of food as would preserve them in health, enable them to go through the discipline of the prison, and return to their corps at the termination of their sentence fit for immediate duty, being at the same time, as far as possible, different from the soldier's ordinary ration.

From the medical statistics of the different prisons, the working of this system of dietary has been found to be most satisfactory, and sickness steadily diminished after its intro-

Digitized by Google

duction. For men in solitary or separate confinement, not employed at hard labour, the quantity of Indian meal for dinner is reduced to 6 oz. instead of 9 oz.; whilst for prisoners after 84 days' confinement with hard labour, whom *in the opinion of the medical officer might require it*, authority exists for the issue of 10 oz. of oatmeal for breakfast, and 12 oz. of Indian meal for dinner.

Such at the present time is the dietary of military prisons. The reports of the governors and medical officers invariably confirm its sufficiency for the due maintenance of health, and report that, as a diet calculated to act as a deterrent, a better cannot be imagined. To the country, too, this system of feeding is advantageous, since the cost of maintenance of each man upon it does not exceed 3*d.* per day, leaving the balance of the soldier's pay available for the discharge of all other expenses connected with the prison, thus rendering each one almost, as it were, a self-supporting institution.

The remaining punishment which awaits all offenders upon admission into a military prison is deprivation of speech. The adoption of a system of total silence at all times, with confinement in a separate cell when not at hard labour, is calculated to increase very considerably the stringency of the discipline, for the soldier is a gregarious animal. Continued association with a large body of comrades, accustomed more or less to continued noise in his barrack room, with music at intervals—a transference to silence and solitude is, perhaps, more severely felt by him than by any other class of men. Still, its influence upon the mental powers is not appreciable. Nostalgia, or longing for home, is occasionally met with, especially in those who, having deserted, have successfully escaped detection for many years, have settled in business and perhaps *thriven*, until by some means they have been discovered and arrested; but such are exceptional cases, and upon the great bulk of the prisoners subjected to confinement in a military prison no appreciable ill effect whatever is produced by the adoption of the silent system.

The various punishments here alluded to are those which await every man indiscriminately who is committed to a military prison. In our next communication we shall dwell upon the penalties of exceptional character, which are inflicted either under the original sentence of the court-martial, or for misconduct whilst in gaol.

(To be continued.)

THE CHINA EXPEDITION.

The last Indian Mail supplies us with some further and more authentic details respecting the China expedition. According to the *Bombay Times*:—A feeling approaching to enthusiasm has been excited in India in favour of the war. Volunteering is going briskly forwards, our latest news from Calcutta informing us that the Lahore Light Horse has offered its services in addition to the regiments previously named; and we have heard words of reproach uttered against the home authorities on account of letters from head-quarters which confidently assert that the force proposed to be sent by the Indian government has been very greatly reduced by the orders from England. It is to be hoped, however, that an army of 15,000 English troops, with 10,000 or 12,000 French, will be quite sufficient to bring the Chinese to reason.

The Governor-General had issued an order for the formation of a corps of irregular cavalry for service in China. The general order says:—

"Horses, carbines, and equipments will be furnished to the regiment by the Government." Clothing will also be supplied at the public expense. French gray, with scarlet turbans and kummerbunds. The regiment will be formed at Cawnpore, under such arrangements as his Excellency the Commander-in-Chief may direct. The Governor-General is pleased to make the following appointments to the regiment: Commandant—Lieutenant W. Fane, Madras Infantry. Second in Command—Lieutenant R. E. Hope Johnstone, Bombay Infantry. The rest of the officers will be hereafter nominated.

CAMP BOOTANA, JAN. 13.

His Excellency the Governor-General is pleased to announce the following appointments of officers to the general staff of the force proceeding from India to China on service: Major-General Sir J. Michel, K.C.B., to command a division; Brigadier-General Sir R. Napier, K.C.B., to command a division.

STAFF AT HEAD-QUARTERS.

Chief of the Staff—Colonel Edmund Haythorne, of the 1st Royal Regiment.

Deputy Adjutant-General—Lieut.-Colonel F. Charles Arthur Stevenson, C.B., of the Scotch Fusilier Guards.

These officers being now in the China command, their appointments are subject to the confirmation of Her Majesty's Government.

Judge Advocate-General—Major H. Wilmot, 2nd Battalion Rifle Brigade.

Deputy Adjutant-General of Her Majesty's Indian Forces—Brevet Lieut.-Colonel Herbert Bruce, of the Bombay Army.

Assistant-Adjutant-General—Brevet-Major the Honble. James Charlemagne Dormer, of Her Majesty's 13th Light Infantry.

Deputy Assistant-Adjutant-General—Lieutenant Robert Biddulph, of the Royal Artillery.

Deputy Assistant-Adjutant-General of Her Majesty's Indian Forces—Major H. D. Taylor, 1st Madras Fusiliers.

Deputy Quartermaster-General—Brevet-Lieut.-Colonel Kenneth Douglas Mackenzie, of Her Majesty's 92nd Highlanders.

Assistant-Quartermaster-General—Brevet-Lieut.-Colonel Robert Lockhart Ross, of Her Majesty's 93rd Highlanders.

Deputy Assistant-Quartermaster-General—Brevet-Lieut.-Colonel Garnet Joseph Wolseley, of Her Majesty's 90th Light Infantry.

Deputy Assistant-Adjutant-General to Sir J. Michel's Division—(To be named hereafter).

Deputy Assistant-Quarter-Master-General to Sir J. Michel's Division—Lieutenant George Allgood, 40th Bengal Infantry.

Deputy Assistant-Adjutant-General to Sir R. Napier's Division—(To be named hereafter).

Deputy Assistant-Quartermaster-General to Sir R. Napier's Division—Lieutenant Peter Stark Lumsden, 60th Bengal Infantry.

R. J. H. BIRCH, Major-General,
Secretary to Government of India with the Governor-General.

THE BRITISH SQUADRON IN CHINA.

The subjoined is from a letter dated Hongkong, December, 20:—

"Admiral Jones left in the mail steamer for Shanghai on the 17th inst., whither Her Majesty's ship Furious, on board which he will temporarily fly his flag, had preceded him.

"The remainder of the 3rd Buffs, from India, have arrived in Her Majesty's Indian navy steamer Coromandel and sailing ship Tasmania, the former having the latter in tow until arriving in Chinese waters, where, in a gale of wind, they parted company. The troops have since gone up to Canton.

"The seamen and officers of Her Majesty's steamer Cambrian, who have garrisoned Macao Fort for many months, are to be superseded by artillery from the marine brigade at Canton, and return to their ship.

"Captain Commerell, of Her Majesty's ship Magicienne, has been out several days with Her Majesty's gun-boats Clown, Drake, Woodcock, and Leven, with armed boats from Her Majesty's ships, Chesapeake, Cambrian, and Magicienne, in search of pirates, who are again becoming numerous and bold in the south of China. They had no fighting, but captured and burnt many junks.

"The vessels composing our Chinese squadron are at present stationed at Hongkong:—The Chesapeake (flagship), the Cambrian, the Highflyer, the Magicienne, the Nimrod, the Hesper, and the Princess Charlotte; gunboats: the Opossum, the Forester, the Kestrel, the Leven, the Starling, the Clown, the Woodcock, the Drake, and the Watchful.

"At Canton and Whampoa.—The Fury, the Assistance, the Bittern; gunboats: the Staunch, the Banterer, and the Firm.

"At Shanghai.—The Furious (flagship), the Sampson, the Camilla, and the Roebuck; gunboats: the Haughty, the Janus, and the Bustard.

"At Ningpo.—The Algerine.

"At Foochow.—The Inflexible.

"At Amoy.—The Acorn.

"At Japan.—The Cruiser.

"Coast of Tartary.—The Actæon and the Dove.

"At Singapore.—The Esk and the Saracen.

"In India.—The Retribution, the Cyclops, and the Sparrowhawk."

Another letter of the same date says—Captain Shadwell, of the Highflyer, will be invalided in the course of a few days, and go home by the mail, which leaves this place on the 15th of January next. His loss to the fleet will not be easily replaced; he has secured the affections of the officers and men of his ship to an extent which is very rarely accomplished by the most popular naval captains, and they express very strongly their regret at his departure. Commander Heath, of the Fury, will be appointed to the Highflyer.

THE ARMY ESTIMATES.

In moving these estimates, Mr. Sidney Herbert accounted for their great increase by stating that he had made a very large outlay upon the new rifled guns, which had proved so valuable in Italy, and which had been largely supplied to the Navy. The Government had thought it better to disembody the Militia as soon as possible and to add to the regular force, regarding it, as a general rule, inexpedient that the Militia should be embodied in time of peace. He then specified the different branches of the force which it was proposed to augment, the extent of the augmentation, and the reasons upon which it was founded, the apparent increase being 20,000 men beyond the number voted last year, though, in reality, owing to transfers from India and other causes, the increase was not so great. He denied that the military force of this country, amounting to 240,000 men, was too large, or disproportioned to the population, in comparison with other nations, and it must be recollected, he added, that our army was not the army of England only, but of our colonies and of India. Then it was said that our army was a dear one; but he showed by reference to the cost of other armies that this was an error. Having got the men, he proceeded to consider how they were commanded, how practised, how clothed, how armed, how fed, and what was the state of their health. Upon all these points he gave minute details. With reference to the health of the army, he stated that a great improvement had taken place. Taking the mortality in the force at home, the best criterion, he showed that its rate had diminished in all the different branches, and although this might be owing, he observed, to the army being a great deal younger than it was, in the Household Cavalry, which had never been in the Crimea nor in India, the mortality had very considerably diminished. After making some passing remarks upon the Volunteer force, and suggestions as to their organisation, he discussed the other Estimates,—for the manufacturing establishments; for warlike stores,—shot and shells and ordnance,—with the separate and comparative merits and properties of the Armstrong and Whitworth guns; for barracks, and other items which he thought required explanation. He repeated that the amount of these Estimates was enormous, but he hoped that the explanation he had given would convince the House and the country that the Government had done their utmost to relieve the public burden as far as possible consistent with the circumstances of the time, which was a transition period in almost every *matériel* of war. He concluded by moving a vote of 143,362 men, exclusive of 92,490 in India. The vote was agreed to, after a discussion in which Sir R. Peel, in a most amusing speech, delivered a vehement protest against the magnitude of these Estimates in a year of peace, and against the Volunteer movement.

Sir George Clark, at present permanent Under Secretary of State for India, will succeed Lord Elphinstone as Governor of Bombay.

THE SCHOOL OF MUSKETRY AT HYTHE.

We have been favoured with the following extract of a letter from a Volunteer officer sent to the School of Musketry for instruction:—

"I hasten to report my arrival here, which was attended with some difficulty in consequence of a severe snow-storm. After leaving Ashford, the train had to be dug out before we could proceed. This, however, very slightly damped the enthusiasm of a numerous body of Volunteers proceeding hither by the half-past eleven train. I travelled with some very pleasant companions, and found out the wrinkle of the officer's ticket (namely, 2d. per mile). This place is three miles from the Westernhanger Station, and the snow being so deep I had some difficulty in getting across. On arriving at the Swan, I found it full, but after driving about some time I secured one room on the ground floor, with the door opening on the high road, and an iron camp bedstead of very small dimensions. I was too glad to get out of the raging snowstorm to be very particular, and after ordering a fire and a cup of tea to be ready in ten minutes, I started for the barracks (within gun-shot) and reported myself, received a rifle and knee-cap, and registered my name and corps, and hastened back, and after a change and some tea, and a good thaw at the fire, I started for the table d'hote dinner at seven o'clock. We sat down about fifty. Mine host appears to be an old soldier, and proved himself a thorough master of the commissariat duty. The dinner and wine, with ale and attendance, cost about 6*s.* per head. Of course our talk was of the various corps assembled, and their different costumes; the prevailing colours appear to be grey and green of various shades, and a few brown; the accoutrements black or brown leather, and some profusely ornamented. Our uniform, you will be pleased to hear, was a source of great attraction, and I had to satisfy numerous inquirers on the subject. The morning was devoted to platoon exercise. About noon we fell out for lunch till half past two, and I took the opportunity of walking to the target practice ground, but I was glad to get safely back in consequence of the numerous falls I encountered from the snow proving so treacherous, hiding the walls and ditches. After another turn at platoon and an introduction to Major-General Hay, a fine martial-looking man, we were marched off to the lecture-room, and heard a very interesting lecture from Colonel Wilford. He is a soldier-like man over 60 years of age, tall, and with lively and pleasing manners; his mode of lecturing was graphic, vigorous, and full of humour, and he is quite enthusiastic with his subject. He told us we could not shoot *by nature*, that it was a common error of men having rifles and shooting once perhaps successfully to conclude that they were good shots *habitually*—a fatal error, as it took years to make a man a rifleman. He dwelt forcibly on aiming and position drill which he said established a union between the finger and the brain; he compared rifle shooting to shooting from a ship, the trigger must be pressed at the *right juncture*, he said although he was getting older daily he shot better than formerly, because he knew when to *press the trigger*. He then dismissed us with some very good and kind advice as to our forthcoming duties. Yours very faithfully, W. A.

ARMY CHAPLAINS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Permit me to direct the attention of your readers to the disadvantages under which commissioned chaplains in the Army labour, arising from their having no uniform. As regiments remain at the same station for a few months only, or at most a year, the soldiers have not sufficient time to recognise the chaplains, so that these officers are generally taken for civilians. On entering the barrack gates they are challenged by a sentry, who asks them to produce a pass. They experience the same annoyance in visiting the hospitals, especially if there is a sign-post at the entrance to the road leading to them, notifying that strangers are not allowed to pass that way, which is frequently the case. In visiting the wards when a new regiment arrives in camp, the patients wonder and cannot tell who they are and what their errand is. On entering the huts, or barrack-rooms, the men do not "stand to attention" as they should do to a chaplain, so that the same noise and confusion which generally prevails in a hut when so many are crowded together continue; men smoking or singing, or reclining in different attitudes, or cleaning their arms and accoutrements; and the chaplains are prevented from speaking to the soldiers and administering to them spiritual advice and instruction. The chaplains, who are obliged to keep a horse, must pay toll, as it is only an officer in uniform who is allowed to pass without payment. Every one knows that officers and men, especially when in cantonments, are very much a class *per se*. They have little intercourse with civilians who cannot enter *con amore* into their conversation, which is usually of a professional character, or understand the habitudes of a soldier's life. The chaplains are regarded as civilians, whereas, were they in uniform, they would be regarded as one of themselves, and be more enabled to cultivate a friendly acquaintance with officers and others upon whom they might excercise a silent and salutary influence. It might seem to many somewhat out of place for a clergyman to wear uniform. But any objection on this score is removed by the fact, that by Royal Warrant chaplains have been commissioned and had grades of rank assigned them. The giving them a uniform might have been expected as a natural sequence to this very proper step; but though more than a year has elapsed since the warrant was issued, nothing has yet been done. It is generally supposed that the chaplains themselves are averse to any such proposal. But the reverse is the case. We believe that the chaplains of all persuasions are nearly unanimous in their wish to have an appropriate uniform assigned them. The subject is exciting much attention in the army; and it is to be hoped that some steps will be speedily taken in regard to it by the military authorities. I have the honour to be sir,—yours very truly, SCRUTATOR.

In reply to Sir H. Stacey on Thursday evening, Mr. Sidney Herbert announced the change in the price of Cavalry commissions, of which we have before informed our readers. He said he was afraid nothing was likely to be done as respects the abolition of stoppages for forage from Cavalry officers.

DRILLING IN SCHOOLS.

On Saturday a very influential meeting was held at the Thatched House Tavern, "with a view to establish preliminary drill at public schools, in connection with the Volunteer Movement."

Lord Elcho, M.P., occupied the chair, and amongst those present were Lord West, Sir De Lacy Evans, M.P., the Hon. W. F. Campbell, M.P., the Provost of Eton, the Hon. G. H. C. Byng, M.P., Mr. Ewart, M.P., Mr. Stirling, M.P., General Watkins, Mr. Coningham, M.P., Mr. Granville Vernon, Dr. Wilson, Mr. Tufnell, Mr. Chadwick, the Rev. G. R. Gleig (Chaplain to Her Majesty's Forces), &c. &c.

Lord Elcho said the object of the meeting was the establishment of a drill in public schools in connection with the rifle movement. That matter had become a great fact, as instanced by its rapid progress through the length and breadth of the land. His lordship then adverted to the speech made the previous night in the House of Commons, at a late hour in the evening, "by an eccentric baronet, the inheritor of a very great name;" and also to that of Mr. Sidney Herbert on the movement. Not liking the discussion altogether, he (Lord Elcho) went home (laughter). He found after he left there had been a great performance, and that the entertainment was to conclude with a screaming farce, in which the parliamentary Robson was to act a very prominent part (laughter). He thought that right hon. baronet would better have shown his patriotism and loyalty by not attempting to cast ridicule on a movement which had sprung up from the public spirit of the people, and which had received the most grateful acknowlegments from his Sovereign (hear, hear). Having spoken at considerable length in favour of the establishment of public drill in public schools, his lordship called attention to the circumstance that such drill was even practised in Quaker schools in Yorkshire—not, he admitted, for warlike purposes, but because those who taught in such schools deemed it advantageous for their pupils in after life (hear, hear). He contended, with them, that the practice of gymnastic exercises had a great effect in improving the *physique*, and even in exercising a beneficial moral influence over those who were under tuition (hear, hear). He was anxious to see the Volunteer Movement become a permanent one, for if the feeling which had raised it were to fall off they would become the laughing-stock of Europe. Every possible effort should be made to make this a permanent force. Nothing, however, would give it permanence but carrying out the object for which they were assembled that day. In Switzerland the youths were trained to the number of 15,000 boys; they were drilled and inspected, and he thought it desirable that England should follow in their footsteps. His lordship having said that it was desirable in commencing a movement of this character to have the opinions of those to whom the nation was ever accustomed to look up, and which opinion was worth having—as well in politics as in other matters—concluded by reading extracts from letters which had been received.

Lord West moved, "That with a view to the permanence of the Volunteer force, it is desirable that elementary drills should be established at public and other schools."

The Hon. Mr. Byng, M.P., having seconded the resolution, it was supported by Mr. G. Cruikshank and Mr. Coningham, M.P., and unanimously carried.

The Provost of Eton (the Rev. Dr. Hawtrey), in moving the next resolution, "That where elementary military drill has been established it has been found to conduce to the discipline and order of schools, and to the mental advancement of scholars, as well as to their physical development and improvement," spoke in terms of the highest approval of the proposition, because he believed that the drill in schools was calculated, by improving the physical powers of the pupils, to prepare them for the better exercise of their intellectual functions.

Mr. Tufnell seconded the resolution, speaking of the excellent effect which military drill had had in the schools connected with the various boards of guardians in London.

Mr. Granville Vernon and Dr. Wilson having supported the resolution, it was unanimously carried.

Sir De Lacy Evans then moved, Mr. Chadwick seconded, "That it is highly important that the chief public schools should take the lead and set the example of the regular practice of elementary military drill," and the resolution was carried *nem. con.*

The Hon. W. F. Campbell moved, and Mr. Ewart seconded, "That in the opinion of this meeting the highest public approbation is due to the provost, head-master, and authorities of Eton, for the prompt and judicious manner in which they have resolved to introduce elementary drill into the Eton system."

This having been carried also unanimously, as was also the next, which the Rev. Mr. Gleig moved, and Major-General Watkins seconded, "That a provincial committee be formed to promote the objects of the meeting."

The general feeling of the meeting was that this preliminary drill should not be carried to such an extent as to interfere with general education.

The names of the following noblemen, who approved of the movement, but who were unable to attend, were announced:—Lord Palmerston, the Duke of Cambridge, Earl Granville, Lord Lyndhurst, Lord J. Russell, the Duke of Argyll, Earl De Grey and Ripon, Lord Shaftesbury, Lord Ashburton, Lord Ellenborough, Lord Brougham, Hon. W. Cowper, Bishop of London, Dean of Christ Church, and the Head Master of Westminster.

ARMS OF PRECISION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The Armstrong rifled ordnance, as recently described in *The Times*, as well as Colonel Wilford's late lecture at the United Service Institution, on rifled small arms, cannot fail to arrest the attention of every professional soldier; for the art of war must henceforth undoubtedly be completely changed, in consequence of the immense range and unerring accuracy of these deadly *armes de précision*. For example, cavalry, on the old system, were massed on the flanks of the line of battle, or to the rear of its wings, ready to dash out and capture guns, or to *bouleverser* broken infantry by a headlong charge. Where can cavalry, however, *now* be placed in the array of battle, when the Armstrong 12-pounders will reach them, to their decimation, two miles off even? And to charge a double field battery of 12 guns henceforth would indeed be a feat of Balaklava Quixotism, since cavalry could not traverse that distance in less than twelve minutes (nor under twenty minutes if the ground were rugged and broken), and during that interval this battery would have discharged its twelve guns four times, its 200 cannon balls telling with withering effect on horses and men, let alone the more awful fire of the regiment of infantry attached to such a battery, and whose shattering musketry fire would reach the cavalry also with deadly effect as soon as it came within three-quarters of a mile, both gunners and riflemen having the very great advantage all the time of firing coolly from a fixed position, whence they can calculate their respective ranges with almost infallible certainty, whilst the cavalry would reach the battery, after their rush, with broken ranks and men and horses blown more or less by their death-charge!

On the same principle of conservatism, infantry itself must henceforth *keep their distance* when massed divisionally; and even when regiments or brigades *advance in line* to the attack, they must do so in *loose order*, and *not*, as of old, "shoulder to shoulder" (unless when actually at the charge), and thus be able effectually to distract both the aim and fire of the riflemen and gunners opposed to them.—I am, &c.,

Jan. 30. EMERITUS.

WHY WE CANNOT GET OFFICERS FOR THE CAVALRY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The reasons usually assigned are the purchase system, the examinations, or the expenses of living in a cavalry regiment.

May I venture to suggest that the real cause is the little consideration that has been shown either to the feelings, the habits, or the pockets of officers, since the return of the army from the Crimea in 1856.

As to their feelings, I can only say that many felt not a little disgusted at being sent into camp after nearly two years' active service, some under canvas, and their horses under Allan-a-Dale's roof.

"'Tis the blue vault of heaven, with its crescent so pale,
And with all its bright spangles,' said Allan-a-Dale."

Such was the welcome home given by a grateful country to the Crimeans in 1856, and I need scarcely add that the same system has been pursued ever since.

With regard to their habits, I believe I am right in saying that they are those of gentlemen accustomed to English sports and English society; but, under the present system, the man who remains in the service does so with a fair prospect of spending a large proportion of his time in a camp; he has to play a severe game at soldiering while in a state of social banishment, with the intense gratification of ringing the changes on field-day, foot parade, and riding school, from April till October.

The officer has to pay a heavy sum for his chargers; he has to pay for their keep, and is very likely to be obliged to picket them in the open.

This is no doubt an amusing experiment for the authorities, but it is done at the risk of the officer, while that officer is not allowed any field allowance as a trifling compensation for the expense and loss he is exposed to.

I am aware that an attempt was recently made to lessen the cost of an outfit in the cavalry by allowing young officers to take remount horses on joining; it was, however, singularly unsuccessful, as many of those horses were cast by the Inspector-General of Cavalry at the next inspection. These are, I believe, the reasons why there are so many vacancies—Numbers have retired in disgust, and the supply is not equal to the demand.

From what class are the officers to come if the service is made a system of drudgery? The upper classes will not come forward; and even the abolition of the purchase system would be scarcely a sufficient inducement for a clerk of moderate abilities to vacate his office stool for the saddle of an officer.

A CAVALRY MAN.

CAVALRY CORNETCIES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As a well-wisher to the cavalry I rejoice to observe that it is in immediate contemplation to remove some of the chief obstacles to the obtaining young officers for that branch of the service. But so serious has the matter become that I am persuaded no half measures will suffice to cope with the evil. There are more than fifty vacant cornetcies, and it will require some genuine and positive inducements held out before young men who intend to make the army a profession can be found to fill them up. Not only must "forage" but "farriery" be supplied gratuitously, and the charge for the "regimental band" should likewise be abolished throughout the army. The exorbitant charges for outfit and the extravagant style of living must also undergo the pruning-hook, or the remedy will fail. Nothing is more enervating or more unsoldier-like than the indulgence in habits of reckless and purposeless extravagance. They must be peremptorily prohibited in high quarters, and the efficiency of the officer will be at once increased.

I am, sir, your obedient servant, PEREGRINUS.

BELGIUM AND CHINA.

In one of our ealiest numbers, we stated that Belgium entertained the idea of sending a force to co-operate with the Allies in China, with a view to have a share in the commercial advantages that might ensue. We have no less an authority than H.R.H. the Duke of Brabant, the heir to the Belgian throne, for the confirmation of our statement. In the sitting of the Belgian Senate of the 17th inst., the Duke, in a very able speech, urged the necessity of such a co-operation. He, moreover, informed the senate that in October last a Belgian envoy had been sent to China in the person of M. d'Egremont, who had so far succeeded as to elicit an official reply from the Chinese Commissary of Foreign Affairs, which places Belgian merchants precisely upon the same footing as that granted to the other powers for carrying on trade is the Five Powers, according to the regulations of 1845. The Chinese official, moreover, informs M. d'Egremont that "as soon as the recent treaties concluded by the English, French, and American ministers shall have been satisfactorily regulated," Belgium will be entitled to the same advantages.

THE SOLDIERS' DAUGHTERS' HOME.

The following is an extract from the Military and Naval intelligence of *The Times*.

"Under the Royal Finance regulations of the 1st November, 1850, the wives and children of the married men were well cared for by the military authorities, having been furnished with *ample* means of returning to their *respective homes*, by rail or steam-vessel as may be least expensive, and were also provided with the necessary certificates which will entitle each woman to receive 6*d.* a day, *allowed by the Indian Fund*, and 2*d.* for each child, independently of the arrangements entered into for the receipt of a Liberal portion of their husbands' pay."

Now, to a non-military person this arrangement will appear perfection; not so to me, who had the pleasure of assisting to maintain, during the whole of the Crimean war, the whole of the wives and families of the Crimean army (with the exception of the Guards). At that time no arrangement was entered into for the receipt of a *liberal* portion of the husband's pay, and no Indian Fund 6*d.* a day and 2*d.* a day was issued. But what I want to bring to your notice is, that at this moment no such arrangement as to the husband's pay *is made in the Line*. In the Artillery it has usually been done with the husband's consent before he embarks for active service, but never in the Line; the consequences of this I need not detail to you, and it would be a cause worthy of your heart and your pen to insist that some such arrangement should be compulsory upon every married soldier on embarkation for active service. It is true that the soldier's pay is not enormous, and that just at the time of his embarking for service he has to pay extra for many fresh articles of kit and clothing, so that the liberality of the portion for his wife and family may be open to dispute; but he should be compelled to do something for his family, especially after he has perhaps made much prize-money, or other windfalls. Unfortunately at present a soldier cannot be compelled by the Poor Law to maintain his family, nor can the military authorities compel him to spend any portion of his pay in the support of his family. The 6*d.* and 2*d.* a day alluded to in *The Times* isnot paid from the Indian Fund, but by the Indian Government Council; and should a war arise unconnected with Her Majesty's possessions in the East Indies, no such allowance will be granted. The Indian Fund, as you know, was collected for the sufferers by the mutiny in India, and only relieves the *widows* and *orphans* of such sufferers—not the wives and families. What is to become of the widows and orphans at the forthcoming Chinese war? Our Patriotic Fund with its million and a quarter will do nothing for them; our Indian Mutiny Fund can do nothing for them; Lloyd's Patriotic Fund can do nothing for them.

I dread the refusals that I shall be compelled to give at my home when the orphan girls of this war increase in number. I have already two from China, there being no other asylum in the kingdom open to the daughters of all the army, and I have not room for more than two hundred, towards the maintenance of whom I get no assistance whatever either from the Government or the Patriotic Fund.

Respectfully yours, H. S. POWYS, Major.

HER MAJESTY'S LEVEE.

At the Second Levee held this season on Thursday last, the following Naval and Military officers were presented to Her Majesty:—Colonel Airey; Lieutenant J. H. Alexander; Colonel-Commandant A. Anderson; Captain W. W. Arbuthnot; Major Armstrong; Captain G. Barlow; Colonel W. F. Beatson; Ensign E. Beaumont; Lieutenant J. Begg; Cornet T. Y. Benyon; Lieut.-Colonel Lord Bingham; Lieutenant T. B. Boileau; Lieutenant and Adjutant Bolton; Lieut.-Colonel Boyle; Lieutenant Samuel Boulderson; Lieutenant W. B. Brigstocke; Captain A. Bromley; Commander C. Bromley, R.N.; Lieutenant G. H. Browne; Major-General the Hon. Robert Bruce; Captain Burnell; Lieutenant-Colonel Fowler Burton; Major Hon. Somerset Calthorpe; The Hon. C. Carnegie; Lieutenant Cathcart; Lieutenant-Colonel Chapman; Lieutenant H. H. Chapman; Lieutenant Cleland; Colonel Robert Spencer Cavendish Clifford; Lieutenant E. J. Clifford; Lieutenant W. H. Gardner Cornwall; Ensign R. Dane; Lieutenant Hon. Vesey Dawson; Ensign C. de Robeck; Colonel Sir J. Douglas; Ensign G. Dumerque; Lieutenant-Colonel Herbert Edwardes; Commander A. G. Edye, R.N.; Assistant-Surgeon W. Everet; Lieut.-Colonel J. R. Farquharson; Lieutenant H. Farquharson; Captain J. E. Ford; Lieut.-Colonel Foster; Lieutenant R. R. Franks; Captain D. Galton; Major Gavin, M. P.; Captain Gill; Viscount Gilford, R.N.; General Sir William Gomm; Lieutenant C. Grant; Ensign T. J. Gray; Captain J. B. Hardy; Lieutenant H. Hardy; Captain H. J. Haydock; Assistant-Surgeon, R. O. Hayes; Lieutenant J. A. Heathcote; Ensign A. H. Hebeler; Ensign C. C. Hood; Commander W. R. Hobson, R.N.; Paymaster T. Hunt; Lieutenant G. Innes; Captain Jackson; Captain Griffith Jenkins; Lieut.-Colonel Jenner; Commander W. Henry Jones, R.N.; Captain J. Jones; Captain E. Vere Jones; Lieutenant C. H. S. Jones; Captain Horatio N. Kippen; Lieut.-General Knollys; Lieut.-Colonel R. Knox; Major Lawrence; Captain Hon. Edward Legge; Ensign Charles Forbes Leith; Colonel Thomas Lemon, R.M.; Colonel John Liddell, C.B.; Cornet E. B. Liebert; Major Light; Lieut.-Colonel Loyd Lindsay; Major A. B. Little; Captain Eliott Lockhart; Captain Donald Mackenzie; Captain James D. Mackenzie; Surgeon McArthur, M.D.; Ensign Sydenham C. McGill; Colonel McMurdo, C.B.; Lieutenant McNeil; Mr. Lee Mainwaring; Lieutenant Malley; Captain W. W. Manners; Mr. Ross Lewis Mangles; Lieutenant H. Marsden; Lieutenant E. A. Marsland; Commander T. Hutchinson M. Martin; Lieutenant H. B. Maule; Lieutenant E. Hall; Captain W. H. Mordaunt; Ensign Aubrey Vere O'Brien; Lieutenant G. Onslow; Lieutenant-Colonel Orr, C.B.; Captain Sherard Osborn, C.B.; Major Walter Brisbane Park; Colonel Parke; Lieutenant J. S. Phelps; Ensign Stainsby Pigott; Lieutenant A. G. Plomer; Lieutenant Harry North Dalrymple Prendergast; Paymaster W. G. Proctor; Lieutenant William Puckle; Captain B. Whitmore Puckle; Ensign A. Reynolds; Lieut.-Col. Robertson; Colonel G. H. Robertson; Captain James Forbes Robinson; Captain Hugh George

Robison; Ensign Archibald Roger; Ensign William Vilett Rolleston; Captain Lewis Stevens Rooke; Lieutenant C. L. Salis; Lieutenant Percy Sanderson; Major Henry Ayshford Sandford; Lieutenant-Colonel Percy Scott; Captain H. Smart; Ensign Walter Caradoc Smith; Lieutenant-Colonel Spalding; Lieutenant Henry St. Leger; Deputy Inspector-General of Naval Hospitals, Dr. John Grant Stewart, R.N.; Lieutenant-Colonel Crichton Stewart; Ensign C. Strutt; Major H. L. Talbot; Lieutenant W. Tatham; Lieutenant George Lee Le Mesurier Taylor; Lieutenat P. H. Thomas; Lieutenant Samuel P. Townsend, R.N.; Captain Edward Winterton Turnour; Captain T. T. Turton; Colonel Richard Howard Vyse; Captain William Claye Watson; Lieutenant and Adjutant H. J. Webb; Major Gould Weston; Lieutenant George Webber; Lieut.-Colonel R. Herbert White; Captain R. Whigham; Ensign E. Williams; Captian Wise, R.N.; Lieutenant T. C. Wray; General Wynyard.

INDIAN NAVY PENSIONS.

To shew more fully that the scale of pension should be founded upon the length of time passed in the Service, rather than upon what according to the Indian code is regarded as "actual service in India," it is only necessary to inquire what is, and what is not "actual service in India" in the view taken of it in the Regulations of the Indian Army and Navy.

According to these regulations, an officer may absent himself from his duty, on medical certificate, and may sojourn at any of the hill stations in the interior of India, or may spend his time at the Cape of Good Hope, or in Van Diemen's Land, and the period of his absence, which may extend to two years will be reckoned as "actual service in India;" but if with a similar object a like period of two years be passed in England or any part of Europe, the time so spent will be deducted from his term of service, and will not be allowed to reckon for ultimate pension. These rules were promulgated at a time when the only communication with India was by a five months' voyage round the Cape, and though ill-adapted to the present time when the mother country is so much more easily accessible from India than either the Cape or Australia, they are still in force, and as every officer on his entry into the service is made fully acquainted with them, no injustice can be complained of, however much such restrictions may operate to check intercourse with Europe, which, for the good of the Services, should be rather fostered than discouraged.

An officer debilitated by the scorching heat of the Persian Gulf, smitten down by a fever contracted in the duties of a survey on the coast of Africa, or suffering from a wound, is urged by a medical committee to proceed to Europe as absolutely necessary to the restitution of his health. He knows that any time spent beyond the Isthmus of Suez will not reckon towards his pension, but he is told that nothing less than England will restore him; he feels that a visit to Europe after an exile of perhaps fifteen or sixteen years in the East, will not only be a pleasure, but will tend greatly to his improvement as an officer.

The two years thus lost for pension he looks forward to make good in the future; but in 1860 he finds that it may be thought necessary to pension him off at once. He joined the Service, say, on the 1st January, 1840, 20 years happens to be one of the periods in the sliding scale of the proposed pension; then had it not been for that fatal visit to England, he would, by the 1st January, 1860, have completed 20 years' regulation service in India, and could have claimed the rate of pension to which that period entitles him; but as this time was *not* spent in the wilds of New Zealand, or among the Boers at the Cape, he finds that he can claim but 18 years' "actual service in India," and will be granted only the next lower grade of pension, which may probably be that for 15 years' service.

This case is perhaps sufficient to exhibit the operation and effect of a scale of pension that is determined by length of "service in India," rather than by the actual time passed in the Service, or since first joining the service; and it will prove that the conditions of a pension unexpectedly forced upon a body of officers before their period of servitude is complete, cannot with justice be based upon the same regulations as may obtain with regard to pensions at the termination of service, which can be taken up at the will of the pensioner.

The number of captains in the Royal Navy actually employed is 129 out of 356, and 202 commanders out of 500. It is plain, therefore, that amalgamation with the R.N. will be to the Indian Navy officer nothing more than a decadence. He would find that in joining the Royal Navy according to his present standing, his prospects would be utterly ruined. Take for instance the case of the senior officers of the different ranks in the Indian Navy, the senior captain is of between 33 and 34 years' service, yet his commission as captain dates on the 9th of March, 1855; he would enter the Royal Navy as the 245th on the list of captains; in his own service, if he has not already served as 2nd class commodore, he will be entitled to do so at the next vacancy; and although as captain in the Royal Navy on the Indian station, he would draw rather larger allowances than as captain in the Indian Navy, there would be this disadvantge that he would have but little chance of ever getting a command at all. The effect of the change then to him, would be to reduce him from 1000*l.* a year in India to the half-pay of 10*s.* 6*d.* a day in England. The senior commander in the Indian Navy is of 31 years' service, the next vacancy will give him his post rank; but in the Royal Navy he will enter only as 278th commander, his commission being so late as the 8th of February 1850—and *when* or *how* will he obtain his promotion? In point of pay he will exchange 600*l.* a year for 8*s.* 6*d.* a day. The same with the lieutenants; they are sure of promotion now, they are sure of employment; throw them into the Royal Navy, and all they are sure of is their half-pay of 5*s.* a day.

But the course which the officers of Indian Navy think ought to be pursued should be, not to pension off officers still ready and willing for duty, their experience and ultimate local knowledge being lost both to themselves and the public, nor yet to force them into amalgamation with the Royal Navy to their infinite disadvantage, but to remodel their Service, to place it on such a footing that it shall be fully capable of taking charge of the Indian Seas in time of peace or war—to maintain, in short, a truly efficient Indian Navy.

INCREASE OF SERGEANTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Believing that you are willing to do all the good that is in the power of an editor of a professional paper, I will give you my idea of the point, of all others, in which a great improvement can be made. I am not magician enough to promise a great result without any cost; I can, however, for a small cost suggest a great increase of efficiency. Double the establishment of sergeants in each regiment. There is such a demand for competent non-commissioned officers for all sorts of duties, detached from their companies, that to see one with his company is quite a treat. They are employed recruiting (the sooner that is done away with, regimentally, the better), the hospital corps, the commissariat corps, the regimental hospital, the school (for training-masters), the musquetry instructor, the Rifle Volunteers, the brigade, and other offices,—each and all want your very best man. The captain must do without, and make lance ranks to do the work without the pay. A large increase in the non-commissioned ranks, with the admitted liability of furnishing all the departments with the best assistants, would do more to bring a better class into the Army than giving twenty commissions for one that is given now. F. Q.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—We take the liberty of inquiring whether pensioners serving in the Royal Arsenal are eligible for the Royal Arsenal Volunteers? Because last night, at a very full meeting of the Royal Gun Factory department, held for the purpose of organising companies of Artillery and Rifles, a number of old pensioners, who are employed in various capacities, said that being enrolled in the local corps, they could not join in the movement.

Now, as the object of this corps is the protection of the arsenal, surely it would be better that we pensioners, who already know our drill and the use of our weapons, should be enrolled in a force where our services could be instantly available, and where we are always to be found at a moment's notice.

Can you obtain from the War Office, or the Horse Guards, or the Admiralty, permission for pensioners serving in the arsenal to join the Royal Arsenal Volunteers? And shall we be allowed the same privileges as to pay, uniforms, and equipments, as we now are in the local companies?

Signatures of pensioners employed in the Royal Arsenal:—C. Collins, R.A.; J. Foy, R.A., (late sergeant); John Fyfe, R.A.; Abel Robinson, R.H.A.; Richard Whitlow, R.A.; George Elliott, R.A., (late Sergeant Conductor of Stores, Kertch); Joseph Perry, E.I.C.; William Daw, R.H.A.; C. Gilinu, R.A.; Thomas Stone, R.A.; John Anderson, R.A.; John Scott, late R.A.; W. Staples, R.A.; W. Miller, R.A.; W. Sheperd, R.A.; W. Davidson, R.A.; P. T. Eccleston, R.A.; T. Anderson (4th King's Own); M. Johnstone, R.A.; H. Holden, R. H.A.; John McManus, R.A.; John Mathew, R.A.; J. Vise, R.A.; T. Bolwell, R.M.; R. Lockyer, R.A.; John Richards, 67th Foot; W. Baker, 4th Light D.; J. Holmes, (Quartermaster, R.N., H.M.S. Harrier); John Merchant, Corporal, R.M.; Henry Davis, Gunner, R.A.; G. Barber, R.A.; P. Curley, R.A.; S. Garrett, R.A.; James Price, R.A.

In the House of Commons, on Tuesday evening, Mr. Jones asked the Secretary of State for India whether the officers of the Queen's service who were present at the defence of Lucknow had been allowed to count any extra service for their pension in consequence thereof, and whether the same privilege was to be extended to the officers of the late Company's army who also served at the defence of Lucknow, and whether it was the attention of the Government to mark in any other way their appreciation of their services.—Sir C. Wood said he was happy to state, with reference to the officers of the Indian army, that one year's service towards pension had already been granted to them, and they had also had twelve months' batta and a special clasp granted to them for their conduct at Lucknow. He believed also that nearly all the officers employed had received their brevet rank, or one of the distinctions of the Bath had been conferred upon them. By the last mail the Government had received an account of the amount of the Delhi prize-money, and by the next mail they expected to receive information that it had been distributed.

ACCIDENTAL DEATH OF BOB, THE 1ST BATTALION OF SCOTS FUSILIER GUARDS' DOG.—As the battalion was marching up Stafford-row, opposite the entrance to Buckingham Palace, on Thursday the 16th instant, Bob, as was his usual custom, was running about amongst the band and drums; he had just passed through the ranks of the band to the left, a fishmonger's cart was passing at the instant, the horse of which struck him with his feet and knocked him down; before he could recover himself the off wheel of the cart passed over his body, and killed him on the spot. The thing was so purely accidental, that it is not supposed the three men in the cart even knew it was done; one of the Drums was ordered to fall out of the ranks and carry him back to the Buckingham Palace guard-room; as poor Old Bob was carried past the battalion, the feelings of regret expressed by both officers and men were such as could only be felt by those who have lost a pet such as Bob was in the battalion. Bob joined the battalion in Windsor in the spring of 1853; he was supposed to belong to a butcher at Slough. The butcher fetched him away several times from barracks; but it was of no use, Bob seemed determined to join the Service, and join it he did, and remained with it to the time of his death one of the greatest pets that ever lived. It would be impossible to state a tithe of the hair-breadth escapes Bob has had in his day. Bob was one of the first on board the Simoom, the ship that took the battalion to Malta. "Whose dog is that?" roared out the First Lieutenant. No particular owner answering the question, "Chuck him overboard," followed immediately. A sergeant, fortunately for Bob, picked him up in his arms, and kept him there until it was decided that Bob belonged to everybody. He was present with the battalion at Alma, Inkermann, Balaklava, and rarely ever missed going into the trenches with the men. He would hunt round shot and live shell. His escapes from the bursting of shell were miraculous. He is at present in the hands of Mr. Leadbeater, to be stuffed, with the view of placing him in the United Service Museum.

Obituary.

Lieutenant-General J. Wright, K.H., died at Southsea on the 16th inst., at the advanced age of 84 years, after a gallant and honourable career in the Royal Marines. The venerable general in his early professional service was engaged in most of Lord Nelson's attacks—On Rota and Cadiz in 1797, the battle of the Nile, the campaign of Naples in 1799; at the surrender of Ovo and Novo, Fort St. Elmo, Capua, and Guata, and the cutting-out of the Guiep, at Vigo. He was also among the gallant troops in the campaign in Egypt in 1801; and the last scene of his active service was at the siege of Algiers in 1816. On his retirement from the service he was placed on full pay. His commissions bore date as follows:—Second lieutenant, April 21, 1796; first lieutenant, June 10, 1799; captain, July 27, 1808; major, Sept. 16, 1816; lieut.-colonel, Jan. 10, 1837; colonel, Aug. 26, 1839; major-general, Nov. 11, 1851; and lieut.-general, June 20, 1855.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BAILLIE—Jan. 8, at Calcutta, the wife of Herbert Baillie, Esq., surgeon, H.M.'s Bengal Army, of a son.

BARKLEY—Feb. 18, at Stoke Cottage, near Bath, the wife of Lieutenant Edward Barkley, R.N., of H.M.S. Cossack, of a daughter.

BEWES—Feb. 15, at 4, Crescent Place, Plymouth, the wife of Lieut.-Colonel Bewes, 73rd Regiment, of a daughter.

BLANC—Feb. 16, at 22, Fulham Place, Maida Hill West, the wife of Assistant-Commissary-General Blanc, of a daughter.

HAVELOCK—Jan. 15, at Bombay, the lady of Lieutenant Jos. Havelock, 6th Bombay N.I., of a son.

JONES-PARRY—Jan. 5, at Bangalore, the wife of Captain Jones-Parry, 1st Madras Fusiliers, of a daughter.

KAYE—Feb. 21, at West Huntingdon, near York, the wife of Lieut.-Colonel G. Lister Kaye, of a daughter.

PATON—Feb. 16, at Elmbank, near Aberdeen, the wife of Major Paton, of Grandholm, of a daughter.

PONSONBY—Feb. 18, at 22, Upper Grosvenor Street, Lady Maria Ponsonby, of a son.

STEWART—Feb. 17, at Swain's Hotel, Edinburgh, Mrs. R. F. Shaw Stewart, of a son.

WADMAN—Feb. 1, in the Quarantine Harbour, Valetta, Malta, on board the Peninsular and Oriental steam-ship China, the wife of Captain Arthur J. P. Wadman, King's Dragoon Guards, of a daughter.

MARRIAGES.

GIBSON—CLARKE—Jan. 26, at the Cathedral, Barbadoes, Charles Edgar Gibson, Captain 49th Regiment, to Georgina Eliza, eldest daughter of William Clarke, Esq., M.D., of Tweedside.

GORDON—EAST—Feb. 18, at St. James's Church, Piccadilly, by the Rev. Freeman H. Bishop, uncle of the bride, Robert Gordon, Esq., Captain 4th Regiment (Rifle Corps), Bombay, eldest son of the late Robert Gordon, Esq., to Marie Theresa, youngest daughter of the late Sir East George Clayton East, of Hall Place, Berkshire, Bart.

HARWAR—SMITH—Feb. 18, at Walton-on-Thames, Surrey, by the Rev. C. Lushington, vicar of Walton, assisted by the Rev. A. Russell, rector of SS. George and Botolph, London, James Lees Harwar, Esq., Captain West York Rifles, to Henrietta, youngest daughter of the late Samuel Smith, Esq., of Hambleton House, near Selby, Yorkshire.

HOPE—GOSLING—Jan. 4, at Secunderabad, Madras, Captain Frederick Henry Hope, of the 1st Royal Regiment, to Anna Maria, daughter of Colonel Gosling, 10th Madras Native Infantry.

PEIRCE—GORE—Jan. 21, at the Cathedral Church, Bombay, by the Rev. W. K. Hitcher, Senior Chaplain, Robert Hodges, youngest son of the late John James Peirce, Esq., of Canterbury, to Caroline, eldest surviving daughter of Major Gore, Royal Artillery, and granddaughter of the late Colonel Gore, formerly of H.M. 33rd Regiment.

PRIOR—DALTON—Feb. 21, at St. George's, Hanover Square, by the Rev. J. L. Prior, rector of Lynby, Notts, Lieutenant-Colonel L. M. Murray Prior, D.L., of Earl's Terrace, Kensington, Commandant of the Royal Elthorne Light Infantry, to Laura, widow of William Dalton, Esq., of Sleningford Park, Yorkshire.

ROBERTS—KING—Feb. 18, at All Souls', Langham Place, by the Rev. Francis W. Adey, of Markyate College, cousin of the bride, the Rev. W. Anwyl Roberts, of Llandudno, son of the late W. Anwyl Roberts, incumbent of St. Germains, Llanrwst, to Charlotte, second daughter of the late Colonel King, K.H., for many years on the Staff of Ireland, and formerly of the 16th Lancers.

UNIACKE—FORTESCUE—Feb. 16, at Street, near Glastonbury, by the Rev. H. Fortescue, assisted by the Rev. R. N. Wood, Henry T. Uniacke, Captain 19th Regiment, only son of the late John Uniacke, Esq., of Boughton House, near Chester, Ardnasach, county of Cork, Ireland, and 8, Belmont, Bath, to Isabella L. Fortescue, daughter of George Fortescue, Esq., of Plymouth.

VAUGHAN—WELD—Feb. 15, at Lulworth Castle, Dorsetshire, by the Right Rev. Bishop Vaughan, Lieutenant-Colonel Vaughan, of Courtfield, Monmouthshire, to Mary, only surviving daughter of Joseph Weld, Esq., of Lulworth Castle.

DEATHS.

BARRY—Dec. 17, at Cape Coast Castle, Africa, aged 39, Philip John Stapleton Barry, Major, Royal Engineers, eldest son of Major-General P. Barry, R.E., sincerely regretted by his family and friends.

BOWER—Feb. 12, after a severe and painful illness, aged 20, at the Royal Naval Hospital, Malta, where he had been invalided from Her Majesty's ship St. Jean D'Acre, Leonard William, youngest son of Robert Bower, Esq., Welham-Malton, Yorkshire.

BROWNE—Feb. 19, at Brighton, Isabella, wife of Major Clement Reid Browne, Bengal Army, aged 46.

BURGESS—Feb. 10, at Naples, of malaria fever, most deeply lamented by his family, and universally respected, Commander George Foster Burgess, H.M.S. Cressy, aged 33.

CHAPLIN—Dec. 13, at Hobart Town, Tasmania, Arthur Lewis Chaplin, Deputy Assistant-Commissary-General, second and youngest son of the late Captain Charles Chaplin, R.E., aged 26.

CHATTERTON—Feb. 6, at her residence, Guernsey, Charlotte, relict of the late Major Chatterton, and daughter of the late General Sir William Green, Bart., Royal Engineers.

DUFF—Feb. 19, at Paris, William Duff, Esq., of Bhaugulpore, East Indies, son of the late General Patrick Duff, aged 73.

GRYLLS—Feb. 7, at Cheltenham, aged 33, Charles Gerveys Grylls, Commander R.N., eldest surviving son of the Rev. Henry Grylls, vicar of St. Neot, Cornwall.

HAMES—Feb. 16, at Worthing, Ann, relict of the late Major Western Hames, of the 2nd Dragoon Guards, respected and regretted by all who knew her.

HEATHER—Feb. 20, at Charlton, S.E., Jemima Selina, wife of J. F. Heather, Esq., M.A., for many years Mathematical Master at the Royal Military Academy, Woolwich.

MURRAY—Jan. 16, at the Barracks, Jamaica, much esteemed and regretted by his brother officers and all who knew him, Captain Wm. M'Carthy Murray, of the 2nd W. I. Regiment, aged 38, leaving a widow and three children to deplore his loss.

SAVAGE—Dec. 12, at Howrah, near Calcutta, after a short illness, deeply regretted by his family and friends, Charles Hotham Savage, Esq., eldest son of the late Arthur Savage, Esq., R.N., late of Sydney, New South Wales.

TAYLOR—Feb. 14, at Guildford, Elizabeth Margaretta Eleanor, only daughter of Captain G. Kepple Taylor, Royal Artillery, aged 4 months.

Mr. George Goldsack, who joined the Royal Gun Factories on the 10th February, 1810, and has just been superannuated on a pension of 152*l.* 15*s.*, held the appointment of Examiner of Ordnance, and not that of a modeller. This estimable gentleman is so universally respected throughout the department, and indeed throughout the whole arsenal, that a handsome testimonial is about to be presented to him.

V. R.

VOLUNTEER RESERVE FOR SEAMEN.

IMPORTANT TO SEAMEN.

Extract from the Speech of Lord Clarence Paget, Secretary to the Admiralty, made in the House of Commons on Monday, Feb. 13th, 1860.

"I know what Seamen are. They are fine, noble, hearty creatures, but men of remarkably suspicious character, and if there are any people they are suspicions of, it is the Admiralty. Captain Brown reports from the different merchant ports that the men say, 'We think the inducement very fair. We think it very handsome; but they only want to kidnap us. The moment we put our names down they will send us off to China.' It is very curious to see men labouring under that delusion. I have been asked over and over again by directors of the great shipping companies, and by men of importance in these commercial ports, for some assurance on the part of the Government that the men will not be called out until war is declared. I told them I could not give that assurance; but I also told them that it was perfectly certain there was NO INTENTION TO CALL THEM OUT except in the event of a critical emergency; that THE THREAT OF IMMEDIATE HOSTILITIES, OR OF SOME NATIONAL DANGER WHICH WOULD OBLIGE US TO MAKE THE GREATEST EXERTIONS FOR THE PROTECTION OF OUR SHORES, WERE THE ONLY CIRCUMSTANCES UNDER WHICH THE GOVERNMENT WOULD CALL FOR THEIR SERVICES. If I can reassure them by what I say to-night, I really believe little more is wanting to induce them to flock to the force. (Hear, hear.) It is so far satisfactory that they are beginning to get over this extraordinary idea. I WISH TO DECLARE TO THEM THAT HER MAJESTY'S GOVERNMENT HAVE NO SORT OF INTENTION TO KIDNAP THEM INTO THE NAVY. (Hear, hear.) And perhaps I had better add a more practical assurance—THAT, IF WE WISHED, WE COULD NOT ENTER THEM IN THE NAVY, because the number is complete, and except for casualties we have no means of entering any considerable number of men over and above what we have at present. (Hear.) I think this is a very satisfactory state of things, and that the House will be glad to hear THERE IS NO DIFFICULTY IN GETTING MEN."

QUALIFICATIONS.

A Volunteer must have served five years at sea, be an A.B., and under 40.

ADVANTAGES.

£6 Retainer, payable quarterly.

A Pension of £12 after requisite service, and when worn out.

Eligibility for Coast Guard or Greenwich.

OBLIGATIONS.

Twenty-eight days' Drill in every Year, with Pay and Allowance for victuals and lodging.

To appear once in Six Months, unless on leave for long voyages, which will be granted on application to a Shipping Master.

To serve in the Navy on an emergency, if required by Her Majesty.

The time of service not to exceed 3 years, unless there is actual war, and then not to exceed 2 years more, with Extra Pay for the extra time.

☞ For particulars as to Inrolment, and for detailed conditions, application should be made to any Shipping Master or Customs or Coast-Guard Officer.

CENTRAL ASSOCIATION FOR IMPROVING THE CONDITION OF THE WIVES AND FAMILIES OF SOLDIERS AND SAILORS.

PATRON—Her Majesty the QUEEN.

VICE PATRONS.

H.R.H. the Duke of CAMBRIDGE, K.G., Commander-in-Chief.
His Grace the Archbishop of CANTERBURY.

PRESIDENT—The Earl of SHAFTESBURY.

CHAIRMAN OF COMMITTEE—WM. ANGERSTEIN, Esq., M.P.

The Central Association appeals to the Public for a continuance of that support so generously accorded to it in times past.

War, with its exigencies, has by no means ceased, for at this moment there are more than 100 applicants for help, whose husbands, now serving in India or China, have been absent from them during periods varying from two months to three years, without, in many cases, sending any money home for their support.

And even were there no such claims on the Association, a wide sphere of usefulness would still lie before it in time of Peace, and it earnestly hopes to be able to continue its efforts to carry out those more extended objects which it was originally designed to effect, viz.: the permanent improvement of a numerous and too long neglected class.

By God's blessing the Association has alleviated many a bitter pang, and not its least effort to afford relief to the objects of its solicitude was the recent contribution of upwards of 1300*l.* towards the outfit of a large number of soldiers' wives with their families, in conjunction with Her Majesty's Quartermaster-General and the Emigration Commissioners, on their embarkation to join their husbands and fathers in India.

But the chief object of its operations is now directed to the maintenance of local branches at such places as Woolwich, Chatham, Parkhurst, Portsmouth, Plymouth, Dublin, Winchester, Ballincolig, and other large garrison and seaport towns, where efforts are being, or will be, made to keep up lying-in hospitals, cheap lodgings, children's nurseries, and work societies affording remuneration and elevating employment.

For this benevolent purpose, subscriptions and donations, however small, are earnestly requested, and will be thankfully received by the Treasurer, the Hon. A. KINNAIRD, M.P., at Messrs. Ransom, Bouverie, & Co., 1, Pall Mall East, S.W.; or by the Secretary, Captain S. F. JACSON, at the office, 7, Whitehall, S.W.

THE SOCIETY FOR THE ABOLITION OF FLOGGING IN THE ARMY AND THE NAVY.

Lord Viscount RAYNHAM, Treasurer.

BANKERS—The London and County Bank.

Life and other assurances effected free of charge for Agency.

Passages secured, free of charge, and baggage forwarded.

Letters, Newspapers, Parcels, &c., taken charge of and forwarded.

12, Pall Mall East, London, S.W.

ARMY AGENCY.

MESSRS. SAUNDERS, OTLEY, & CO. execute orders for SUPPLIES of every description transmitted to them by Regimental Messes and Officers in England, India, and the Colonies, and generally act as AGENTS for the Receipt and Remittance of Pay, Pensions, &c.

50, Conduit Street, Hanover Square, London, W.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., viâ EGYPT. The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

FURLING OR REEFING SAILS FROM DECK, universally recommended, and supersedes all others. Opinion of Captain Wm. Vincent, Managing Superintendent Royal Mail Company:—

"Southampton, Jan 21, 1860.

"I consider the invention (Finlay's Patent) a very excellent, simple, and easy method of shortening sail, and well deserving the attention of shipowners generally, but particularly for sailing ships which have to carry a press of canvas to make a passage with comparatively few hands."

Apply to the Manager, Mr. T. MOORE, 33, Regent Circus, Piccadilly, London, W.

DIVING APPARATUS.

C. E. HEINKE, SUBMARINE ENGINEER, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

MONEY.—A Gentleman is desirous of INVESTING a FEW THOUSAND POUNDS in the PURCHASE of, or ADVANCING (in sums of 150*l.* and upwards) upon REVERSIONARY PROPERTY (freehold or funded), or will Lend it, for long or short periods, upon the personal security of responsible parties, heirs to entailed estates, &c.—Address, in the first instance by letter, to M. A., care of Messrs. HALTON, Tailors, 4, Princes Street, Hanover Square, W.

A GENTLEMAN AND LADY are desirous of meeting with a GENTLEMAN TO RESIDE AND BOARD with them. The family consists of sons only. Unexceptionable references given and required. Apply personally or by letter; if the former, between the hours of 12 and 2 o'clock. Address B. A., care of Messrs. RICHARDSON BROTHERS, 23, Cornhill, London.

WANTED, LEFT-OFF CLOTHES FOR AUSTRALIA.—MR. & MRS. JOHN ISAACS, 319 & 320, Strand, W.C. (opposite Somerset House), continue to give the highest price in cash for Ladies', Gentlemen's, and Children's Clothes, Regimentals, Underclothing, Boots, Books, Jewellery, and all Miscellaneous Property. Letters attended to. Parcels sent from the country, either large or small, the utmost value returned by post office order the same day. Reference, London and Westminster Bank.

VOLUNTEER SERVICE DINNER, AT THE ST. JAMES'S CONCERT HALL.

THE COMMITTEES OF THE NATIONAL RIFLE ASSOCIATION AND VOLUNTEER SERVICE CLUB have made arrangements for a

DINNER OF VOLUNTEER OFFICERS,

To take place in the Grand Concert Hall of the St. James's Hall, on the 7th of MARCH, the day on which Her Majesty will hold a Court for the reception of Volunteer officers.

His Royal Highness the Duke of CAMBRIDGE has consented to preside.

The dinner will be limited to commissioned officers of Volunteer corps and the respective Committees of the National Rifle Association and Volunteer Service Club, Uniforms or Court Dress.

Vouchers for the dinner tickets may be obtained on application to the Hon. Sec. of the Volunteer Service Club, No. 7, Albemarle Street, Piccadilly, W., up to the 1st of March inclusive. All vouchers not exchanged by the 4th will be cancelled. Dinner tickets, including wine, 25*s.* each, may be purchased by holders of vouchers from Messrs. SAMS, St. James's Street; Messrs. MITCHELL, Messrs. CHAPPELL, Messrs. OLLIVIER, of Bond Street; Messrs. CRAMER, BEALE, & Co., Regent Street; and the ticket-office, St. James's Hall, Piccadilly. Dinner on table at half-past six.—7, Albemarle Street, Piccadilly, W. Feb. 21, 1860.

HONORARY SECRETARY.

William Henry de Carteret, Esq., R.N.

BANKERS.

The Union Bank of London, 4, Pall Mall East, S.W.

With a view to the permanence of the Volunteer Force, it has occurred to some noblemen and gentlemen interested in the Volunteer Movement, that a Club might be formed on the same basis as those established for the Military and Naval Services, to be called the "Volunteer Service Club."

The above-named noblemen and gentlemen have formed themselves into a Provisional Committee for the purpose of establishing the Club.

Gentlemen desirous of becoming members are requested to send their names to the Honorary Secretary, by whom any further information will be given.

By order,
WILLIAM HENRY DE CARTERET, R.N.,
Honorary Secretary.

7, Albemarle Street, Piccadilly, W.,
31st January, 1860.

CAVAN MILITIA.—WANTED, for the above Regiment, a PAYMASTER-SERGEANT. Pensioner preferred. A liberal allowance will be given, if competent, and fully acquainted with the duties. Applications and Testimonials to be addressed to Captain and Adjutant N. GOSSELIN, Cavan Militia, Cavan.

ROYAL GLAMORGAN LIGHT INFANTRY REGIMENT OF MILITIA.

WANTED, for the Permanent Staff of the above Corps, a SERGEANT-MAJOR. He must have filled a similar situation in the Line. Also, a HOSPITAL SERGEANT and THREE STAFF SERGEANTS. The latter must be capable of Paying Companies, and be efficient Drill Instructors. Apply to the ADJUTANT, Cardiff.

MESSMAN.—WANTED IMMEDIATELY, for the Mess of the 15th Hussars. Applications with Testimonials, Terms of Messing, &c., &c., to be forwarded to the President, Mess Committee, 15th Hussars, Island Bridge Barracks, Dublin.

TO VOLUNTEER RIFLE CORPS.

BOOSEY & SONS' MILITARY BAND INSTRUMENTS, Reed and Brass, as well as Bugles, Drums, and Fifes, have been used and approved of by almost every regiment in the service, at home and abroad. Those regiments that contemplate the formation of a band, are invited to apply to the firm, who will be happy to recommend them competent bandmasters, and render any further assistance that may be required.

BOOSEY & SONS, Holles Street, London, W.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 21. 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

KOHLER'S PATENT HARMONIC CORNOPEAN.—An entirely new invention, and is in every respect worthy the attention of all Amateurs and Professors of Music. It is also most effective in a Military Band. Price 10*l.* 10*s.*

Estimates and drawings sent on application to JOHN KOHLER, Military Musical Instrument Maker to Her Majesty's Army and Navy, 35, Henrietta Street, Covent Garden, London, W.C.

CHARLES KNIGHT'S POPULAR HISTORY OF ENGLAND.

This day is published, price 9s.,

THE SIXTH VOLUME,

COMPRISING THE CIVIL AND MILITARY HISTORY FROM THE ACCESSION OF GEORGE I., 1714, TO THE CLOSE OF THE AMERICAN WAR, 1783.

The Seventh Volume will open with a general view, being a continuation of Chapters in Vol. V., of the Material Progress of the Country in Agriculture, Manufactures, and Commerce; of Discovery and Colonisation; of Manners and the Condition of the People; of Religion and Charitable Institutions; of Literature; of the Fine Arts; from the Accession of George III. to the period of the French Revolution.

The great amount of authorities to be consulted, sometimes in books not readily accessible, renders it necessary that the Author should bespeak the indulgence of the Subscribers to the Monthly Parts for the postponement of the appearance of Part XLIX. till the 31st of March.

"This is the History for English youth."—*Times*, Jan. 12.

BRADBURY & EVANS, 11, Bouverie Street, Fleet Street, E.C.

SPORTING WORK, ILLUSTRATED BY LEECH.

HISTORY OF THE WAR IN THE PENINSULA AND SOUTH OF FRANCE.

BY GENERAL SIR WILLIAM F. P. NAPIER.

"We freely confess that in no language, ancient or modern, have we perused any narrative of warlike operations comparable to this."—*United Service Journal.*

T. & W. BOONE, Publishers, 29, New Bond Street, London, of whom may also be had some Odd Volumes to complete sets of former Editions. All in Six Volumes.

WEST MIDDLESEX RIFLES. Head Quarters, Lord's Cricket Ground, Marylebone. Practice Ground, Wormwood Scrubs.—The Members of this Corps Drill at Head Quarters every Wednesday at 5 P.M.; Friday at 7 P.M.; and Saturday at 4 P.M.; at Portman Street Barracks on Monday and Thursday at 7 P.M.; at Raynham's Factory, Clarendon Road, Notting Hill, every Wednesday and Saturday at 7 P.M.; and will March from Head Quarters every Tuesday at 7 P.M., accompanied by their Band, to the St. John's Wood Barracks for Parade. Enrolled Member's Entrance Fee, 10s.; Annual Subscription, 1l. 1s.; Honorary Member's Life Subscription, 10l. 10s., or Annual Subscription, 2l. 2s. The ammunition is supplied to the effective members free of expense. Gentlemen wishing to join can obtain every information and enrol their names as members on application to the Adjutant or Secretary at Head Quarters; the Portman Barracks; or at Notting Hill. The Book of Rules and List of Members, price 6d., can be obtained of the Secretary or Drill Instructor at Head Quarters. Bankers—Sir S. Scott, Bart., & Co., 1, Cavendish Square, W.

Secretary—Mr. G. Marriner, 33, Welbeck Street, W.

FOURTEENTH MIDDLESEX (HIGHGATE) RIFLE VOLUNTEERS.—By permission of the Honourable Benchers of Gray's Inn, and to suit the convenience of the London Members. The Corps will MEET for DRILL PARADE in GRAY'S INN HALL, on MONDAY EVENINGS at 7. The Wednesday Evening Drills at Head Quarters, and Saturday Drills at the Wellington Barracks at half-past 3 will be continued as usual. The Officers of the second Company have been appointed, and a third Company is in course of formation. The Head-Quarters are now ready for the reception of Members. A supply of Rifles has been obtained from the Government, and a resident Drill-Sergeant and Armourer appointed. Members may therefore attend for instruction at any time.

Josiah Wilkinson, Captain Commandant.

VOLUNTEER GUARDS.—MEMBERS' CARDS OF ADMISSION TO THE DRILLS are now being ISSUED, and SUBSCRIPTIONS, &c., of Enrolled and Honorary Members RECEIVED by the Secretary on the evenings of drill; or at the Committee Rooms, 38, Conduit Street, W. Drafts or money orders to be crossed to "Coutts & Co.'s" bank.

Feb. 13, 1860. Edwd. F. D. Walshe, Hon. Sec.

VOLUNTEER GUARDS, the Hon. T. C. BRUCE, Captain-Commandant.—The Services of this Corps having been accepted by Her Majesty, and the Drills being now regularly established, GENTLEMEN DESIROUS OF JOINING may apply personally to the Committee on Monday Evenings, at Allen's Riding School, Seymour Place, W., between the hours of 7 and 9 p.m.; at Hungerford Hall, Strand, W.C., on Wednesdays, between 5 and 7 a.m.; and on Fridays between 7 and 9 p.m.; or by letter to E. F. D. Walshe, Hon. Sec., 38, Conduit Street, W.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

Patrons:—

Her Most Gracious Majesty the Queen.
His Royal Highness the Prince Consort.

At every Examination for Naval Cadetships since May, 1857, Pupils from this Establishment have taken the first or second places. Those Pupils who have entered the Army and Military Colleges have been equally successful.—Applications to be addressed to the Rev. E. Burney, M.A., Gosport.

ROYAL NAVAL ESTABLISHMENT, Eastern Parade, Southsea.

CONDUCTED BY MR. THOMAS EASTMAN, R.N.

The following Gentlemen have passed from this Establishment since June, 1859:—Messrs. Alexander, G. A. Ellis, Garnier, Mallory, Hoghton, Boddom, Maycock, Gillum, Osborne, Nuthall, O'Brien, Bedingfield, Powell, Hodges, Jackson, Lysons, Browne, Roberts, Hunt, Walters, Pascoe, Pugh, Freeland, Jaffray, Lord Albert Clinton, Messrs. Weld, Fairfax, Hutchinson, Atkinson, Brabazon, Law, Hazel, Needham, Gibson, Abbot, Smith, Nottidge, Chambrè, Forder, Smart, Bird, Giles, Rust, Compton, Russell, Thompson, Mitchell, Haswell, Ellis, Hawes, Calder, Hebden, Tully, Hyman, Milman, Hough, Dugdale, Coddington, Gissing, Lindeman Bancroft, Campbell, Lambert. 346 gentlemen have passed from this Establishment as Naval Cadets, including 116 under the Admiralty Regulation of 23rd February, 1857.

NAVAL CADETS.

OF THE 50 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, on the 13th December, SIXTEEN were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gataker, Steavenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. Johnson, Naval Instructor; W. Bell, Chaplain; J. A. Burrow, Chaplain and Naval Instructor.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, officers who had read at this Establishment have twice come out first on the list.

Apply to Captain Lendy, Sunbury, S.W.

EDUCATION.—BRIGHTON.

FRENCH, GERMAN, AND CLASSICAL SCHOOL, 15, Eaton Place, Kemp Town.

Principal—Mr. L. W. SCUDAMORE, B.A.

Pupils prepared for the Army, Civil Service, Oxford and Cambridge Examinations, &c. French and German constantly spoken. Terms moderate. References to the friends of pupils, many of whom have taken high places at the above Examinations.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major Corte, The Cedars, Putney, S.W.

MILITARY TUITION.—PUPILS under 16 years of age PREPARED FOR THE ARMY and other Examinations by a Graduate of much experience and success in teaching. Terms very moderate. Resident foreign and other masters. For particulars, address F. G. L., Mr. Simpson's Library, 31, King's Road, Brighton.

RIFLE PRACTICE—NATIONAL SOCIETY FOR THE ENCOURAGEMENT OF.

The several objects of the Society are as follows:—

1st. The encouragement of rifle practice by handsome awards for competitive excellence. The competitions to be open to soldiers, volunteers, and others.

2nd. The offer of premiums for improvement in the rifle.

3rd. The institution of county contests.

4th. The organisation of a grand metropolitan contest of the best shots of every county.

This Institution is intended to stand independently of volunteer rifle corps, and to be supported by voluntary subscription.

Those Mayors of county towns who have not yet formed committees to carry out these objects are requested to do so immediately, and place themselves in correspondence with W. Cave Thomas, Esq.,
6, Wells Street, Oxford Street, W.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved Enfield-pattern Rifle, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

George H. Daw, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"New Gun.—Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times.*

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (New Model), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

Saml. Colt, 14, Pall Mall, S.W., or through any respectable Agency.

RIFLED CANNON.—The Patentee of the latest improvement in the construction of Cannon, and which improvement has been adopted by Her Majesty's Government, is willing to supply British Colonies or Volunteer Corps with guns of the newest pattern at a price varying slightly according to the size of gun, but averaging about 2l. per cwt.

The method of construction is equally applicable to the largest ordnance as to the smallest; to a mortar capable of throwing a shell weighing several tons as to the lightest mountain howitzer.

Manufacturers desiring licences under this Patent may apply to Messrs. Cunliffe & Beaumont, 43, Chancery Lane, W.C.; to W. Brookes, Esq., 73, Chancery Lane, W.C.; to Messrs. Robertson, Brooman, & Co., 166, Fleet Street; or to the Patentee, Captain Blakely, Holywood, near Belfast.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. De la Cour, 327, High Street, Chatham.

THE NEW REGULATION BRIDLE.

A. DAVIS,
MILITARY SADDLER,
33, STRAND, W.C., AND AT ALDERSHOT CAMP.

OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. Davis for an Estimate for Complete Regulation or Private Outfit in Saddlery.

A. Davis, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, Old Bond Street, London, W.

TO OFFICERS IN HER MAJESTY'S ARMY AND NAVY.

MATTHEW WILDSMITH having been favoured with the patronage of many Gentlemen in Her Majesty's Forces has paid special attention to the production of a BOOT that should combine strength with ease and comfort. He is now happy to announce that he has succeeded in obtaining a leather specially prepared which he can with confidence recommend for military use, being light in weight, pliable, and very durable. Indian and Foreign Orders executed with despatch.—1, Sherard Street, Regent Street, W., rear of County Fire Office.

ELKINGTON & CO. desire respectfully to call the attention of Regimental Messes requiring PLATE to their Manufactures, which may be obtained in great variety from their establishments.

PARISIAN PAPER HANGINGS AND INTERIOR DECORATIONS, at
Jackson & Graham's, 35, 37, and 38, Oxford Street, W.

SUPERIOR BEDSTEADS, BEDDING, AND CHAMBER FURNITURE.

JACKSON & GRAHAM respectfully inform the public that they have largely extended this department of their business by devoting three spacious show-rooms (each 120 feet long) exclusively to the display of Bedsteads of various woods, with furniture en suite, of a superior class, together with Brass and Iron Bedsteads of every size and description. Illustrated price-lists of Brass and Iron Bedsteads and Bedding may be had on application.—Show-rooms, 35, 37, & 38, Oxford Street, Preston Place, and Newman Yard, W., adjoining.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, Hill & Millard, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,
James Coulson & Co.,
Beg to intimate that their only London Depôt is at
No. 46, Pall Mall, S.W.,
A few doors West of the Army and Navy Club.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. Carr, Chemist, 171, High Holborn, London, W.C., in bottles, 1s. each.

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious Vinegar, ensure purity, and effect a saving of 50 per cent. See Report of Dr. Letheby, City Officer of Health; Dr. Hassall, of *The Lancet* Commission, and others. Sold by the Trade, in bottles, labelled and capsuled. Wholesale
63, King William Street, London Bridge, E.C.
Sample for Six Quarts, to any Railway, for 3s. 6d., P. O. O. or Stamps.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, Crosse & Blackwell, Purveyors to the Queen, 21, Soho Square, London, W.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

Arthur Hill Hassall, M.D.,
Analyst of "The Lancet" Sanatory Commission,
Author of "Adulterations Detected." "The Urine in Health and Disease," &c.
Wimpole Street, 20th January, 1860.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
And pronounced by Her Majesty's Laundress to be
THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
Wotherspoon & Co., Glasgow and London.

PARIS CHOICE PERFUMERY.

ED. PINAUD'S Perfumes, Fancy Soaps, Pomades, Philocomes, Aromatic and Oriental Vinegar, Cosmetics, Elixir, Dentifrice, &c., &c., to be had of all Chemists and Perfumers throughout the Country. Wholesale Depot, and for Export, 27, Cannon Street West, London, E.C.

CONDY'S PATENT FLUID, OR NATURAL DISINFECTANT,
Not only deodorises but disinfects perfectly, and destroys for ever the cause of infection. Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease, and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

Patronised and reported upon by the Board of Health and all the most eminent medical men of the day most satisfactorily.

Sold in Quart Bottles, 4s.; Pints, 2s.; Half-pints, 1s., and in bulk, 10s. per Gallon. Sold by all first-class Chemists.

A BRIEF statement of the circumstances under which the new artillery has been despatched to China,—or rather to the Red Sea, for the Armstrong guns have not reached the Indian Ocean yet—will justify in some measure the suspicions of those who believe that all is not right yet at the War Office and the other departments charged with the administration of the forces of Great Britain, and that a very successful attempt would be made to rival the confusion and chaos of the *arrangements* at the outset of the Crimean war, if we were again plunged into a contest with any European power. Whether that be so or not, here is the story. It was desirable to send the Armstrong batteries as soon as possible to the East. Arrangements accordingly were made by which the "Himalaya" was rendered disposable for the conveyance of the force to Alexandria, where other arrangements were cunningly devised for their conveyance by railway to Cairo and thence to Suez. Fearful of the consequences of too great rapidity of transit, however, on the guns or on the troops, the authorities lighted upon the notable expedient of neutralising the speed of the Himalaya during the western portion of the route, by employing the famous old steam-barge of Her Majesty's Indian Navy, the "Berenice," built at Glasgow in 1835, of 664 tons burthen, and 230 horse-power, which has been known to go eight knots under favourable circumstances, to go round to Suez, to take the artillery on board. By letters received from Cairo, dated February 16, it appears that one battery, R.A., sailed in that remarkable craft from Suez on the previous day. Thus it would appear that part of the Artillery force has been very nearly three weeks in Egypt, and the rest is still there; and if our ally, the Emperor of the French, were not the most magnanimous of men, he certainly might have asked for explanations of the delay. Perhaps he views with pity the weakness of our "system," which struggles with the carriage of a few guns as if it were engaged in marching a grand army into Italy.

But that is not all. The "Berenice," which was to have carried the 14th Dragoons from Bombay to Suez, had never apparently the least intention of doing anything of the kind, and had no notion of doing duty as a troop-ship. On being inspected it was found she had no cooking-coppers for the men's food, no tubs, no plates, dishes, or buckets, no bedding for the sick. And the Artillery officers were actually obliged to fit her out with these articles as well as they could, and to furnish her even with quarter-galleries at Suez. The officer in command had received no instructions to provide anything of the sort; and, as he knew the playful coyness which the authorities evince in regard to any advances made by officers on their own responsibility, he wisely declined to incur the risk. But the ship is at sea at last, and we wish her and her cargo a pleasant, and—if it were not mockery, we would say—a speedy voyage. H.M. 14th Light Dragoons were at the latest accounts not waiting at Suez, where they were expected to be—on the contrary, they were at Bombay, and it was said that tenders had just been issued for their transport round the Cape! Meanwhile Milward's battery is passing its time very agreeably, no doubt, in the harbour of Alexandria, on board the floating hotel, which the authorities have found for them on board H.M.S. Himalaya—a mode of lodging them which is however not very economical. But with a liberal Parliament, and the ungrudging liberality of the estimates, what signifies a few pounds? One may ask if this delay could not have been avoided, and if Great Britain, with her enormous resources in shipping, could not find better accommodation for her troops, and make more judicious endeavours to alleviate some of the horrid discomforts of a Red Sea passage in February?

We are glad to be able to say that the new order reducing the prices of cavalry commissions appears to be promptly appreciated by those for whose benefit it was devised. The Horse Guards is no longer without applications for the purchase of cornetcies, and not a few ensigns from the infantry are desirous of being transferred to the cavalry, now that promotion in that branch of the Service may be expected without the outlay of large sums; and that, as we hope a check will be put upon the extravagant style of living, which has been unquestionably one of the principal causes of denuding the service of subalterns.

The letter in which Mr. Sidney Herbert advocated the change is full of sound sense and thorough knowledge of the real position in which the cavalry service has been placed of late years. He is reduced to the alternative of abandoning the preliminary examination and the hard work and disagreeable service which are said to be the reasons why rich men of the old class of cavalry officers have not come forward of late years, or of introducing a new state of things and a new class of officers, as regards the means and expenditure. The Secretary for War says: "If we cannot get the men of large means and expensive habits, let us lower the money demands as far as possible, and obtain the same kind of young officers that we find offering in large numbers for the infantry regiments, who will not object to pass the examination, perform the heavy duty, and go on Indian service." We hope sincerely that the officers coming into the cavalry under these new regulations, and on the faith of an implied engagement that useless expenditure is to be discouraged, will find themselves able to sustain their position on moderate incomes. Considering the difference between the two rates of pay, they ought to be able to do so. For a prudent young man there is, after all, a not unimportant difference in the 95*l.* a-year of the ensign and the 146*l.* of the cornet; and we hope that the officers at present in the cavalry will have the good sense to acquiesce in the new state of things, and not to seek to maintain a regimental tone inconsistent with the means of the only class of young men who can now be induced to officer the cavalry corps. To fulfil one's social duties and be esteemed as a person of gentlemanlike habits does not necessarily cause a large personal expenditure; and in branches of the Service officered by more aristocratic families than the cavalry, there are several young officers keeping up their position sufficiently well on incomes of exceedingly modest proportions.

The influence of the official change of prices upon those actually paid for future promotion will of course to a great extent involve the success or failure of the new scheme. We are inclined to anticipate that this influence will be very considerable, and that the usual prices will be very little more than those usually paid in a good style of infantry regiment. A cavalry captain, retiring under the old rules, would have about 5000*l.* made up for him in the regiment. Of this sum the Government will now give him 1425*l.*—the regulation difference between cavalry and infantry—the officers who purchase in succession to him will make up as regulation 1800*l.*—or 3225*l.* altogether—leaving him about 1800*l.* out of pocket, assuming he had purchased at the rates usually given of late years. Of this 1800*l.* in all probibility he will suffer the loss of about one half. In other words, we anticipate that the price under the new system will settle down to about 3000*l.*

We believe that the official regulations must after a little time undergo still further modification. In fact a supplementary general order will soon become necessary, to settle more accurately the position of the cavalry officers who now hold commissions, to whom every consideration ought to be shown, not merely as a matter of justice to them, but as a useful element in lowering as far as possible the extra sums to be paid by their successors. For instance, a cavalry lieutenant's commission under the old rule was worth 1190*l.*, a troop is now worth 1800*l.*, and one of these lieutenants in purchasing it should be allowed to do so on payment of the difference, viz., 610*l.* If you treat a lieutenancy obtained at cavalry price as only worth 700*l.* and make the holder pay 1100*l.* more for his troop, you oblige him to pay 390*l.* which must be made up to him on retiring by the Government, and you compel him to give more than the market value for a commission. During the last three or four years many young gentlemen of moderate means have been induced to go into the cavalry, and their interests are not so unworthy of the attention of the authorities, but that one may anticipate some fair consideration of the claims they possess to be allowed to purchase their promotion by paying the difference between the cavalry price of their present and the infantry price of their new commissions.

In another respect, the change of price affords room for a still further reform of great importance which we have more than once advocated in these columns—namely, that purchase should cease with the rank of captain. It so happens that in Dragoon regiments a captain's commission, purchased at the old prices, is, in round numbers, worth a major's under the new; and a major's, obtained under the old system, is equal to that of a lieut.-colonel under the new. If, therefore, when a lieut.-colonel of cavalry retires, the major and the captain in succession were promoted without purchase, leaving the troop and the subaltern steps to go by purchase, a good foundation would be made for the introduction of the system of selecting field officers, and the principle which we have contended for in our preceding remarks would be sustained. Mr. Sidney Herbert is in favour of selection, and we adopt his views so far as we believe their fulfilment would prevent us having very bad commanding officers. At all events, we trust the new change in the cavalry arrangements may be made the introduction to changes not less important or salutary. A bold use of the "reserve fund" would do marvels in giving increased efficiency to the Service.

ARMY REFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I see Sir De Lacy Evans is about to move for the abolition of purchase in the Army, due regard being paid to existing interests.

Now this can only be done by returning to each officer the regulation value of his commission. As it might be inconvenient to the Chancellor of the Exchequer to provide the whole amount necessary for this purpose all at once, I beg to suggest that a *saleable* annuity at the rate of 5 per cent. per annum, terminable (say in fifty years) be granted to each officer who has purchased his commission.

Those who have received commissions without purchase to be granted similar annuities, valuing their commissions as 100*l.* a-year for each year they have served. Thus any officer who wished to realise his money would have only to dispose of his annuity; and if he did so at once he would get twenty years' purchase for it, or in other words, the exact amount of his capital.

I have said nothing about any compensation being made for the sums paid over regulation, because I do not think there can be the slightest claim for such; and because if purchase were done away with money would still be given by ambitious young men to induce their seniors to retire, and thus provide for their own advancement; so that the present purchasers who have paid more than the regulation, in all probability would not be so much out of pocket, after all.

In future (purchase being abolished) let the promotions be regimental, and by seniority (except in special cases), take a larger number of officers from the ranks.

To do this properly, oblige each commanding officer at the half-yearly inspections to bring to the notice of the inspecting officer such non-commissioned officers as he considers in every respect fit for promotion to commissioned rank. Let these men go before a board of examination, and if found qualified, promote them.

Increase the junior department of the R. M. C., and oblige every candidate for a commission to pass through it.

Reduce the expense of living in cavalry regiments. If measures of this kind are adopted, we shall no longer hear of the difficulty of procuring cornets and ensigns for Her Majesty's Service.—Your most obedient servant,

AN EX-DRAGOON.

THE ARMY.

6th Dragoon Guards. Lieutenant de Bourbel has left the depôt to join the regiment in India.

7th Dragoon Guards. Lieut.-Colonel Forrest, Lieutenant O'Dowd, and Cornet Goldsmith have joined head-quarters at Sealkote.

2nd Dragoons. A court of inquiry has been ordered upon a field officer of this regiment, to which we refer more particularly in our leading remarks.

3rd Light Dragoons. Six troops and ten officers have been ordered from Dublin to Cork, to act in aid of the civil power during the election. The officers had arranged to give a ball to their friends in Dublin, which has been necessarily postponed in consequence of this unexpected move.

5th Lancers will arrive at Aldershot in the course of the ensuing week.

14th Light Dragoons. This regiment was to have come from Bombay to Suez in the Berenice, and from Alexandria home in the Himalaya, but it would appear that the order from England did not arrive in time, and the regiment will possibly be sent round the Cape.

Royal Artillery—A detachment of Royal Artillery left Woolwich on Tuesday, and proceeded by railway to Southampton for embarkation, to join the batteries stationed at Malta and Corfu.

Royal Engineers. A board of officers having assembled at Brompton Barracks to report upon the state of health of Captain the Hon. J. J. Bury, R.E., who has recently returned from Australia, the Duke of Cambridge has granted that officer twelve months' leave of absence.

Lieutenant G. W. Johnson, R.E., proceeded from head quarters to Dover on Wednesday, to be employed in the superintendence of the engineering works now in progress at that station.

The surveying expedition of the Royal Engineers about to be despatched to New Zealand are ordered to embark on board the Nugget.

8th Regiment—1st Battalion has moved from Cawnpore to Calcutta.

9th Regiment. The second division of the 1st Battalion embarked this week for Corfu, where the head quarters of the battalion have arrived in the Perseverance.

20th Regiment. A detachment of 200 of the 2nd Battalion has left Dublin for Naas, to make room for the City of Dublin Militia previous to their disembodiment.

24th Regiment. The 2nd battalion embarks at Cork this day on board the Donald M'Kay, which will bring home the 61st Regiment.

31st Regiment. Captain Prevost is on leave from the depôt at Chatham.

45th Regiment. Lieut.-Colonel H. J. Shaw, late of this regiment, has arrived at Chatham, and taken the command of the Invalid Depôt, in lieu of Lieut.-Colonel Henry Anderson, who retires after having the command five years.

46th Regiment. Major Platt leaves Marseilles on the 5th, for Bombay, to join.

54th Regiment is ordered to Cawnpore.

76th Regiment. The band have presented the master with a valuable silver snuff-box, with the following inscription:—"Presented to Signor J. Reggazoli by the Band of the 76th Regiment, as a token of their high respect and esteem, 14th of February, 1860."

78th Regiment. A party of about 180 men, under Lieutenant-Colonel Lockhart, arrived from Fort George last week and took up their quarters in Edinburgh Castle, vacated by the West York Rifles, who are now distributed in Paisley, Ayr, and other towns. The main body of the regiment, under Colonel Ewart, left Fort George at 2 o'clock on Friday morning, and, travelling by railway, reached Edinburgh about half-past 5 in the afternoon. The city bells were rung as the signal that the regiment was expected, and the Edinburgh Rifle Volunteers the Midlothian Coast Artillery, and the Leith Rifles turned out to line the way for the gallant Highlanders, and to give them a military salutation. All the way from the railway station at Waverley Bridge to the Castle (*vid* Princes Street and Mound) there was an immense concourse of people of all classes in the streets. At the platform two bands—those of the County Militia and the Coast Volunteers—had taken up their places to play the "Conquering Hero" and other appropriate tunes. The Lord Provost was present, and shook hands with the Colonel, giving him welcome and congratulation. When the regiment left the station they were at once involved in a tremendous and eager crowd, who sent up ringing cheers, while hats and handkerchiefs were enthusiastically waved from the windows commanding the scene. The Volunteers were scarcely able to stem the multitude, and their line not being very continuous the Highlanders had actually to push and elbow their way through at many points. At length the protecting lines of the Volunteers ceased altogether, and the soldiers, fatigued with their journey, could with difficulty make their way up to the Castle, owing to the pressure. The band of the regiment was quite unable to continue the strains of "Auld Lang-syne," with which they had hitherto responded to the public welcome, and the "big drummer" had for some distance to hold his sonorous instrument in silence above his head till some of the ready throng gave their aid to drag it along. Even the ranks of the column were somewhat broken, and the gallant Highlanders could not in some cases prevent their being relieved of their rifles by those who desired to do them the service of carrying them, while many of them found old and new friends in the crowd who eagerly sought to bear them company. It was not till half-past 6 o'clock that the regiment reached the Castle, into which they were followed by the loud huzzas that had accompanied their whole progress. It is just twenty years since he 78th were last quartered in Edinburgh Castle, and it was shortly after they left Edinburgh that they were sent out to India, whence they have now returned covered with so much glory.

87th Regiment Moves down country towards Calcutta, and is said to be one of the regiments destined for China.

Rifle Brigade The 2nd Battalion has been ordered to Ferozepore.

The Inspector-General of Fortifications' Department and the Barrack Department, so long located at Harrington-house, Whitehall-gardens, have this week been removed to the War-office in Pall Mall.

The Secretary of State for War, with the concurrence of the General Commanding-in-Chief, has decided that the army shall be equipped exclusively with those rifled muskets, pattern 1853, the parts of which are universal, or respectively interchangeable, and that the arms which are non-interchangeable shall be kept for the militia, volunteers, and other forces.

A committee of officers will be assembled, it is said, to consider the best form of musket, as it is apprehended the present Enfields are too thin in the barrel, and it is proposed to increase the thickness by diminishing the bore. The recent changes in the size of the cartridge and bullet, which was diminished to facilitate loading, have injured the precision of fire.

A new muzzle-loading gun, the invention of Commander Scott, R.N., is to be tested in a few days by the Ordnance Select Committee, at the Government practice range, Shoeburyness.

The Government has presented a number of beautifully executed maps and plates of the Crimean campaign to the non-commissioned officers' library at the Royal Engineer establishment, Brompton Barracks, the whole of the sieges and other operations in which the British forces were engaged being faithfully represented.

WAR-OFFICE, PALL MALL, Feb. 28.

General Order.—No. 746.

Dated Horse Guards, S.W., Feb. 28.

In consideration of the eminent services of Major-General Sir Hugh Rose, G.C.B., during the late operations in India, Her Majesty has been graciously pleased to promote this distinguished officer to the rank of Lieutenant-General in the Army.

By order of His Royal Highness the General Commanding-in-Chief,

(Signed) G. A. Wetherall, Adjutant-General.

BREVET.

Major-General Sir Hugh Rose, G.C.B., to be Lieutenant-General; Feb. 28.

WAR-OFFICE, PALL-MALL, March 2.

22nd Regiment of Foot—Major-General Sir John Lysaght Pennefather, K.C.B., from the 46th Foot, to be Colonel, vice General Sir William Francis Patrick Napier, K.C.B., deceased; Feb. 13.

46th Foot—Major-General John Geddes, to be Colonel, vice Major-General Sir John L. Pennefather, K.C.B., transferred to the Colonelcy of the 22nd Foot; Feb. 13.

2nd Regiment of Dragoon Guards—Cornet Edward Vandeleur to be Lieutenant, by purchase, vice Payne, who retires; March 2.

5th Light Dragoons—William Potter Stephenson, Gent., to be Cornet, without purchase, vice John O'Gown Smith, who resigns; March 2.

8th Light Dragoons—Thomas Coates, Gent., to be Cornet, by purchase, vice Goldswortny, promoted; March 2.

9th Light Dragoons—Ensign John George Buchan Hepburn, from the 4th Foot, to be Cornet, vice Crofton, promoted; March 2.

10th Light Dragoons—Cambré Brabazon Ponsonby, Gent., to be Cornet, by purchase, vice Barthorp, promoted; March 2.

11th Light Dragoons—The Commission of Paymaster Coventry to be antedated to Feb. 1.

Royal Engineers—Brevet Colonel William Turnbull Renwick to be Colonel, vice Wulff, retired upon full-pay; Captain and Brevet-Colonel Lintorn Arabin Simmons, C.B., on the Seconded List, to be Lieut.-Colonel; Captain and Brevet-Major George Archibald Leach to be Lieut.-Colonel, vice Renwick; Jan. 31. Captain Robert Dundas Kerr, from half-pay, to be Captain, vice Brevet-Major Barry, deceased; Dec. 18. Second Captain Richard Warren to be Captain, vice Leach; Second Captain Charles Augustus Rice, from half-pay, to be Second Captain, vice Warren; Jan. 31.

Military Train—For Brevet-Colonel John Clark Kennedy, C. B., Lieutenant-Colonel, upon half-pay of the 18th Foot, to be Colonel-Commandant, vice Brevet-Colonel M'Murdo, C.B., &c., which appeared in the Gazette of the 10th ult., read Brevet-Colonel John Clark Kennedy, C.B., from Lieut.-Colonel, half-pay 18th Foot, to be Colonel-Commandant, vice Colonel M'Murdo, C.B., &c.

1st Regiment of Foot—Lieutenant James Creagh to be Captain, by purchase, vice Chrystie, who retires; Ensign Cresswell Keane Charles Rooke to be Lieutenant by purchase, vice Cumming, who retires; Ensign Fergus Farrel to be Lieutenant, by purchase, vice Creagh; Hutchison Possnett, Gent., to be Ensign, by purchase, vice Bloomfield, promoted; March 2.

6th Foot—Lieutenant James George Cockburn to be Adjutant, vice Lawrell, promoted; Nov. 19.

10th Foot—Lieutenant John Bartholomew Corballis, from the 39th Foot, to be Lieutenant, vice Lynam, who exchanges; March 2.

12th Foot—Captain Francis Williams, from half-pay, Unattached, to be Captain, vice Samuel Fairtlough, seconded, having been appointed Permanent Instructor at the School of Musketry at Hythe; March 2.

14th Foot—Captain James Dickson Mackenzie, from the 1st West India Regiment, to be Captain, vice Dwyer, who exchanges; March 2.

19th Foot—Lieutenant John Binnie Mackenzie to be Captain, vice Uniacke, who retires; Ensign Brunhead Rogers to be Lieutenant, by purchase, vice Mackenzie; March 2.

22nd Foot—Lieutenant Henry Proctor to be Captain, by purchase, vice Couch, who retires; Ensign William Cunliffe Powis to be Lieutenant, by purchase, vice Proctor; Ensign Louis Richard Grismond Vaughan has been superseded, being absent without leave; March 2.

34th Foot—Ensign Lutley Jordan to be Lieutenant, by purchase, vice Peel, promoted; Ensign Charles Edward Leeson, to be Lieutenant, by purchase, vice Mathew, who retires; March 2.

39th Foot—Lieutenant Frederick Augustus Lynam, from the 10th Foot, to be Lieutenant, vice Corballis, who exchanges; March 2.

47th Foot—Captain Graham Taylor, from the 53rd Foot, to be Captain, vice Garnier, who exchanges; March 2.

52nd Foot—Ensign Henry Atkinson Adair, to be Lieutenant, without purchase, vice Julian, promoted; Jan. 31.

53rd Foot—Captain Brownlow North Garnier, from the 47th Foot to be Captain, vice Taylor, who exchanges; March 2.

58th Foot—Henry Thomas Butler, Gent., to be Ensign, without purchase, vice Reeves, deceased; March 2.

84th Foot—Ensign William Frank Wheatley to be Lieutenant, without purchase, vice Lambert, deceased; Feb. 11. Ensign James Murray Thomas Simpson to be Lieutenant, by purchase, vice Wheatley, whose promotion, by purchase, as stated in the *Gazette* of the 21st of February, has been cancelled; March 2. Lieutenant William Frank Wheatley to be Adjutant, vice Lambert, deceased; Feb. 11.

1st West India Regiment—Captain Gage Hall Dwyer, from the 14th Foot to be Captain, vice Mackenzie, who exchanges; March 2.

2nd West India Regiment—Lieutenant Lloyd Richter Creak Drouet to be Captain, without purchase, vice Murray, deceased; Ensign Lionel Lowdham Brett to be Lieutenant, without purchase, vice Drouet; Jan. 17. Andrew Truelove Edge, Gent., to be Ensign, without purchase, vice Brett; March 2.

Ceylon Rifle Regiment—John Shiel, Gent., to be Ensign, by purchase, vice Mesham, promoted; March 2.

Purveyor's Department.

Purveyor's Clerk of the First Class, Henry de Burgh Adams to be Purveyor to the Forces, vice T. A. Corbett, whose services have been dispensed with; March 2.

Brevet.

Colonel Henry Powell Wulff, retired full-pay, Royal Engineers, to be Major-General, the rank being honorary only; Jan. 31.

Lieut.-Colonel William Henry Miller, of the Madras Artillery, to be Aide-de Camp to the Queen, with the rank of Colonel in the Army; March 2.

The Brevet Commission of Brevet-Major C. F. Young, Royal Artillery, to be antedated to the 20th July, 1858.

Paymaster James Twibil, 38th Foot, to have the honorary rank of Captain, under the provisions of the Royal Warrant of the 27th Jan., 1860; March 2.

Notice.—The next Examination of Candidates for direct Commissions in the Army will be held, at the Royal Hospital, Chelsea, on Wednesday the 11th of April next, and following days.

THE SONS OF INDIAN OFFICERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—In the House of Commons it was stated (with reference to the admitting the sons of officers of the Indian army into Woolwich and Sandhurst) that "The College of Sandhurst was not financially in a prosperous condition," &c., &c., &c., and that "it should be remembered that officers of the Indian Army had a higher rate of pay, and their widows higher pensions, than the officers of the Queen's Army. This made a great difference between them." Now, the widows of the Indian officers get pensions *that their husbands pay for by monthly deductions all their lifetime, as also by heavy donations to the fund* from which widows draw pensions, therefore the Government cannot take the credit of this!

As to the pay of the Indian Officers, it is exactly the same as that of Her Majesty's Army, when they are in India!

Indian Officers are therefore to get nothing in England! yet Her Majesty's Officers take equal share of all the "loaves and fishes" in India!

Yours obediently, Observer.

The Royal Engineers' Memorial.—The ceremony of laying the foundation-stone of the large memorial which is to be erected at the eastern entrance to Brompton-barracks, to the memory of those officers and men of the Royal Engineers who fell in the Crimea, was performed on Thursday afternoon by His Royal Highness the Duke of Cambridge, in the presence of Sir John Burgoyne, Inspector-General of Fortifications, and nearly the whole of the generals and other officers of the Royal Engineers, and a large concourse of spectators. The memorial, which is to be erected at the cost of the officers, non-commissioned officers, and men of the Royal Engineers, will be one of the most handsome structures of the kind in the kingdom. It will consist of a lofty central arch, with two side arches, the whole being about 35 feet in height, 45 feet in width, and 10 feet in depth. The height of the middle arch will be 22 feet, and that of the two side arches 13 feet. The whole will be of a very massive and substantial character, and will be highly ornamented. It is to be built of Portland stone, faced with marble, elaborately carved, on which will be inscribed the names of every officer and man of the Royal Engineers, who fell in the Crimea. The memorial is to be built from the designs of Mr. Digby Wyatt, by Messrs. Mansfield and Son, and the total cost will be 7000*l.*, exclusive of the iron gates, which will be made from the cannon taken from the Russians, and presented by the Government. The motto of the Royal Engineers, "Quo fas et gloria ducunt," will be engraved at the summit. His Royal Highness, after the performance of the ceremony, made a minute inspection of the Royal and Indian Engineers, the corps marching past in slow and quick time. At the termination of the manœuvres, the duke, together with all the officers of the Royal Engineers, partook of luncheon in the large mess-room of Brompton barracks, to which about 100 of the most distinguished officers had been invited. The duke returned to town in the afternoon, a royal salute from the battery being fired on his departure. In the evening a magnificent dinner was given by the officers of the Royal Engineers in their mess-room, and Colonel Sandham also had a large dinner party. The non-commissioned officers likewise dined together. The memorial will be about six months in progress.

20th do., Cork, 2nd bat. 6th, 47th, 48th, 57th, 99th
21st do., Chichester, 2nd bat. 4th, 51st, 83rd
22nd do., Stirling, 42nd, 71st, 79th, 92nd
23rd do., Aberdeen, 72nd, 74th, and 93rd

COLCHESTER CAMP.

On Sunday, the 19th ult., while divine service was being performed in the camp church, this building seemed for a time doomed to partial destruction by a gale of wind. It is a large wooden structure, capable of holding two thousand persons, and built on the same plan as the huts, but of course with additional props and joists to support the broad roof, and tie together the whole building. In consequence of the camp being so full, there is now not accommodation enough in the church for all the troops in the morning; and an afternoon service is performed at 3 p.m. Civilians are admitted to this service, and it is usually very fully attended. It was towards the conclusion of the sermon when the gale attained its highest intensity; and, at this time, the end of the building over the altar, which is only connected with the sides and roof, was seen to undulate like pasteboard—the greater part of it is only composed of thin planking—and to give some unpleasant cracking sounds, which were evidently causing the commencement of a panic in the part of the congregation near. The Rev. Mr. Walsh, garrison chaplain, terminated his discourse abruptly; but the force of the wind shortly afterwards subsided. It was the general opinion that a slight increase of pressure would have forced the end of the church out. The building has been since examined, and no harm found to be done, and its very thinness and pliability probably led to this result.

The number of troops in camp are, in round numbers, 2600. When the men absent on furlough rejoin, either one of the depôts will require to be moved to some other station, or the married huts will have to be vacated, to make room for their accommodation. Already certain houses in the town have to be hired for the accommodation of some of the married soldiers.

It is said that the first outlay for the Brick Hut-Barracks for 1000 men, about to be built in the drill-ground adjoining the camp, will be slightly less than it would have been for wooden huts; while the expenses of repair, which are constantly recurring in the latter, will be in a great measure uncalled for in the brick huts. It is chiefly, however, on account of the free supply of air between separate huts, and on other sanitary grounds, that the plan of this kind of barrack has been preferred to the old form of one large building for the whole battalion.

The detachment of the Prince of Wales' Own Donegal Militia Regiment left the camp at Colchester on the 14th instant, part proceeding to Yarmouth, and part to Deptford. The subdivision to Deptford, consisting of 55 non-commissioned officers and men, with 11 women and children, left under the command of Captain John Tredennick. Lieutenant M'Kenzie accompanied. The subdivision which proceeded to Yarmouth was still smaller.

SHORNCLIFFE CAMP.

The 2nd Division of the 1st Battalion of the 9th Regiment marched from the camp on Thursday morning for the station of the South Eastern Railway Company, Folkestone, en route to Portsmouth, there to embark on board the hired screw transport Indiana, for Corfu, the whole under the command of Major Hawes. The following officers were with the division:—Captains Terry, Harvey, and Captain and Paymaster Seivingham; Lieutenants Roberts, Grubb, and Layard; Ensigns Cousins, Green, and Quail; Surgeon Ovens. The strength of the division was 12 sergeants, 13 corporals, 3 drummers, 295 rank and file, 20 women and 30 children. Brigadier Williams was in attendance to ascertain how quickly the whole could be placed in the railway-carriages; and, in spite of the delay caused by the men being told off in eight instead of sixes for each carriage, the whole, including the women and children, were seated, and the baggage placed in the vans, in twenty-five minutes. The invalids and depôt went by a subsequent train on march to Limerick, under the command of Lieutenant Stanley, of the 47th; amongst them were several veterans decorated with six medals; and one sergeant, seemingly in very ill-health, had no less than seven.

A sergeant-major (Boyle), two sergeants, and eight men of the newly raised "Army Hospital Corps," have arrived from Chatham, and have taken over the duties of the general hospital from the late medical staff corps. During the past month a great portion of the undulating ground near the hospital has been laid out in beds, and planted with trees and shrubs. Terraces have also been raised, and winding paths made for the patients to take exercise in; when the trees attain their growth, and the grass-plots their verdure, the whole will form a most picturesque spot, highly creditable to the authorities of the camp.

The commuted sentence of a general court-martial was read yesterday (Friday) to the whole of the regiments at the camp; condemning private Michael Linvarn, of the 47th Regiment, to penal servitude for six years, the original sentence being ten years, for the offence of striking the adjutant of the regiment. The prisoner will be removed at once to Pembroke, there to undergo his sentence.

On Wednesday morning the whole of the troops marched from the camp, in heavy marching order, through Folkestone, returning about one.

The foundations of five reading-rooms, one for each of the ranges of huts, were commenced on Monday morning last, and are to be completed without delay. The contract for them has been obtained by Mr. Stiff, builder, of Dover.

Military steeple-chases, got up by the officers, have been advertised. Two days' sport is announced, and eight races, including two handicaps, are to be run for. They take place on the 20th and 21st inst., at an easy distance from the camp, and the prizes to be run for exceed 300*l*. Good sport is anticipated. The races for officers are restricted to those belonging to regiments in the S.E. district.

CHATHAM INVALID DEPOT.—On Thursday a number of cavalry and infantry troops, who have recently arrived at the invalid depôt, St. Mary's Barracks, from India, were discharged from that establishment by direction of the Commissioners of Chelsea Hospital, the whole of them having been pronounced unfit for further service. The depôt of the 53rd regiment at the garrison has been considerably augmented by about 60 non-commissioned officers and men, who have been ordered to join from India, the medical officers at Fort Pitt having declared that they are fit for further service.

THE WHITWORTH GUN.

Mr. Whitworth has written to *The Times*, describing his rifled cannon. He says, "All the guns, however, which I have myself made, are ready for any proof and any comparison that may be required. Their strength is such that they can be elevated on their carriages, and be fired, if necessary, as mortars, at any angle, with the largest charge of powder that can be consumed in them. The 3-pounder was repeatedly fired at an angle of 35°, and attained a range of more than five and a-half miles, without doing the piece or its carriage the slightest injury. The material of which the cannon is made is the same as that used for my rifled musket barrel—homogeneous iron. To obtain an extreme proof of its strengths, I loaded one of the barrels with a leaden plug, so long that a full charge of powder was unable to drive it out. On firing the powder, the plug remained in the barrel, and the gases of the explosion all came through the touch-hole, leaving the barrel uninjured. This experiment was repeated four times with similar result. Of the durability of my guns I can speak with the utmost confidence. From one of them upwards of 1500 shots have been fired, chiefly at high elevations, without the gun exhibiting any injury or sign of wear. The relative merits of my own and other systems are best compared by appealing to practical results. These show that the system of construction which enables the simple hard metal projectile to be fired gives better results, and is capable of a more extended application, than the construction which requires the compound projectile and soft metal coating. In other words, the system of rifling by mechanical fit is capable of doing much more than that of rifling by the force of the explosion." It is stated that shells have been successfully fired from a Whitworth gun of the same bore (3-pounder) as the gun which threw its shot 5½ miles, and burst well. The practice with actually bursting shell has not been extensive, but the best practice with the 3-pounder has been with hollow shot filled with sand and sawdust of the same specific gravity as gunpowder. These projectiles in fact were shell in all but having a bursting charge. Owing to the difficulty there is in keeping the Southport range clear from shrimpers, donkey-boys, and young ladies, shell practice is rather a difficult matter; but if hollow shot filled with sand and sawdust can be fired, shell may tried when the facilities are offered.

The fact that the Whitworth tube is rifled *throughout*, as is argued, tells immensely in its favour as a *shell* gun; as there is no chamber, shell of any increased length and therefore capacity, may be fired with any required charge of powder. In the Armstrong the screw in the breach takes up a *fixed* distance, the rifling begins at a fixed distance, so the length of projectile fired, and therefore its capacity, is fixed. *Three* out of *four* consecutive shots fired from the 80-pounder at 7°, on Thursday, Feb. 23, were as follows:—

Range. Yards.	Deviation. Feet.		Feet.
3493	6 to Right	Greatest difference in length of range	48
3487	6½ ,,	Greatest difference in width	6 *inches.*
3492	6½ ,,	Range about 2 miles	

The form of the Whitworth bore, it is said, offers no impediment to shell. When the conditions under which the smooth six-sided shot is propelled along a well-greased, equally smooth, true, six-sided tube, are compared with the conditions under which the lead-coated shot is driven through a 40-grooved tube, it is seen where the advantage lies at the outset. The action of *iron* cutting into *lead* is different to the action of iron on iron well lubricated.

Speaking of great guns at long ranges, the precision of the 80-pounder at 7°, with a range of two miles, was about equal to that of the rifle-musket at one-seventh of the range.

PAY OF STAFF-OFFICERS.—A Parliamentary return, printed on the motion of Mr. Monsell, contains the following statement, among others, with reference to the pay and allowances of staff-officers at home and abroad. It shows that the Duke of Cambridge has 2000*l*. a-year regimental pay, 3458*l*. staff pay, and 876*l*. forage allowance—making a total of 6334*l*. Lord Clyde, regimental pay, 1000*l*.; Indian pay and allowances, 10,208*l*. Lord Seaton, 5234*l*.; Sir H. G. Smith, G.C.B., 3007*l*.; Sir J. Ferguson, 6100*l*.; C. A. Windham, C.B., 4539*l*. 11*s*. 8*d*.; Sir S. J. Cotton, K.C.B., 4539*l*. 11*s*. 8*d*.; Sir R. Garrett, K.C.B., 4539*l*. 11*s*. 8*d*.; Sir J. E. W. Inglis, K.C.B., 4539*l*. 11*s*. 8*d*.; P. E. Craigie, C.B., 5083*l*. 6*s*. 6*d*.; Sir H. H. Rose, G.C.B., 5083*l*. 6*s*. 9*d*.; J. Michel, K.C.B., 4539*l*. 11*s*. 9*d*.; Colonels R. Walpole, Rifle Brigade, 2538*l*.; J. Longfield, 8th Foot, 2538*l*.; Hon. P. E. Herbert, 82nd Foot, 2206*l*.; T. J. Galloway, 70th Foot, 2538*l*.; H. W. Stisted, C.B., 78th Foot, 2206*l*.; W. G. Brown, 24th Foot, 2206*l*.; T. Chute, 70th Foot, 2206*l*.; F. C. W. Milman, 37th Foot, 2206*l*.; G. Hutchinson, 80th Foot, 2206*l*.; A. H. Horsford, Rifle Brigade, 2206*l*.; J. Douglas, 79th Foot, 2206*l*.; G. F. A. Pinckney, 73rd Foot, 2206*l*.; J. Macduff, 74th Foot, 2207*l*.; J. Creagh, 86th Foot, 2207*l*.; M. K. Atherley, 92nd Foot, 2207*l*.; and C. A. Edwards, C.B., 18th Foot, 2538*l*.

From Hong Kong we hear, under data of Jan. 14, that preparations on a large scale are being made for the requirements of the coming campaign. It is probable the force will be detained in India till the setting in of the south-west Monsoon, so as to be able to proceed at once to the scene of operations. Dr. Muir, D.I.G., an excellent officer, is charged with the medical arrangements, and is cordially assisted by Admiral Hope. General Straubenzee, as he is only waiting for his successor to relieve him, and may consider he is quite justified in taking no responsibility on himself which he can fairly avoid, takes no active part in the arrangements. Surgeons Carne, Telfer, Rutherford, and Denny had arrived. It may be pardonable to remark that the governor, the admiral, the minister, the general-in-chief, the quartermaster-general, and the principal medical officer, are all Scotchmen. The Chinese are in a bad way.

THE WOUNDED LUCKNOW SOLDIER.—The clergyman who received the contributions on behalf of the wounded Lucknow soldier of Amesbury, writes to the *Times* to say that he has received 321 letters enclosing various sums.

THE NAVY.

ST. JAMES'S PALACE, FEB. 23.

The Queen was this day pleased to confer the honour of knighthood upon Francis Leopold M'Clintock, Captain in the Royal Navy, LL.D.

ADMIRALTY, FEB. 27.

Rear-Admiral of the Blue James Hope, C.B., to be Vice Admiral of the Blue until further orders, and while employed as Commander-in-Chief of her Majesty's ships and vessels within the limits of the East India station.

FEB. 24.—APPOINTMENTS.—Chief-Engineers J. J. Greathead (1856), to the Cumberland, for service in the Waterloo; and C. H. Houghton (1854), to the Asia, for service in the Nelson.

Second-class Assistant-Engineer J. Lanksbury, confirmed to the Centurion.

Acting Third-class Assistant-Engineers J. K. Harvey, to the Wellington, as supernumerary; and J. Tapp, to the Wellington, for service in the Zephyr.

FEB. 25.—Commander W. J. Pollard (1854), to the Hawke, additional, for service in the Coast Guard.

Lieutenants H. G. Hale (1855), to the Greyhound; J. H. Coxon (1854), to the Hero; and W. Strickland (1847), to the Royal Albert.

Engineers G. L. Thompson, promoted to second-class Assistant-Engineer, and appointed to the Styx; and J. Bridgeman, confirmed to the rank of chief engineer.

Paymaster S. W. Parker (1859), to be additional to the Majestic.

FEB. 27.—Engineers R. Evans, promoted to first-class Assistant-Engineer in the Melpomene; and T. G. Heaven, confirmed to the rank of first-class Assistant-Engineer in the Melpomene.

Lieutenant H. J. Dyke (1859), to the Marlborough, additional for disposal.

Third-class Assistant-Engineer W. A. Houghton, to be additional of the Fisgard, for charge of the machinery of the Torch.

Acting Third-class Assistant-Engineer E. J. Wilcox, to the Firebrand.

FEB. 28.—Master F. W. Rea (1856), to the Cumberland.

Inspector of Machinery Afloat W. Price (1858), to the Victoria and Albert.

Chief-Engineers J. Bruce (1853), and T. Truscott (1847), to the Victoria and Albert.

Paymaster J. Wotton (1859), to be additional to the Victory.

Midshipman A. H. Du Borlaz, to the Centurion.

Acting Assistant-Surgeon J. F. Kynsey, to the Impregnable.

First-Class Assistant-Engineers W. J. Brown, to the Victoria and Albert, as supernumerary, for service in the Elfin; J. Mears, W. Brown, and J. Prowett, to the Victoria and Albert.

Second-Class Assistant-Engineer G. Tidcombe, to the Wellington, for charge of the machinery of the Penguin.

Third-Class Assistant-Engineers S. Windley, J. King, and W. Ross, to the Fisgard, for appointment to gun-boats coming forward.

Acting Third-Class Assistant-Engineers A. B. McLuckie, to the Victoria and Albert; T. Marsh, to the Diadem; and R. Anderson (b.), to the Wellington, for temporary charge of the Procris.

MARCH 1.—PROMOTIONS.—Engineers W. Price, inspector of machinery afloat, to the Cumberland, for service in steam ordinary at Sheerness; J. H. Langley, inspector of machinery afloat, to the Victoria and Albert.

APPOINTMENTS.—J. R. Aylen, D. N. Welch, and A. Balleston, re-appointed to the Royal Yacht.

Paymasters G. H. Mowbray, re-appointed to the Royal Yacht; H. Campion, to the Edinburgh.

Assistant-Paymasters J. T. Suetor, to the Nile; J. Marston, re-appointed to the Royal Yacht; J. M. Minter, deputy inspector-general, re-appointed to the Royal Yacht.

Clerks G. Robinson, Assistant Clerk to the Royal Albert, G. F. A. Rowe, to the Fisgard.

Aboukir, 90, screw, Captain D. Curry, left Plymouth on Thursday, the 23rd ult., to join the fleet, which she fell in with off that port.

Ariadne, 26, screw. An accident occurred on Thursday morning on board this ship, at Spithead, which, by an extraordinary piece of good fortune, was unattended by any serious consequences. The mast-rope of the maintopgallantmast broke as it was being sent up, and the spar came down with terrific force, and, breaking its way through the upper deck, struck one of the 10-inch maindeck guns on the breech, which checked its further progress, none of the hands on deck being touched by the spar in its descent.

Bacchante, 51, screw, in charge of Capt. G. T. Gordon, commanding the steam reserve at Portsmouth, steamed out to Spithead on Monday on her contractor's trial of machinery. On steaming out beyond the Nab Light Vessel, going at full speed, she stopped engines and went astern in 42 seconds; again at full speed she stopped engines and went ahead in 23 seconds. The machinery worked most satisfactorily in every respect with a perfect command of steam. As this was only the contractor's trial, no runs were made at the measured mile. Captain Harris, Her Majesty's ship Illustrious, Commander Thorp, Her Majesty's ship Asia, were on board during the trial, which was superintended by Mr. J. Dinnen, Inspector Afloat to the Admiralty; Mr. G. Murdoch, Inspector Afloat at Portsmouth; and Mr. Miller, Assistant Chief Engineer of Her Majesty's Dockyard. The ship is fitted with a steering apparatus on Admiral Martin's plan, which will be more effectually tested when the ship's official trial takes place on the 6th.

Brilliant, 20, was towed from Chatham to the Thames on Wednesday afternoon by the African and Adder, steamers, the severe gale of the previous day having rendered it dangerous for her to leave the harbour.

Briton, old sailing-frigate, has been unlocked from No. 1 Dock at Portsmouth, where she has had her copper stripped off her, and as many of her bolts driven out as possible, their places being filled up with trenails. She was afterwards slung with chains, and will be moored up the harbour as a target-ship for the Excellent.

Brunswick, 80, screw, Captain E. Ommanney, will be paid off at Plymouth, on Friday next.

Cameleon, screw-corvette, launched on the 23rd ult., at Deptford, has been taken into dock at Woolwich to be coppered and prepared for receiving her engines. The following are her dimensions:—Length between perpendiculars, 185 feet; length of keel for tonnage, 164 feet; breadth, extreme, 33 feet 2 inches; ditto for tonnage, 32 feet; moulded, 32 feet 4 inches; depth in hold, 17 feet 5 inches; burden in tons, 950 8-94; engines, 200 horse-power; and to be mounted with 17 guns.

Castor, 36, which is to be fitted at Chatham Dockyard as a training ship for the Naval Coast Volunteers, has had the whole of the hands who were employed on the Brilliant transferred to her; she is to be completed with all despatch, as the Admiralty are desirous that she shall be stationed in the Thames, off Greenhithe, to receive the Volunteers.

Conqueror, 101, screw, Captain Wilcox, at Plymouth, received her powder on Wednesday; her crew were to have been paid on Thursday.

Dasher, 3, steam-vessel, Commander Philip de Saumarez, sailed on Saturday for the Channel Islands.

Dee, 4, steam store-ship, Master-Commander Pullen, on her return voyage from Portsmouth, was on Tuesday hauled into basin at Woolwich to receive machinery and steam gear for the Sutlej and other vessels fitting out at the western yards.

Diadem, 32, screw, Captain J. H. Cockburn, has gone into Plymouth harbour to repair damages sustained by collision with the Queen. We are informed the men of this ship have requested permission to be allowed to erect a monument to the late Captain William Moorsom at their own expense—a very just tribute to a gallant officer.

Dover, steam-vessel, since her arrival at Woolwich from the river Gambia, has been nearly re-constructed, and is to be fitted out to be lent to the Colonial Government for her former service.

Euryalus, 51, screw-frigate, Captain J. W. Tarleton, C.B., having on board His Royal Highness Prince Alfred, arrived at Spithead on Tuesday from the Mediterranean. His Royal Highness was accompanied by Major Cowell. He travelled by special train on the London and South-Western Railway, arriving at the Waterloo station at a quarter-past one in the afternoon, where he was received by His Royal Highness the Prince Consort and His Royal Highness Prince Arthur. The meeting between the two young princes was most cordial. His Royal Highness looked remarkably well. The princes proceeded to Buckingham Palace in one of the Royal carriages. His Royal Highness passed his examination for midshipman on board the Euryalus the day the ship anchored at Spithead. The King of Portugal dined with the prince and the officers of the ship, on board, on the 18th ult. The Euryalus sailed from Lisbon on the following day, and had a contrary wind until off Ushant, when it veered from N.E. to N.W. and S.W. Off Cape Finisterre she lost a man by falling from aloft overboard. She passed the Channel squadron below Plymouth, at 10·30 p.m. on Sunday, standing on a wind down Channel. The only foreign vessels of war in the Tagus when the Euryalus sailed were a Dutch squadron of a frigate and two corvettes under a commodore's pendant. The Euryalus is very defective, both in her hull and machinery, and is expected to go into Portsmouth Harbour to dock and refit.

Fairy, Her Majesty's Royal screw-yacht, was docked at Portsmouth for the purpose of cleaning and examination. She was paid off and re-commissioned again on Tuesday. On Thursday the commissioned officers on board received their commissions from the Admiralty, through the hands of Captain Hon. J. Denman.

Firebrand, 6, steam-sloop, Commander J. Bruce, is ready to receive her crew, and will be brought out of the steam basin to-morrow.

Firefly, steam-vessel, is ordered to be rigged, and leaves the harbour in a few days for the surveying service on the African coast.

Flying Fish, screw steam-vessel, Commander C. W. Hope, steamed out of harbour on Wednesday morning, and anchored at Spithead to await orders.

Galatea, 26, screw-frigate, fitting at Chatham for the steam reserve, is nearly completed, and will be ready to be undocked on Friday next.

Harpy, steam-vessel, is now fitting out for service on the coast of Scotland.

Hero, 91, screw, Captain Henry Seymour, arrived at Spithead on Sunday, from Portland. She was expected to sail yesterday (Friday) for Lisbon.

Howe. To be launched at Pembroke Dock on the 7th of March. Length between perpendiculars, 260 feet; length of keel for tonnage, 220 feet; breadth, extreme, 61 feet; breadth, moulded, 60 feet 2 inches; depth in hold, 26 feet 4 inches; burthen in tons, 4236 10-94.

Immortalité, 51, screw, completed re-shipping her boilers under the factory crane in the steam basin at Portsmouth. The last of her boilers, weighing nearly 27 tons, was hoisted from the jetty alongside and suspended over the ship, clear of her bulwarks, in 2½ minutes. Mr. G. F. Barr has joined this vessel as chief engineer.

Indiana, screw-steamer, has arrived at Portsmouth from London, to embark a wing of the 9th Regiment of Foot, for conveyance to Corfu.

Mars. On Thursday a court-martial assembled to try William Devereux, William Bowden, James M'Lean, and George Williamson, seamen belonging to Her Majesty's ship Mars, on a charge of having deserted from that ship on or about the 20th February. Captain Strange, of the Mars, prosecuted. The court found the charge proved against the prisoners, and sentenced them to twelve months' imprisonment in Winchester Gaol. The court was composed of Captains the Hon. J. Denman (president), G. H. Seymour, C.B., G. T. Gordon, R. Harris, A. Farquhar, T. Wilson, and E. W. Vansittart, together with the deputy judge-advocate of the fleet, W. J. Hellyer, Esq.

Mersey, 40, screw, Captain H. Caldwell, arrived at Plymouth on Tuesday, having sustained some injuries in the late gale, which she came into port to make good. Parted company on Monday morning at 10 o'clock, lat. 49° 30′ N., long. 4° 25′ W., with the Edgar, the Donegal, the Melpomene, the Algiers, the Trafalgar, the Aboukir, the Queen, and the Royal Albert. The flag-ship was ahead, out of sight. The squadron was under canvas and steam, endeavouring to beat out of the Channel against a strong N.W. wind. On the 25th ult., at 2 o'clock in the afternoon, the Mersey, which was steering W. half N., came in contact with the screw steam-ship Algiers, 91, Captain George W. D. O'Callaghan. Both were under all sail; the wind, from S.S.W., was so light that neither ship was under full command. The Algiers lost her jibboom and flying jibboom. The Mersey was struck on the port quarter, and had two of her cutters stove in. Since then the Mersey has experienced a series of severe storms, which have at different times washed away her head, hammock-berthing, &c. On the 27th, about noon, wind N.W. by W., and having a force of 10, a tremendous sea carried off from the main chains and drowned Henry Hayward, 24, coxswain of the cutter, a native of Canterbury, and, from the head, John Summers, 18, first-class boy, belonging to Southsea. The Mersey was then under close-reefed topsails and fore staysail. The yoke of her rudder has been bent by wear and the recent violent strainings of the sea, and this was the immediate cause of her return.

Pigeon and Linnet, gun-boats, ordered to be fitted at this port, are to be supplied with the following powerful armament, viz.:—1 68-pounder, of 95 cwt., and 10 feet in length; 1 32-pounder, of 56 cwt., and 9 feet 6 inches in length; and 2 howitzers, throwing 24-pounder shells.

Pylades, 21, steamer, Captain M. de Courcy, was at Vancouver's Island on the 14th of December last. She was waiting for the Amythyst, 26, steamer, Captain S. Grenfell, which ship the Pylades expected to meet in the first week in January last. The latter ship was to carry her freight to Panama, where in all probability she would arrive in the first week in February; she was then to return to Mexico, and from thence to Panama.

Rhadamanthus, steam store-ship, F. R. Sturdee, master, sailed from Plymouth for Pembroke on Wednesday.

Sanspareil, 70, screw, Captain Wilmot, at Plymouth, was swung for the adjustment of her compasses on Saturday. She is to proceed to Pembroke, where her crew will jury-rig the Howe, 121, screw, recently launched at that port, for navigation to Plymouth. The Sanspareil subsequently proceeds to Ireland.

Torch, gunboat, launched from the builder's yard on Tuesday, arrived at Woolwich on Thursday, and was towed down to Chatham yard to be fitted for service.

Virago, 6, paddle, Commander Dunn, at Plymouth, has her repairs completed, and is again ready for sea.

Victory. The flag of Admiral William Bowles, C.B., was struck on board this ship on Thursday evening, and that of Vice-Admiral Henry W. Bruce, the newly-appointed commander-in-chief, hoisted on Friday morning. Captain Robert Coote (1854) succeeds Captain Farquhar as Flag-Captain. Flag-Lieutenant Suttee succeeds Flag-Lieutenant Robinson; Paymaster William Hickman is secretary, a gentleman well-known and highly respected in the Service. Captain Farquhar retires, having obtained by his courteous demeanour and judicious discipline the esteem and regard of every officer and man belonging to Her Majesty's ship Victory and her tenders.

THE CHANNEL FLEET.—The following ships forming the squadron under the command of Rear-Admiral Sir Charles H. Fremantle, passed Plymouth on Friday, 24th ult., for Lisbon:—Royal Albert, 121, screw, flag of the commander-in-chief; Queen, 86, screw, Captain C. F. Hillyar; Trafalgar, 90, screw, Captain Fanshawe; Donegal, 101, screw, Captain Broadhead; Algiers, 91, screw, Captain W. D. O'Callaghan; Aboukir, 90, screw, Captain D. Curry; Edgar, 91, screw, flag of Rear-Admiral Erskine; Mersey, 40, screw, Captain Caldwell; and Melpomene, 51, screw, Captain C. J. F. Ewart. The Diadem, 32, screw, Captain J. H. Cockburn, which formed part of the fleet as far as Plymouth, put into that port to repair damages sustained by a collision with the Queen when getting under weigh at Portsmouth, by which her bowsprit and figure-head were carried away, with other damage, which the dockyard authorities report will take 20 men three weeks to repair.

EXPERIMENTS AT THE DOCKYARD.—On Saturday, 25th ult., afternoon a series of experiments were carried out in the river, off the dockyard, to test the efficiency of Wood and Rogers' patent boat-lowering and detaching apparatus. The experiments were conducted from a steam-tug vessel, in the presence of Admiral Bullock, Master-Commanding Petley, of the Black Eagle; Mr. Macdonald, Master-Attendant, of the Fisgard (flag-ship); Mr. Turner, Master-Shipwright, at Woolwich; and Captains Guthrie, Stead, and Marshall, of the merchant service. The principle of the invention differs in some respects from the plan of Mr. Clifford, whose apparatus has been generally adopted in the Navy, and a report as to the result of the experiments will be forwarded to the Admiralty. It may be observed that Messrs. Wood and Rogers have decidedly effected an improvement in the mode of disconnecting the lowering gear from the boat on its reaching the water.

PORTSMOUTH.—The whole of the hands employed in the steam-factory at Portsmouth are working extra hours up to 10·30 p.m. each day, every exertion being made to fit with their machinery as quickly as possible the different large vessels recently launched at that port.

PEMBROKE DOCKS.—Orders have been sent to these docks for the men to work an hour and a half more every day. The construction of another gun-vessel is being proceeded with at Pembroke Dockyard. She is to be called the Nimble, and is to be built in the same shed and from the same lines as the Espoir, recently launched from No. 6 slip. The Nimble will be the third of these fast despatch vessels built at Pembroke, and the following will be her chief dimensions:—Length between perpendiculars, 145 feet; length of keel for tonnage, 127 feet 10 inches; breadth, extreme, 25 feet 5 inches; breadth for tonnage, 25 feet 1 inch; breadth, moulded, 24 feet 6 inches; and depth of hold, 13 feet She will be fitted with engines of 80-horse nominal power, and carry four broadside-guns and one pivot-gun. The whole of the clerks of the several departments of this dockyard (with one exception) have signed a memorial, which has been forwarded to Commodore-Superintendent the Hon. J. R. Drummond, for presentation to the Admiralty, complaining of the injustice inflicted by the mode in which several recent promotions have been filled up.

SUPERANNUATIONS IN CHATHAM DOCKYARD. — The following *employés* in Chatham dockyard have been superannuated by order of the Lords of the Admiralty: — J. Meckiff, leading man of shipwrights, 57*l.* 7*s.* 8*d.* per annum; W. Horn, shipwright, 46*l.* 19*s.*; J. Loft, messenger, 42*l.* 11*s.* 8*d.*; M. Dove, spinner, 45*l.* 4*s.* 2*d.*; J. Head, S. Stephens, and J. Naylor, first-class sawyers, 41*l.* 14*s.* 8*d.* each; J. Thompson, joiner, 39*l.* 19*s.*; W. Greenfield, labourer, 36*l.* 10*s.*; W. Jackson and J. Rack, 22*l.* 6*s.* each.

EFFECTS OF THE GALE AT CHATHAM DOCKYARD.—So severe a gale as that of Tuesday last has not been known at Chatham dockyard for a great number of years. At the time the gale was at its height a portion of the lead on the roof of one of the buildings was stripped off, and several minor casualties occurred. In consequence of the boisterous weather none of the ships under orders to sail left the harbour that day. During the afternoon a large and very strong fence, which divided the ordnance land from the road, was partially blown down and carried some distance, and a fine stack of chimneys at the New Union Workhouse, Chatham, was also blown down, entailing several hundred pounds expense to have it rebuilt.

THE NEW COMMANDER-IN-CHIEF AT PORTSMOUTH.—On Monday morning Vice-Admiral of the White, Henry William Bruce, paid a visit to Admiral Bowles, at the official residence in the Dockard, Portsmouth. The Rear-Admiral Superintendent and officers belonging to Her Majesty's naval service, doing duty at the port, were present, and Admiral Bowles, C.B., introduced them to his successor, Vice-Admiral Bruce, and in the most feeling and courteous manner expressed the gratification he had experienced in presiding over so efficient and gentlemanly a body of officers. The admiral then bade all an affectionate farewell. At noon Vice-Admiral Bruce hoisted his flag, white at the fore, on board the Excellent, Captain Hewlett, and saluted the flag of Admiral Bowles with 17 guns, and the compliment was duly returned from the Victory.

FLOGGING IN THE NAVY.—A return has been issued of the number of persons flogged in the British Navy in 1858. The total number of punishments was 997; of lashes inflicted, 1230; of men liable to corporal punishment, 47,646; and of lashes inflicted by sentence of court-martial, 784. The highest number of lashes was 50; the lowest, 3. The vessels on which the most cases occurred are the Basilisk, Brunswick, Chesapeak, and Indus. Five cases are reported from the Euryalus, 15 from the Princess Royal, and 13 (with the large number of 500 lashes) from the Royal Albert.

THE PACIFIC.—By accounts from Vancouver's Island we learn that Her Majesty's ships Ganges and Tribune were in Esquimalt Harbour on the 4th January, all well. The latter ship was expected to leave for England on the arrival of the Topaze, looked for in March or April, and may be calculated to reach England in September next. The Tribune is in a defective state; she had taken in a new mainmast, but the foremast is not sound. Some parts of her planking in the stern would not bear caulking; tarred blankets coppered over had to be nailed on. Her boilers are also much worn.

The gig of Her Majesty's yacht Victoria and Albert left the yacht on Monday, 27th ult., at 3·20 p.m., under a reefed lugsail, having on board Mr. Price, inspector of machinery, Mr. Madge, Mr. Brown, and Mr. M'Luckie, engineers, with intention of landing at the King's Stairs; a heavy puff of wind caught the boat's sail on clearing the lee of the Carnatic coal depôt, and at once capsized the boat, and threw the passengers and boat's crew into the water. Happily, all hands were rescued.

The boring operations on the shoals of the eastern approaches to Spithead, for the purpose of selecting the sites for the intended forts recommended by the Defence Commission for the protection of Portsmout Dockyard, &c., are still being carried on. An excellent foundation has been found on the "No Man's" shoal. But on the "Horse" shoal nothing firmer than shingle has been found at a depth of 47 feet. The boring has been now commenced on the southern portion of the "'Spit" shoal, but has been interrupted by the present stormy weather. As soon as it moderates the work will be resumed.

Lord Panmure, military screw steam-transport, Mr. H. T. Moore, master-commanding, which vessel sailed from Devonport on Sunday, arrived at Woolwich on Wednesday, having experienced a most fearful gale in the Channel, carrying away her foregaff, headboard, sails, &c. On coming to anchor in the Downs the chief officer was severely disabled by a fall. From the violence of the gale communication was cut off from the shore, and no medical assistance was procurable until the ship's arrival at Woolwich.

Nuggett, hired transport, has arrived at Woolwich for the embarkation of troops for New Zealand.

The present chief of the Mediterranean Fleet, Vice-Admiral Fanshawe, C.B., will, according to a report at Plymouth, succeed to the naval command there on the retirement of Vice-Admiral Sir Barrington Reynolds, K.C.B., whose term of service expires on the 4th of May.

The War Department have chartered the Northfleet, the Speedwell, and Fontanelle, to ship military stores from Woolwich arsenal.

THE NAVAL RESERVES.

The Duke of Somerset entered into a statement of the strength and prospects of the naval reserves in answer to a question from Lord Hardwicke, on Monday evening in the House of Lords. He began by saying that some of the improvements suggested by the manning commission had been carried out in a modified form. It had been thought useless to establish training-ships for boys, since, unless brigs, or some small vessels in which the boys could go to sea were attached to them, they would be useless, which, if they regarded as hulks-barracks on shore, would be better. The plan of the Government, therefore, was to establish naval schools, to which small vessels might be attached. It had been recommended that means should be taken to teach seamen gunnery. With that view the Admiralty had increased the pay of efficient gunners, and had appointed gunnery lieutenants and instructors, so that any man who should acquire a certain degree of skill might obtain a certificate and the increased pay. The Naval Reserve consisted of three bodies—the Coast-guard, the Royal Naval Coast Volunteers, and the New Volunteers. The first consisted of about 3200, in addition to about 1800 men belonging to the district Coast-guards, making a total of 5000, all of whom were perfectly qualified to go on board immediately. The second force consisted of about 6600, so that the country had between 11,000 and 12,000 men ready to embark in the event of any emergency. In raising the third branch the Government had been assisted by the Board of Trade. He, the Duke of Somerset, had, however, determined not to admit ordinary seamen as was proposed. The very liberality of the terms offered had raised suspicions on the part of the men. Why, seamen could not at first believe that they were to receive 6*l.* for nothing but allowing themselves to be drilled; for, as the noble earl reminded him they were also to receive pay during the period of their drill, the offer was too good to be true. The system had only been in operation since the beginning of the year, and notwithstanding the novelty of the offer, the suspicion which it had at first excited, and the difficulty which there must be in at once thoroughly understanding its details, the men were now beginning to come forward at the rate of 40 or 50 per week. He thought they ought to proceed gradually, or they might be committing the country to a very large expense. It was true that they had to resort to shipping masters, because if they attempted to raise the men merely by naval officers they would fail; the men would not come; but the responsibility of taking or rejecting the men must rest with the naval officers. In order to facilitate business they had made arrangements by which the shipping-master attended at the office, so that there was but a single attendance on the part of the men. Lord Hardwicke had said that 22 days' training were not sufficient to make the men thoroughly effective. That was quite true; but they did not want to draw the men away from the mercantile service. If they were to give them more days' training, it could only be done by taking the men permanently, which would be very objectionable, because the expense would be enormous. Besides, if they took able seamen, he did not think it impossible to train them to the use of guns and to give them considerable efficiency in 22 days. The noble earl stated that there was not sufficient instruction given to the officers and men on board the coast-guard ships. That was quite true as regarded the ships, but if the noble earl made inquiry he would find that every district ship had one, if not more, gun-boats attached to it; and these gun-boats were sent out, and there was no better practice than going out in gun-boats. The estimates were very heavy, and he did not think they would have been justified in going into further experiments of this kind. He thought it better to commence with the reserves in a cautious manner. If they went on increasing the number, even at the rate of 40 or 50 a week, they would soon have a considerable number; and when the men became fully convinced that they would never be called out except when there was some great national danger, he had no doubt they would join the reserve in much greater force.

THE STEAM ORDINARY.

The following powerful ships now form part of the Steam Ordinary complete, or being brought forward:

SHIPS OF THE LINE,					
1st division of Steam Ordinary:					
Duke of Wellington	131 s.	700	H.P.	Portsmouth.	Complete.
Royal George	102 s.	400	,,	Devonport.	,,
Revenge	91 s.	800	,,	Devonport.	Being rigged.
Princess Royal	91 s.	400	,,	Portsmouth.	27th March.
St. George	90 s.	500	,,	Devonport.	Complete.
Colossus	80 s.	400	,,	Portsmouth.	,,
Meeanee	80 s.	400	,,	Sheerness.	,,
2nd division of Steam Ordinary:					
Royal Sovereign	131 s.	800	,,	Portsmouth.	,,
Windsor Castle	100 s.	500	,,	Devonport.	,,
Hood	91 s.	600	,,	Sheerness.	,,
Lion	80 s.	400	,,	Devonport.	,,
Goliath	80 s.	400	,,	Sheerness.	,,
FRIGATES.					
1st Division of Steam Ordinary:					
Orlando	50 s.	1000	H.P.	Devonport	Complete.
Shannon	51 s.	600	,,	Portsmouth	,,
Bacchante	51 s.	600	,,	Portsmouth	,,
2nd Division of Steam Ordinary:					
Galatea	26 s.	800	H.P.	Chatham	Complete.
Horatio (mort)	12 s.	250	,,	Sheerness	,,
Forth (mort)	12 s.	200	,,	Devonport	,,
Seahorse (mort)	12 s.	200	,,	Devonport	,,
3rd Division of Steam Ordinary:					
Eurotas	12 s.	200	H.P.	Sheerness	Complete.
CORVETTES AND SLOOPS.					
1st Division of Steam Ordinary.					
Charybdis	21 s.	400	H.P.	Chatham.	Complete.
Challenger	21 s.	400	,,	Sheerness.	,,
2nd Division of Steam Ordinary.					
Tartar	20 s.	250	H.P.	Sheerness.	14th April.
Malacca	17 s.	200	,,	Sheerness	Complete.

In addition to the above steam reserve there are 35 other ships and vessels, from 17 guns down to 6 guns, all of which are now or will be complete before the end of the present month. This list, however, does not include gun-vessels, of which there are 105 in the different divisions of steam ordinary. If we add to these the Channel, Mediterranean, East Indian, and North American Fleets, we can then form a notion of the naval force this country has at her immediate disposal.

The following ships are unappropriated, and are fitting out:—

Devonport	Conqueror	101 s.—Capt. E. S. Sotheby, C. B.
	Nile	90 s.—Capt. E. K. Barnard.
	Centurion	80 s.—Capt. H. D. Rogers, C. B.
	Sanspareil	70 s.—Capt. E. A. P. Wilmot, C.B.
	Greyhound	17 s.—Com. F. W. Sullivan.
	Virago	6 s.—Com. M. B. Dunn.
Sheerness	Forte	51 s.—Capt. E. W. Turnour.
	Locust	3 p.—Lieut.-Com. J. B. Field.
Chatham, fitting as drill-ships for Naval Reserves	Castor	22.—Com. J. Palmer.
	Brilliant	16.—Com. C. H. Gardner.
Woolwich	Alecto	5 p.—Com. H. J. Raby, V.C.

It is announced that the re-erection of a fort at the mouth of the harbour of Great Yarmouth is to be proceeded with.

THE MILITIA.

The East Kent Militia is ordered to leave Portsmouth, to relieve the Bedfordshire Militia at Weymouth, the latter being ordered to Portsmouth.

The Wiltshire Regiment has taken up the quarters of the Oxfordshire at Dover, the latter having been disembodied.

A detachment of the Donegal Militia has again taken up guard duty at Deptford Dockyard, in relief of a detachment of the 47th Infantry.

1st Somerset Regiment of Militia—Henry Gully Foy, Esq., to be Surgeon, vice Hugo, deceased; Feb. 23.

Rutland Militia—John Thomas Keal, Esq., to be Surgeon; Feb. 24.

Royal 1st Devon Yeomanry Cavalry—Henry William Clarke to be Lieutenant, vice Robert S. Dykes, deceased; John Northmore to be Cornet, vice Clarke, promoted; Richard Preston Bishop to be Cornet, vice James H. Buller, promoted; Dec. 31.

Artillery Regiment of Royal Lancaster Militia—William Skirving, Gent., to be Second Lieutenant, vice Thomas Christie, promoted; Jan. 22.

1st Durham Regiment of Militia—Edward Kent Fairless, Gent., late Captain same Regiment, to be Quartermaster, from the 8th Oct.; Oct 18.

Hampshire Artillery Regiment of Militia—Edward Burnett Robinson, Gent., to be Second Lieutenant, vice Lillingstone, resigned; Feb. 24.

Royal South Lincoln Militia—Warwick Oben Gurney Richards, Gent., to be Lieutenant, vice Ingram, struck off; Feb. 23.

90th or Stirlingshire, &c., Highland Borderers Light Infantry Regiment of British Militia—Robert William Cullen, Gent., to be Ensign, vice Horrocks, resigned.

The following Circular, No. 554, has been issued to the commanding officers of Militia regiments.

War Office, 21st February, 1860.

SIR,—I have the honour, by direction of Mr. Secretary Herbert, to inform you that each volunteer enrolled in the regiment under your command for a second term of five years' service will at the termination of each future training, which may take place during the period of his engagement, be allowed a gratuity of ten shillings in addition to the usual training bounty, subject, however, to the Rules prescribed in Article 105 of the Militia Regulations of the 1st September 1854, relative to the forfeiture of Bounty for absence or misconduct.

Should a regiment be embodied the gratuity may be issued under similar rules, either in quarterly instalments of 2*s.* 6*d.* or at the rate of 1*d.* a day during the last thirty days of the quarter.

I am also to take this opportunity of requesting that you will have the goodness to instruct your Adjutant (if you have not already done so) not to re-enrol any man whose conduct has not been such as to meet with your approval.

I have the honour to be, Sir,
Your obedient servant,
DE GREY AND RIPON.

THE ORDNANCE SURVEY.—Earl de Grey stated on Monday, in the House of Lords, that officers went about the country from time to time to survey different lines of railway as they were made, which were not yet laid down on the sheets of ordnance survey. The reports were sent to the office at Southampton, and when they arrived the plates were altered by laying down the lines.

ROYAL NATIONAL LIFE-BOAT INSTITUTION.—A Meeting of this Institution was held on Thursday, at its house, John Street, Adelphi. Thomas Baring, Esq., M.P., in the chair. The second service clasp was voted to Captain Wasey, R.N., who had recently received the medal of the Society, also the medal to Captain Thomas Davies, R.N., and to George Milligan, in acknowledgment of their gallant service in the Institution's life-boats, stationed at Fleetwood and Great Yarmouth, in rescuing the crews, consisting of nine men, from the wrecked vessels, Catherine, of Newry, and the John Bull, of Yarmouth; the crews of the two boats were paid 28*l.* for their intrepid services. Rewards amounting to 33*l.* were also voted to the crews of the Society's life-boats stationed at Ayr, North Britain, Great Yarmouth, Teignmouth, and Penmon, for saving many lives from various wrecks during the recent heavy storms. Rewards amounting to 49*l.* were likewise voted to the Society's life-boats stationed at Holyhead, Cahore, Wicklow, and Frazerburgh, for putting off recently with the view of rendering assistance to ships in distress, but which did not afterwards require their aid. The silver medal of the Institution was also voted to Thomas Baker, coast-guardsman, and the thanks of the Institution inscribed on vellum to six other men, in addition to money rewards which they had locally received, for their gallant services in rescuing four out of six from the schooner Sentinel, which was recently wrecked on the back of the Isle of Wight. Various other rewards were also voted for saving life from different wrecks on the coast. The Institution decided on placing new life-boats at New Quay, in Cornwall, and at Tyrella in Dundrum Bay. A benevolent lady had decided on presenting to the Society the cost (380*l.*) of both boats. Life-boats were ordered to be stationed at Banff on the north-east coast of Scotland, and at Kingsgate near Margate. The cost of these boats had also been generously presented to the Society. It was reported that the Institution had now under its charge ninety-nine life-boats; the largest life-saving fleet the world has ever yet seen under the management of a philanthropic institution. Some of these boats were instrumental last year in saving two hundred and eighteen of our fellow-creatures from a watery grave. The Royal Mersey Yacht Club presented to the Institution a liberal contribution of 75*l.*, being the proceeds of a ball given by the Club at Liverpool in aid of the funds of the Life-Boat Institution. It was reported that Admiral the Earl of Shrewsbury had been invited to take the chair at the Annual Meeting of the Institution, at the London Tavern, on Thursday the 15th instant. Payments amounting to 627*l.* having been made on various life-boat establishments, the proceedings closed.

VOLUNTEERS.

METROPOLITAN.

THE CENTRAL LONDON VOLUNTEER RIFLE CORPS.—This corps is now steadily increasing in number, two companies having been formed and the drill progressing most satisfactorily, under the instruction of Sergeant-Major Rhoades and Sergeant Gutteridge, in the hall and grounds of Gray's Inn. A permanent committee has been formed, consisting of Messrs. Isaacs, Low, Smith, Withers, W. J. Hurlstone, Davis, and others; and Mr. Walters has been appointed hon. secretary. It is expected that they will be able to fix upon the uniform in the course of next week; and Mr. Bodkin, the Deputy-Lieutenant of the county, has received the necessary instructions preparatory to the enrolment of the corps.

ST. GEORGE'S RIFLES.—This corps met on Saturday, at Devonshire House, Piccadilly, by kind permission of his grace the Duke of Devonshire, and were inspected by Colonel Macmurdo, Inspector-General of Volunteers, who expressed himself much pleased with the uniform and the soldierly bearing of the men. The corps then marched out with the lieut.-colonel at their head, and their brass band. Their route was along Piccadilly, St. James's Park, past Buckingham Palace, up Constitution Hill into Hyde Park, along Oxford Street, down Regent Street and Waterloo Place, along Pall Mall, up St. James's Street, to Burlington House to dismiss. The corps will assemble at Devonshire House, Piccadilly (full dress), this day at half-past three o'clock, for the purpose of marching out with the band.

QUEEN'S (WESTMINSTER) RIFLE VOLUNTEERS.—The St. Clement Danes division of this corps took the oath of allegiance, &c., on Wednesday last, at the Vestry Hall, before Richard Twining and John G. Stilwell, Esqrs., the local magistrates. This company, through the liberal contributions of equipped members by Messrs. Clementi, Messrs. Smith, Messrs. Twining, Mr. Tuxford, and Mr. Isaacson, now numbers nearly 90 members.

CUMBERLAND.

3RD CUMBERLAND RIFLE VOLUNTEERS.—This corps is advancing rapidly in its drill under the instruction of Sergeant T. Atkinson, Royal Cumberland Militia.

HAMPSHIRE.

PORTSMOUTH.—The Volunteers of this town are now being sworn in. They have come to an understanding about their uniform, which, however, is very distasteful to the majority of the corps.

KENT.

WOOLWICH VOLUNTEER CORPS.—The following letter was yesterday received from Maidstone by Colonel Tulloh, R.A., Superintendent of the Royal Carriage Department, and Commandant of the Royal Arsenal Corps of Volunteer Rifles and Artillery, at Woolwich:—"Sir,—I am directed by Viscount Sydney, the Lord-Lieutenant, to inform you that the Queen has approved of and accepted the offers of service of a corps, consisting of eight companies of Artillery Volunteers, in the Royal Arsenal, Woolwich. The corps is numbered as the 10th in the county of Kent, and its *maximum* establishment will consist of 1 lieutenant-colonel, 1 major, 8 captains, 8 first-lieutenants, 8 second-lieutenants, 1 adjutant, 1 surgeon, and 640 men of all ranks.—I am, sir, your most obedient servant, J. W. Wildes." A separate corps of Artillery is in course of organisation in Mr. Anderson's department, to be named the Royal Gun Factory Corps. Mr. Frazer, Mr. Elliott, and Mr. Hay, having been elected captains, and other officers of the department to the subordinate grades. The arrangements proposed by Sir W. Armstrong for uniting the advantages of the Rifle and Artillery corps, by adopting the use of both weapons in the field, have been rejected by the Lord-Lieutenant; the corps is therefore to be drilled in the use of artillery alone.

ROYAL GUN FACTORIES VOLUNTEER RIFLE CORPS.—A meeting for the purpose of organising a Volunteer Rifle Corps, in connection with the Royal Gun Factories Department of the Woolwich Arsenal, took place on Tuesday evening last in the Gun Foundry. Between 600 and 700 men, employed in the department, were present, and most of the principal officers were on the platform.

LANCASHIRE.

THE LIVERPOOL VOLUNTEERS.—The following is a list of accepted Lancashire Rifles, belonging to Liverpool and its immediate neighbourhood, viz.:—1st (3 companies), 14th (2 companies), 19th (3 companies), 5th (2 companies), 22nd, 25th, 32nd, 39th, 41st, 42nd, 45th, 48th, and 51st, each 1 company; the maximum strength of which is 19 captains, 19 lieutenants, 19 ensigns, and 1900 men; 15th, 3 companies and a half, 3 captains, 4 lieutenants, 4 ensigns, and 360 men; 1st subdivision, 1 lieutenant, 1 ensign, and 60 men; artillery, accepted, about 2000; artillery and rifles, not yet accepted, about 500; Cheshire Volunteers, in the neighbourhood of Liverpool, about 500. The Cheshire Volunteers, included in the above being composed of persons having business in Liverpool, though residing in Cheshire, have a right to be included; thus making the whole Liverpool force above 5000 men. A few of the "accepted" companies are below their strength, and others are above it; so that the accepted strength may be taken as a fair estimate. The 500 "not yet accepted" is perhaps rather below the actual number of such at present at drill.

MIDDLESEX.

EDMONTON RIFLE CORPS.—The inhabitants of this village have decided to join the Tottenham or 33rd Middlesex Rifle Corps, the services of which have been accepted by the Queen. An important and successful public meeting was held at the Angel, Edmonton, on Thursday evening, Mr. Burk, J.P., being in the chair, when a co-operation with the Tottenham Corps was voted unanimously. Several gentlemen entered their names as effective members, and about 50*l.* was subscribed in the room. Mr. W. Booker, Mr. G. Ellis, Mr. Pulley, and Mr. Solomons were requested to join the Tottenham committee, in order to promote the movement in Edmonton.

THE SOUTH MIDDLESEX CORPS.—This corps is to assemble on the 8th of March at the Knightsbridge Barracks, and drill in Hyde Park. This has been done already with much success, and a strong muster is anticipated.

YORKSHIRE.

SCARBOROUGH.—On Tuesday the 21st ult., the Rifle Corps at this place were assembled for the purpose of being "sworn in." They were marched to the parish church, where the evening service was performed, and afterwards the oath of allegiance was administered to the members of the company by E. S. Donner, Esq., clerk to the magistrates, in the presence of the Mayor, J. Woodall, Esq., and E. H. Hebden, Esq. (the deputy-lieutenants).

STOKESLEY.—A meeting of the members of this rifle corps was held at the Golden Lion Hotel, Stokesley, on Monday last, when the following gentlemen were unanimously chosen officers, their names to be submitted to the Lord-Lieutenant for approval:—George Marwood, Esq., Busby Hall, captain-commandant; James Emerson, Esq., of Easby Hall, lieutenant; and J. P. Sowerby, Jun., Esq., Stokesley, ensign.

FLAMBOROUGH.—The Artillery corps at Flamborough now musters above 40 members, and more are ready to join. On Sunday last the Volunteers mustered in full uniform, and were marched to Marton church, where a sermon was preached to them by the officiating clergyman.

THE VOLUNTEER BALL.—The preparations for this magnificent *fête* are rapidly progressing, and the new Floral Hall bids fair to be the great focus of attraction for some days to come. The list of ladies patronesses has received some important accessions since the first announcement was published, and now includes the names of more than fifty of the highest members of the aristocracy. A special gallery for their exclusive accommodation is now in process of construction at the east end of the hall, from the design of Mr. Charles Barry, and from this elevation a grand view of the ball will be obtained. Messrs. Gunter will supply refreshments during the evening at counters arranged in convenient situations around the ball-room; and the supper—by Messrs. Staples, of Aldersgate Street—will be served in the basement under the hall, a gigantic apartment, 17 feet in height, and extending beneath the whole area of the building. The applications for vouchers have very far exceeded the most sanguine anticipations of the projectors; and the exchange of tickets has proceeded at a rate which, if continued to the end of the week, will preclude the chance of all who are not very early in the field. It is rumoured that it is not unlikely Her Majesty may honour the ball with a visit; and the presence of their Royal Highnesses the Prince of Wales and Prince Alfred, is understood to be placed beyond a doubt.

Bridgewater, or 5th Somerset Company of Volunteer Rifle Corps—John Masters, Doctor of Medicine, to be Honorary Assistant-Surgeon; Feb. 25.

Keynsham or 7th Somerset Company of Volunteer Rifle Corps—James Ireland Clayfield Ireland, Esq., to be Captain; Charles John Simmons, Gent., to be Lieutenant; Harford Lyne, Gent., to be Ensign; Feb. 25.

Charles Copperthwaite, Esq., to be Captain; Thomas Walker, jun., Gent., to be Lieutenant; Thomas Robinson Etty, Gent., to be Ensign; Richard Jones, Gent., to be Honorary Surgeon; Feb. 18.

1st North Riding of Yorkshire Artillery Volunteer Company—Henry Thompson Thomas Vaughan, Esq., to be Captain; William Randolph Innes Hopkins, Esq., to be Captain; William Vaughan, Gent., to be First Lieutenant; Charles Ferdinand Henry Bolekow, Gent., to be First Lieutenant; James Innes Hopkins, Gent., to be First Lieutenant; Robert Lloyd, Gent., to be Second Lieutenant; James Stovin Pennyman, Esq., to be Second Lieutenant; John Brewster, Gent., to be Second Lieutenant; Feb. 27.

2nd North Riding of Yorkshire Rifle Volunteer Company—James Simm Metcalfe, Gent., to be Ensign; Feb. 28.

5th North Riding of Yorkshire Rifle Volunteer Company—John Michell, Esq., to be Captain; Charles Richard Robinson, Gent., to be Ensign; William Walker, Gent., to be Honorary Surgeon; Feb. 27.

6th North Riding of Yorkshire Rifle Volunteer Company—Tindall Hebden, Esq., to be Lieutenant; Harcourt, Johnstone, Esq., to be Ensign; Feb. 28.

1st Company of Wigtown Volunteer Artillery—Viscount Dalrymple to be Captain; John Campbell, Gent., to be First Lieutenant; Alexander Guthrie, Gent., to be Second Lieutenant; John Orgill, Gent., to be Honorary Surgeon; Rev. William Mungall Simpson to be Honorary Chaplain; Feb. 20.

1st Subdivision Wigtown Rifle Volunteers—Robert Vans Agnew, Esq., to be Lieutenant; William James McHaffie, Esq., to be Ensign; Feb. 24.

1st Company of Lincolnshire Artillery Volunteers—Andrew Mercer Adam, Esq., M.D., to be Honorary Assistant Surgeon; Feb. 17.

2d Company of Lincolnshire Rifle Volunteers—Samuel Trought, Esq., to be Honorary Assistant Surgeon; Feb. 17.

3d Lincolnshire Rifle Volunteers—William Earle Welby, Esq., M.P., to be Captain Commandant; Feb. 28.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s*. 6*d*. per quarter, or 26*s*. per annum, payable in advance; and the postage—uniformly 1*d*. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.
[Late "Household Words" Office.]

THE ARMY AND NAVY GAZETTE IS SOLD BY J. MENZIES, Bookseller, Princes Street, Edinburgh.

MR. ALBERT SMITH with his CHINA REPAIRED and MONT BLANC REVISITED, 1859. Every Night (but Saturday) at 8, and TUESDAY and SATURDAY Afternoons at 3 o'clock. Stalls 3*s*., which can be taken at the Box Office, Egyptian Hall, daily, from 11 till 5; Area 2*s*., Gallery 1*s*.

EASTWARD HO! MECHANICS INSTITUTE, DERBY.

MAYALL'S PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum*.

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

NEW WORK ON SEAMANSHIP.
Now ready, in 8vo. with 150 Illustrations, price 10*s*. 6*d*.

THE NAVAL CADET'S GUIDE, AND SEAMAN'S COMPANION, containing Practical Rules for Fitting and Placing Riggings, Managing Sails, &c., also Complete Illustrations of all Standing Rigging, the Knots, Bends, and Hitches in use, and a Catechism on Rigging Ships, Boat Sailing, Bending, Reefing, and Furling Sails, Working Anchor Gear, Manœuvring, &c. Used on board H.M. Training Ship Britannia. By GEORGE S. NARES, Lieut. R.N.

Portsea: JAMES GRIFFIN. London: LONGMAN & Co.

THE ARMY PRINTING OFFICE, 102 & 114, HIGH STREET, PORTSMOUTH.—HENRY LEWIS.—Company Ledgers, Pay Books, Order and Day Books, Defaulter Sheets, District and Garrison Forms.

DOUDNEY & SONS' RIFLE SUITS.—1st SURREY, 4*l*. 2*s*.; SOUTH MIDDLESEX, 4*l*. 10*s*.; RIFLE BRIGADE, 4*l*.—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s*. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new *Regulation* Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS *guarantee* every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l*. 4*s*. Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l*. 12*s*. Mappins' Travelling Dressing Bag for Ladies, 4*l*. 4*s*. The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

HERALDIC STUDIO, 4, OLD CAVENDISH STREET, W.—New Designs for Monograms and Armorial Bearings in every style. Arms, Crests, &c., found by sending Name and County. Sketch, 3*s*. 6*d*. Paintings, Seals, Dies, and every kind of Engraving, in a superior style, by D. T. BAKER.

N.B. Mr. BAKER's ten years' connection with the Heralds' College guarantees correctness and excellence of execution.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 5*s*. 6*d*., 10*s*. 6*d*., and 21*s*. at UNWIN & ALBERT's, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No *communications* can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

The EDITOR has received numerous and lengthy letters from the Assistant-Engineers of Her Majesty's Fleet, in all of which the circular, No. 398, is strongly censured and inveighed against.

CENTURIO BRITANNICUS.—*Moniteur de l'Armée, Le Spectateur Militaire*. Any foreign bookseller.

CADWALLADER.—The paymastership of a cavalry regiment is not more remunerative than that of infantry.

"POWDER HORN," THE BRITISH GUNNER.—It is requested that our friends will not place us under the necessity of adhering rigidly to the rule which we have laid down in reference to the insertion of answers to questions.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

In consequence of an unusual press of matter, many interesting Communications and much Correspondence must stand over till next week.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 3, 1860.

There has been a cross action between Mr. Oliphant and Admiral Seymour—between Admiral Seymour and Lord Elgin—and between Lord Elgin and Sir John Pakington; in other words, a triangular duel; or, if a severance of interests between the Naval officer and the First Lord of the Admiralty be admitted, a quadrilateral one, in which the principal combatants have been hurling the most deadly projectiles at each other, with no other effect than to discover (when too late) that the belligerents were not within range.

Let us be grateful for this crowning mercy, and congratulate ourselves that they are not likely to be brought face to face. It is impossible to conjecture what might have been the result—the mind refuses to dwell upon it; but such a contingency is happily out of the question, for each chieftain, eager for the fray, has already hastened to lay his case before that court from which he hopes to obtain the most favourable judgment. The Earl of Elgin, with a suavity and serenity worthy of the great Confucius, addresses himself to the Lords, and urges his claim to a verdict by a touching offer of his honour as a peer. Sir Michael Seymour rushes to the Commons, and there, in terms which if blunt are at least clear, denies the correctness of Lord Elgin's statement; whilst Mr. Oliphant, *exul utroque*, appeals to the public through the medium of the press,—perhaps not the worst tribunal of the three.

As the matter stands it is a very pretty quarrel, and will be read with great interest and much edification by the Commissioners Keweiliang and Hwashana, about the period when, according to ordinary calculation, the combined forces of France and Great Britain may be disembarking on Chinese soil; whilst its tendency will be of a re-assuring nature to General Hope Grant and Admiral Hope, as well as to the French Commander-in-Chief. And, although we have not now for the first time to learn that all combined expeditions are invariably attended with delay, and probably with disagreement, it seems unnecessary to impart into the councils of war a fresh element of doubt and discord, unless it be for the purpose of showing our magnanimous contempt of all obstacles; or it may be with a view to follow the example pursued by Mr. Gladstone with reference to his budget, and by deepening our ditch to a chasm, claim the greater honour for overleaping it.

If ever there was a moment for the timely interference of a "judicious bottle-holder," it surely was on this occasion. What could Lord Palmerston have been thinking of to permit the continuance of such an unseemly quarrel, so prejudicial to public interests? Surely, its chief combatants, members of the same political party, might have submitted their differences to some referee of high standing, in lieu of upbraiding each other in arenas where the complainant could alone be heard. The House of Commons had been but just instigated to prevent a passage of arms between the Benicia Boy and Mr. Tom Sayers: it would have been but fair play to our Chinese champions to have put an end to that wordy warfare so much more damaging than blows. It is scarcely possible to overrate the mischief that the washing of so much "linge salé" in public has occasioned, and the more so as all the performers are men of position, and have been respectively called upon to fill situations of trust and importance. In our islands a frank avowal of misconception or mistake would be accepted with hearty good-will, and be followed with an oblivion of all that was disagreeable; but the same toleration will be hardly extended to us by those nations whom we have been grandiloquently lecturing for many years past upon the faults and inconsistences of their public men.

We confess to little feeling of sympathy with any of the parties. If Plenipotentaries will ignore the existence of a Commander-in-Chief by despatching orders to officers under his direction without his sanction; if they will insist upon regulating monsoons and typhoons as Canute did the tides, they will meet with a similar fate, and with deserved failure: it is given to few men to be at once diplomatists and warriors; and if Lord Elgin forgot the result of Mr. Frere's campaign in Spain, it is not probable that Sir Michael Seymour was likely to overlook the fate that attended Sir John Moore.

The Admiral is so far in an exceptional position that his conduct has been approved by his superiors; and we presume, therefore, that he must have had evidence to adduce sufficient to exonerate him from blame. With this he ought to have been satisfied, and he should have rested upon his laurels. If the favourable judgment then passed upon him be now reversed, he will have no one to thank but himself.

Mr. Oliphant does not appear to very great advantage in the matter; his position would have been scarcely noticeable, had he not filled the position of bellows-blower to the great organist when the latter was out of wind. It would no doubt have been wiser if the Secretary had suppressed that portion of his work which hinted at the existence of those differences now so unfortunately made public; but it is not astonishing to find a little imprudence in two such goodly volumes, especially when the author admits that at a critical period he could find no better employment than driving through the streets of Taku in a donkey tandem. But what shall we say of the Admiralty, to whom the case appears to have been referred? Short were their counsels, quick their decision. The high qualities of Sir M. Seymour as a naval officer were in themselves an answer to any imputations, and the Admiral was thus acquitted on the strength of a good character when he would probably have wished the matter tried on its merits. And this is one of the most wonderful features in the affair; for the Board at the Admiralty was at that time presided over by a light to illuminate and illustrate the deeds of erring mortals. Had plain men like Sir James Graham or Sir Francis Baring been entrusted with the inquiry, they would probably have considered that character alone did not dispose of a specific charge. It was reserved for Sir John Pakington to deal with the matter in another manner; and Lord Elgin now complains that the Admiralty delivered judgment without doing him the common justice of informing him of their decision or the grounds on which they arrived at it.

We shalll eave Sir John Pakington and Lord Malmesbury to the enjoyment of those mutual felicitations which must arise wherever they meet: Lord Elgin, Sir John Pakington, and Sir M. Seymour are respectively Knights of the Bath. There is a sort of magical interest in a triad of any sort. There were the three Graces, and an equal number of tailors in Tooley Street, our empire comprises three nationalities, and the pawnbroker hangs out three balls. The order of the Bath insists upon the motto of "Tria juncta in uno;" and it might be wise to consider whether the acceptance of such an honour does not carry with it an obligation to be chary of speech, moderate in temper, just in judgment; all of which we cordially commend to the consideration of the dislocated trio of G. C. B.s

---

Sir John Pennefather is transferred to the 22nd Regiment, vice Sir William Napier, and Major-General Geddes succeeds him in the colonelcy of the 46th. One of our contemporaries, it will be recollected, about a fortnight since announced that Major-General the Hon. C. Grey would succeed to the vacant colonelcy, and we at the same time stated our disbelief that His Royal Highness would give a first-class reward for distinguished service to a very amiable and excellent gentleman, who was formerly a soldier, but had never seen a shot fired, except at a review. The appointment of Major-General Geddes is such a one as the hard-working members of the Service have a right to expect. He served with the 27th at Calabria, in 1806; at the capture of Procida, in 1809; in Sicily, in 1810; and has four clasps for Nivelle, the Nive, Orthes, and Toulouse; at which last he received a severe and painful wound, his thigh-bone being broken near the hip.

We believe some change is likely to take place in the destination of Major-General Cameron, C.B. On resigning the vice-presidency of the Council of Military Education, the gallant General was appointed

Digitized by Google

to the command of the Infantry Brigade at Aldershot, vacated by Major-General Spencer; but it is probable that he will now proceed to another command.

We participate in the satisfaction which the country no doubt experiences at the mark of Royal favour conferred on Sir Hugh Rose for his eminent services in India. It might be adduced as an argument that great regimental experience is not a necessary qualification for a very successful General, when it is considered that a large part of Sir Hugh Rose's career was that of a diplomatist rather than that of a soldier, up to the period when he was called upon to display the most brilliant qualities as a General, and made himself remarkable for the energy of his movements and the success of his operations. The Syrian campaign of 1840-1 did not afford much opportunity for the acquisition of profound military knowledge; but Colonel Rose, as Consul at Constantinople in 1853, showed that he understood strategy when he requested Admiral Dundas to move up his fleet to the Bosphorus; and, as our Commissioner at the French headquarters during the Crimean war, he developed qualities which gained him the support of some of the best of the French Generals, though his functions could not always be conducted with perfect satisfaction to all officers in both armies. In India, however, in a most arduous, difficult campaign, the general objects of which were indicated by Lord Clyde and the chief of the Staff, he showed he had the highest attributes of a commanding officer. Jhansi, Calpee and Gwalior are memorable names; and without detracting from the credit of such men as Napier, and from the presiding counsels of the Commander-in-Chief, it is not too much to say that Sir Hugh Rose is one of the men on whom England would count in time of need with the greatest confidence.

General Sir George Brown, G.C.B., will relieve Lord Seaton in the Irish command in the course of next month.

Lieut.-Colonel the Hon. H. H. Clifford, V. C. unattached, formerly of the Rifle Brigade, has been appointed Assistant-Quartermaster-General to the division at Aldershot, in succession to Colonel Clarke Kennedy, the new Commandant of the Military Train.

A Court of Inquiry assembled on Thursday at the Royal Barracks, Dublin, Major-General Gough, C.B., President, to investigate certain representations and reports made to the General Commanding the Forces in Ireland, by Colonel Darby Griffiths of the Scots Greys, relative to the conduct of Brevet-Lieutenant-Colonel Clarke of the same regiment.

Captain R. C. Dudgeon, of the 61st Regiment, has been appointed Aide-de-camp to Major-General Breton, commanding the troops at the Mauritius.

Major W. Williamson, of the 85th Light Infantry, has been appointed Commandant at Natal, in succession to Lieut.-Colonel Cooper, of the 45th Regiment.

Colonel Wilmot is appointed Judge-Advocate-General of the Army forming the Chinese expedition.

It has been suggested to us that it would improve the monthly Army list very much if to *all* Staff appointments the dates were fixed, now that these posts are only to be held for five years.

There is, as we anticipated, very great difficulty experienced by the Government in filling up the vacancy in the Army Medical Department, caused by the lamented death of Mr. Alexander. Dr. Martin, who has been named, was offered the post under a former Government; but we believe there is no intention of affronting the military surgeons by placing a civilian over their heads. Dr. Gibson is rather advanced in years; and, of those who are eligible, some are considered too young, and others not young enough.

Extract of a letter from a field-officer of the Rifle Brigade, Gonda, 14th January:—

"I shall say very little of poor dear Glyn's death, which I heard of three days since. It was the severest shock I ever experienced for many a long day. I knew his heart well, and there was not in the world a nobler soul. He never possessed a thought that was not right. I never in my life met with a finer fellow in heart and mind. Poor dear fellow! it is as the loss of a brother to me. The whole battalion have his loss at heart, and the thoughts of it come across me in the most busy moments."

There is a report that at a large manufactory a considerable number of a formidable species of weapon, on the exclusive possession of which we placed great reliance, have been made for foreign governments. We shall allude to the subject with more precision hereafter.

The officers of the Artillery Staff of the Chinese expedition took their passage on board one of the Peninsular and Oriental steamers, which was to have sailed on February 20 from Suez.

In the Army and Navy Gazette of January 7th (our first number), we announced that a Royal Warrant, regulating the rank and emoluments of Paymasters, would shortly appear, and indicated the nature of some of the promotions and advantages to be conferred on that body of officers by the document. The Warrant will be found textually in another place, and we think that its provisions leave very little to be desired by the Paymasters in Her Majesty's service.

Major Dillon, Rifle Brigade, has been appointed to the Staff of the Chinese expedition by Lord Clyde. A thorough soldier, a skilful and gallant officer, who, though very severely and dangerously wounded at Cawnpore, hung on to his duties through the whole of the Indian Campaign—Major Dillon has not got more than he deserves in being selected by the judgment of his chief from so many other deserving officers as peculiarly eligible for the distinction.

The Medical Staff in India has undergone still further reductions. Instead of seven Deputy-Inspectors-General, the number has been reduced to four:—one for Bombay, one for Madras, one for Bengal; Dr. Anderson, the fourth, being retained at Calcutta as General-Superintending Sanitary Officer.

CAVALRY COMMISSIONS.

The following general order, regulating the future price of cavalry commissions, to which we alluded in our last number, was published on Friday evening, 24th ult.

Horse Guards, S.W., Feb. 23.

I. His Royal Highness the General Commanding-in-Chief having had under consideration the present expenses necessarily incurred by officers of cavalry, and anxious to reduce them as far as practicable, has the satisfaction of announcing to the Army that Her Majesty the Queen has been pleased to approve of a reduction of the regulation prices for commissions in the cavalry of the Line, which will accordingly for the future be as follows, viz.:—

Lieutenant-Colonel ...	...	£4500 instead of	£6175
Major	3200	,,	4575
Captain	1800	,,	3225
Lieutenant	700	,,	1190
Cornet	450	,,	840

The difference in value between the late and proposed regulation price of a cavalry commission will be paid to the retiring officer from the reserve fund at the disposal of the Secretary of State for War.

The price which an officer will pay on promotion by purchase to the higher ranks, will be—

Major to be Lieut.-Colonel ...	£1300	instead of	£1600
Captain to be Major	1400	,,	1350
Lieutenant to be Captain ...	1100	,,	2035
Cornet to be Lieutenant ...	250	,,	350

II. His Royal Highness also promulgates, in concurrence with the Secretary of State for War, the following revised regulation regarding the purchase of officers' chargers from the ranks, viz.:—Every officer of Cavalry and Horse Artillery, and of the Cape Mounted Riflemen, below the rank of regimental field officer, is permitted to select two horses as chargers from the ranks, with the exception of medical officers, veterinary surgeons, paymasters, and quartermasters, who may select one each, under the following conditions:—

1. The price to be paid will be the price allowed by regulations for the purchase of remounts.

2. When two or more officers are to select at the same time, the senior is to have first choice, but must not be permitted to choose a second horse until his juniors have each chosen one.

3. Officers will be required to pay the price of their chargers into the hands of the paymaster within one week from the date of selection.

4. In selecting officers' chargers from the ranks the horses of all sergeant-majors and sergeants, which have been regularly ridden in the field as such, are to be exempt from choice.

5. Officers will not be permitted to use their first chargers, when selected from the ranks or remounts, for hunting or for harness; but this restriction is not intended to apply to second chargers so selected.

6. Officers will not be permitted to part with the horses selected from the ranks, or from the remounts, to any one except an officer of the same corps, without the sanction of the Commander-in-Chief, obtained through the commanding officer; and when permission is given to sell such horses they must be replaced at the officer's own cost, in the usual manner, by private purchase.

7. Selected chargers may be exchanged between officers of the same corps, with the sanction of the commanding officer; and, after their full price has been paid to the paymaster, may be sold to any officer of the same corps entitled to a choice—the purchase to stand in the place of a selection, and the seller to be entitled to another choice.

8. Except in the case of sale to an officer of the same corps, as provided for in clause 7, no officer will be allowed to replace a charger taken from the ranks or remounts by a fresh selection unless the charger previously selected has died, been killed in action, been captured, or lost, or been shot at the recommendation of a board for infectious disease, or is reported unfit for further service through age, vice, disease, permanent unsoundness, or any other cause which may in the opinion of an inspecting general officer justify the rejection of such horse as a charger, in which case he will be returned to the ranks to be cast and sold.

9. Officers who select chargers from the ranks or from the remounts must in all cases pay the usual fee for the breaking of horses to the riding-master. It is to be clearly understood that, in the selection of chargers, officers are not restricted in their choice to the remounts—*i. e.*, young horses not yet fit for the ranks—but are free to choose, subject to the conditions and exceptions above specified, from all the horses on the effective strength of the regiment; and His Royal Highness the General Commanding-in-Chief desires that commanding officers of cavalry regiments will faithfully and thoroughly carry out the liberal intentions of this order, by giving every facility to officers for making a free and proper selection.

III. The General Commanding-in-Chief is further pleased to approve of each officer of a regiment of cavalry being allowed two soldiers to attend him and groom his horses employed for regimental purposes, when present in quarters or absent on duty.

One of these bâtmen is to be held available for mounted parades, when, owing to the absence or want of men, there may be unappropriated horses.—By Command of His Royal Highness the General Commanding-in-Chief.

G. A. Wetherall, Adjutant-General.

LATEST INTELLIGENCE.

HOUSE OF COMMONS.—Friday.

It was not to be expected that the allusion to Savoy in the French Emperor's speech would pass without observation in Parliament, and therefore at the meeting of the House of Commons, last night, questions were put to Lord J. Russell by Sir W. Vernys, Mr. Baillie Cochrane, and Sir J. Walsh. The first, to ascertain whether the noble Lord had any explanation to give on the subject; the second, whether a day would be fixed for a discussion on the subject; and the third, whether the Government had any knowledge of a treaty between France and Sardinia relative to the cession of Savoy. Lord J. Russell, after laying on the table the correspondence on the subject, said that, judging from the speech of the Emperor Napoleon, he was of opinion that if the great powers of Europe strongly objected to the annexation of Savoy, it would not take place. The Government had no information that any treaty for the cession of Savoy existed between France and Sardinia. It was in the power of any member to raise a discussion on the papers which he had presented, but it was not his intention to do so.

After some other business had been transacted, Sir R. Peel again called attention to the subject; pointing out some discrepancies between the versions of the Emperor's speech in the *Times* and *Morning Post*, and exhorted the house not to allow a day to pass next week without discussing this important matter. Mr. Bright took a Manchester view of the subject, and could see no harm in the annexation of Savoy by France. The value of land and produce would be doubled by that measure, and he believed that the patriotic feelings of others whom he could name would not be able to resist such a temptation as that.

Lord John Manners, in some spirited observations, denounced the selfish and unpatriotic sentiments of the member for Birmingham. He had furnished a test by which to measure the extent of his allegiance to his own Government: only give him sixpence for that for which he had hitherto obtained only fourpence, and his patriotism could not withstand the bribe. Lord J. Manners' remarks elicited cheering of the most enthusiastic character. Lord J. Russell also felt it necessary to say that he did not concur in the opinions uttered by Mr. Bright.

Colonel Herbert asked the Secretary of State for India, what number of Her Majesty's regiments of infantry and cavalry it is proposed to retain for service in the East Indies after 1st July, 1860.

Sir C. Wood stated that the instructions given to the Government in India were to send home as many troops as they could, due regard being paid to the safety of India. The right hon. Baronet took the opportunity of stating positively—which he was unable to do last Friday, in consequence of a want of agreement between the information he had received from India and from the Horse-Guards—the names of the regiments proceeding from India to China. The 3rd and 67th Regiments sailed some time ago. The 99th, he believed, went on early in February, and the 2nd battalion of the 60th went in the course of the month. The 31st, 44th, and, perhaps, the 87th, were about to sail.

Sir F. Baring called the attention of the house and the government to the services of Captain Sir L. M'Clintock, in the Franklin expedition, and paid a well-merited tribute to the devotion of Lady Franklin. A monument was erected to one of the best of the Austrian generals, which, after reciting his brilliant services, ended with this inscription, "*non patria, non imperator, sed conjux posuit.*" Let the Government interpose to prevent a similar inscription being appropriately placed on Franklin's tomb. Mr. Whiteside and Sir J. Pakington enforced the views of Sir F. Baring, and Lord Palmerston declared that the Government would not act in opposition to the feeling of the House either with regard to a reward for Captain M'Clintock, or the erection of a monument to Sir J. Franklin. Unlike the monument to the Austrian General, alluded to by Sir F. Baring, it would be one in which the Sovereign, the country, and the widow would unite.

Sir J. Pakington directed the attention of the Secretary of the Admiralty to a paragraph in the *Times* of that morning, which stated that the Fleet had been dispersed in the late gale, and that two serious collisions had taken place.

Lord Clarence Paget admitted that the Queen, and the Diadem, and the Algiers and the Mersey, had come into collision in tacking, but the damage sustained was not of a serious character.

In the House of Lords it was announced by the Government that, with the view of saving the expense, it was not intended to call out the Yeomanry this year for drill or training. This declaration called forth severe censure from Lords Malmesbury and Ellenborough.

The Native Indian Army and the Enfield Rifle.—Let us for a moment suppose that the Bengal army had been armed with the Enfield rifle before the mutinies began. Should we then have reconquered India? It is very doubtful; and we may be quite certain, that whatever the result, we should have lost twenty times as many men as in the late struggle. The natives of India are excellent marksmen; their gunnery at Delhi was superior to our own. What then would have been the result had they been armed with the rifle? We doubt much if there would have been any capture of Delhi, any fugitives from Lucknow? If this be admitted, we see at once the danger of supplying the Madras and Bombay armies with the Enfield. Should they ever be disposed to imitate the conduct of the Bengal regiments, where would be the remedy? On the whole, we think the Government has taken the wisest course in reducing the native troops to one level, by depriving the few of the rifle, and supplying to all the musket.—*Homeward Mail.*

MEMOIR ON SWORDS.*

The subject of swords and swordsmanship has been so much neglected in our Service, that we ought to be thankful for any work tending to throw a light upon it, and this translation of a very scarce book by Colonel Marey, of the French Army, will be useful, if it only promotes discussion, and calls forth other and more practical works treating of the same.

The colonel tells us in his opening sentence, "Being garrisoned at Strasbourg as an officer of Artillery, I employed myself in researches upon swords. I practised with them so as to be able to use them efficiently, and acquired sufficient dexterity in so doing." (P. 1.) The result of these researches he here gives us, and Colonel Maxwell, of the Bengal Artillery, has been at the trouble of translating the Colonel's remarks, and, by the addition of plates and a few notes, has produced what on the whole we consider to be a readable little book.

We should have been glad if the Colonel had been a little more general in his remarks, giving us, while he was upon the subject, his opinions not only upon swords but upon swordsmanship; for, though we cannot but agree with him, that "it is reasonable to believe that a good weapon adds to the soldier's confidence" (p. 2), still a perusal of his work will not greatly affect the reader's prowess in the field, further than in the matter of enabling him to select a good and efficient arm; and it is, after all, in the knowledge of the proper mode of handling this arm, when we have got it, that we are most deficient; while the value of the volume would have been more universally acknowledged if the author had been at times more intelligible and less learnedly precise in his explanations; for the soldier is scarcely likely to derive much practical advantage from the statement at page 56 (however little we may be prepared to dispute it), that, "If the blade, consequent upon the impulse, penetrate without deviation into a soft body, the point will describe a cycloid therein; and that the wound should be as near as possible of the same dimensions as the sword, the latter should be curved analogously to the cycloid." Nor should we be inclined especially to shun a single combat with an antagonist who happened to be conversant with the fact, that "the point would penetrate much better if it were situated in the medial line of the blade, having its angle bisected by the line which goes from the apex to one-third way across the origin of the blade, measuring from the edge side" (p. 68).

If, however, we are inclined to take exception to the somewhat obscure and pedantic phraseology which Colonel Marey has, in places, thought fit to adopt, or if we express a doubt of the practical utility of this volume, except to Mr. Wilkinson, of Pall Mall, and his brother sword-cutlers—we are ready to admit that it has all the appearance of being the work of a man who studied his subject carefully, and the time spent by Colonel Maxwell in its translation has therefore been far from wasted; while we would repeat the hope we expressed above, that it will have the good effect of directing the attention of both military and scientific men to a subject on which we are at present so strangely in the dark, as this one of swords and swordsmanship.

NAVAL RESERVES.†

The views, very concisely and clearly expressed by Admiral Martin, are unfavourable to the Admiralty plan for raising a Reserve Force of Royal Naval Volunteers, as regards its utility in securing real seamen, as to efficiency of training and as to its operation in other branches of the Service. The writer maintains that there should be two divisions of the Reserve. The first to consist of foreign-going sailors, registered through the shipping masters; the second and most important, of coasting sailors, fishermen, and seafaring men, with residences fixed along the coast, to be raised by means of the Coast Guard Service, which has already done good service in reference to the management of the Coast Volunteers. He maintains that young men, pensioned after ten years' service, should be accepted as volunteers, because we are not now sure of their services, owing to the absence of proper restrictions on the conditions of the payment of their pension, and because these men are generally eligible for the Coast Guard, which they enter with the view of obtaining increase of pension. The conclusions to which the gallant officer arrives are as follows:—

"It is evident that the instructions for the Royal Naval Volunteers must be considerably altered; that continued care must be exercised in entering and uniformly training the ordinary seamen of the fleet; that the 'Fleet men' of the Coast-guard, the only Naval reserve, are about 3200 and not 7000; and that the crews of the Coast-guard ships, instead of being a reserve of unsurpassable seamen, are no better than very ordinary crews, and are placed under conditions the least favourable to improvement."

All these propositions are maintained in this short pamphlet with considerable force and knowledge of the subject.

* *Memoir on Swords, &c.* By Colonel Marey, Commanding the 1st Regiment of Cuirassiers. Translated from the French, by Captain and Lieut.-Colonel Henry Hamilton Maxwell, Bengal Artillery. With Notes and Engravings.

† *Memoranda on Naval Reserves.* By Vice-Admiral W. F. Martin. (James Ridgway, Piccadilly.)

SINNOTT'S MILITARY CATECHISM.*

Since the revision of our system of drill, and the publication, in 1859, of the new "Field Exercise and Evolutions of Infantry" Sinnott's "Catechism" has naturally been somewhat at a discount; and many a drill-sergeant and aspiring recruit has felt the want of some such work as this in which he could search for and obtain at a glance the desired information on points connected with drill. Lieutenant Malton has devoted himself to the task of supplying this want, and, by a combination of the new drill-book on the one side, with the well-known Catechism on the other, has produced an edition of Sinnott which we doubt not will prove as popular as its predecessors. Lieutenant Malton has "kept as closely as possible to Sinnott's method of arrangement," viz., that of questions and answers, probably the best which could be devised for the purpose, while he has added to the original work "the words of command for the *manual* and *platoon*, and a short glossary."

Sinnott's catechism is so essentially a practical work, and the fact of its having passed through ten editions previous to this one, demonstrates so incontestably the estimation in which it is held by the soldier, for whose use it is intended, that it is scarcely necessary to point out its value, nor should we have noticed a work so well known, and so generally appreciated by military men, had it not been that in the ranks of our Volunteers there are probably many who are unacquainted with it, and who will, we feel sure, when they have seen it, be glad that we have thus recommended it to their notice.

NATIONAL DEFENCE.†

The proposals of the writer of this pamphlet could only be carried out in the face of an immediate certainty of war. France might, with reason, demand explanations of our proceedings if we kept a fleet of fifteen line-of-battle ships, three first-class frigates, and six smaller vessels at Portland, manned by 17,000 men; if we had a reserve at Sheerness, Portsmouth, and Plymouth (ready for sea in 48 hours) of ten line-of-battle ships, 150 gun-boats, 12 frigates, &c., manned by 19,000 men; and a second reserve to be ready for sea in three weeks' notice, to be manned by 13,000 sailors and pensioners at the same ports. The conclusion at which the author arrives is, that we must bring up and educate for years to come 10,000 boys in order to man the Royal Navy, and to maintain us in a state of perfect security.

OCCASIONAL THOUGHTS ON MILITARY SUBJECTS.

THE VOLUNTEER MOVEMENT.

(*Continued from page 126.*)

I dare say there are some still living who, like myself, witnessed the siege of Fort Erie in the war of 1812-14. The garrison of that fort was regularly supplied by Volunteers from Buffalo on the opposite side of the river: they came for a few days, were regularly dismissed at the close of their engagement, and relieved by others. This continued for some time, when, on the 17th of September (if I recollect rightly the day), these roughs, clothed in all sorts of rustic garments, and many with coloured handkerchiefs tied round their heads, were led out of the fort in a sortie upon our trenches. Assisted by the treachery of a foreign battalion they turned our right; and, after a severe conflict with the troops then on duty as guard of the trenches, succeeded in spiking the guns of our advanced batteries. Fresh troops then came up, stopped their further progress, and drove them back with severe loss; but not till they had left behind them almost as many dead and wounded of the British force as of their own.

Surely this remarkable event, which I have detailed as accurately as my memory permits, affords a proof of what our descendants in America are now capable of doing, without submitting themselves to the formal drills and rigid discipline of the professional soldier, and confirms the justice of the opinion expressed by an experienced military writer of what he considered Britons could do of old. Turpin, the well-known commentator on Montecuculi, stated that in his opinion it would be quite easy to invade England with 50,000 men, which number ought to be, in his opinion, sufficient to subjugate the country, as William III. had conquered it with 20,000. On this statement General Warnery, an officer who had served under Frederick the Great, as a general of cavalry, remarks, "it is true that William III. did, indeed, land in England with only 20,000 men; but, as he had with him the feelings of the people and of the Army, he might have effected the (so-called) conquest with even a less number. France, on the contrary, with her 50,000 men would have had no such advantage. * * * England, besides her regular Army has, at this time, the finest and most numerous militia of any country in Europe, in the roll of which men of distinction take pleasure to inscribe their names. It is, in fact, composed of Englishmen, that is to say, of men born soldiers, who, without making a formal profession of arms, would, in such a case, be ready to sacrifice themselves for their country, and that, too, without excepting the merchants, whose patriotism almost everywhere else depends upon the effect it is likely to have on their pockets. The 'Tailor Dragoons' afford us a fine illustration of the general character of the English nation. London alone could turn out in a few days several such regiments; and although there might not be time to equip and arm them all in precisely the same pattern, they would not be the less able to do their duty should an enemy make his appearance in their country."

* *Sinnott's Military Catechism: adapted to the Revised System of the Field Exercise and Evolutions of Infantry.* By William D. Malton, late Lieutenant 2nd Royal Middlesex Rifle Militia. Eleventh Edition.

† *A Few Words on National Defence.* (Spottiswoode & Co., New Street Square.)

Surely this noble testimony of a soldier who had studied and practised war under the great Frederick, to the warlike qualities of our ancestors, may well outweigh the sneering doubts of those who would throw discredit on the out-pouring of warlike feeling of the present day. Though an engineer myself, I have ever maintained that no nation could ever secure itself from invasion by the mere masses of fortification, unless in cases where the only access to the country is by a defile, a mountain pass, or some such limited channel of admission. A dockyard or an arsenal may be secured from insult by fortification, but the real defences of a great nation are to be found in the bold hearts and strong arms of its inhabitants. What, for example, would the far-famed Quadrilateral have been in the shape of defence, had there not been an Austrian army of 150,000 men ready to change, at any moment, passive resistance into offensive action? How clearly, too, did Garibaldi show, in that remarkable campaign, how much irregulars, whose hearts were swelling with the fire of patriotism, could do, even against the trained soldiers of the oppressors of their country!

I feel that Her Gracious Majesty, the Queen, and His Royal Highness her Commander-in-Chief, have exhibited their wisdom by encouraging the English people not to rely for their defence on the standing army alone, but willingly and zealously to take part in the danger as well as in the glory of defending their country.

They have first to prepare themselves for so doing, by acquiring skill in the use of the rifle, and then by training themselves to move and act with facility, either in conjunction with or independently of regular troops. For this purpose drill is necessary, but it should be the drill required for the field, not merely for the parade. Who indeed does not know that soldiers, when they return from a long course of active service, have generally lost much of the polish they had before exhibited on the parade, and yet are not the less efficient? The professional soldier may be reasonably expected to appear at one moment as a stately machine, for exhibiting before the gaze of admiring crowds—more especially of ladies—the "pomp and circumstance" of fictitious war or of regal state, and, at the next shaking off those trammels which would impede his movements in the field, to take part in real warfare. The Volunteer is not required to acquire the stiffness of the regular soldier, but it is indispensable that he should learn the art of moving with ease and taking part in combined movements.

Much has been said respecting the drill best suited to the peculiar conditions of a Volunteer force; but the real question resolves itself into the proposition just set forth, namely, that drill and regulations should be made as conformable as possible to the independent character of such a body. Captain De La Barre Duparcq, the Professor of Military History and Military Art at the Imperial School of St. Cyr (one of the most readable military writers of the day), has pointed out in the strongest manner the greater difficulty of light infantry drill when compared with line drill; and Mr. Sidney Herbert has stated the same in his recent most able speech on the Army Estimates; but it is right to observe, with Duparcq, that this difficulty is consequent on the higher intelligence, greater personal activity, quicker perception of objects, which are required in a light infantry soldier, rather than in the movements themselves. The soldiers of the Line form, as it were, one body, a machine; are linked, as it were, together, and move in harmony under a common impulse. The light infantry soldiers, on the contrary, are no longer guided by the touch of arm against arm, but must depend on the rapid glance of the eye to keep their distances, and advance or retreat with precision.

The trained automaton of the Line would find it difficult to act efficiently under this loose, but yet most regular, system, whilst it appears to me that it ought to be not only the most agreeable to the disposition of country Volunteers, but also the easiest acquired by them, considering that they probably have already had their bodies suppled and their eyes sharpened in their national game of cricket.

The Line drill would probably best suit the town Volunteers; and even here the attempt ought not to be made to stiffen them into regular soldiers, but merely to instruct them in such movements as are necessary to prevent confusion. Every one knows what confusion a bungler creates in a quadrille, in the Lancers for example, and yet no one would think it necessary before trying such a dance to acquire the skill of a ballet dancer. Let me add that in the neighbourhood of a fortress, Warnery (who rightly considers that the Militia or Volunteers of a country are certain to defend with resolution, when combined with a small number of regular troops, any such place confided to their charge) recommends that they should be made acquainted with the names, magnitude, and objects of every part of the fortress, and be prepared to adjust their arms to the proper range.

There are other points connected with the Volunteer question on which I shall only say a very few words. Simplicity and economy of dress ought to be rigidly enforced, as men should be attracted to join the force by feelings of patriotism, not by personal vanity. The latter feeling has perhaps too much influence in leading young gentlemen to join the regular army, though it quickly dies away and gives place to nobler feelings. The formation of bands is another point much discussed; it is manifestly a favourite measure with the Volunteers themselves; but it has been condemned by others as leading to unnecessary and useless expense. I must say that I do not sympathise with the objectors; and knowing well how much martial music cheers and exalts the soldier, I feel that a band is by no means an inappropriate adjunct to an institution, which, Lord de Grey has pointedly told us should be looked upon as a permanent instrument of National Defences.

In Ireland they have their temperance bands! why, then, should we not have our Volunteer bands?

I will now close these remarks by quoting another very encouraging observation of Warnery:

"I will also say that, although the English have few, if any, fortresses, they do not require in time of peace to keep up a large army; not only because they are protected by their fleet, but because a newly-levied English regiment, whether horse or foot, would, after two months, perform its duty as well as any other, an advantage which no other state

Digitized by Google

or nation possesses." And why is this? Simply because the English are by nature warlike; and such men, whether Volunteers or Regulars, will quickly acquire military habits and efficiency. J. E. P.

THE NEW STAFF COLLEGE.

The following regulations regarding the examination of officers who may be candidates for admission to the Staff College in February, 1861, are published at the Horse Guards for general information :—

"There will be vacancies for 15 officers, two of whom may belong to the Corps of Royal Artillery and Royal Engineers.

"HOME STATIONS.

"Officers serving in the United Kingdom, who are desirous of entering the Staff College, will be examined in London on the 16th of July next, and following days.

"Commanding officers of Royal Artillery, Royal Engineers, and of all regiments and depôts of the Cavalry, Guards, and Line on the home station, will forward to the Adjutant-General, through the usual channel, for the consideration of the General Commanding-in-Chief, the applications of such officers as wish to compete for admission, together with the necessary certificates.

"These applications should be sent in not later than the 15th of June, after which date the officers approved by His Royal Highness will be instructed to place themselves in communication with the Council of Military Education, with the view to their receiving the rules for the examination.

"FOREIGN STATIONS.

"At foreign stations the following regulations will be strictly adhered to :—

"The examination will be held on the 16th of July and following days, or as soon after that date as the examination papers shall be received from the Council of Military Education.

"A board of officers will be appointed by the general-officer in command, and will consist of three officers; one of whom to be, when practicable, a staff-officer, having the rank of field-officer, and the other two, if possible, not under the rank of captain. One of these officers will belong to one of the scientific corps, where any such officer can be obtained.

"The examinations will be conducted by means of the same printed questions as are set for the examination of candidates in London, and they are to be answered in the presence of the board.

"The board will give to each candidate a number, which he will affix to each of his examination-papers, instead of his name. He will retain the same number throughout the examination.

"The board will give to each candidate a paper of the printed examination questions on each subject, at the time specified for the examination in that subject.

"The candidates will write their answers to the questions in the presence of the board, and their papers, together with the printed examination questions, will be collected at the hour appointed, and made up into a packet, which will be sealed before being taken from the examination room.

"The board will, immediately on the conclusion of the examination, forward the papers of the candidates to the general officer commanding for transmission to the Council of Military Education, accompanied by a certificate that the candidates obtained no assistance from books, or help of any kind in their examination. The board will at the same time forward the names of the candidates, corresponding with their index numbers in the examination, in a separate envelope, for transmission to the Council of Military Education.

"The following will be the order of the examination :—

"First Day.—Military drawing, 3 hours; ditto, 3 hours.

"Second Day.—Fortification, 3 hours; ditto, 3 hours.

"Third Day.—Mathematics—obligatory portion, 1st Paper, 3 hours; obligatory portion, 2nd Paper, and voluntary portion, 1st Paper, 3 hours.

"Fourth Day.—Mathematics—voluntary portion, 2nd Paper, 3 hours; military history, 1st Paper, 3 hours.

"Fifth Day.—Military history, 2nd Paper, 3 hours; ditto, 3rd Paper, 3 hours.

"Sixth Day.—French, 3 hours; chemistry, 3 hours.

"Seventh Day.—German, 3 hours; geology, 3 hours.

"There will be in all cases an interval of not less than one hour between the two periods of examination on each day.

"The papers will be collected at the appointed hours by a member of the Board. Any candidate, however, who may have finished his examination paper on any subject before the hour named may deliver it into the hands of a member of the Board.

"Candidates will bring their writing and drawing materials, instruments, &c., and also the tables of logarithms they are in the habit of using. No other books or notes of any description will be allowed to be used.

"It is scarcely necessary to observe that no communication whatever will be allowed between the candidates at the examination.

"Officers commanding regiments abroad are to transmit to the general officer in command a return of the officers desirous of competing, together with a medical certificate of good health and fitness for the active duties of the Staff. Such officers will then be ordered to join at head-quarters for examination, or at any other places which may be selected for the convenience of those at the more distant stations.

"With reference to Paragraph IV. of the revised regulations for the Staff College, published with the General Order, No. 743, of the 23rd ult., which directs 'that if the commanding officer of the regiment, or the general officer commanding, cannot recommend the application of any candidate, the grounds of objection are to be distinctly stated,'—it is to be observed that, as there will not be time at distant foreign stations to refer to the Adjutant-General on the subject, such officer should, in all cases, be permitted to undergo his examination, on the understanding, however, that the objections urged against his application will still be submitted for the decision of His Royal Highness the General Commanding-in-Chief.

"General-officers commanding at foreign stations will place no restrictions upon officers competing, further than the exigencies of the Service may absolutely require. It will be understood that the rule by which only one officer can be spared from a battalion at a time, for the purpose of studying at the Staff College, does not apply to candidates from battalions which have officers now at the College, but whose course of study will terminate in December next.

"General-officers commanding at foreign stations will select the hours for the examination which are best suited to the climate and circumstances of the country, taking care, however, to conform strictly to the number and distribution of the hours, as detailed in the foregoing regulations.

"On the completion of the examinations at their head-quarters general officers commanding should transmit the candidates' papers immediately to the Vice-President of the Council of Military Education, 1, Whitehall Yard, without waiting for those of out-stations; and in like manner they should forward, without delay, the papers from each out-station as soon as received. In the event of there being no candidates, general officers commanding will notify the fact to the Vice-President of the Council without delay.

"Officers serving abroad, who may be successful candidates, will be allowed the regulated passage-money home on joining the Staff College.

"The names and examination-numbers of the candidates who are successful in the competition, as well as of those who prove themselves qualified, and the examination-numbers alone of candidates who fail, will be published immediately after the reports of the examiners have been received by the Council of Military Education, with the total number of marks gained by each candidate, and his place on the list. "By order of His Royal Highness,

"The General Commanding-in-Chief,

"G. A. WETHERALL, Adjutant-General."

ARMY CHAPLAINS' UNIFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As an old military chaplain, I think it right to notice briefly the letter contained in your last number, and signed, "Scrutator." I hope it will not be inferred from that letter that the *majority* of chaplains are in favour of a *uniform*—such, I believe, is not the case.

If chaplains dress and comport themselves as they ought, there will be no difficulty or hesitation on the part of the soldiers in recognising them, and paying that respect which is due to their position. If "Scrutator" and his brother chaplains will go freely amongst the men, and talk and preach to them in a kind and friendly spirit, and without attempting to "come the officer" over them, they will have no cause to complain of want of attention or respect. I admit that a uniform on the field in time of war would be perhaps desirable, but at *home* I conceive no necessity to exist for dressing up a chaplain as a *station-master* or a *police-constable*, whose uniforms, I am told, closely resemble those now contemplated for chaplains.—I am, &c.,

CLERICUS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your last number there appeared a letter on the subject of a uniform for Chaplains to the Forces. With much of what the writer advanced, every one who has had experience in the matter must fully concur. But your correspondent was evidently not aware that the question had already been decided, and that the nature of the uniform was under consideration.

Whether he or any one else will be satisfied with the result remains to be seen. I send you an extract from a letter received yesterday from one who had gained his information from the highest authority. "A plain black coat, single-breasted, with a turn-down or ordinary collar, on which is to be worn (in black) a crown and star to denote rank . . . No head dress of any kind, other than an ordinary hat; but, when on service in the field, a forage cap may be worn."

What the object of this may be is to me, I confess, doubtful. It is *not* a military dress, and therefore will not effect a recognition of the military position of the chaplain, and it *is* so very like the dress of a policeman or a superintendent of a railway that I think most chaplains will strongly object to wear it.

If a uniform be expedient, let there be one; but such a style of dress as that proposed is only calculated to make the wearer look ridiculous. Instead of that I would suggest to our authorities that they make the chaplain's dress to consist of a single-breasted frock coat, with *standing* collar, on which, as on the sleeves, the distinctions of rank be marked in black as in the Rifles, the breast of the coat and the seams being also braided, and a broad black braid being worn down the trowser seam in full dress. A forage cap, with the usual staff device, in black, to be worn at pleasure.

A uniform such as this would be quiet and perfectly clerical, at the same time it would unmistakeably mark who the wearer was, and obtain from soldiers and others that recognition which, in nineteen cases out of twenty, is now withheld.—I am, sir, &c., L. E. R.

MILITARY PUNISHMENTS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your correspondent, writing on the subject of "Military Punishments," expatiates on the merits of "shot exercise," &c.

This punishment is, in fact, one of the most unequal extant, pressing far less severely on the short cobby man, than it does upon his companion of six feet high. It is at once obvious that the latter has to stoop the difference between the relative height of their hands to find the shot, and then to raise it to a considerably greater height before again stooping to deposit it on arrival at the appointed spot.

Courts-martial should bear in mind that in sentencing the upstanding grenadier and dumpy from the centre company to the same periods of hard labour, the one will have twenty per cent. more labour imposed upon him than the other. Better still, let governors of military prisons be instructed to use their discretion in such cases.

I remain, your obedient servant,

A CAPTAIN.

THE PURCHASE SYSTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I confess I do not understand "I's" letter. I only perceive that he is very angry.

My desire was first to show that it was possible to maintain an corps of 16,000 men,—the Marines—without purchase, in an effective condition as to the ages of their officers, and I submit that my figures of last week prove that; and, secondly, to show that the alleged advantage of purchase on non-purchasing officers in purchase corps do not place them in a better or even in as good a position as are the officers of non-purchasing corps, and I submit that my figures prove that also.

I stated that commissions are seldom given to non-commissioned officers until they are 25 or 30 years of age. "I" admits this, but says it is unfair to say it!

The effect of purchase on non-purchasing officers in purchase corps, as far as I can discern, is to accellerate somewhat their progress to the rank of captain, and then to arrest their military career at that rank. We know, by a return from the Horse Guards, that in the space of 42 years, following the peace of 1814, no young man entering the Army without money to buy promotion had attained the rank of Lieut.-Colonel commanding a battalion. An arrangement which thus limits the advancement of men without money to retired captaincies with the honorary rank of Major or Lieut.-Colonel, can hardly be reckoned as advantageous for them or for the country. It excludes from the command of regiments—from the ranks of Colonel, Major-general, and Lieut.-General—all officers sprung from the middle classes of the country, and from the lower classes, no matter what amount of military talent they may have proved themselves to possess.

"I" observes that if I will renew my researches in Hart's army list of 1856, I shall probably find as many Lieut.-Colonels commanding regiments, who have been promoted without purchasing a single step, as of purchasers of every step upwards. I have stated that I have searched and could find none. Will he name half a dozen in the 54 battalions not employed in the Crimea?

I am, Sir, your obedient servant, H.

THE PAYMASTERS' WARRANT.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A great injustice is done to regimental paymasters in the new Royal Warrant, dated 27th January, 1860.

It is therein stated, that "after 15 years full-pay service as a commissioned officer, with not less than 10 years as paymaster," they will have "the honorary rank of major, *but junior of that* rank.

Suppose a paymaster completes his 15 years of such service on 1st January, 1860, he then takes choice of quarters, &c., next to the major or surgeon of the regiment, as the case may be (for the surgeon is not necessarily junior of his rank as major). On the 15th of January, 1860, the surgeon retires, and an assistant-surgeon is promoted in his stead; consequently, by the date of his commission, he is junior to both the paymaster and the regimental major. Ere long the major, however, retires, and a captain is promoted to the vacant majority, being in point of service and date of commission, junior to the said paymaster and surgeon. But by the surgeon's warrant, he chooses quarters, &c., before the major who shall be junior to him; and thus, by the senior major's retirement, the surgeon (may be of only six or ten years' service) is put over the paymaster, though the said paymaster is his senior, and was a few days previously receiving the advantages of such seniority; and thus the paymaster, of however long service, loses a place in the regiment by circumstances which really have nothing whatever to do with him.

Paymasters—for the most part officers who have held other commissions in the Service—cannot but feel the unfairness of this anomaly in favour of the surgeons. Their duties do not clash, so why one should have such an advantage over the other when, making both junior to the regimental field officer of corresponding rank would prevent any such unpleasantness and be just to all, I do not understand, but I am sure the same cannot be better pointed out than through the medium of your powerful journal.

I am, Sir, your obedient servant,

NO FAVOUR.

VOLUNTEERS WEARING SASHES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The following letter has been addressed by Mr. Sidney Herbert to the respective Lords-Lieutenant of counties.

"War Office, February 15th, 1860.

"My Lord,—My attention having been recently directed to the practice adopted by some of the Volunteer Corps, in which a silk sash is worn over the uniform by honorary members, and even in some cases by enrolled members, when not upon parade, I have to request that, as the practice in question is open to considerable objection, you will signify to the officers commanding Artillery and Rifle Volunteer Corps within the limits of your jurisdiction, that the custom of wearing the sash shall be discontinued in those instances in which it may now prevail, and shall not be introduced for the future.

"I may observe that this article when worn in the regular army is the distinguishing mark of an officer, but that it forms no part of the dress of either Artillery or Rifle Corps in Her Majesty's regular forces.

"I have, &c., SIDNEY HERBERT."

As the above is rather ambiguous, will you allow me to ask what the Secretary for War means? Does this request to Lords-Lieutenant apply to commissioned officers of Artillery and Rifle Volunteer corps? or to privates and non-commissioned officers of such corps only?

It is, I submit, a mistake, to say that a sash is not any part of the dress of the regular Artillery, for I have frequently seen both commissioned officers and sergeants of Artillery wear sashes.—I have the honour to be, &c.,

A CONSTANT SUBSCRIBER.

On Sexagesima Sunday eight soldiers were baptised in the camp church, Aldershot; and on Quinquagesima Sunday the Bishop of Winchester held a confirmation in the same church, when 228 soldiers, 1 officer, and 21 civilians attached to the army, received imposition of hands.

THE MEDITERRANEAN.

MALTA, FEBRUARY 23, 1860.

H. M. steam troop-ship Perseverance, Commander E. R. Power, arrived on the 17th inst., from Corfu, with H. M. 14th Regiment, and left on the 20th inst., for Gibraltar and Jamaica, conveying the above regiment.

H. M. screw line-of-battle ships Marlborough, (bearing the flag of Vice-Admiral A. Fanshawe, C.B., Commander-in-chief of the Mediterranean fleet), Captain Lord F. H. Kerr; Cæsar, Captain J. H. Mason; and Neptune, Captain F. A. Campbell, and the screw steam-corvette, Cadmus, Captain H. S. Hillyar, C.B., arrived on the 18th inst. from Gibraltar. H.M. screw line-of-battle ship Victor Emmanuel, Captain Clifford, C.B., arrived from the same port on the 22nd instant.

The English screw-steamer, Pomona, 995 tons burthen, Captain S. B. Penn, having on board 7 passengers, and 31 persons composing the crew, which had left Malta harbour on the afternoon of the 21st instant, bound for London, with silk, wool, &c., foundered at sea on the morning of the 22nd, when five miles distant from Cape San Demetrio, at Gozo. Eighteen persons, comprising five passengers, were saved in a small boat, and taken on board the Austrian brig, Teresa Caterina, Captain B. Podich; and, with the exception of two who were drowned in attempting to save themselves on board the brig, arrived safely in Malta harbour about half-past twelve o'clock, P.M., of the 22nd. Captain Penn and 21 persons perished. The following is a list of the names of the persons who were saved:—Mrs. Jacobs and Son, Mrs. M. A. Richesi, J. Mahoney, and Edwin Blake, passengers; Thomas Battey, mate; Wm. Duff, 2nd engineer; Wm. Stokes, 3rd engineer; Samuel Norman and John Bowmaker, firemen; Thomas Dangerfield, steward; Wm. Ellis, Cook; Thomas Brown, Thomas Bruce, and Henry Ashley, seamen; and Wm. Pullerd, boy. Mr. Penn was one of the most active and energetic men, and one of the most popular captains on the station, known for his kindness and consideration for his passengers. His conduct on this occasion was most heroic. When the engineer told him the leak had increased so much that the fires were out and the vessel could not float another hour, he ordered a boat with Clifford's apparatus to be lowered. He then saw all his passengers safely into the boat, and then as many of the crew as the boat could safely carry, for it was very rough weather. He did not quit the ship till every human qeing was first out of her. In lowering the boat which was not fitted with Clifford's apparatus they could not get her clear of the ship, and the vessel sank with Capt. Penn and nineteen seamen on board. The Captain was seen still self-possessed on the deck, and sank with his right arm held up above his head. The others were picked up in the boat by an Austrian vessel who brought them back to Malta. The Austrian sailors behaved very bravely in rescuing the crew from the boat, risking their own lives in the attempt.

Two squadrons of the 1st (the King's) Dragoon Guards are to proceed to China immediately—it is thought, in the Simla. The officers under orders for China are—Colonel Sayer, Major Slade, Captains Bradbury, Mitchell, Alexander, and Wingfield, Lieutenants Sidney, Grews, Hubback, Crewe, and Marsland, Cornet Sedley, and Dr. McSheehy.

The 14th King's Light Dragoons are expected in Malta, from Alexandria, by H.M.'s steam troop-ship Himalaya, and it is reported that they will remain here for a couple of months. The 21st Fusiliers are under orders to be in readiness to embark on board the Himalaya for the West Indies. The 1st battalion 22nd Regiment is shortly expected in Malta. H.M.S. Perseverance conveyed the 2nd battalion 9th Foot to Corfu.

The schoolmaster of the 21st Fusiliers has been called to account by Major *Boothby*, Inspector of Garrison Schools, for having delivered a lecture which savoured too much of politics, and commented rather severely, but perhaps truly, on the intentions of the Emperor Napoleon towards Egypt and the Mediterranean.

40,000*l.* were voted at the last sitting of the local council of government, towards dredging and extending the great harbour of Valetta for naval and commercial purposes. An equal amount is to be voted by the Imperial Government for this important improvement.

The squadron—consisting of liners Hannibal, London, and St. Jean d'Acre—under the command of Rear-Admiral G. R. Mundy, C.B., is daily expected here from Corfu. Admiral Mundy will, after calling at Malta, proceed to Gibraltar, to take command there. He left Corfu in H.M.S. Hannibal on the 21st.

A grand fancy dress ball—it being Carnival Folly season—given at the Palace on Monday last, was numerously attended by naval and military officers, who gave much employment to the *Smitch* tailors and outfitters of this place. The ball came off most successfully.

During the Carnival, which lasted three days, commencing on the 19th inst., the troops in garrison were confined to barracks, and the officers were not allowed to appear in public, excepting in their uniform dress! This order was given for the first time in Malta, at the suggestion of our *Maltese* superintendent of police. Instead of encouraging reciprocal good feeling and confidence, it will create distrust, and show that our authorities are suffering from fear or nervousness.

The Himalaya that was hurried from England with the Artillery, is still laying at Alexandria, and some of the Artillery on board.

The Valetta, from Alexandria, had very severe weather, lost her deck cabins, and one of the passengers had his arm broken. Major Nixon, of the Rifle Brigade, is a passenger.

Commander Burgess of the Cressy is dead. His vacancy is filled by Lieutenant Dunlop, and Mr. Kerr of the Marlborough, gets the Lieutenant's vacancy.

Exmouth, with two other sail of the line, will be stationed at Corfu.

Scourge goes to Morocco this evening, and Osprey to England to-morrow. Cadmus is to go to Smyrna.

MALTA GARRISON.—Governor and Commander-in-Chief: Lieut.-General Sir J. Gaspard Le Marchant, Knt. Assist. Military Secretary: Captain Wilford Brett. Assist. Adjutant-General: Brevet-Lieut.-Colonel G. H. S. Willis. Deputy Quartermaster-General: Brevet Lieut.-Colonel E. G. Hallewell. Town Major: Lieut.-Colonel B. C. Mitford. Commanding 1st Brigade: Major-General C. Warren, C.B. Brigade-Major: Captain S. W. F. Wilson. Commanding 2nd Brigade: Major-General F. Horn, C.B. Brigade-Major: Brevet Major Hon. W. J. Colville, R.B. Royal Artillery: Colonel-Commanding E. C. Warde, C.B. Royal Engineers: Colonel H. O. Crawley. 2nd Battalion, 3rd Buffs: Lieut.-Colonel F. F. Maude, C.B. 2nd Battalion, 15th Regiment: Lieut.-Colonel J. H. Wingfield. 1st Battalion, 21st Fusiliers: Colonel J. Ramsay Stuart, C.B. 2nd Battalion, 22nd Regiment: Lieut.-Colonel D. Anderson. 2nd Battalion, 23rd R. W. Fusiliers: Lieut.-Colonel E. W. D. Bell. 4th Battalion, Rifle Brigade: Lieut.-Colonel F. R. Elrington. Royal Malta Fencible Regiment: Lieut.-Colonel A. Mattei.

STATIONS OF THE MEDITERRANEAN FLEET.

Agamemnon, 91, Capt. T. Hope. Gibraltar.
Alacrity, 4. Com. J. K. Baird, Gibraltar.

Perseverance, 2, troop-ship, Com. F. R. Power.
Quail, 2, Lieut.-Com. N. Osborn. Gibraltar.
Racoon, 21, Capt. T. A. Paynter. Leghorn.
Recruit, 8, Com. D. Spain. Galatz.
Renown, 91, Capt. A. Forbes. Gibraltar.
St. Jean D'Acre, 101, Capt. T. P. Thompson. Corfu.
Scourge, 6, Com. W. G. Jones. Malta.
Scylla, 21, Capt. R. Lambert. Gibraltar.
Tartarus, 4, Com. A. L. Mansell. Malta.
Terrible, 21, Capt. F. H. H. Glasse, C.B. Malta.
Victor Emmanuel, 91, Capt. W. J. C. Clifford, C.B. Malta.
Vulture, 6, Capt. G. Parker. Tangiers.

PAYMASTERS.

A royal warrant, dated the 27th ult., has been promulgated by Mr. Sidney Herbert. It provides: "1st. That on and after the 1st day of January, 1860, such paymasters, who are in future to be selected from regimental or depôt battalion paymasters, shall be allowed 2*s.* 6*d.* a day in addition to the several rates of pay prescribed for length of service in our royal warrant of the 2nd December, 1857. 2. It is also our will and pleasure that the rank of all the paymasters of our army shall be as follows:—On appointment as paymaster—Relative rank of captain. After five years' service as paymaster—Honorary rank of captain. After 15 years' full pay service as a commissioned officer, with not less than ten years as paymaster—Honorary rank of major, but junior of that rank. 3. Such relative or honorary rank shall carry with it all precedence and advantages attaching to the rank with which it corresponds (except as regards the presidency of courts-martial, courts of inquiry, and boards of survey, where the senior combatant officer shall always be president), and shall regulate the choice of quarters, rates of lodging money, servants, fuel and light, or allowances in their stead; personal or detention allowance, prize money, and field allowance. But when a paymaster is serving with a regiment or battalion, the officer commanding, though he be junior in rank to such paymaster, is entitled to a preference in choice of quarters. 4. As forage allowance is not applicable to infantry paymasters, it can only be granted specially to such paymasters on proof of the necessity for employing a horse in the performance of public duty. 5. Paymasters shall be entitled to all the allowances granted by our warrant of the 13th July, 1857, on account of wounds and injuries received in action, as combatant officers holding the same relative rank. 6. Their wives and families shall, in like manner, be entitled to all the allowances granted by our warrant of the 15th June, 1855, to the wives and families of combatant officers holding the same relative rank. 7. District paymasters who shall become entitled to the highest rate of half-pay, fixed by our warrant of the 2nd December, 1857, and who may be considered by our Secretary of State for War to be deserving of special consideration, from having discharged their duties to the last in such a manner as to entitle them to the most favourable treatment, may, in each case of retirement as it occurs, be specially recommended to the Lords Commissioners of our Treasury for half-pay, at the rate of 17*s.* 6*d.* a day. 8. Every paymaster after completing the periods of service to which the rates of half-pay of 13*s.* a day and upwards are attached in our royal warrant of 2nd December, 1857, may, on retiring from the army, receive a step of honorary rank, provided his duties have been performed to the satisfaction of our Secretary of State for War; such step of rank is, however, not to carry with it any increased pecuniary advantages."

THE PACKET SERVICE.—The Packet Service (Transfer of Contracts) Bill was read a second time on Monday, 27th ult. Lord C. Paget said that the Board of Admiralty was already overburdened with its own proper work in connection with the Navy, and ought to be relieved of this extraneous branch of its duties. This business had been thrown upon the Admiralty at a time when the mail packets were vessels of war. But now that the conveyance of the mails was put out to contract and carried on in merchant vessels, there was no reason whatever why the Post-Office, with the assistance of the Board of Trade, if necessary, should not discharge this duty.

INVASION TACTICS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—A General Officer of Artillery,* who has recently written on the defences of the country, gives it as his opinion, that "a French army landing on the most enclosed district in England *could march in line with perfect ease* from the point of debarkation (across country) to London!"

It is scarcely worth while to discuss such a strange and incomprehensible opinion.

The inclosures of England may perhaps not be of a nature to form very formidable obstacles to the advance of an invader, but they are, at all events, quite sufficient to render *impossible* the march which the gallant General fancies perfectly easy, but which, I think no General in his senses would ever attempt.—Your obedient servant,

February 22. B.

INDIAN NEWS.

Madras, Jan. 28.

Orders for raising a corps of Irregular Cavalry for service in China have been issued.

Enlistment in the Native Army of Bengal has been stopped for the present.

Sir Charles Trevelyan is still on his tour through the southern districts of Madras.

H. M.'s 44th are expected to leave Madras for China on the 30th instant. H. M.'s 66th are *not* to go to China.

Accounts from Calcutta to 24th January state, that the preparations for the China expedition proceed with considerable activity. In addition to the regiments named, H. M.'s 99th may be added, and also the 23rd Fusiliers. The expedition is highly popular with the native troops.

A correspondent of the *Hurkaru* writing from Cawnpore on the 10th says:—"The Company of Artillery are ordered to garrison the Fort of Saugur, for there has been some disturbances of a serious nature. H. M.'s 80th Regiment was proceeding there, and was beat back to Calpee. They have lost 20 men in killed and wounded. A telegram came in for assistance."

It is intended to send a mountain train battery to China, and orders have been given to drill the troops of muleteers for that purpose.

There is a vague and we think unlikely rumour that General Sir W. K. Mansfield, K.C.B., goes in command of the China forces, instead of Sir Hope Grant.

Two companies of the Royal Engineers are to go to China, and will be placed under the command of Major-General Sir R. Napier, of H. M.'s Indian Army, who will superintend the engineering operations.

Major General Straubenzee, commanding in China, has sent in his resignation, it is said owing to the the appointment of Sir H. Grant.

THE INDIAN ARMY.

A letter from Sir Patrick Grant to General Peel, written from Madras on the 1st of July, 1859, was published on Thursday on return to an order of the House of Commons. He says:—

"In the report of the commissioners appointed to inquire into the organisation of the Indian army, it is stated that I am one of the advocates for maintaining a local army for India distinct from the Line.

"This is a misconception which I beg permission to rectify.

"The question put to me on that point was, 'What proportion of the European force should belong to Her Majesty's regular army, and what portion should be composed of troops raised for service in India.'

"My reply, dated the 16th June 1858, ran thus:—'On this point I recorded my opinion, and it is still the same, in my memorandum placed in the hands of the Governor General on the 29th June, 1857 (Extract enclosed, E.):—viz., to replace the revolted corps of cavalry and infantry, the East India Company should raise three regiments of dragoons and 19 regiments of European infantry,' &c.

"When I made that reply on the 16th June, 1858, the question had not been raised of transferring the Indian armies or the government of the Indian Empire from the East India Company to the direct control of the Crown.

"At that time the East India Company had a large and powerful army of its own, quite distinct from the Imperial army, and it was in reference to those then existing conditions that I considered the question put before me.

"Since then an entire change in these particulars has taken place; the East India Company has ceased to exercise political or territorial sovereign powers; and the government of India and the Indian armies have become Her Majesty's Indian government and Her Majesty's Indian forces.

"Under these altered circumstances, to maintain the Indian army as a purely local force would be to place all belonging to that army in a position of inferiority, engendering heart-burnings and jealousies between the two branches of the Queen's Service, and productive of other far more serious evils.

"Having submitted this explanation to you as President of the Board of Commissioners, without venturing to enter into details as to how the arrangement can be best carried out, I will only add the expression of my firm conviction that, under the present altered conditions of our Indian Empire, and both armies, it is in the highest degree desirable that the two Services should now, as much as possible, be thoroughly incorporated, special provision being made to secure to the local governments and local military authorities full control over the troops serving in India, and the entire patronage of every staff or other appointment, civil or military; for I securely hold that to establish and maintain a strong and firm government in this country, the local authorities must be entrusted with almost supreme power."

DEATH OF THE HON. GEO. F. W. YELVERTON.—We regret to learn that this hon. gentleman died on Sunday last in Ireland. The deceased was the eldest surviving son and heir presumptive of Viscount Avonmore. The lamented gentleman was the son of Viscount Avonmore by his first marriage with Jane, second daughter of Mr. Thomas Boothe, of Whitehaven, and was born 7th March, 1818, and was for some years in the 64th Regiment. He retired from the Army in 1848.

* Sir Robert Gardiner.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ASTLEY—Feb. 27, at Rutland Gate, the wife of Lieutenant-Colonel Astley, of a daughter.

BAKER—Feb. 23, at Bayswater, the wife of Richard S. Baker, Esq., late of the Madras Army, of a son.

BARLOW—Feb. 22, at Beechfield, Doncaster, the wife of Henry Wm. Barlow, Esq., late Captain Royal Engineers, of a daughter.

CAINE—Dec. 19, at Hongkong, the wife of George W. Caine, Esq., H.M.S. Consul Swetow, of a son.

EDWARDS—Feb. 24, at 29, Lower Baggot Street, Dublin, the wife of Colonel Clement A. Edwards, C.B., 18th Royal Irish Regiment, of a son.

GORE—Nov. 7, on board the Walmer Castle, the wife of Major J. A. Gore, 71st Highland Light Infantry, of a son.

GRIFFITHS—Feb. 26, the wife of Paymaster Griffiths, Royal Artillery, of a son.

GULLY—Feb. 23, at Marwell Hall, Hants, the wife of Lieutenant W. Gully, Bengal Horse Artillery, of a son.

HIND—Feb. 26, at Chapel House, Ormskirk, the wife of Captain Joseph Hind, Bengal Army, of a son.

JOHNSON—Feb. 25, at Hannington Hall, Wilts, the wife of Captain Willes Johnson, R.N., of a daughter.

LUMLEY—Feb. 21, at Derry Castle, county Tipperary, at the residence of her father, the wife of Lieutenant-Colonel Lumley, of a daughter.

NEWCOMEN—Feb. 23, at Redcar, Yorkshire, the wife of George Newcomen, Esq., Lieutenant R.N. and Captain A.V., of a daughter.

NIGHTINGALE—Jan. 19, at Mominabad, the wife of Captain Geoffrey Nightingale, Commandant of 3rd Hydrabad Cavalry, of a daughter.

O'LEARY—Feb. 15, at Bradford, the wife of Dr. O'Leary, 45th Regiment, of a son.

SKEETE—Feb. 24, at Dover, the wife of Captain Skeete, Royal Wiltshire Militia, of a daughter.

STEWART—Feb. 29, at Granton House, Edinburgh, the wife of Lieutenant Duncan Stewart, R.N., of a son.

TOMPKINS—Feb. 23, at Southsea, Hants, the wife of Charles R. Tompkins, Esq., R.N., H.M.'s ship Excellent, of a daughter.

TURNER—Feb. 26, at St. Mark's Place, Anglesey, near Gosport, Hants, the wife of Deputy-Commissary-General Turner, of a son.

WYNELL-MAYBOW—Feb. 22, at Bath, the wife of Lieutenant-Colonel J. H. Wynell-Maybow, of twin sons, who survived their birth only a few hours.

MARRIAGES.

BOND—MERRY—Dec. 22, at Kamptee, by the Rev. S. T. Pettigrew, brother-in-law of the bride, Captain H. Auburey Bond, H.M.'s 91st Regiment, to Mary Anne, daughter of R. Merry, Esq., of Norwich.

BOOTH—EBNER—Feb. 21, at the British Embassy, Frankfort, A.M., Charles, eldest son of the late Lieutenant-Colonel Henry Booth, to Catharina Wilhelmina, daughter of the late Hermann Ebner, of Frankfort.

BOWEN—PACKE—Jan. 20, at the Cathedral, Bombay, Captain William T. Bowen, 16th Regiment N.I. Bombay Army, and second son of the late Major Bowen, of Pembrokeshire, N.W., to Rosa, third surviving daughter of the Rev. Christopher Packe, vicar of Ruislip, and Priest in Ordinary of H.M.'s Chapels Royal.

BURLTON—CAMPION—Feb. 23, at Welton, Yorkshire, by the Rev. T. B. Paget, Henry Montgomery Barton Burlton, Esq., of H.M.'s Bengal Army, youngest son of Colonel Burlton, C.B., of Portland Place, to Mary Rose, eldest daughter of J. Campion, Esq., formerly of the 72nd Highlanders.

HEATH—INNES—Feb. 23, at Trinity Church, Paddington, by the Rev. G. E. Carwithen, chaplain H.M.S. Pembroke, assisted by the Rev. F. H. Addams, M.A., incumbent of St. Peter's, Notting Hill, George Poynter Heath, Esq., Lieutenant R.N., younger son of the Rev. Charles Heath, M.A., rector of Hanworth, Norfolk, to Elizabeth Jane Long, eldest daughter of Joseph Long Innes, Esq., late Captain H.M.'s 39th Regiment.

HYSLOP—LYON—Feb. 23, at Belfield, Cupar, by the Rev. Robert Skinner, Maxwell Hyslop, Esq., of Liverpool, to Phœbe, third daughter of Captain George Lyon, of Dalruscan.

JONES—WILLIAMS—Feb. 21, at Llanfihangle, by the Rev. John Jones, vicar, John James Brooks Jones, Esq., late Commander of H.M.'s gun-boat Insolent, only son of the late Rev. Thomas Jones, vicar of Llanrhydian, Gower, Glamorganshire, to Adah, eldest daughter of the late Richard Williams, Esq., M.D., Aberystwyth, Cardiganshire.

MACDONALD—WILLIAMSON—Jan. 10, at Singapore, by the Rev. H. Smythe, John E. Macdonald, Esq., son of the late Captain Macdonald, of the 91st Regiment, to Emilie Sophia, eldest daughter of Thomas Williamson, Esq., of Savage Gardens, Trinity Square.

MAUDE—STERLING—Jan. 24, at Colombo, Lieutenant-Colonel F. C. Maude, Royal Artillery, C.B. and V.C., eldest son of Captain the Hon. F. Maude, R.N., to Pauline S. Sterling, only daughter of the Hon. Paul Sterling, Acting Chief Justice, Ceylon.

PALMER—PEEL—Feb. 16, at the parish church, Alverstoke, by the Rev. Thomas Walpole, rector, Manley Montgomery Palmer, Lieutenant Royal Limerick County Regiment, and eldest son of Henry M. Palmer, Esq., of Shriff, county Leitrim, Ireland, to Ellen Elizabeth Westcar, youngest daughter of the late Jonathan Peel, of Culham, Oxfordshire.

PLAYFAIR—CRACROFT—Jan. 4, at Jounpore, India, Lieutenant William Playfair, H.M.'s 4th Bengal Native Infantry, to Henrietta, daughter of Walter S. Cracroft, Esq.

TRAVERS—BICKNELL—Feb. 23, at St. Paul's, Herne Hill, by the Rev. Ruggles Fisher, rector of Lyston, brother-in-law of the bridegroom, assisted by the Rev. M. Anderson, incumbent, James Conway Travers, Esq., Royal Marines Light Infantry, only surviving son of the late Major Travers, K.H. Rifle Brigade, to Lucy Sanford, elder daughter of Elhanan Bicknell, Esq., of South Place, Herne Hill, Surrey.

DEATHS.

ALLDRIDGE—Feb. 26, at Penge, to the inexpressible grief of her family, Lucy, relict of Thomas Alldridge, Esq., Purser R.N.

AYTOUN—In December, at Calcutta, of dysentery, Eustace de Vescie Aytoun, late Bengal Yeomanry Cavalry, and fourth son of the late Captain M. C. W. Aytoun, R.A.

BRIDGES—Feb. 29, at Parkstone, Dorsetshire, Lieutenant George Lovibond Bridges, R.N., aged 24.

BROUGH—Feb. 29, at his apartments, Charles Street, St. James's Major-General Redmond William Brough, aged 68.

D'EVEREUX—Feb. 25, at 47, Hertford Street, Mayfair, General John D'Evereux, aged 82. He raised the Irish Legion which, under Bolivar, was engaged in the successful struggle for independence in Columbia.

FLETCHER—Feb. 22, at the Royal Naval School, New Cross, Archibald, son of Commander Fletcher, R.N.

HAMILTON—Feb. 21, at High Halden, Kent, Peregrine Charles Baillie Hamilton, late Captain in H.M.'s 60th Rifles, aged 37.

HENDERSON—Jan. 17, at Bombay, aged 32, Captain W. H. J. Henderson, of the Bombay Artillery.

HOUSTON—Feb. 16, at Nice, Captain Thomas Blakiston Houston, of the 4th (King's Own) Regiment.

NOYES—Feb. 26, Henry James Noyes, Esq., of Sunninghill, Berks, late of the 26th Cameronians.

RAPER—Jan. 10, at Bermudas, Augustus Shaw, son of A. F. Raper, Esq., 30th Regiment.

SKARDON—Feb. 26, Charles John Skardon, only son of the late Lieut.-General Charles R. Skardon, H.E.I.C.S., aged 39.

SKIPWITH—Feb. 26, at Norfolk Villa, Jersey, the infant son of Major G. Skipwith, 11th Depôt Battalion.

SMELT—Feb. 20, at Frenchay, Gloucestershire, aged 62, Catharine Beverley, relict of Lieutenant-General W. Smelt, C.B., and eldest daughter of the late Sir W. H. Robinson, K.C.H.

STAVELEY—Feb. 20, at Old Sleningford Hall, Ripon, Yorkshire, Thomas Kitchingman Staveley, Esq., aged 69, late Royal Engineers, Justice of the Peace for the North Riding of Yorkshire and Liberty of Ripon, and Member of Parliament for the city of Ripon under the First Reformed Parliament.

TOD—Feb. 21, at Clifton, Miss Charlotte Bruere Tod, eldest daughter of the late Captain Alexander Tod, R.N.

TWEEDY—Feb. 23, at Bromley House, Kent, aged 80, Colonel George Tweedy, on the retired list of the Bombay Army.

WALLER—Feb. 9, at Malta, Robert Waller, Esq., Harbour-Master of Aden.

WALSH—Feb. 26, at Colchester, Adelaide Sophia, infant daughter of the Rev. R. L. Walsh, Chaplain to the Forces.

WHITFIELD—Feb. 22, at Daviston, King's county, A. Whitfield, late Lieutenant 33rd Regiment, and formerly of the 86th.

V. R.

VOLUNTEER RESERVE FOR SEAMEN.

IMPORTANT TO SEAMEN.

Extract from the Speech of Lord Clarence Paget, Secretary to the Admiralty, made in the House of Commons on Monday, February 13th, 1860.

"I know what Seamen are. They are fine, noble, hearty creatures, but men of remarkably suspicious character, and if there are any people they are suspicions of, it is the Admiralty. Captain Brown reports from the different merchant ports that the men say, 'We think the inducement very fair. We think it very handsome; but they only want to kidnap us. The moment we put our names down they will send us off to China.' It is very curious to see men labouring under that delusion. I have been asked over and over again by directors of the great shipping companies, and by men of importance in these commercial ports, for some assurance on the part of the Government that the men will not be called out until war is declared. I told them I could not give that assurance; but I also told them that it was perfectly certain there was NO INTENTION TO CALL THEM OUT except in the event of a critical emergency; that THE THREAT OF IMMEDIATE HOSTILITIES, OR OF SOME NATIONAL DANGER WHICH WOULD OBLIGE US TO MAKE THE GREATEST EXERTIONS FOR THE PROTECTION OF OUR SHORES, WERE THE ONLY CIRCUMSTANCES UNDER WHICH THE GOVERNMENT WOULD CALL FOR THEIR SERVICES. If I can reassure them by what I say to-night, I really believe little more is wanting to induce them to flock to the force. (Hear, hear.) It is so far satisfactory that they are beginning to get over this extraordinary idea. I WISH TO DECLARE TO THEM THAT HER MAJESTY'S GOVERNMENT HAVE NO SORT OF INTENTION TO KIDNAP THEM INTO THE NAVY. (Hear, hear.) And perhaps I had better add a more practical assurance—THAT, IF WE WISHED, WE COULD NOT ENTER THEM IN THE NAVY, because the number is complete, and except for casualties we have no means of entering any considerable number of men over and above what we have at present. (Hear.) I think this is a very satisfactory state of things, and that the House will be glad to hear THERE IS NO DIFFICULTY IN GETTING MEN."

QUALIFICATIONS.

A Volunteer must have served five years at sea, be an A.B., and under 40.

ADVANTAGES.

£6 Retainer, payable quarterly.
A Pension of £12 after requisite service, and when worn out.
Eligibility for Coast Guard or Greenwich.

OBLIGATIONS.

Twenty-eight days' Drill in every Year, with Pay and Allowance for victuals and lodging.

To appear once in Six Months, unless on leave for long voyages, which will be granted on application to a Shipping Master.

To serve in the Navy on an emergency, if required by Her Majesty.

The time of service not to exceed 3 years, unless there is actual war, and then not to exceed 2 years more, with Extra Pay for the extra time.

☞ For particulars as to Inrolment, and for detailed conditions, application should be made to any Shipping Master or Customs or Coast-Guard Officer.

Established 1825.

Funds Invested	£847,000
Annual Income	116,000
Claims paid	1,150,000

BONUS YEAR.—Persons Assuring on or before the 25th March next will be entitled to one full year's share in the profits then to be divided. The Bonuses become vested after payment of the *Third* premium. The Profits will be divided in every *Fifth* year after the 25th March next.

No extra premium is charged for service in any Volunteer Corps within the United Kingdom during peace or war.

B. HALL TODD, Secretary and Actuary.

BONUS DIVISION.

GLOBE INSURANCE,

CORNHILL & CHARING CROSS, LONDON, S.W.

ESTABLISHED 1803.

Capital One Million, All paid-up and Invested.

The following are examples of the PROFITS accruing on Globe Participating Life Policies under the BONUS declared as at 31st December, 1858:—

AGE at Date of Policy.	Original Sum Insured.	Original Annual Premium.	Complete Years in force.	Bonus applied— By Addition to Policy.	Bonus applied— By payment in CASH.
25 Yrs.	£1000	£21 9 2	6 Years.	£72	£27 17
35 ,,	1000	28 2 6	6 ,,	72	32 15
40 ,,	1000	32 15 0	6 ,,	72	35 7
50 ,,	1000	45 12 6	6 ,,	72	42 9

(*Policies of One to Five complete Years Participate in proportion.*)

The above Profits are equivalent—if added to the Policy—to a Reversionary Sum at death equal to One Pound Four Shillings per Cent. per Annum on the Sum Insured for each of the completed years of the Policy:—Or, If taken as an Immediate Cash Payment, is, at most ages, considerably more than One Year's Premium.

The Bonus Periods are FIVE Years, and the Rates of Life Premiums, whether *With* or *Without* Profits, very economical.

FIRE, LIFE, ANNUITY, and REVERSIONARY business transacted.

WILLIAM NEWMARCH, Secretary.

*** No Charge for Volunteer and Militia Corps.

For upwards of thirty years No Extra Premium has been charged by the Globe for service in the Militia and in Volunteer Corps in the United Kingdom.

OFFICES—London, 40, Cannon Street, E.C. (temporary); Lisbon, 4, Rua Boa Vista.

This Company, formed for the purpose of establishing a line of steam service between England, Portugal, and the Brazils, and completing the essential link of communication between Milford Haven, the seaport of the Great Western and South Wales Railways, and Santos, Bahia, and Pernambuco, the seaports of the three important railways of the Brazils, has been incorporated by a Royal charter from His Majesty the King of Portugal.

The commercial transactions between Great Britain, Portugal, and the Brazilian empire are of immense and increasing importance, as is shown by the annual trade returns. From 1850 to 1857 our exports of British manufactured goods to the Brazils increased from 2,544,837*l.* to 5,447,566*l.*; and the passenger traffic between Portugal and that empire, which is already very great, is constantly and largely increasing, and will be very much further developed by the railways now in course of construction.

The Brazilian ports send coffee, dyewoods, drugs, diamonds, silver, and other valuable products to this country every year; while we import 60,000,000lb. of coffee annually, two-thirds of which may be furnished by the Brazils, in exchange for British manufactures. These facts alone will give some idea of the present and prospective commerce between the three countries, and of the necessity of the connecting link furnished by this Company for the regular, rapid, and frequent transit of goods and passengers.

In sanctioning the formation and assuming the official position of Protector of the Company, His Majesty the King of Portugal fully recognises the importance of the extensive and increasing trade that exists upon the line the Directors have adopted. His Royal Highness the Duke of Oporto, His Majesty's brother, by accepting the President's chair, also gave expression to his opinion as to the importance of the undertaking.

The statutes under which the Company has been incorporated give its vessels special advantages over those of other nations, and the Directors are assured that their ships sailing under the Portuguese flag will be able to command a very large share of the passenger traffic existing between Great Britain, Portugal, and the Brazils.

On the formation of this Company the attention of the Board was directed to Milford Haven, as the best port of departure from England for the south. The harbour possesses great natural advantages; it is free from port dues, and a plentiful supply of fuel and coal of an excellent quality can be had at all times at a little more than one-half the price charged at other more southern ports. As an additional inducement to the Directors, the Great Western and South Wales Railway Companies afforded them great facilities for working the service—to such an extent that shippers of goods, merchants, and passengers belonging to Bristol, Liverpool, Southampton, London, and most of the important mercantile districts of England will have the benefit, both in shipment and delivery, of greater expedition and convenience than if the ships went direct to any of these ports. The importance of the undertaking will be further shown by the favour with which the Brazilian railways regard it, as being the great line of commercial communication between this country and the Brazils.

The Directors have entered into a contract with the Portuguese Government for a subsidy for the carriage of their mails to the Brazils, by which a payment is secured to the Company equal to about 15,000*l.* per annum of our money. A contract has also been entered into with Her Majesty's Postmaster-General, on highly favourable terms, for the conveyance of the British mails from this country to Portugal and the Brazils, and a subsidy will also be received from the Brazilian Government for the conveyance of their mails, equal to about 15,000*l.* a-year. In addition to these contracts already concluded, the Company have negotiations in progress which the Directors confidently anticipate will terminate satisfactorily, and in that case the Company will be in receipt of a gross sum of 85,000*l.* a-year for postal service.

Through rates have been arranged, by which goods and passengers will be booked from all the principal cities in Great Britain, Ireland, and the continent of Europe, so as to secure a direct transit throughout in the most expeditious and economical manner.

Although the Directors of this Company were unable to submit the undertaking to the public or to take any steps to place the capital necessary for carrying it out until the formalities required for its perfect registration under the Portuguese laws had been completed, they felt the necessity of occupying the line at the earliest moment, and they purchased, in the month of September last, the three fine vessels by which the service has been up to the present time so efficiently carried on.

The line was opened on the 3d of October by the steamship Milford Haven. She was followed in November by the Portugal, and on the 24th of December by the Brazil. The trade of the Company's line has thereby been fairly established.

The following is an extract from the report of the Directors of the South Wales Railway to their shareholders on the 20th of February, 1860:—

"The arrangements for through booking with the Anglo-Luso-Brazilian Royal Mail Steam Navigation Company, which were adverted to at the last half-yearly Meeting, have been brought into operation. One of the ships of the Company arrives at and departs from Milford-haven in each month.

"The traffic in connection with them has already become of material importance to this Company, and from information which the Directors have received they believe that the undertaking itself bids fair to be a profitable one to its promoters, and of permanent advantage to the South Wales Railway."

Applications for shares to be addressed to the Directors of the Company, 40, Cannon Street, London, E.C.; or to the Brokers of the Company, Messrs. De Zoete and Edwards, 17, Throgmorton Street, London; or Messrs. Knight and Coleman, 1, Royal Exchange Buildings, London. Each application for shares must be accompanied by a payment at the rate of 1*l.* per share on the number of shares applied for. If the application be not acceded to, the deposit will be returned in full.

Prospectuses may be had at the Offices of the Company, and from the Brokers and Agents.

UNITED KINGDOM LIFE ASSURANCE COMPANY.

No. 8, Waterloo Place, Pall Mall, London, S.W.

The Hon. FRANCIS SCOTT, Chairman.
CHARLES BERWICK CURTIS, Esq., Deputy Chairman.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on all policies effected prior to the 31st December next year, should, in order to enjoy the same, make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without imparting to the recipients the risk of copartnership, as is the case in mutual societies.

To show more clearly what these bonuses amount to, three following cases are put forth as examples:

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1861.
£5,000	£1.987 10*s.*	£6,987 10*s.*
1,000	397 10*s.*	1,397 10*s.*
100	39 15*s.*	139 15*s.*

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security for the payment of the policy when death arises; in addition to which advantages, one half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, the other half being advanced by the company without security or deposit of the policy.

The Assets of the Company at the 31st December, 1858, exclusive of the large subscribed Capital, amounted to £652,618 3*s.* 10*d.*, all of which has been nvested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

Immediate application should be made to the Resident Director, 8, Waterloo-Place, Pall-mall, S.W.

By order, P. MACINTYRE, Secretary.

UNITED SERVICE INSTITUTION, WHITEHALL YARD, S.W.

WILSON, 40, Cannon Street, London, E.C.

DIVING APPARATUS.

C. E. HEINKE, SUBMARINE ENGINEER, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

SUBMARINE RAM.—The INVENTOR of a NEW NAVAL ENGINE, intended to be used against Ships of War, and to answer the purpose of the "Steam Ram," is desirous of MEETING with a GENTLEMAN who would be WILLING TO EMBARK in the Invention.—Address, A. Z., ARMY AND NAVY GAZETTE OFFICE, Wellington Street North, Strand, W.C.

CENTRAL ASSOCIATION FOR IMPROVING THE CONDITION OF THE WIVES AND FAMILIES OF SOLDIERS AND SAILORS.

PATRON—Her Majesty the QUEEN.

VICE PATRONS.

H.R.H. the Duke of CAMBRIDGE, K.G., Commander-in-
His Grace the Archbishop of CANTERBURY. [Chief.

PRESIDENT—The Earl of SHAFTESBURY.

CHAIRMAN OF COMMITTEE—WM. ANGERSTEIN, Esq., M.P.

The Central Association appeals to the Public for a continuance of that support so generously accorded to it in times past.

War, with its exigencies, has by no means ceased, for at this moment there are more than 100 applicants for help, whose husbands, now serving in India or China, have been absent from them during periods varying from two months to three years, without, in many cases, sending any money home for their support.

And even were there no such claims on the Association, a wide sphere of usefulness would still lie before it in time of Peace, and it earnestly hopes to be able to continue its efforts to carry out those more extended objects which it was originally designed to effect, viz.: the permanent improvement of a numerous and too long neglected class.

By God's blessing the Association has alleviated many a bitter pang, and not its least effort to afford relief to the objects of its solicitude was the recent contribution of upwards of 1300*l.* towards the outfit of a large number of soldiers' wives with their families, in conjunction with Her Majesty's Quartermaster-General and the Emigration Commissioners, on their embarkation to join their husbands and fathers in India.

But the chief object of its operations is now directed to the maintenance of local branches at such places as Woolwich, Chatham, Parkhurst, Portemouth, Plymouth, Dublin, Winchester, Ballincolig, and other large garrison and seaport towns, where efforts are being, or will be, made to keep up lying-in hospitals, cheap lodgings, children's nurseries, and work societies affording remuneration and elevating employment.

For this benevolent purpose, subscriptions and donations, however small, are earnestly requested, and will be thankfully received by the Treasurer, the Hon. A. KINNAIRD, M.P., at Messrs. Ransom, Bouverie, & Co., 1, Pall Mall East, S.W.; or by the Secretary, Captain S. F. JACSON, at the office, 7, Whitehall, S.W.

BANKERS.

The Union Bank of London, 4, Pall Mall East, S.W.

With a view to the permanence of the Volunteer Force, it has occurred to some noblemen and gentlemen interested in the Volunteer Movement, that a Club might be formed on the same basis as those established for the Military and Naval Services, to be called the "Volunteer Service Club."

The above-named noblemen and gentlemen have formed themselves into a Provisional Committee for the purpose of establishing the Club.

Gentlemen desirous of becoming members are requested to send their names to the Honorary Secretary, by whom any further information will be given.

By order,
WILLIAM HENRY DE CARTERET, R.N.,
Honorary Secretary.

SECRETARY—R. T. Alison, Esq.

OFFICES—20, Walbrook, City, E.C.

This Company is formed for the purpose of purchasing and enlarging the premises well known as the West Cliff Hotel, Folkestone, and advantageous arrangements have been made with the Proprietor, who has agreed to sell to the Company the whole of this property by Mr. Woodthorpe's valuation, and to take a large portion of the purchase-money in paid-up Shares. Possession of the property will be given to the Company on Ladyday, when completion of the purchase will be effected.

A first-class connection has already been secured to this Hotel, as certified by the books, and which, with proper management, cannot fail to be permanent. The expenses and risk up to this time have been borne by the present Proprietor, so that a well established business will be at once transferred to the Shareholders.

The West Cliff Hotel has a south aspect, is built upon a light, dry soil, and is situated at the entrance of Folkstone, on the London High Road. Its position is one of peculiar beauty, commanding the most delightful and extensive sea and country views; and it is the opinion of some of the most eminent physicians of the day that, in point of health, it stands unrivalled. Its close proximity to the great Camp at Shornecliff must also be looked upon as an important feature, more especially as it is understood that Government is about to purchase a considerable tract of the adjoining land for the purposes of fortification, and for converting the Camp into permanent barracks for a large additional force.

The Folkestone season is of long duration, commencing in the Spring and lasting to a late period of Autumn, and the increasing influx of visitors at this period is so great that large numbers are almost daily turned away, for want of sufficient first-class Hotel accommodation.

From these facts, and from the general satisfaction expressed by visitors after a lengthened sojourn at this Hotel (*including many of the most distinguished families and members of the aristocracy*), together with its immediate proximity to the Continent, *the certain success of this Company is confidently relied upon.*

The result of similar undertakings, whether metropolitan or provincial, has been most satisfactory, *and very large profits upon the capital invested have been realised;* it is, therefore, anticipated that with additional outlay, to render the present establishment one of a more extensive and complete character, the profits will be augmented in proportion as the accommodation is increased; and the Directors of this Company believe that the West Cliff Hotel will be one of the most attractive and remunerative investments of the day.

The present premises are held upon lease for 99 years, from Christmas, 1852, at the low annual ground rent of 100*l.*, which includes a large extent of land recently added to the property. The capital is required for the purchase of the lease, furniture, plate, linen, fixtures, and other effects, and laying out the ornamental grounds to the Hotel; and for carrying out alterations, which will add at least one hundred apartments to the present building, besides providing suitable coffee, billiard, and smoking rooms, together with handsome library and a capacious public salle à manger.

The books of the Company will be made up every six months, and whatever amount of Profit is thought proper to be divided will be declared at the General Meeting of Shareholders; but interest will be paid upon deposits and subscriptions from date of receipt up to the time of payment of the first dividend.

A novel system for the security of Shareholders is proposed to be carried out by the Directors of this Company, and it is intended to receive Shares *at their par value as cash payments from Shareholders who may at any time visit this Hotel.* This arrangement being purely of a Tontine character, presents a pleasing method to any Shareholder for realising the value of his investment, whilst at the same time the interests of the remaining proprietors are greatly enhanced by every Share thus cancelled.

It is considered that the present capital will be ample for all purposes, including the contemplated addition and alteration of the opposite property, more especially as the Hotel business is peculiarly one of a ready-money character; and should a further outlay be required, a Special General Meeting of Shareholders will be convened for the consideration of the question; but in no case will the capital be increased without the sanction of the Shareholders, previously obtained at such Meeting.

The Directors propose to enter into arrangements with the London Bridge Railway Terminus Hotel Company, with the view of establishing a system "en-correspondence" between the two Companies, which will result in great advantages to the Shareholders of both Companies.

Applications for shares to be addressed to the Secretary or brokers of the Company. A deposit of 10*s.* on each Share applied for must be previously paid to the Bankers of the Company; and in the event of no allotment being made, the deposit-money will be returned.

THE ST. JAMES'S RESTAURANT, 69, REGENT QUADRANT, and 25, Piccadilly.

Feb. 13, 1860. EDWD. F. D. WALSHE, Hon. Sec.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

PATRONS:—

Her Most Gracious Majesty the QUEEN.
His Royal Highness the PRINCE CONSORT.

At every Examination for Naval Cadetships since May, 1857, Pupils from this Establishment have taken the first or second places. Those Pupils who have entered the Army and Military Colleges have been equally successful.—Applications to be addressed to the Rev. E. BURNEY, M.A., Gosport.

NAVAL CADETS.

OF THE 50 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, on the 13th December, SIXTEEN were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gataker, Steavenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. JOHNSON, Naval Instructor; W. BELL, Chaplain; J. A. BURROW, Chaplain and Naval Instructor.

AT THE LATE COMPETITIVE EXAMINATIONS, the following successful Candidates passed directly and on First Trial from MR. DE BURGH'S MILITARY ESTABLISHMENT, Dublin, no pupil of his having failed.

ROYAL MILITARY ACADEMY, WOOLWICH.—Examination commencing January 4th, 1860.—Mr. W. J. Galway; Mr. J. L. Morgan; Mr. R. A. Livesay; Mr. Carlile Greer.

Mr. Galway obtained 4433 Marks and the Tenth Place; and Mr. Morgan 4108 Marks, and the Fourteenth Place. These high Marks were obtained without the aid of Classics as a subject of examination.

The gentlemen who passed from the UNIVERSITY OF DUBLIN were also pupils of Mr. De Burgh.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—Examination commencing January 16th, 1860.—Mr. *H. P. Hardinge* obtained the SECOND PLACE on Marks less by 32 than those of the First Place.

ROYAL MILITARY COLLEGE, SANDHURST.—Examination commencing November, 1859.—Mr. O'Neil Power, Tenth Place.

DIRECT COMMISSIONS IN THE ARMY.—Examination commencing February 1st, 1860.—Mr. A. Clarke (Marks 5334); Mr. G. Yeo (Marks 3805); Mr. Burton (Marks 3140); Mr. Knox (Marks 2715); Mr. Meredyth; Mr. L. Norman; Mr. J. Mansfield.

Mr. DE BURGH'S references to the Parents of present and former Pupils include the following:—Right Hon. and Right Rev. the Lord Bishop of Meath; Right Hon. Joseph Napier; Ven. the Archdeacon of Meath; Colonel Lake, C.B., Dublin Castle; Colonel Knox, J.P., Thurles; Colonel Morgan, R.A., Swansea.

19, Trinity College, Dublin, March 1st, 1860.

ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.

CONDUCTED BY MR. THOMAS EASTMAN, R.N.

The following Gentlemen have passed from this Establishment since June, 1859:—Messrs. Alexander, G. A. Ellis, Garnier, Mallory, Hoghton, Boddom, Maycock, Gillum, Osborne, Nuthall, O'Brien, Bedingfield, Powell, Hodges, Jackson, Lysons, Browne, Roberts, Hunt, Walters, Pascoe, Pugh, Freeland, Jaffray, Lord Albert Clinton, Messrs. Weld, Fairfax, Hutchinson, Atkinson, Brabazon, Law, Hazel, Needham, Gibson, Abbot, Smith, Nottidge, Chambrè, Forder, Smart, Bird, Giles, Rust, Compton, Russell, Thompson, Mitchell, Haswell, Ellis, Hawes, Calder, Hebden, Tully, Hyman, Milman, Hough, Dugdale, Coddington, Gissing, Lindeman Bancroft, Campbell, Lambert. 346 gentlemen have passed from this Establishment as Naval Cadets, including 116 under the Admiralty Regulation of 23rd February, 1857.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, officers who had read at this Establishment have twice come out first on the list.

Apply to Captain LENDY, Sunbury, S.W.

EDUCATION.—BRIGHTON.

FRENCH, GERMAN, AND CLASSICAL SCHOOL, 15, Eaton Place, Kemp Town.

PRINCIPAL—MR. L. W. SCUDAMORE, B.A.

Pupils prepared for the Army, Civil Service, Oxford and Cambridge Examinations, &c. French and German constantly spoken. Terms moderate. References to the friends of pupils, many of whom have taken high places at the above Examinations.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

MILITARY TUITION.—PUPILS under 16 years of age PREPARED FOR THE ARMY and other Examinations by a Graduate of much experience and success in teaching. Terms very moderate. Resident foreign and other masters. For particulars, address F. G. L., Mr. SIMPSON'S Library, 31, King's Road, Brighton.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"NEW GUN.—Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times.*

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

RIFLED CANNON.—The Patentee of the latest improvement in the construction of Cannon, and which improvement has been adopted by Her Majestey's Government, is willing to supply British Colonies or Volunteer Corps with guns of the newest pattern at a price varying slightly according to the size of gun, but averaging about 2*l.* per cwt.

The method of construction is equally applicable to the largest ordnance as to the smallest; to a mortar capable of throwing a shell weighing several tons as to the lightest mountain howitzer.

Manufacturers desiring licences under this Patent may apply to Messrs. CUNLIFFE & BEAUMONT, 43, Chancery Lane, W.C.; to W. BROOKES, Esq., 73, Chancery Lane, W.C.; to Messrs. ROBERTSON, BROOMAN, & Co., 166, Fleet Street; or to the Patentee, Captain BLAKELY, Holywood, near Belfast.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

REVOLVERS, GUNS, & RIFLES OF THE FINEST LONDON MANUFACTURE.

ROBERT ADAMS (Gunmaker to H. R. H. the Prince Consort), 76, King William Street, London, E.C., supplies, wholesale and retail, his PATENT REVOLVER, as exclusively adopted by H. M.'s War Department and the Indian Army; together with Military and Sporting Guns, Rifles, Breech-Loaders, Ammunition, and Appurtenances of every description.—Price Lists by post on application.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. DE LA COUR, 327, High Street, Chatham.

THE NEW REGULATION BRIDLE.

A. DAVIS,
MILITARY SADDLER,
33, STRAND, W.C., AND AT ALDERSHOT CAMP.

OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfit in Saddlery.

A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

TO OFFICERS IN HER MAJESTY'S ARMY AND NAVY.

MATTHEW WILDSMITH having been favoured with the patronage of many Gentlemen in Her Majesty's Forces has paid special attention to the production of a BOOT that should combine strength with ease and comfort. He is now happy to announce that he has succeeded in obtaining a leather specially prepared which he can with confidence recommend for military use, being light in weight, pliable, and very durable. Indian and Foreign Orders executed with despatch.—1, Sherard Street, Regent Street, W., rear of County Fire Office.

PRIZE MEDAL FOR VOLUNTEER RIFLE CORPS.

T. R. PINCHES & CO., of 27, Oxenden Street, London, S.W., have just completed dies suitable for the above, an impression of which in white metal can be had (with prices for the same in Gold and Silver), and forwarded to any part of the United Kingdom post free, upon application to T. R. PINCHES & Co., with a remittance for 2*s.* 6*d.* in postage stamps or otherwise.

ELKINGTON & CO. desire respectfully to call the attention of Regimental Messes requiring PLATE to their Manufactures, which may be obtained in great variety from their establishments.

LONDON: 22, Regent St., W., and 45, Moorgate St., E.C.
DUBLIN: College Green.
LIVERPOOL: Church Street.
Manufactory and Show Rooms, Newhall Street, Birmingham.

Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

JOHN SHERWOOD & SONS, LICHFIELD STREET, BIRMINGHAM, SILVERSMITHS AND ELECTRO-PLATE MANUFACTURERS. Estimates for Mess Plate and Canteens supplied by return post. Licensees for the manufacture of the Hydrostatic Urns as in use at the Camp at Aldershot.

A., care of Messrs. HALTON, Tailors, 4, Princes Street, Hanover Square, W.

PARISIAN PAPER HANGINGS AND INTERIOR DECORATIONS, at
JACKSON & GRAHAM'S, 35, 37, and 38, Oxford Street, W.

SUPERIOR BEDSTEADS, BEDDING, AND CHAMBER FURNITURE.

JACKSON & GRAHAM respectfully inform the public that they have largely extended this department of their business by devoting three spacious show-rooms (each 120 feet long) exclusively to the display of Bedsteads of various woods, with furniture en suite, of a superior class, together with Brass and Iron Bedsteads of every size and description. Illustrated price-lists of Brass and Iron Bedsteads and Bedding may be had on application.—Show-rooms, 35, 37, & 38, Oxford Street, Preston Place, and Newman Yard, W., adjoining.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,

JAMES COULSON & Co.,

Beg to intimate that their only London Depôt is at No. 46, PALL MALL, S.W.,

A few doors West of the Army and Navy Club.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especially for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARR, Chemist, 171, High Holborn, London, W.C., in bottles, 1*s.* each.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of CROSSE & BLACKWELL, 21, Soho Square, London, W.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission, Author of "Adulterations Detected." "The Urine in Health and Disease," &c.

Wimpole Street, 20th January, 1860.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE
THE FINEST STARCH SHE EVER USED.

Sold by all Chandlers, Grocers, &c., &c.

WOTHERSPOON & Co., Glasgow and London.

WE do not believe the Service is "going to the dogs"—still less do we think that the nautical Calibans who affirm the Navy has already arrived at the bottom of the canine inferno, have reason on their side. But we must admit that some portions of our organisation is not in an efficient or satisfactory condition. Over and above those special defects there tower great questions which affect all the Navies of the world, and of course possess most interest for us, to whom the spirit of naval supremacy is as the breath of our nostrils. Let us say it at once—the old Navy has perished; it is as obsolete as the triremes of Antony, or as the galleys of Dandolo! The navy which is now riding the seas is in its veriest infancy, and it is managed by infants who scarcely pretend to know their business. We do not wish to be misunderstood. The seamanship and courage of our men—the zeal and skill of our officers—are worthy of the best days of our Navy; though it would be ridiculous flattery to say that their position is relatively to that of other Navies as supereminent, and their absolute confidence as great as they were in the days of Howe or Nelson.

We have old officers, not too old to command, who have seen hard fighting in their day. We have sailors who possess all the great qualities of seamanship, daring dash and discipline, which carried our flag over many a hostile blazon in all the seas of the world. But it strikes us that the application of these gallant officers, and of these excellent qualities to a modern steam-fleet, very much resembles the adaptation of stage-coachmen and full-blooded teams to locomotives and railway-trains. No living man can tell what the next war—and God avert it long—may bring forth; nor can the wisest veteran admiral, or the rashest young commander, venture to lay down with the least pretension to authority, the most general rules for the conduct, or predict with the smallest knowledge the result, of a general engagement at sea.

The great authorities are quite at variance. Some rely on ships of the largest size, with numerous *bouches-à-feu*. Others argue that such vessels are but gigantic slaughter-houses, to be sent to the bottom with their crews by the charge of steel-coated rams, or to suffer from the incessant converging fire of gun-boats, as the bull is tortured by the satellites of the matador in the ring. Some hold up their hands for frigates, or at least men of war of immense speed, with armaments of prodigious power on one deck. Others pin their faith on ocean gun-boats. There is scarcely one man in our Navy, however, who pretends he could work a fleet composed of all the varieties of vessels which we are now launching, or that his first professional experience would afford him sufficient knowledge to enable him to direct their combined operations with harmony and with the greatest result from each element. How different it was in the good old days! The admiral who commanded a fleet sent out "his eyes" to watch; his vedettes and patrols scoured the waves in front, flank, and rear; whilst the line-of-battle ships sailed majestically along—floating castles—indeed, according to our new notions, much more like structures intended for permanent stations on *terra firma* than for cleaving the waves and quick locomotion. They were obedient, docile old creatures—rather slow, but uncommonly steady, and very sure. There they went, in two lines, perhaps, or in any other order the fancy of the admiral or circumstance dictated, as orderly as a flock of wild geese—the flying jib-boom of one 74 just over the taffrail of another—handy and regular and biddable. At the signal they came up to the wind, went about, tacked, or fell off, just as the admiral pleased, and he could determine their positions within a few yards with tolerable certainty. When the frigates came in and reported an enemy, the British officer of those days could almost anticipate the result. Given the enemies' strength and position, he soon solved the problem of how to bring them to action, and to determine the adequate number of prizes. Frigates attacked each other, did outpost work, cutting out, general marauding, and coast duties with energy and spirit; but the bravest captain in the fleet never dreamed for a moment of tackling a regular built line-of-battle ship.

In action the most skilful manœuvres of the admiral might, indeed, be frustrated by the big ships becoming unmanageable, owing to loss of yards and masts; and a fortunate frigate might enjoy the pleasure of raking an adversary, deprived of his steerageway by similar accidents: but all these things were *cæteris paribus*. Now a fleet cannot go to sea without the occurrence of collisions in moderate weather, which are ascribed to the unhandiness of the ships and young lieutenants, and crews from the merchant service, not being able to perform "the most difficult duty" of sailing their ships in long, dark nights in what are called narrow waters. The circumstances brought before the public by a letter in the leading journal gave rise to a discussion in the House of Commons, to an inquiry and to a correspondence, no one of which, as far as we can judge, is at all satisfactory or assuring. The excuses which have been urged for the two serious collisions which occurred amount in fact to this—that either the officers in command were careless, or that they were ignorant of the qualities of the ships. If we admit that long, "unhandy" ships, like the Diadem and Mersey, are difficult to manage under sail in light winds, surely the officers were aware of the fact, and ought to have made allowances for it accordingly. If we be wrong in that proposition, it follows that we must expect to hear of these huge vessels smashing each other to pieces whenever they are in company in light winds. What they would be in action one may judge when he reads that under sail they cannot be prevented when in a fleet from running into each other, because they are so long and so unmanageable. It is bad enough—very distressing indeed in the face of such estimates as the Admiralty have presented to us—to hear of the partial failure of the plan for the reserve—of the "running" of ship's crews—of the disorderly conduct of some of our sailors,—without the addition of this proposition that a class of ships, from which so much was expected, can only be worked with safety under steam, that they are not handy under canvas, and that in fact they could not be relied upon for smart manœuvres, or for keeping up long port blockades.

It is a painful thing to see a generous steed, which, in the vigour of his years, has won all the great prizes assigned by his country to courage, speed, temper, and training, attempt in vain to accomplish in his old age feats which would have tasked to the utmost the energies of his famous youth. Such a spectacle was afforded to the House of Commons on Tuesday last by General Sir de Lacy Evans. The distinguished veteran endeavoured on that occasion to grapple with all the difficulties of the purchase question, and moved an address to her Majesty for its entire abolition at a definite period. He spoke for nearly two hours, and was tolerated by the House of Commons with that respectful forbearance which the memories of his past services were sure to obtain from such an assembly. We say tolerated, rather than listened to, because of the General's entire speech the members who sate nearest to him heard not ten sentences, and the Speaker, the rest of the House, and the reporters, not one; and when at last he sate down, his audience—if we may use the term—were in as complete ignorance of the arguments by which he had been attempting to enforce his views, as if he had never risen.

Under such circumstances, debate became impossible; for how were arguments to be supported or confuted which no man had heard? The interest of the evening, therefore, was confined to the speech of the Right Hon. the Minister of War, explaning the intentions of her Majesty's Government in respect to this much-vexed subject.

Mr. Herbert declared that it was the purpose of his colleagues and himself to bring forward a measure, adopting the recommendations of the Duke of Somerset's Commission; and limiting the operation of purchase to the rank of major; reserving the actual command of regiments to lieut.-colonels selected by the Commander-in-Chief.

How such a measure as this will work, time only can show. No doubt it will be a great incentive to regimental officers to distinguish themselves by caring for the interior economy and discipline of their corps, with such prizes as regimental commands in view; prizes which may not indeed be always assigned to the worthiest, but which, in these days of publicity, will hardly be assigned by the military authorities to those who have not proved themselves worthy. That the proposed change is a moderate one is probable from the fact that it satisfies neither party: the abolitionists rejecting it as not going far enough; the military party—represented by Colonel North—denouncing it as the thin end of a wedge which, in time, will shiver the purchase system to its core.

Be that as it may, it becomes our first duty to caution the officers of the Army to look well to its immediate effect, which must undoubtedly be to lower the value of regimental commissions to the regulation prices. A lieutenant or a captain of cavalry, called upon by his brother officers either to pay double the regulation for his next step, or to stand aside and let a wealthier candidate for promotion precede him, has hitherto been told that such has been the established usage of the corps in which he has the honour of holding a commission, and that whenever he retires he will be entitled to receive from his successor the high price which he himself has been required to disburse. He has been reminded, too, that in purchasing his steps at such an enhanced price, he has been purchasing certain and speedier access to the highest ranks and emoluments of the Service.

But the declaration made by Mr. Herbert on Tuesday night alters completely the position of purchasing officers, and materially narrows the advantages which they are likely to obtain by thus investing their money. As things now are, a man, having invested, say 9000*l*., in the purchase of a majority in a cavalry regiment, has done so on the calculation that that payment would secure for him, at no distant period, the lieutenant-colonelcy of his regiment; and, in due course, the grades of colonel and general, and the usual good things connected with those ranks.

But, as soon as Mr. Herbert's plan has been carried into effect, the purchase of a majority will ensure no such advantages; and it will depend entirely on the personal merits of the officer, aided perhaps a little by the interest which he can command, whether he rises rapidly in the Service, or whether he remains a major till the end of his days; and, if he be obviously incompetent, he certainly will never get the command of a regiment—pay what he will. It is clear, therefore, that the prices above regulation, of which we have lately heard so much, must henceforward be abated; and that incoming officers can no longer in fairness be asked to pay money for which no certain return can be offered to them. This may be bad news for those who actually hold commissions for which they have paid these fancy prices; but the facts are as we have stated them, and this ought to be fairly faced; and young officers, who in future choose with their eyes open to pay the large sums above regulation which have, up to the present time, been asked for and received, can have no reason to complain if they do not get them again when they retire. However hard Mr. Herbert's measure may bear upon individuals, if it succeeds in abolishing the noxious practice of paying large sums above regulation for promotion, it is impossible but that it should be beneficial to the working officers of the Army.

THE ARMY.

1st King's Dragoon Guards. Lieut.-Colonel Pattle, and not Lieut.-Colonel Sayer, as originally ordered, goes in command of the two squadrons ordered on service in China, each of which will consist of 4 officers, and 96 non-commissioned officers and men.

3rd Light Dragoons. Six troops are ordered to return to Dublin from Cork, where they were employed in aid of the civil power during the election. Captain Charles Talbot Goff is a candidate for Roscommon, for the vacancy caused by the unseating, for treating, of his brother Captain T. W. Goff, formerly of the 7th Dragoon Guards.

7th Hussars. Major Trevelyan and Cornets Kennard and Wombwell have joined the head-quarters of the regiment from England.

12th Lancers. The head-quarters had reached Futtehpore late in January *en route* for embarkation for England.

14th Light Dragoons. The head-quarters under the command of Colonel Scudamore and six troops, were to have embarked on board the ship Sydenham, on the 11th February; and C. and E. troops, under the command of Major Thompson, on board the ship Speedy, on the 13th. An unhappy affair has occurred at Kirkee. Mr. Hunt, formerly sergeant-major in the 14th Dragoons, and now partner in the firm of Hunt, Monnett, and Co., of Poona, discovered by means of an intercepted letter that Cornet William Sandys Browne of his former regiment had seduced his wife. Hunt went to the officer's house, and after an altercation, in which the seducer showed himself equally insolent and mean-spirited, shot him in the chest. Browne is now out of danger. Hunt has had the universal sympathy of all acquainted with the details of this sad occurrence. Cornet Browne has endeavoured to avoid giving evidence against Hunt, making a condition that the latter will seek no civil remedy against him.

15th Hussars. A troop has been detached from Dublin to Castlebar, Mayo, in consequence of some disturbances in that neighbourhood.

17th Lancers are moving through Saugor and Nursingpoor to relieve the 12th Royal Lancers at Secunderabad, but the route which the authorities have given them is rather Indian or Irish, or whatever is most tortuous. They will march from Saugor to Nursingpoor. So far so good. But from Nursingpoor they are to retrograde northward to Jubbulpore, in order to proceed to Kamptee instead of striking the Kamptee road at Dumah, some marches shorter. Captain Macartney is in command of the depôt at Maidstone.

Royal Artillery.—Arrangements will shortly be made for the erection in front of the Royal Artillery Barracks at Woolwich of a monument to the memory of the officers of the corps who fell in action during the Russian war.

The following general regimental orders, signed by Colonel C. Bingham, deputy adjutant-general, have been received at head-quarters of the Royal Artillery, Woolwich, from the Horse Guards:—

"With reference to the circular memorandum, dated Horse Guards, Dec. 5, 1859, recently promulgated to the Royal Artillery, it is hereby notified for general information that every supply of regimental or necessaries received from Woolwich by a battery or detachment of Royal Artillery at home or abroad must be examined and reported upon by a board of officers, as directed in the general order of April 1, 1859. As, however, the materials composing the tunics, jackets, and trousers, and all other articles of clothing and general necessaries for the Royal Artilery, are regimentally inspected and approved by officers of the corps previously to being received at Woolwich, the inspection, when received by a battery or detachment, will have reference only to the state of the articles, their being free from injury by moth, damp, or in packing, and transmission to their destination; also the articles being complete and correct in number; and for this purpose a board of artillery officers in the first instance will be sufficient. It must, however, be distinctly understood that no article can be condemned for any cause except by a reconstituted board of one artillery officer, one officer from another corps, and a military store or commissariat officer."

The Secretary of State for War has directed that for the future all miscellaneous disbursements, on account of the Royal Artillery, are to be submitted to the War-office, through the paymasters of the respective brigades, for a special authority, before they are included as charges in the public accounts, as is the practice for all similar expenses for the line.

A detachment of 55 gunners, belonging to the depôt brigade of Royal Artillery, left Woolwich on Monday for Gibraltar, and other detachments are under orders for Malta and Corfu.

Major Rogers, Royal Artillery, is ordered to join his battery at Bermuda; and Lieutenant B. H. Forster is to proceed to Australia, to take up his appointment as aide-de-camp to Major-General Pratt, commandant of the forces in that colony.

A large detachment of drivers newly enlisted were yesterday ordered to be despatched from the depôt brigade to the encampment at Aldershot, and arrangements are being carried out at Woolwich for the reception of a large draught of service men from Aldershot and Shorncliffe, to complete the organisation of the 15th and 16th brigades to be formed during the ensuing month.

Royal Engineers.—Colonel Wulff, now commanding at Harwich, is to retire on full pay, vice Major-General Dixon, deceased. Lieut.-Colonel Laffan, late M.P. for St. Ives, is about to retire on half pay. Major White is ordered to the Cape of Good Hope to relieve Lieut.-Colonel Dill, who has returned home on sick leave. Major Barry's death on the coast of Africa leaves Major Leach, head of the Irish survey, first for promotion to lieutenant-colonel. These vacancies, together with the proposed augmentation of half a battalion, making eight battalions in all, will, it is expected, promote Brevet-Colonels Renwick and Broughton to the regimental rank of colonel; Brevet-Colonel Simmons, C.B., and Brevet-Majors Leach, White, Whittingham, Gosset, Baillie, and Collinson to the rank of lieut.-colonel in the corps; Second Captains Warren, Hon. J. Bury, Stotherd, Noble, Schaw, Heygate, Gordon, Fowler, Clarke, Brevet-Major De Vere, and Pelly, to captain; and Lieutenants Hewett, Mould, Carey, Gosset, Grant, Steward, Malcolm, M'Donnell, Wilson, De Montmorency, Hon. W. Le Poer Trench, Marindin, Wheatley, Sim, and Frankland, to the rank of second captain.

Captain Morrison has arrived from Barbadoes, and is now on leave of absence; Captain Siborne has been appointed to the London district, and has been succeeded in the command of the Royal Engineer Train by Captain Duff. Second Captain the Hon. J. J. Bury, returned from foreign service, is now on leave; Lieutenant Hamilton is under orders for the Mauritius; B. H. Williams, removed from Chatham to Dublin; Mulloy from Chatham to Belfast; Gun from Chatham to Devonport. Lieut. Warburton has left for New Zealand to join Capt. Mairis's Company.

Captain Cornes is a passenger from Tasmania by the incoming mail.

Major Ducane, now on duty at Plymouth, has received instructions to proceed to the West Indies.

1st Royal Regiment. Capt. Legge has arrived in England from Hong Kong, with invalids from various regiments.

6th—1st Battalion moves to Benares and Azimghur.

11th Regiment. Ordered from Aldershot to Devonport.

12th Regiment. Captain Queade, five officers, and 111 men have embarked for Sydney to join the 1st Battalion.

19th Regiment. Captain G. Forbes has arrived home from India in command of detachments of invalids.

20th Regiment. The Indian journals record a lamentable accident which caused the death of Lieutenant Holmes, 20th Regiment, at Gondah. It appears he was reading and smoking a cheroot at about one o'clock at night, in bed. His mosquito curtains were not burnt. Therefore it is supposed he got out of bed to light his cheroot, and in turning away set fire to his night shirt, which must instantly have blazed up, as he rushed into another room where an officer happened to be writing, calling for help, and enveloped in flames. The other officer instantly snatched up a *resai* from the bed, wrapped it round him, and extinguished the flames as quickly as possible, but not before he was burnt severely in several vital places. Every remedy was tried immediately, and there was some hope till eleven o'clock next morning, when he began to sink, and died without much suffering at 7 p.m. that evening. This ill-fated officer has had some miraculous escapes, and was struck by a rifle-bullet directly over the heart while in the trenches before Sebastopol, which glanced from his pouch-belt without injuring him.

27th Regiment. This regiment gave a grand ball at Umballah on the 19th of January, after their gallant comrades of the 87th had been presented with new colours by Lady Canning.

31st Regiment was to embark at Bombay on the 15th and 16th of February in the Earl of Clare for China.

36th Regiment. At Devonport, removes to-day to the Plymouth Citadel, and occupies the quarters recently vacated by the Royal Dublin Militia.

37th will remain at Ghazepore, and not go to China, as previously arranged.

38th Regiment. A letter from Roy Bareilly, Oude, of the 13th January, states that General Sir Hope Grant had arrived there, reviewed H.M.'s 38th Regiment, and expressed great satisfaction with the corps.

42rd Light Infantry. The regiment is on its way to Madras from Saugor. Lieutenant A. G. E. Morley has arrived in England from Calcutta.

46th Regiment. Extract from Garrison and Station Orders. By Brigadier Colin Troup, Commanding. Mooltan, Wednesday, Jan. 18, 1860.—"No. 41. Orders having been received for the march of H.M.'s 46th Regiment to Jullunder, the Brigadier commanding cannot allow that excellent regiment to quit his command without placing on record his high estimation of it. During a service of upwards of thirty-nine years in India, the Brigadier has had to do with many regiments, but with none that has given more universal satisfaction than H.M.'s 46th Regiment; he parts with them with the deepest regret, and he wishes each and all of them health, happiness, and prosperity, wherever they may go. The Brigader feels assured that the uniform good conduct of H.M.'s 46th Regiment will at all times elicit the admiration and good-will of whatever officer may have the honour of commanding it, and should the time come, he cannot doubt but it will prove itself as well behaved in the field as it has ever done in quarters, for, as a general rule, the latter always ensures the former."

Royal Marines. Colonel Holloway has arrived in England from China.

56th Regiment. Paymaster H. Finlay has leave to England, accompanying the invalids, viâ the Cape of Good Hope, *m.c.*

60th—1st Battalion remains at Fort William, Calcutta, until ordered home. The battalion has been in India since 1845, and has seen a very large amount of active service. The 2nd Battalion has been ordered for duty in China. It was to proceed from Benares by bullock train and rail to Calcutta without delay, embarking in the ships Minden, Hougomont, and Alfred.

64th Regiment. Under instructions from army head-quarters, the officer commanding H.M.'s 64th regiment has received orders to hold in readiness for embarkation 400 non-commissioned rank and file, with a proper complement of officers, for the purpose of proceeding to Aden to do garrison duty there. This will reduce the number remaining with the head-quarters of this distinguished corps at Kurrachee to about 330 men.

65th Regiment. One officer and 167 rank and file have left to join the head-quarters of the regiment at Auckland, New Zealand.

73rd Regiment remains at Dinapore for the present.

75th Regiment. Brevet-Major W. Brookes, has received the appointment of Military Storekeeper in Calcutta. The selection of this officer for the post, reflects credit on Government. He rendered eminently useful service during the mutiny; was at the siege of Delhi; with Colonel Greathed's column in the various actions at Allyghur, Agra, and other places which followed; with Sir H. Grant at Cawnpore; and afterward with Sir J. Outram at Lucknow.

76th Regiment. The band, at present stationed at Richmond Barracks, have presented the Master with a valuable silver snuff-box, manufactured by J. West and Son, College-green, to mark their sense of his great exertions and zeal in imparting to them a sound knowledge of music, as well as for his uniform kindness of manner. The box bears the following inscription:—"Presented to Signor J. Reggazoli by the band of the 76th Regiment, as a token of their high respect and esteem, 14th February, 1860." Lieutenant Hodges, who has just been promoted in this regiment from the 38th, has arrived from India in the Clarence troopship.

77th Regiment. Captain Green is appointed to the China Staff.

80th Regiment relieves the 43rd Light Infantry at Saugur.

87th Royal Irish Fusiliers were presented with new colours by the Countess Canning at Umballah on the 19th of January. The 7th Hussars, Carabiniers, 27th Inniskillings, and several native corps were present, and the ceremony was most effective. We hear from the depôt at Youghal that an affray took place between some of the 87th and the police during the Cork election.

88th Regiment. The detachment of the 88th Connaught Rangers, at Allyghur, is directed to join head-quarters, at Delhi, as soon as the general court-martial at the former station is over. Captain Hall, of the 88th, has been appointed Deputy-Assistant-Quartermaster-General at Saugur. A private of the 88th, who used violence to his superior officer, has been sentenced to penal servitude for eight years.

98th Regiment. Major Ellerman has received leave for twelve months, from date of giving over the details of the Jager corps at the Cape of Good Hope, and of his services being dispensed with by the Governor of that colony.

SHORNCLIFFE CAMP.

The works for draining the square or parade-ground of the camp under the superintendence of the Royal Engineers having been completed, working parties of the 47th Regiment and the 2nd Royal Cheshire have this week commenced operations for draining the square of the permanent barracks occupied by the Royal Artillery, situate in the north-east of the camp. Much inconvenience having arisen from the surface of the ground after the least rain being so saturated as to become a complete quagmire, the drainage will obviate this, and be a great boon to the occupants of the barracks.

A system of passes for dealers of all kinds has been in operation since the formation of the camp, allowing them to carry articles of necessary consumption for the use of the troops, and affording an easy check against improper persons trading in prohibited articles. Since the conviction of the mess-masters noticed in this journal last week, an order has been issued by the General in command abrogating the privilege, except in the cases of persons who supply milk and vegetabies. The distance of the camp from the towns in the vicinity makes this a source of much inconvenience to the soldiers, and very seriously interferes with a large and industrious class of persons who carry on the other necessary articles beside milk and vegetables. It is rumoured that the Excise have raised the question with the military authorities, on the grounds that persons dealing in this petty way ought to be provided with a hawker's licence, in addition to the pass issued by the Brigade-Major.

The Antrim artillery are now engaged in practise with 18-pounders at the martello towers in the locality of the camp.

Alteration in Court-Martial Rules.—Provisions having lately been made in the 12th section of the Annual Mutiny Act for trial of officers and soldiers of H.M.'s Army by courts-martial composed exclusively of officers of H.M.'s Indian Army, when necessary or expedient, H.E. the C.-in-C. is pleased to direct that the following alterations be made in the rules for the guidance of courts-martial, namely, that article 28, page 6, be altered thus: "Courts-martial for the trial of officers and soldiers of H.M.'s Army, or H.M.'s Indian Army, may when necessary or expedient, be composed exclusively of officers of either of those Services," and that the following words be erased from note 34, page 107, at lines 5 and 6, namely, "or entirely of officers of the East India Company's Service, in either case."

A new edition of the "Queen's Regulations" having been just published, a General Order has been received from the Horse Guards, directing all commanding officers to see that every officer under their command is provided with a copy.

The following General Order has just been issued to the Army at home and abroad by the Duke of Cambridge:—"His Royal Highness the General Commanding-in-Chief desires to call the attention of commanding-officers to the 38th Article of War, by which they are empowered to order school parade, and to enforce the attendance of soldiers at school.—By command. G. A. Wetherall, Adj.-Gen."

Government has authorised the staff salary of regimental instructors of musketry of H.M.'s Indian forces being fixed 60Rs. per mensem, in addition to horse allowance.

A party of 200 men and six staff sergeants, under the command of Colonel Hay, have left Warley barracks for Halleybury, near Hertford, the depôt at Warley being fully occupied.

Two of Captain Grant's military cooking-waggons were yesterday delivered over to the commandant of Woolwich garrison, Major-General Sir Richard Dacres, K.C.B., at the recommendation of the select committee of the Arsenal, with directions from the Minister for War to travel them a distance of 500 miles. Each waggon is said to be capable of cooking for 800 men.

A general order has been issued from the Horse Guards, directing that in future any alteration in the appearance of a soldier, either from accident, disease, cupping, or by his being marked with the letter "D," is to be noted on the back of his record of service.

The following are the sums of the various tenders for the erection of the stonework of the Crimean Memorial in course of building at Brompton Barracks:—Gillingham, 1,732*l.*; Foord and Sons, 1,690*l.*; Kelt, 1,645*l.*; Lucas, 1,620*l.*; Stump, 1,544*l.*; Holland, 1,493*l.*; Myers, 1,457*l.*; Kirk and Parry, 1,456*l.*; Mansfield and Sons, 1,435*l.*; Cubitt, 1,400*l.*; and Lee, 1,400*l.*

Mr. F. S. Shepherd, of the military-store department, Chatham, having been appointed to the store department at Gibraltar, the whole of the Ordnance *employés* have presented him with a farewell address, in which they regret his removal, and wish him every health and happiness in his new position.

Amateur Theatrical Performance by the Officers at Chatham.—The first of the amateur performances by the officers at Chatham, in the elegant theatre which has

Digitized by Google

been erected in the Royal Marine barracks took place on Wednesday evening last, and was attended with the most complete success. The interior of the building was brilliantly lighted, and every arrangement had been made for the comfort of the visitors, who were composed exclusively of the officers of the garrison and ladies and their friends accompanying them. The performance was attended by Major-General H. Eyre, commandant of the garrison, Major-General W. H. Eden, Colonel E. Rea, Colonel H. Sandham, together with upwards of 100 officers of the various corps quartered in the garrison. The band of the Royal Marine Light Infantry, conducted by Herr Kappey, occupied the orchestra. The pieces selected for performance were *Charles the Second* and *Lend Me Five Shillings*. The following were the officers who sustained the principal characters:—Captain the Hon. D. J. Monson, 52nd Light Infantry; Captain G. Wedderburne, 7th Fusiliers; Captain H. E. Savage, Royal Engineers; Captain C. J. Skerry, 81st Regiment; Captain C. L. A. Farmar, Royal Marines; Lieutenant F. Wright, 20th Regiment; Ensign E. Villiers, 43rd Light Infantry; and Assistant-Commissary-General A. Crookshank. The whole of the officers acquitted themselves admirably, the various characters being sustained in a manner far superior to that usually observed in amateurs. During the performance most of the actors were warmly applauded.

The War Department having decided on employing in the public establishments those wounded and disabled soldiers who have recently been formed into a body called commissionaires in the metropolis, the Commander-in-Chief, who highly approves the proposed plan, has issued an order directing that those commanding officers who may be in want of messengers or office-keepers are to apply to the Adjutant-General of the Forces, when a selection will be made from the commissionaires, one of whom will be appointed to the office required.

In the House of Commons on Monday, Mr. Sidney Herbert, on being questioned by Mr. H. Baillie respecting the Armstrong and Whitworth guns respectively, said that nothing could be more satisfactory than the trials which had taken place with the Whitworth gun; but that, although the range of the gun was greater than that of the Armstrong, and the aim nearly as accurate, still, that the difference between the two weapons was not so great as to warrant the Government in discontinuing the manufacture of the latter. It was, however, intended, as the more satisfactory course, to have a trial of both guns at Shoeburyness.

In accordance with the Army Estimates an increase in the number of hands employed at the several departments of the Royal Arsenal is to take place at the end of the present financial year, on a scale unprecedented since the period of the Russian war. The following additional hands will be added during the ensuing summer:—Armstrong gun factories, 2,589; laboratories, 1,154; carriage department, 352; inspector of artillery, 33; gas factory, 8; total increase, 4,136. The largest increase will take place in the gun factories, on the completion of the new factories now building, for the purpose of supplying rifled ordnance to the whole of the home and foreign stations. The number of men now employed in the gun factories is 810 only, but on the completion of the new buildings the number to be employed is 3,399.

A special order has been issued to the effect that all Volunteer officers presenting themselves in uniform may be permitted to see the Arsenal.

Colonel R. Rumley, the newly appointed Vice-President of the Council of Military Education, vice Major-General Cameron, has returned from his staff employment at Gibraltar, and will forthwith enter on the duties of his appointment.

Several of the Armstrong guns have been forwarded from Woolwich to Portsmouth. Two of them have been mounted at Fort Cumberland, the head-quarters of the Royal Marine Artillery, and others have been placed on board Her Majesty's ship Excellent, Captain R. S. Hewlett, C.B., the gunnery ship at the port.

DOWNING STREET, MARCH 7.

Her Majesty has been pleased to appoint Lieutenant-Colonel Andrew Beatty, R.E., to be a Member of the Council of the Island of Saint Helena.

WAR-OFFICE, PALL-MALL, MARCH 9.

6th Regiment of Dragoon Guards—John Fryer, Gent., to be Cornet, by purchase, vice Turner, promoted; March 9.

8th Light Dragoons—Francis John Roche Thackwell, Gent., to be Cornet, without purchase, vice Malcolmson, promoted; March 9.

7th Light Dragoons, Brevet Lieut.-Colonel William Dascon Bushe, to be Lieut.-Colonel, by purchase, vice Babington, who retires; Brevet-Major the Hon. Ivo de Vesci Twistleton Wykeham Fiennes to be Major, by purchase, vice Brevet Lieut.-Colonel Bushe; Captain Richard Shaw, from 9th Light Dragoons, to be Captain, vice Paulet, who exchanges; Lieutenant the Hon. Caryl Craven Molyneux to be Captain, by purchase, vice Fiennes; March 9.

9th Light Dragoons—Captain Charles William Paulet, from 7th Light Dragoons, to be Captain, vice Shaw, who exchanges; March 9.

15th Light Dragoons—Gerald Walker, Gent., to be Cornet, by purchase, vice Bentinck, promoted; March 9.

Military Train—Adjutant Thomas Mitchell, from half pay of the late Land Transport Corps, to be Quartermaster, vice McBride, who retires on half pay; March 9.

Coldstream Guards—Lieutenant and Captain Harvey Tower to be Captain and Lieut.-Colonel, by purchase, vice Halkett, who retires; Ensign and Lieutenant Frederick Horace Arthur Seymour, to be Lieutenant and Captain, by purchase, vice Tower; Edward Chaplin, Gent., to be Ensign and Lieutenant by purchase, vice Seymour; March 9.

3rd Regiment of Foot—Ensign Ernest Frederick Barnes has been permitted to resign his Commission; March 9.

4th Foot—Lieutenant Richard Alexander Law to be Captain, without purchase, vice Houston, deceased; Ensign and Adjutant Charles Frederick Bockman to be Lieutenant, without purchase, vice Law; Feb 17.

10th Foot—William Edgecumbe Rendle, Gent., to be Ensign, by purchase, vice Johnson, promoted; March 9.

18th Foot—Octavius Ridley Lawson, Gent., to be Ensign, by purchase, vice Poole, promoted; March 9. Francis Nathaniel Burton, Gent., to be Ensign, by purchase, vice Twining, promoted; March 10.

19th Foot—William Irvine, Gent., to be Ensign by purchase, vice Wells, promoted; March 9. James Gordon Moir, Gent., to be Ensign, by purchase, vice Bennett, promoted; March 10.

30th Foot—Frederick Watkins, Carlow, Gent., to be Ensign, by purchase, vice Knys, promoted; March 9. Frederick Dawson, Gent., to be Ensign, by purchase, vice Smyth, promoted; March 10.

31st Foot—Henry Jacob Henley, Gent., to be Ensign, by purchase, vice Farquharson, who retires; March 9.

32nd Foot—John Thomas Garwood, Gent., to be Ensign, by purchase, vice Foll, promoted; March 9.

33rd Foot—William Herbert Adams, Gent., to be Ensign, by purchase, vice Seagram, promoted; March 9.

34th Foot—Brevet Lieut.-Colonel Edmund Wodehouse to be Lieut.-Colonel, without purchase, vice Brevet Colonel Blachford, retired upon full-pay; Captain Francis Charles Murray to be Major, without purchase, vice Wodehouse; Lieutenant Robert Joseph Logan Crutchley to be Captain, without purchase, vice Skurray; March 9.

25th Foot—Herbert Bulkley Praed Praed, Gent., to be Ensign, by purchase; March 9.

26th Foot—The Honourable George Grimston Craven to be Ensign, by purchase, vice Manjin, deceased; March 9.

31st Foot—Arthur Annesley Yeo, Gent., to be Ensign, by purchase, vice Hamilton, promoted; March 9.

33rd Foot—Craven Charles Goring, Gent., to be Ensign, by purchase, vice Gore, promoted; March 9.

39th Foot—Henry Frederick Gaubert, Gent., to be Ensign, by purchase, vice Woodroofe, promoted in the 25th Foot; March 9.

41st Foot—Lieutenant James Baird to be Captain, by purchase, vice Lambert, who retires; Ensign Edgar Younghusband to be Lieutenant, by purchase, vice Baird; William Robert Maurice Wynne, Gent., to be Ensign, by purchase, vice Younghusband; March 9.

47th Foot—James Birney, Gent., to be Ensign, by purchase, vice Berkeley, promoted; March 9. William Robert Jervis, Gent., to be Ensign, by purchase, vice Hanley, promoted in 35th Foot; March 10.

51st Foot—Richard Reynell Drought, Gent., to be Ensign, by purchase, vice Lewes, promoted; March 9.

52nd Foot—Henry Lyttleton Fowys, Gent., to be Ensign, by purchase, vice Adair, promoted; March 9.

55th Foot—Alexander Jackson Clark, Gent., to be Ensign, by purchase, vice Faber, promoted; March 9.

63rd Foot—Thomas Colville, Gent., to be Ensign, by purchase, vice Knapp, promoted; March 9.

76th Foot—Brevet Lieut.-Colonel Collingwood Fenwick to be Major, without purchase, vice Brevet Colonel Gardiner, appointed Inspecting Field Officer of a Recruiting District; Lieutenant Charles Thomas Caldecott to be Captain, without purchase, vice Fenwick; Ensign Godfrey Trevelyan Faussett to be Lieutenant, without purchase, vice Caldecott; March 1.

85th Foot—Henry Chudleigh Wilmer, Gent., to be Ensign, by purchase, vice Urquhart, promoted; March 9.

86th Foot—Brevet-Major Harvey Wellesley Pole Welman, to be Major, without purchase, vice Brevet-Lieut.-Colonel Keane, retired on full pay; Lieutenant Augustus Nicholas Wilson, to be Captain, without purchase, vice Welman; Ensign William Saunders, to be Lieutenant, without purchase, vice Wilson; Sergeant Major John Francis Stephens to be Ensign, without purchase, vice Saunders; March 9.

93rd Foot—James St. Clair Drysdale, Gent., to be Ensign, by purchase, vice Fullarton, promoted; March 9.

96th Foot—Arthur Cadell Greenslade Leman, Gent., to be Ensign, by purchase, vice Durrant, promoted; March 9.

Rifle Brigade—Lieutenant Lewis Vaughan Williams, to be Adjutant, vice Blundell, who resigns the Adjutancy only; March 9.

BREVET.

Brevet Colonel Augustus George Blachford, retired full-pay 24th Foot, to be Major-General, the rank being honorary only; March 9.

Brevet Lieutenant-Colonel Giles Keane, retired full-pay 86th Foot, to be Colonel in the Army, the rank being honorary only; March 9.

The appointment of Lieut.-Colonel William Henry Miller, as Aide-de-Camp to the Queen, with the rank of Colonel in the Army, to be antedated to 26th April, 1859.

Quartermaster Adam McBride, retired upon half-pay Military Train, to have the honorary rank of Captain, under the Royal Warrant of 17th December, 1855; March 9.

The undermentioned promotions to take place consequent on the death of Major-General Redmond William Brough, on the 29th Feb. 1860:—

Brevet-Colonel Charles Ashmore, Lieut.-Colonel, half-pay 4th Foot, to be Major-General; March 1.

Lieut.-Colonel William Twisleton Layard, Ceylon Rifle Regiment, to be Colonel; March 1.

Brevet-Major Frederick Browne Russell, half-pay 3rd Dragoon Guards, Staff-Officer of Pensioners, to be Lieut.-Colonel; March 1.

Captain Samuel Cleaveland, Royal Artillery, to be Major; March 1.

1st Sussex Artillery Volunteer Corps—The Queen has been graciously pleased to approve of Lieut.-Colonel Joseph Estridge bearing the title of Captain Commandant of the above corps.

Summary of Experiments with Mr. Whitworth's Rifled-Cannon at Southport, showing the Mean Range and Deviatian of all the shots fired at each experiment.

Column A shows the number of shots fired at each experiment.
Column B shows their average range in yards.
Column C shows their average longitudinal, and D their average lateral deviation from a central point, according to the system adopted at Hythe.

ARMY CHAPLAINS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Permit me to say a few words in reply to Clericus; and they shall be but few.

General assertions are best met by facts to disprove them. He says, that if "Chaplains will go freely among the men, and talk and preach to them in a kind and friendly spirit, without attempting to 'come the officer' over them, they will have no cause to complain of want of attention or respect." Now, as a case in point, I am constantly among the soldiers; seeing them in hospital, at bible-classes whenever and wherever I can, and I have never treated them except with the utmost kindness. I am too fond of them to do otherwise. And yet these same individuals, men whom I know by name, and who know me well, will meet me, and not only not salute me as an officer, but make no recognition whatever. This one fact answers, as I said, your Correspondent's axiom. Of course, there may be differences in different stations. He speaks from his experience—I from mine. But, I think from what I have heard from others, that most will agree with me that, except in very small stations, not ten per cent. of the soldiers recognise a chaplain. Whether it is desirable they should, and whether a uniform would effect this, is another question. I have my own views on both these subjects; but my present object in writing is to prove, that no one person's experience in such matters is an infallible rule, and the most apparently incontrovertible axioms are overturned by one single contradictory fact.—I am, Sir, &c. L. E. R.

PAYMASTERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the new warrant for paymasters, relative rank of captain is given on appointment:

After five years' service as paymaster, the honorary rank of captain.

After fifteen years' service as a commissioned officer, of which ten shall have been as a paymaster, the honorary rank of major (but junior of that class).

Now, in the warrant of 2nd December, 1857, which regulates the pay, paymasters of fifteen years' prior service, commissioned and non-commissioned, of which at least ten may have been as a commissioned officer on full pay, are allowed to reckon it as equivalent to five years' service as a paymaster, and succeed to the increased rate given to that class. The new warrant appears to ignore this, so far as the non-recognition of past services in either capacity, for the honorary rank of captain. Thus, officers on an equality for pay, do not rank alike, and one of them, who had no former military service whatever, thus attains this position, before the other, who may be able to reckon not only a long period in the Army, but also a considerable part of it on active service abroad. This could easily be amended, by making the "or" of the warrant of 2nd December, 1857, in the second degree, applicable also to rank in the new warrant. ONE INTERESTED.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The recent warrant undoubtedly must be considered by the paymasters, as a great boon, with the exception of that anomaly remarked upon in your last week's impression; at the same time, it is, I think, to be regretted, that the Treasury has curtailed this measure of those pecuniary advantages which both the late and present Secretaries for War had recommended for adoption, 2*s.* 6*d.* additional pay to the depôt paymasters, and 5*s.* to the district, with the retiring allowance of 17*s.* 6*d.* and 1*l.* respectively. The day is not distant, I feel assured, when this will be conceded, so convinced am I of the present Secretary for War's disposition to do justice to all under his orders. The point, however, which I particularly wish to call attention to, and which I regret has been hitherto ignored, is this: there are many officers, of whom I am one, who have purchased their commissions, and have services of ten, fifteen, and twenty years, a few of whom have likewise completed a service of twenty years as paymaster, which entitles them, as it does all civilian paymasters, to the highest rate of pay allowed, so that for their previous service and the price paid for their commissions they absolutely receive no acknowledgment. The injustice of the case is so apparent, that I cannot help hoping some step will be taken to remedy it; the more so as I am able to point out that barrack-masters and even adjutants of militia are allowed to draw their half-pay, notwithstanding that the youth and short service of the latter hardly entitle them to any. A PAYMASTER OF TWENTY YEARS' STANDING.

York, March 6.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In reference to a letter in your last Number, signed "No Favour," as to the anomalous position of a paymaster, with the honorary rank of major—permit me further to observe that, as the rank of the medical officer is at all times relative only, the surgeon rather than the paymaster would appear the party to be considered in the junior position, although not expressed in the warrant for medical officers; otherwise what meaning can attach to the honorary rank of captain, to be attained by the paymaster after five years' service, during which his rank was *relative*.

I would further observe upon the case of Paymaster Twibill, 38th Foot, in last *Gazette*, that his honorary rank is dated 2nd of March. From this is it to be understood that paymasters are only to reckon as captains from the date of that rank? Hitherto they obtained choice of quarters, position on duty, and pecuniary and other advantages, as captains, with reference to their relative standings.

5th March. LOOKER-ON.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your last able publication you were pleased to observe in a short paragraph that Army paymasters have now very little to desire after the promulgation of the late warrant. You are right, sir, they have very little; but little as that is, what a pity you should not have had to say, they have nothing to desire.

A Correspondent has clearly pointed out the injustice of that objectionable clause, "junior of that rank;" and I cannot help raising my feeble voice to put in a word or two if you will permit me.

It is a customary saying, "when you do anything you had better do it well." It is a source of deep regret to many that the authorities had not this in view when they framed the late warrant. It was the subject of long and anxious expectation, seeing the advantages which had lately been conferred on other branches of the Army, more particularly the surgeons, who, once upon a time took their place with paymasters, but now, in most cases, precede them. Can you tell me for what good reason the paymasters are shut out of the relative rank of lieutenant-colonel *while serving*, and why should a combatant officer appointed to a paymastership, with 10 or 15 years' previous service, have to serve his 35 or 40 years in all before he can retire upon the highest rate of half-pay? Is this too much for paymasters to expect? No, sir, it just comes to "very little." Then I say, let the defect be repaired, and pour more consolation on many a disappointed old paymaster who was once a combatant officer; andalthough by leaving off parades and drills he thought he was serving himself, yet he served his country as well, and, for one thing, relieved the half-pay list.

I am, Sir, your obedient servant,

March 6. DISAPPOINTMENT.

Digitized by Google

THE NAVY.

ADMIRALTY, MARCH 5. — APPOINTMENTS. — Lieutenant F. C. B. Robinson to the Chesapeake (additional) for disposal.

Surgeons D. Pendrith to the Cordelia; Dr. A. L. Archer (additional) to the Chesapeake.

Assistant-Surgeons Dr. J. C. Messer to the Edinburgh; W. C. Fairbairn to Greenwich Hospital; P. Comrie (additional) to the Chesapeake.

Acting Assistant-Surgeons Dr. J. Ferguson to the Hawke; N. O'D. Parks (additional) to the Impregnable.

Midshipmen W. E. Fitzgerald and W. Birnington to the Mersey.

MARCH 6.—Mates G. B. Evans to the Nile, and J. H. Sidal to the Ariadne.

MARCH 8.—Lieutenant T. B. Horner to the Fisgard, 42, additional for surveying service.

Arachne was at Barbadoes Feb. 11th.

Atalanta was left at Barbadoes Feb. 11th.

Atlas, 91, building at Chatham, has several hundred shipwrights employed on her, in order that she may be brought forward for launching. The whole of the caulkers of the establishment are engaged caulking her.

Bacchante, 51, screw-frigate (new), sister to the Shannon, on Tuesday steamed out of Portsmouth harbour, in charge of Captain George T. Gordon, commanding the steam reserve at Portsmouth, and proceeded to the trial ground in Stokes Bay to make her official trial of speed at the measured mile. The trial was under the supervision of Mr. Dinnen, Admiralty inspector of machinery afloat, Mr. Murray, chief engineer of Portsmouth dockyard, and Mr. Murdoch, inspector of machinery afloat at Portsmouth. Mr. Moody represented the master-builder on board. Captain Harris, of Her Majesty's cadet-training ship Britannia, was also on board during the trial. Admiral Martin was among the visitors on board, the ship being fitted with a steering apparatus on his plan. The weather was all that could be wished for the occasion—smooth water, and the wind not exceeding a force of 2. The machinery and boilers worked remarkably well throughout, with a plentiful supply of steam. The Bacchante's engines are a pair of 300-horse power, each nominal, by Maudslay, Field, and Co., who were represented by Mr. Warrener, who had charge of the engines during the trial. The steering apparatus consists of a cross-head or yoke fixed at a certain angle sufficient to clear the screw well, and connected by two parallel rods with another cross-head, from the centre of which projects a lever or tiller, to which is attached in the ordinary manner the ship's wheel-ropes. The apparatus appeared to act admirably, and exhibited great power over the rudder. The ship's steering qualities also appeared to be good, and she made a complete circle under full steam in 7 minutes 21 seconds. The engines were stopped when at full speed, and then moved ahead in 13 seconds; stopped again, and moved astern in 14 seconds. The ship's draught of water was—forward, 20 feet 1 inch; aft, 22 feet 1 inch. Pressure of steam in gauge, 21; vacuum, 24; revolutions of engines, *maximum*, 55; mean, 54. Temperature in stokehole, 113; in engine-room, 54, on deck, 46. The common screw was used, with a diameter of 19 feet 4 inches, and a pitch of 25 feet. Six runs were made at the measured mile, giving the ship a speed of rather over 12 knots. It must not be forgotten, however, that the ship has yet to take on board the whole of her provisions, and powder and shell, and this, with the weight of her crew, their bags, and what other stores she may have to take on board before she can proceed to sea, must materially increase her immersion in the water, and undoubtedly will affect her speed; at the same time her screw has been only tried at one pitch, and in its old form. The ship proved very steady under steam, and the trial was considered by the different officials on board to have been of an extremely satisfactory nature.

Barrosa, 21, constructed on the same principle as the Jason, recently launched at Devonport, will be launched at Woolwich to-day. She will be floated round to the fitting-basin immediately afterwards, to receive her engines, of 400-horse-power, and, from her peculiarly sharp build, she is expected to have unusual speed. The preparations are to be complete, so that she may be in the river about 3 o'clock p.m. Her principal dimensions are :—Length between perpendiculars, 225 feet; ditto of keel for tonnage, 179 feet 7¼ inches; breadth extreme, 40 feet 8 inches; ditto for tonnage, 40 feet 4 inches; ditto moulded, 39 feet 8 inches; depth in hold, 24 feet 2 inches; burden in tons, 1,623 43-94.

Biter, gunboat, tender to the Blenheim, 60, screw, coast-guard ship in Portland Roads, arrived at Plymouth on Tuesday.

Biter, tender to the coast-guardship Blenheim, 60, Capt. F. Scott, C.B., at Portland, arrived on Tuesday at Plymouth. She is to be docked and repaired.

Brunswick, 80, Captain Ommanney, at Plymouth, the crew were paid off on Friday. The Marines, Marine Artillery, and seamen belonging to Portsmouth, took passage in the steam-tender Avon, G. Day, second master-commanding, which sailed the same afternoon. On Saturday the Brunswick was towed to her moorings in Hamoaze.

Bulwark, 91, screw steamer, has about 200 shipwrights employed on her, in order that she may be completed early in the approaching summer.

Buzzard was at Monte Video Jan. 31st.

Cameleon, screw-sloop, launched a few days since at Deptford, has been docked, to be coppered and completed for service.

Chesapeake. Preparations are being made for the intended distribution of an award for salvage services rendered to the treasure on board the Ava, between the 12th March and 26th July, 1858, by this ship.

Conqueror, 101, Captain Sotheby, in Plymouth Sound, was swung, and had her compasses adjusted on Friday week. On Saturday her crew were inspected by Captain Jerningham, of the gunnery-ship Cambridge; and she left Plymouth on Tuesday for Portland.

Cossack was at Carthagena Feb. 11th.

Curacoa has gone to the Falkland Islands from the river Plate.

Curlew. Preparations are now being made for the distribution of proceeds arising from a part of the cargo of the Russian vessel Lloviano, captured on the 29th May, 1855, by this ship.

Diadem. Some irregularities have occurred at Plymouth among the crew of this steam-frigate, 32, Capt. James H. Cockburn, now under repair in consequence of having been in contact with her Majesty's ship Queen. It appears that on the 31st of January last, when the frigate was at Portsmouth, the port watch was paid six months' wages (out of eight months due), and granted five days' leave of absence, which expired on the 5th of February. The 5th occurred on a Sunday, and only 14 or 15 out of, say 250 returned; nearly all the rest came back on Monday, the 6th, when the starboard watch was paid, and left for five days. Twenty-three among those who thus obtained leave are yet absent from the ship. The Diadem went from Portsmouth to Portland, where she remained a few days, and on Thursday, February 23, sailed with the squadron for Lisbon, but having lost her bowsprit just outside by getting in contact with the Queen, she put into Plymouth Sound on the 24th (Friday), and on Monday, the 27th, was placed alongside the hulk Endymion, in Hamoaze. It seems, that in consequence of so many having broken leave at Portsmouth, a certain amount of restriction was put on the liberty of the ship's company, which was granted only to petty officers having relatives at Plymouth, to those who returned regularly on the previous occasion, and to those who have what is termed "privileged" leave. The men say, that by Admiralty Order 30 of the crew of a line-of-battle ship are always allowed liberty every Saturday night in harbour, and 20 from a frigate. In practice on board the Diadem 10 have seldom left on a Saturday; more frequently only two or three, and those petty officers. To obtain this limited liberty, it is said to be always necessary, on board the frigate, to produce a letter from some real or supposed sick mother or sister, or to adopt some fictitious means repulsive to the feelings of any true-hearted and conscientious British seaman. This being the condition of affairs, when the crew of the Diadem observed that the crews of other ships under repair at Plymouth obtained their liberty, they delegated their petty officers to make application for wages (monthly allowance) and leave by night, watch and watch. Accordingly on Tuesday morning, between 10 and 11 o'clock, application was made, and the men alleged that they could obtain no distinct reply. At 12 they went down to dinner, and at a quarter past 1 the boatswain and his mates piped up as usual, "Hands fall in," but not a man stirred. Those on the main deck went quietly below, where it was all darkness, the scuttle-holes having been simultaneously filled with old bags, clothes, &c., and the lights extinguished. When the boatswain, his mates, the master-at-arms, or any other petty officer sung out to the crew to come along, the only response was a powerfully combined cheer, followed by grumbling demands for "Money and leave." The men were completely organised; no shots were rolled, and only one basin was broken by a youngster. This unfortunate condition of affairs having been reported to Captain Cockburn, the Marines—about 70—were ordered under arms, and sentries were stationed over the hatchways. The boatswain then piped, "Hands fall in on quarterdeck"—a call which was promply obeyed. The crew came up in an orderly manner and went aft, the petty officers in front. Captain Cockburn is reported to have rebuked them for their improper conduct, and to have asked why they did not come to him if they had any complaints. They replied that they had already complained, without effect, to the first lieutenant (Mr. Barston), and some in the rear said, "Money and leave!" "We want to be treated like men, and not like slaves!" The commander, on hearing these strong expressions, got in a more elevated position, and ordered those who uttered them to come in front, but no one appeared. It was hailing very severely at the time. Captain Cockburn then told the men that inquiry should be made as to the amount of wages due, on which they with some reluctance returned to their duty. The next day (Wednesday) two months' wages out of the three months due were paid to the well-conducted of one watch, and one month to the remainder, and they obtained leave for the night. On Thursday the other watch was paid, and had their liberty. It is stated that Captain Cockburn was so well pleased with the conduct of the Marines that he requested Captain Jolliffe to remit all punishments then in progress. Several seamen and five or six Marines, who obtained night leave on Wednesday and Thursday, had not returned to the Diadem on Sunday last.

Euryalus, 51, screw, Captain Tarleton, C.B., was on Thursday taken into the steam basin at Portsmouth for the purpose of having her boilers taken out. Her crew were paid wages and granted 14 days' leave ashore. Six of the junior officers passed their examinations in seamanship as mates, on board the Britannia training-ship, at Portsmouth, in a highly creditable manner. Mr. Long and Mr. Hope received first-class certificates; Messrs. Tupman, Greene, Hon. J. M. Yorke, and Gordon receiving second-class.

Firebrand, 6, paddle, Commander James M. Bruce (son of the Commander-in-Chief at Portsmonth), is receiving her crew and completing for sea.

Firefly, steam-vessel, Commander Taylor, under orders for the Mediterranean, will leave Greenhithe to-day for her destination, after receiving ammunition at Purfleet. She is bound for Malta, where she is to supply the place of the Tartarus, paid off by Captain Mansell, who will transfer his pendant to the Firefly, for surveying-service in the Mediterranean. The Lords of the Admiralty have forwarded to Commander Taylor a letter forwarded to Lord John Russell by Count Persigny, the French Ambassador, acknowledging, on behalf of the French Government, the services rendered by the crew of the Firefly in saving the crew of Blanche Marie, wrecked in October last.

Flying Fish, screw despatch-vessel, Commander Charles W. Hope, sailed from Spithead on Tuesday to join the Channel Fleet.

Forward was at Monte Video Jan. 31st., but was about to leave for the Pacific.

Grappler was at Monte Video Jan. 31st., but was about to leave for the Pacific.

Hannibal, 91, screw, Rear-Admiral G. R. Mundy, C.B., Captain M. Connolly arrived at Malta on the 25th ult., from Corfu, where she left the rest of the squadron under Admiral Mundy's command. After refitting, the Hannibal will proceed to Gibraltar.

Hero, 91, screw, Captain George Henry Seymour, C.B., which sailed from Spithead on Friday week to join the Channel squadron at Lisbon, put back on Saturday morning, with the loss of her fore-yard. She was ordered to proceed on her voyage when the damage was repaired.

Howe. The launch of this splendid line-of-battle ship was most successfully effected from No. 2 shed at Pembroke dockyard on Wednesday. From an early hour in the morning the sightseers poured in from the surrounding country. At a few minutes before 6 o'clock Miss Ramsay, daughter of General Ramsay, and niece to Captain George Ramsay, C.B., Captain-Superintendent of Pembroke dockyard, came forward, and, taking the gaily decorated bottle that hung at the vessel's bow, dashed it against the stem, and the christening of the Howe was an accomplished fact. At 10 minutes past 6 o'clock, p.m., just three minutes from the time the dog-shores had been knocked away, the Howe moved off, and, gliding grandly down the greased ways, gathering speed as she went, reached the water amid enthusiastic cheeers and waving of handkerchiefs, while the dockyard band played "Rule Britannia." As soon as she had gained a sufficient offing she was brought up, and the largest line-of-battle ship in her Majesty's Navy swung to her anchor for the first time. The Howe was designed by Rear-Admiral Sir Badwin W. Walker, K.C.B., Controller of the Navy. She was laid down in March, 1856, and owing to the press of work in all the Royal dockyards at that period, consequent on the Russian war, she was partly framed by superannuated shipwrights, re-employed for the occasion. She is a very beautiful model, and has been completed under the immediate superintendence of Mr. Henry Cradock, the present Master-Shipwright. Her figure-head is a three-quarter length figure of Admiral Lord Howe, in the old naval uniform, and is about 15 feet high. Her principal dimensions are as follows :—Length over all, 301 feet, 1 in.; length between perpendiculars, 260 ft.; length of keel for tonnage, 220 ft.; breadth, extreme, 61 ft.; breadth for tonnage, 60 ft. 2 in.; breadth, moulded, 59 ft. 4 in.; depth of hold, 26 ft. 4 in.; depth from taffrail to under side of keel, 65 ft. 9 in.; depth from top of figure-head to keel, 61 ft. 9 in.; burden in tons of ship, 3594; burden in tons of engine-room, 1842; burden in tons of builder's measurement, 4236; load draught of water when ready for sea, afore, about 24 ft. 9 in.; ditto, abaft, about 25 feet 8 inches; weight of hull when launched, about 3500 tons. Her armament will be as under :—Lower deck, 32 8-inch guns, 65 cwt., 9 feet long; middle, 30 8-inch guns, 65 cwt., 9 feet long; main, 32 32-pounders, 58 cwt., 9 feet 6 inches long; upper, 26 32-pounders, 42 cwt., 9 feet long; ditto, 1 68-pounder pivot, 95 cwt., 10 feet long; total, 121. Her complement of officers and men will be 1130. Her engines are of 1000 horse-power, and are made by Messrs. Penn & Son, of Greenwich.

Jasper. Mr. Nicholson, Master of this ship, was admitted as a patient at the Royal Naval Hospital, Port Royal, Jamaica, on the 21st of January, and four days afterwards was found drowned on the palisadoes. The Coroner's Jury returned a verdict to the effect that he was labouring under insanity at the time.

Leopard was at Maldonado by the latest advices from South America.

Madagascar was left at Rio by the last mail packet.

Mars, 80, Captain Strange, sailed from Spithead at daylight on Tuesday to join the Channel Fleet. A number of her were are reported absent.

Megæra, screw troopship, at Portsmouth, is ordered by the Admiralty to be fitted with Cunningham's patent top-sail for reefing from the deck. The whole of the screw troopships in Her Majesty's Navy, with the exception of the Himalaya, are now fitted on this principle.

Mersey, 40, screw, Captain Caldwell, has her upper yoke much worn, and is to be supplied with a new one, but is not to be detained for that purpose.

Mutine, 17, Commander William Graham, from Portland, arrived in Plymouth Sound on Wednesday evening.

Nelson, 91, screw, in the steam basin at Portsmouth, has again been placed under the steam crane to complete receiving her machinery.

Nile, 91, screw. It was discovered on Monday, says the *Plymouth Mail*, that two of the hemp cables of this vessel, at this port, had been maliciously cut by some miscreant on board. Every means are being used to discover the blackguard, and it is sincerely to be hoped with a successful result. Nothing less than the yard-arm would be a sufficient punishment for such a scoundrel; and we should think the crew, whose lives might have been imperilled by so foul a deed, would give Lynch-law to the perpetrator if they could discover him.

Oberon was at Monte Video Jan. 31st.

Osborne, Master-Commander Bower, has been taken into the steam-basin at Portsmouth for the purpose of having her old boilers taken out, and receiving new ones fitted with superheating steam apparatus.

Phaeton, 50, has been hauled into basin at Chatham to be masted and fitted for commission.

Racer was at Barbadoes Feb. 9th.

Sanspareil, 70, screw, Captain Wilmot, has left Plymouth for Pembroke, where she will leave 100 of her crew to assist in rigging the Howe, and then proceed to Ireland, where she will relieve the Amphion. Mr. Paul, assistant-master-attendant and a party of riggers from Devonport-yard, are also to be employed in rigging the Howe.

Scourge, 6, screw, Commander W. G. Jones, left Malta on the 21st ult. for Gibraltar.

Severn, 50, is ordered to be brought forward for sea. Her masts are to be put in immediately. She is to be rigged and fitted for commission.

Siren was last heard of at Bahia, bound for England.

Termagant was at Monte Video Jan. 31st., but was about to leave for the Pacific.

Topaz sailed from Valparaiso for Vancouver's Island on Jan. 16.

Torch, steam gun-vessel, launched at Blackwall on Thursday week, has been forwarded to Chatham Dockyard for completion.

Trafalgar, 91, screw, Captain Fanshawe, has gone into Plymouth harbour, and is to be placed in dock, to search for a leak supposed to be below the water line. John

Digitized by Google

Williams (1), belonging to this ship, was tried by court-martial at Plymouth on Wednesday for refusing on the 1st of March to obey the orders of John Fawkes, additional boatswain, and for striking William Rayfield, leading seaman, and George Green, captain of the foretop. The prisoner pleaded "Guilty," and was sentenced to receive 48 lashes, be imprisoned 12 months, and be dismissed from Her Majesty's service.

Trusty. Orders have been received at Chatham for the steam floating battery, Trusty, 14, which was so severely injured by the spherical shots from the Armstrong guns during the recent experiments, to be taken into dock to be thoroughly repaired and her defects made good. Several of her plates, which are of immense thickness, were completely riddled by the shots, some of which went completely through the sides of the vessel, the wrought-iron plates being fractured wherever they were struck by a shot. In consequence of the comparatively little resistance presented by these iron-plated floating batteries, no more vessels of that class are to be constructed.

Valorous was at Sacrificios Feb. 4th.

Virago, 6, paddle, Commander Dunn, at Devonport, is taking in stores for Queenstown, and after discharging the same at that port will proceed to Pembroke to assist in navigating the Howe, 121, screw, to Devonport.

Vixen was at Callao, by the latest accounts.

The Duke of Somerset will hold levees on the following Thursdays at twelve o'clock :—March 15, 22, 29 ; April 5, 19, 26; May 3, 10. Officers wishing to attend are requested to insert their names, stating their rank and seniority, either personally or through their agents, in a book left with the hall porter for that purpose.

Chatham Dockyards.—Efforts are being made at this establishment to complete three of the large vessels of war recently ordered by the Admiralty to be constructed, and bring them forward for launching during the approaching summer. These are, the Atlas, 91, the Bulwark, 91, and the improved screw-frigate Undaunted, 51, each of which has several hundred hands employed on them to hasten their completion. The Atlas is getting very forward, and will be the first of the three completed. This vessel will be one of the finest of her class belonging to any navy in the world; and her clipper-like appearance, as she lies on the stocks is the admiration of most of the first ship-builders of this country who have visited her. It is intended to arm her with the heavy Armstrong guns, and as her steaming capabilities are rated very high, she will be a most formidable object to encounter. The fine frigate Undaunted is building from the designs of Admiral Sir Baldwin Walker, K.C.B., and it is anticipated that she will be one of the most superior of our large 51-gun screw-frigates.

An Admiralty order has been received by Captain Goldsmith, C.B., directing that 10 additional apprentices are to be immediately entered at Chatham Dockyard, viz., 6 shipwrights, 2 ropemakers, 1 joiner, and 1 caulker.

The Lords of the Admiralty, feeling the importance that the Navy should be supplied with the best telescopes at a limited price, recently invited all the principal opticians in England to send in their specimens without name. After a most rigid trial, that made by Elliott Brothers, in the Strand, proved to be the one decided upon as the best, and this firm has consequently received the appointment to supply the Admiralty.

Admiralty orders have been received to get ready for launching, with all possible dispatch, the new screw frigates and corvettes now on the slips at Woolwich and Deptford. At the former yard the Bristol is in a very forward state ; the whole of her framework being complete. The Anson, 91, is nearly ready for launching.

The following appointments have been made at the Admiralty :—Lieutenant Loftus C. H. Robinson, to be Flag Lieutenant to Vice-Admiral Bruce, Commander-in-Chief at Portsmouth; Lieutenant F. M. Prattent, to the Centurion ; Lieutenant Arthur H. Gilmore, to the Donegal ; and Edward H. Stanton, paymaster, to the Falcon.

Iron-cased ships.—There are at present 4 iron-cased ships building by contract. Two of them of 6039 tons, and 1200-horse power, and two smaller of 3268 tons each ; the total cost for building being estimated at 1,355,807*l.*, including machinery.

Sailors' Home, Well Street, London Docks.—The monthly meeting of the directors was held at the above-named institution on Thursday, 8th inst., present—Admiral Bowles, C.B., the president, in the chair, Admiral Sir Henry Hope, K.C.B., Vice-Admiral Harcourt, Captain the Honourable Francis Maude, R.N., William Stuart, Esq., and William Gaussen, Esq. The secretary presented the accounts, by which it appeared that the number of boarders received into the institution during February was 580, and the total number since the opening of the institution in 1835 has been 111,358. Since 1st May, 1859, the large sum of 23,808*l.* 0*s.* 7*d.* has been remitted by sailors to their friends in the country, and 3654*l.* 17*s.* 7*d.* deposited in the Seamen's Savings Bank established by the Board of Trade. The object of the institution being to improve the habits and raise the character of seamen, a course of instructive and amusing lectures has been given weekly during the winter months in the adjoining school-room. It may also be stated that since the establishment of the Royal Naval Volunteer Reserve Force of Seamen, the directors have made the most strenuous efforts to make its benefits known to the sailors of the Port of London, and during the past months of January and February 53 efficient able seamen have been enrolled in that force at the Sailors' Home. The accounts of the Destitute Sailors' Asylum were at the same time submitted, by which it appears that since 1st January, 165 destitute seamen have been supplied with food, shelter, and clothing, and by these means have been enabled to resume their occupation at sea.

Coast-Guard Appointments.—Inspecting-Commanders: Commanders Walter J. Pollard to Kilrush, vice Dent, whose appointment has been cancelled ; William H. Jones to Carrickfergus, vice Elliott, removed. Chief officer : Lieutenant James H. McK. Robertson to command East End Lane station, vice Lindsey. Removal—Inspecting-Commander : Commander James E. Elliot from Carrickfergus to Swansea, vice Crewe-Read, period of service expired.

A NAVAL GOOD GRUMBLE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—The navy is suffering from an enormous surplus of effective and non-effective officers of the executive branches, and the question is, "What is to be done to remedy this state of things ?"

Young officers are constantly joining ; the higher ranks are at a stand-still, and there is no apparent chance of their moving on—consequently all the evils so long complained of must continue. Officers in the prime of life, with long and meritorious service, are begging unsuccessfully for promotion and employment year after year, whilst their proper places are filled or given to youths who have nothing to recommend them but inexperience and powerful influence.

Is the service in the navy to be a continued system of "Begging Letter Writing ?" Is an officer of the navy to be always subject to caprice, chance, or the influence of patronage, when soliciting advancement or employment, and always to be kept in a state of uncertainty ? Can an officer be said to belong to a service, or can he be expected to be zealous and take a lively interest in it under such circumstances ?

In the famous Leipsic article a just and truthful comparison is drawn between French and English naval officers on this particular point, much to the detriment of the latter, which I would strongly recommend to the notice of the Admiralty, the Queen, and country.

Better at once that some large and comprehensive scheme of reward and retirement should be adopted to suit all parties (to employ the efficient and retire the aged) than such injustice should be continued, and the naval officers reduced to a proper working number, than keep hundreds of officers and gentlemen hoping against hope, and wasting years of their best days in penury and idleness.

For such injustice as this England will some day reap the fruits, and I see no reason why this country should escape the inevitable consequences the pages of history have so often recorded, and a just providence has invariably decreed to those nations who neglect their public servants. The navy of England is said to be her right arm ; if so, it is the worst used limb in the body, and although enormous sums of money are voted for that arm, they go everywhere else except into that arm.

What is the use of iron frigates, Armstrong guns, &c., without officers and men to man them ?

What fool is there that has not seen enough on two minutes' consideration to see that these iron-cased rams are an entire gigantic humbug ?

And where is the sailor that will deny (excepting admirals and old post captains) that everyone is thoroughly discontented, disgusted, and dissatisfied with the whole naval system as it is from "clew to earing."

I am, sir, yours respectfully,

Buntline.

THE MILITIA.

Dublin.—The left wing of the City of Dublin Militia left Plymouth on Friday in the British and Irish Company's steamship Lady Eglintoun, Captain Bishop, for Dublin where the regiment will be disembodied.

First Devon Militia.—Captain John Walter Savile, late 2nd Bombay European Light Infantry, has been appointed Adjutant, Captain Pitman having resigned in consequence of ill-health ; the retirement of this much-esteemed officer, together with the cause, is a source of deep regret to Lieutenant-Colonel Davie and his brother officers. The sergeants of the Permanent Staff, anxious to show their esteem and respect for Captain Pitman, have presented him with a very handsome silver cigar case, and an address.

Prince of Wales' Own Donegal Militia. — On the departure from the corps of Sergeant-Major Greaves, the following address was presented to him, together with a substantial token of the esteem in which he is held :—"We the undersigned non-commissioned officers and men, desirous of showing our esteem and regard for Sergeant-Major G. H. Greaves, wish to offer him a small token of our appreciation of his many virtues by presenting him with a purse. During his service with us, his general demeanour has been of so gentlemanly and conciliating a character, that while he instructed us in the necessary military duties, he kindly bore with the inexperience of many of us—always making allowance for, and suiting his reproof or instruction to the abilities of the persons addressed ; thus rendering duty a pleasure, reproof wholesome, and instruction agreeable. As he leaves the regiment to better his position, while we congratulate him upon his success, we deeply deplore his departure from amongst us, sincerely hope that the same praiseworthy qualities which endeared him so much to us, may be equally valued by those among whom he is about to associate, and wish him and family every happiness. Peter Maxwell, Quartermaster-Sergeant, &c. &c."

The West Suffolk Militia will assemble at Bury St. Edmund's on the 30th of April for 27 days' training.

Warwickshire Militia—2d Regiment—John Thomas Watling, Gent., to be Ensign, vice Bunbury, resigned ; March 2.

3rd Regiment of King's Own Staffordshire Militia—Michael Foley, Gent., to be Quartermaster from the 26th day of October; Nov. 5.

2nd Regiment Royal Cheshire Militia—Arthur Wilfrid Bolton, Gent, to be Ensign, vice Salkeld, resigned ; Feb. 20.

Haddington, Berwick, Linlithgow, and Peebles Regiment of Militia Artillery—Captain Thomas Shairp to be Major, vice George Logan Home, promoted ; March 6.

West Suffolk Militia—Edward Michael Rogers, Gent. to be Lieutenant ; March 3. Her Majesty approves and accepts the resignation of Edward John Osmond Clarke, as Ensign in the above regiment.

The Expedition to New Zealand. — In accordance with orders received from the War Department, the expedition of Royal Engineers about to be despatched to New Zealand from Chatham will take their departure from Woolwich this day in the Nugget, which vessel has been chartered by the Government. The expedition, which is under the command of Lieutenant Warburton, R.E., will be absent from England several years, during which the engineers will be employed in making a survey of the colony, and in several engineering expeditions. The 6th company of Royal Engineers, now at New Zealand, will return to England on the arrival of the expedition,

VOLUNTEERS.

METROPOLITAN.

London Brigade.—The above corps, under the command of Lieutenant-Colonel Hicks, on Saturday last marched to the parade ground at the Horse Guards for the purpose of being inspected by his Royal Highness the Duke of Cambridge, colonel of the brigade. At two o'clock the corps in full dress uniform began to assemble at the Guildhall, every approach to which was crowded with persons anxious to catch a glimpse of the City brigade. After going through several military manœuvres, the bugle sounded shortly after three for marching order, and, accompanied by two excellent bands under the direction of Mr. Tutton, away they marched to the tune of "Annie Laurie." The brigade passed down Union-street, across the Blackfriars-road, down the New-cut. Arriving at the Victoria Theatre, much merriment was excited among the mob, from the fact that at that point the advance guard, numbering about twelve of the corps, turned to the right, and marched onwards to Waterloo Bridge, while the others crossed the Waterloo-road, and continued their way to Westminster-road, where the runaways, by doing a "double-quick march" through the York-road, were enabled to join their brigade. Just as the brigade arrived at Westminster Bridge, the rain, which had long been threatening, came down in torrents ; but it did not appear to cool their courage, as they proceeded to Storey's-gate, where they entered the park, amidst the cheers of the many people who had assembled. It was then expected that they would have drawn up in lines on the parade-ground ; but the Duke of Cambridge did not make his appearance, so the brigade passed on to Buckingham Palace, and then pursued its way up Constitution Hill, through Hyde Park, down Edgeware-road, and returned by the way of the New-road, to the City.

South London.—This corps assembled on Saturday, at three o'clock, at the Surrey Cricket-ground, Kennington Oval, and proceeded, under the command of Colonel Boucher, to march to Wandsworth, headed by the excellent band of the 1st Surrey Militia and the drums and fifes of the Fusilier Guards. About 180 members attended in uniform.

Queen's Westminster Rifle Volunteers.—On Tuesday the members of this corps dined together at Willis's Rooms—Lieutenant-Colonel the Earl Grosvenor in the chair, supported by the Marquis of Salisbury, lord-lieutenant of the county, the Hon. F. Byng, deputy-lieutenant ; Mr. Miller, M.P., deputy-lieutenant, Lord J. Butler, Sir J. Shelley, M.P., the Rev. Dr. Finch, Dean of Westminster, Chaplain to the Corps, and a number of other gentlemen well-known in Westminster. In proposing the health of Her Majesty the chairman felicitously alluded to the fact that they were not only bound to drink the health of Her Majesty as citizens but as soldiers serving as the Queen's Westminster Volunteers. The health of the Lord-Lieutenant of the county was responded to by the Marquis of Salisbury, who expressed his opinion that what he had seen convinced him that the Westminster corps would prove to be one of the first, if not the first, of the county. His lordship concluded by proposing the health of Earl Grosvenor, which was most rapturously received and briefly responded to. Lord James Butler, late of the 7th Fusiliers, but now of the Queen's Westminster Rifles, having acknowledged the toasts of the "Army and Navy," Mr. Elliot, chairman of the central committee, proposed "The Queen's Westminster Rifle Volunteers, and success to the Volunteer movement ;" and stated, though they had only been established about three months, they numbered upwards of 2000 effective Volunteers ; and he doubted not that within a few months they would rival the old Volunteer corps of their fathers and grandfathers sixty years since, when the Westminster Volunteers numbered upwards of 10,000. A variety of other toasts was drunk, and the company did not separate until a late hour. The musical arrangements, which were most excellent, were conducted by Mr. Dawson, of Westminster Abbey.

The Volunteer Guards. — The Hon. T. C. Bruce, Captain-Commandant.—The services of this corps having been accepted by Her Majesty, the committee are now enrolling members, and gentlemen of the required standard (six feet and upwards) who may be desirous of joining, should forward their applications without loss of time. This corps is established with a view to meet the requirements of men whose stature, being so much above the average height, renders their appearance in the ranks of ordinary sized corps somewhat out of place, and who would therefore otherwise be deterred from joining in the development of the Volunteer movement. The committee, while desirous to aim at making the Volunteer Guards a thoroughly efficient and permanent corps, are equally resolved on confining every item of expenditure and outfit within the most economical limits consistent with efficiency. The drills, as at present established, take place on Mondays at Allen's Riding Schools, Seymour Place, Bryanston Square, from 7 to 9 p.m. ; Wednesdays, at Hungerford Hall, Strand, from 5 to 7 p.m. ; and on Fridays at Hungerford Hall, Strand, from 7 to 9 p.m. Any information as to rules, uniform, drills, &c., may be had by personal application to the Committee on the evenings of drill at the above places and hours ; or by letter to Edward F. D., Walshe, the Hon. Secretary, Committee Rooms, 38, Conduit Street.

19th Surrey Rifles.—A meeting of the friends and supporters of this movement was held this week at Hawkstone Hall, Waterloo Road ; John Williams, Esq., in the chair. The Chairman said they were met to promote and encourage the formation of the Lambeth Rifle Corps. He alluded to the attempt which had been made by a committee to raise a Southwark and Lambeth Rifle Corps, but Lambeth was determined not to be tied to the smaller borough. At a former meeting nearly 300*l.* had been subscribed, and their respected member, Mr. Roupell, had equipped 240 men at his own expense (loud cheers). That gentleman had also, in the most princely manner, given two houses near Kennington Park for head-quarters (louder cheering) ; and the hon. gentlemen had accepted the invitation to become their colonel. Mr. Williams, the other member for Lambeth,

Digitized by Google

had doubled his subscription on hearing that Mr. Roupell had consented to become their commanding officer (cheers). They now mustered 300.

BERKSHIRE.

THE BERKSHIRE RIFLE CORPS.—The Lord-Lieutenant of Berks, the Earl of Abingdon, held a *levée* at Wytham Abbey, near Oxford, on Saturday, which was attended by the deputy-lieutenants of the county and the officers of the second corps established in Berkshire. The Volunteer rifle movement in the town and neighbourhood of Abingdon, has met with liberal support. Among the subscribers are Major Lloyd Lindsay for 50*l.* donation, and five guineas annually; Mr. J. S. Bowles, 10*l.*; Mr. John Aldworth, 10*l.* 10*s.*; Mr. J. B. Jenkins, Kingston, 10*l.* 10*s.*; Mr. Ballard, late Mayor of Abingdon, 5*l.* 5*s.*; Rev. T. Loveday, Ilsley, 5*l.* 5*s.*; Mr. Isaac Robey, Harwell, 5*l.*, &c. The donations now amount to nearly 300*l.*, and annual subscriptions about 100*l.* There are two companies at Reading, and a third is expected to be shortly formed.

CAMBRIDGESHIRE.

THE CAMBRIDGE UNIVERSITY CORPS.—The inauguration, as it may fairly be designated, of thn University Rifle Corps took place at Cambridge on Monday, by the swearing in of the members in th Senate-house. The day in the town was almost universally observed as a holiday, flags streamed from almost every window, and the church bells ringing merrily gave early note of preparation.

HAMPSHIRE.

SOUTHAMPTON.—On Thursday, 1st inst. a very interesting ceremony, in connection with the volunteer movement, took place in the splendid New Music Hall, Carlton-place. Major Lacy, in the name of Mrs. Algeo, presented the 3d company, of which Mr. Algeo is in command, with a very handsome silver bugle. Major Lacy addressed the officers of the corps and the men in most appropriate terms. He thanked Mrs. Algeo most sincerely, in the name of the company, for her kind and elegant present, and concluded his observations amid loud cheers. The bugle has engraved upon it a portion of the Southampton Arms, surmounted by two standards, with a suitable inscription.

PORTSMOUTH VOLUNTEERS.—At a meeting held at the Guildhall in this borough on Monday evening last, it appeared that Sir David Conyngham, Bart., who had been gazetted as colonel of the corps only a few days previous, had resigned. When it is remembered that Sir David was the only officer belonging to the corps, and that he had been gazetted with the sanction of the Marquis of Winchester, his sudden withdrawal from the regiment took everybody by surprise. It is rumoured, nay, stated openly, that his retirement is entirely owing to his disinclination to appear in the very distasteful uniform insisted upon by the noble Marquis of Winchester, who exercises what ought to be the graceful functions of the lord-lieutenant of the county. This outburst of their late colonel has left a vacancy, which rumour has assigned to Major Valancy, but it is anticipated that the Marquis of Winchester will exercise the same discretion in accepting any officers elected by the corps, as he has in adopting their uniform. It was supposed that the corps tired out by the obstinacy with which the Lord-Lieutenant stuck to his "sealed pattern," had given up all hopes of being dressed like soldiers, and had accepted the uniform insisted upon by his Lordship. But the resignation of the gallant Colonel would seem to infer that this is not the case. For the present it is difficult to say how the affair will terminate, except that it cannot be otherwise than detrimental to the corps. Indeed, some of the most efficient and influential members have withdrawn their services rather than continue to be mixed up with the "squabble." It may appear to many that it matters not how a Volunteer is dressed. But great allowance must be made for men who live in a garrison town like Portsmouth, upon the subject of uniform, where every regiment in the service is from time to time quartered. The Portsmouth Volunteers would often have to come in contact with the best troops of the Line, and for this reason alone some marked attention ought to be paid to their soldierly dress and appearance. Instead, therefore, of discouraging this praiseworthy desire on the part of the corps, it ought to receive the approval of those persons whose duty it is to raise the patriotic feelings of the people in the sacred cause of defending the country. It is therefore quite intelligible why an officer of Sir David Conyngham's keen appreciation of the ridiculous, chose rather to resign his command than to appear before the eyes of military critics as a Guy—at all events as a "Volunteer Guy." But independent of any considerations of this kind, the men are Volunteers, and are entitled to have an opinion upon the subject of the dress they are to pay for and wear, so long as the proprieties of the Service are kept in view. Moreover, many of the corps are "non-equipment" men, who wear uniforms paid for by their richer brethren in arms. And one of the most fatal objections to the light—singularly light-grey, insisted upon by the Marquis of Winchester, for their uniform is, that it stains readily, smuts with powder, and is fragile in texture, and, consequently expensive. This is a serious consideration for the "non-effectives," who will have to clothe and re-clothe their poorer comrades oftener than may be convenient. In other words, the "free equipment" men will not continue in the corps because the non-effectives or clothing members will be tired out by the continual purchase of new uniforms.

The dress which was first selected by the Portsmouth Volunteers unanimously was a rifle green of excellent quality, and a complete uniform of this cloth was made and submitted to the Governor-General of the garrison, Sir James Yorke Scarlett, and Colonel Somerset, and both of these officers approved of it as a soldierly equipment. Few persons, it is presumed, will question the judgment of these veteran officers, and whose approval only increases the regret everywhere felt that the uniform originally designed has been discarded to suit the whim of the Lord-Lieutenant of the county.

KENT.

WOOLWICH—ROYAL ARSENAL VOLUNTEERS.—We have read a statement to the effect that the field-officers of the corps which has been raised in the Arsenal will be appointed from the officers of the Royal Artillery, in which case it is said all the members—amounting to 1509—will resign, officers and men—simultaneously. This would be a very deplorable result, and we trust that the authorities will pay some consideration to the feelings of the gentlemen who raised the corps, and that the latter will not act hastily and perhaps unwisely.

SHEERNESS.—The drilling of the 13 corps of Kent Artillery Volunteers has commenced, and all the officers, including Captain-Commandant W. Braham Robinson and Captain John S. Harper, have received their commissions. In consequence of this corps being composed of persons belonging to the dockyard, the Admiralty have kindly lent them the band instruments which were formerly used in the Royal Dockyard Battalion, and were chiefly purchased by the officers of that brigade.

KENT RIFLE AND ARTILLERY VOLUNTEERS.—The Royal Arsenal Corps of Volunteers, in command of Colonel Tulloh, R.A., Superintendent of the Royal Carriage Department, which has been formed with a view of internally defending Woolwich Arsenal from foreign invasion, consists at present of upwards of 2000 effective men, divided into nearly equal numbers of rifle and artillery companies. The whole of the officers, with the exception of the staff, lieut.-colonels, and majors, have been selected by ballot, and appointed by Viscount Sydney, Lord-Lieutenant of the county, on the recommendation of the commandant. The officers of the rifle companies were on Thursday the 1st inst. approved by Her Majesty and received their commissinos. The Royal Carriage Department has supplied nine companies, seven in the rifles and two in the artillery, the captains being Messrs. Ellis Urquhart, Toms, Hare, Manifold, Chapman, Roberts, Hart, and Murphy. The Royal Laboratory, under the superintendence of Captain Boxer, R.A., has furnished 10 companies—nine Rifles and one Artillery, the captains of which are Messrs. Oram, Piper, Greensil, Thorpe, Forrest, Angus, Storey, Holliday, Davidson, and Tozer. Messrs. Elliott, Frazer, Hay, and Monk, are appointed captains of the four artillery companies belonging to the Royal Gun Factories, under the direction of Mr. Anderson; and Mr. Travers is named captain of the company belonging to the Military Store Department, under the superintendence of Captain Gordon. Each department has provided a band of brass instruments, all are progressing effectively, and drills are carried out with much vigour. The Woolwich Corps, the 4th Kent Rifles, consists of 88 active, energetic men, from 24 to about 40 years of age, professional and commercial residents of the town, the whole of whom have been sworn in before the Deputy-Lieutenant of the county, Sir T. M. Wilson, Bart. The officers of the corps are Lieutenant-Colonel Thorold (late of the 92nd Foot), Captain; Mr. Carter, Lieutenant; and Dr. Butler, Ensign. The Old Charlton Volunteer Rifle Corps, 28th company, was raised at Charlton in a single day, through the influence and personal application of Mr. G. H. Graham, who holds considerable property in the neighbourhood, and numbers nearly 100 effective members, exclusive of honorary members, who take no share in the drills. Although three weeks have barely elapsed since the company was originated, their appearance and progress in drill confer credit on all concerned. Their band consists of 16 brass instruments. The following gentlemen have received their commissions in the company from Her Majesty, viz.:—Colonel George Walkup Congden (late Royal Marine Light Infantry), Captain; Mr. George Hall Graham, Lieutenant; and Mr. W. Caryl, Ensign. A second company to this corps will be shortly organised. The senior officer of each battalion has received an invitation to dine with the Lord-Lieutenant at his residence in London on Wednesday the 7th inst., as a formal inauguration of the corps. An artillery corps is likewise in course of formation in the Dockyard. Fifty men belonging to the shipwrights' department have been enrolled, and numbers are expected to join during the week.

10TH CORPS, KENT ARTILLERY VOLUNTEERS.—1st Battalion. As Captains: Charles A. Ellis, J. R. Manifold, J. S. Greensill, J. H. Chapman, G. S. Murphy, S. E. Hare, R. W. Urzt, M. S. Hardinge. 7 Companies—1st Lieutenants: G. M. Japp, G. Child, H. Rutter, Charles Guy Pym, J. Kellow, J. Purcell, E. J. Amos. As 2nd Lieutenants: W. Lamerton, H. Morris, G. Smith, P. Wand, W. Smith, C. Coo, W. Rees.

26TH CORPS, KENT RIFLE VOLUNTEERS.—1ST BATTALION—1st, Captain William E. S. Oram, Lieutenant John Pittman, Ensign Robert Smith. 2nd, Captain Charles D. Piper, Lieutenant J. Smith, Ensign George Rowe. 3rd, Captain William J. Thorpe, Lieutenant John Farrell, Ensign Walter Keeble. 4th, Captain Robert Forest, Lieutenant John Henry. 5th, Captain Sumner Toms, Lieutenant William C. Butler. 6th, Captain James Davidson, Lieutenant George Rennall, Ensign Spiller. 7th, Captain William Tozer, Lieutenant David Campbell, Ensign Thomas Carlisle. 8th, Captain Everett Denton, Lieutenant James Liddell. 9th, Captain William Horrie, Lieutenant John Hay, Ensign John Douglas. 10th, Captain William Augus, Lieutenant William Bush, Ensign Budd. 11th, Captain John Holliday, Lieutenant Robert Donelly, Ensign James McNaught.

CANTERBURY RIFLE CORPS.—During the past week, the members of the rifle corps made their first public appearance, fully equipped in their regimentals, arms, &c. On Tuesday evening the 6th Company, assembled at 7 o'clock, and marched through the city, as far as Bridge, where they halted, and after partaking of refreshments, returned to Canterbury, and were dismissed. On Thursday evening the 5th Company assembled at the Corn Exchange, and then proceeded in the direction of Harbledown, returning by way of St. Thomas's Hill, where they stopped for a brief period, and refreshed themselves at the City of Canterbury. It was 10 o'clock before they returned to the city. Their appearance was certainly very creditable for the time they have been at drill, and their marching firm and soldier-like.

DEAL AND WALMER VOLUNTEER RIFLE CORPS.—Lieut.-Colonel Backhouse has been appointed commanding officer of this corps. A better choice could scarcely have been made, considering the practical experience of the gallant officer. The corps is drilled from 6·30 to 8 o'clock in the morning, every Monday, Wednesday, and Friday, at the Dockyard.

WILTSHIRE.

STEEPLE ASHTON.—Walter Long, Esq., M.P. for North Wilts, having liberally undertaken to equip 25 men as the nucleus of a local section of the 2nd Wiltshire Company of Volunteer Rifles, the required number has been entered on the muster roll. The addition of this latest enrolment swells the 2nd Wilts, or Trowbridge corps, to upwards of 90 members.

1st Norfolk Artillery Volunteers—Thomas Burton Steward, Gent., to be First Lieutenant; Thomas Matthews Read, Gent., to be Second Lieutenant; March 2.

4th Norfolk Rifle Volunteers—Frederick Palmer, Gent., to be Honorary Assistant Surgeon; Feb. 25.

7th Norfolk Rifle Volunteers—Lieutenant Charles Mortlock to be Captain; William Thomas Waite Wood, Esq., to be Lieutenant, vice Mortlock, promoted; Feb. 29.

8th Company of Dorsetshire Rifle Volunteers—George Pleydell Mansel, Esq., to be Captain; Robert Crawford Farquarson, Esq., to be Lieutenant Francis Tregonwell Johns, Gent., to be Ensign; Feb. 29.

7th Cornwall Artillery Volunteers—James Scott, to be Lieutenant Feb. 27.

6th Shropshire Rifle Volunteers—The Rev. William Henry Wayne to be Honorary Chaplain; Richard Thursfield, Gent. to be Honorary Assistant Surgeon; March 2.

7th Shropshire Rifle Volunteers — William Anslow, Gent., to be Ensign; March 2.

8th Shropshire Rifle Volunteers—Algernon Charles Heber Percy, Esq. to be Captain; March 2.

9th Shropshire Rifle Volunteers—William Field, Esq., to be Captain March 2.

10th Shropshire Rifle Volunteers—Sir Charles Henry Rouse Boughton Bart, to be Captain; March 2.

Staffordshire Rifle Volunteer Corps—7th Company—Robert Sherratt Tomlinson, Gent., to be Honorary Assistant Surgeon; Feb. 28.

8th Company—Robert Sherratt Tomlinson, Gent., to be Honorary Assistant Surgeon; Feb. 28.

13th Company—William S. Williamson, Esq., to be Captain; Feb. 26. Edward Williamson, Gent., to be Lieutenant; Thomas Brindley, Gent. to be Ensign; Feb. 27.

16th Company—Samuel Mayer Turner, Esq., to be Honorary Assistant Surgeon; Feb. 28.

17th Company—Frederick Turton Sparrow, Gent., to be Lieutenant William Aston, Gent., to be Ensign; March 1.

20th Company—William James Kite, Gent., to be Honorary Assistant Surgeon; Feb. 29.

23rd Company—Alexander Clement Foster Gough, Esq., to be Captain; George Singleton Tudor, Gent., to be Lieutenant; Thomas Ironmonger, Gent., to be Ensign, March 1.

26th Foot—Ralph Dickenson Gough, Esq., to be Captain; William Deakin, Gent., to be Lieutenant; Feb. 27.

7th West Riding of Yorkshire Rifle Volunteers (Halifax)—Joseph Moxon Kirk, Esq., to be Captain; Jan. 21. John Crossley Sutcliffe, Esq., to be Captain; Lieutenant John Richard Ingram, to be Captain, vice Akroyd, promoted; John Bailey Holroyde, Gent., to be Lieutenant; Charles Emmet, Gent., to be Lieutenant; Ensign Charles Fuller to be Lieutenant, vice Ingram, promoted; Edward Halgh, Gent., to be Supernumery-Lieutenant; Feb. 24. John Appleyard, Gent., to be Ensign; John Holdsworth, Gent., to be Ensign; Jan. 21. William Barstow, Gent., to be Ensign; the Rev. Charles Richard Holmes, M.A., to be Chaplain; Feb. 24.

10th West Riding of Yorkshire Rifle Volunteers (Huddersfield)—Thomas Pearson Crosland, Esq. to be Captain; Thomas Brook, Gent., to be Lieutenant; Thomas Brooke, Gent., to be Ensign; Feb. 24.

12th West Riding of Yorkshire Rifle Volunteers (Skipton)—Matthew Wilson, Esq., to be Captain; George Robinson, late Lieutenant 1st Duke of Lancaster's Own Militia, to be Lieutenant; Henry Alcock, jun., Gent., to be Ensign; Feb. 8.

15th West Riding of Yorkshire Rifle Volunteers (North Craven)—James Johnstone Luce, Gent., to be Honorary Surgeon; Feb. 23.

17th West Riding of Yorkshire Volunteers. Clare Rifles (Knaresborough)—Samuel James Brown, Esq., to be Captain; Charles John Radcliffe, Gent., to be Lieutenant; Ralph Ord Hodgon, Gent., to be Ensign; Feb. 27.

19th West Riding of Yorkshire Rifle Volunteers (Rotheram)—George Wilton Chambers. Esq., to be Captain; Arthur Hirst, Gent., to be Lieutenant; William Hirst, Gent., to be Ensign; Feb. 29.

22nd West Riding of Yorkshire Rifle Volunteers (Leeds)—John Robinson, Esq., to be Captain; John James Cousins, Gent, to be Lieutenant; George Irwin, Gent, to be Ensign; Feb. 29.

23rd West Riding of Yorkshire Rifle Volunteers (Burley)—William Edward Forster, Esq., to be Captain; William Macleod, M.D., to be Lieutenant; Edward Hirst Hudson, Gent, to be Ensign; Feb. 20.

27th West Riding of Yorkshire Rifle Volunteers (Huddersfield)—Bentley Shaw, Esq., to be Captain; John Haigh, jun., Gent., to be Lieutenant; George Henry Greenwood, Gent, to be Ensign; Feb. 28.

Lanarkshire Rifle Volunteers—19th Corps (Glasgow 2nd Northern Battalion)—The Rev. John Eadie, D.D., LL.D., to be Honorary Chaplain; John Mather, Esq., to be Supernumerary Lieutenant; March 1. Moncrieff Mitchell, Esq., to be Captain of the 41st Company; Alexander Bannatyne Stewart, Esq, to be Lieutenant in the 41st Company; Peter McBryde Stewart, Esq., to be Ensign in the 41st Company; March 2.

25th Company—Lieutenant John Ritchie Miller to be Captain, vice John Napier, resigned; Ensign Donald Anderson to be Lieutenant, vice J. R. Miller, promoted; Feb. 29.

38th Company—William Bowstead, Esq., to be Captain; Alexander Smith, jun., Esq., to be Ensign; March 1.

44th Company—Thomas Downie, Esq., to be Honorary Assistant-Surgeon; March 1.

53rd Company—William Sellar, Esq., to be Ensign; March 1.

60th Company—Duncan Macfarlan, Esq., to be Captain; Donald Campbell, Esq., to be Lieutenant; William Whyte, Esq., to be Ensign; Thomas Drysdale Buchanan, M.D., to be Honorary Assistant-Surgeon; March 1.

61st Company—Hugh Reid, Esq, to be Captain; George Munro Kerr, Esq., to be Lieutenant; Malcolm Coll McGregor, Esq., to be Ensign, March 1.

68th Company—Walter Montgomerie Neilson, Esq., to be Captain; Henry Martini, Esq., to be Lieutenant; Henry Lancaster Graham, Esq., to be Captain; March 1.

69th Company—George Thomson, Esq., to be Captain; John McLean McKendrick, Esq., to be Lieutenant; John Grant, Esq., to be Ensign; March 1.

70th Company—William Tod, Esq., to be Captain; William Hutton Inglis, Esq., to be Lieutenant; William Mackay, Esq., to be Ensign; March 1.

71st Company—James Murdoch, Esq., to be Captain; William Leckie Ewing M'Lean, Esq., to be Lieutenant; James Clark Bunten, Esq., to be Ensign; March 1.

2nd Gloucestershire Artillery Volunteers—Alfred Goold, Gent., to be First Lieutenant; Maurice Frederic Carter, Gent., to be Second Lieutenant; March 1.

10th Gloucestershire Rifle Volunteers—Herbert William Wood, Esq., late Lieut.-Colonel 4th Regiment Madras Native Infantry, to be Captain; Shapland Swiny, Gent., late Captain Royal Dublin City Militia, to be Lieutenant; Stanhope Templeman Speer, Gent., to be Ensign; March 1.

Gloucestershire Battalion of Rifle Volunteers—William Purnell Purnell, Esq., C.B., late Colonel 90th Regiment of Light Infantry, to be Lieut.-Colonel; Edward Andrew Noel, Esq., late Captain 31st Regiment of Foot, to be Major; March 3.

6th Company of Cheshire Rifle Volunteers—Francis Henry Barker, Gent., to be Ensign; Feb. 24.

9th Company of Cheshire Rifle Volunteers—Alfred Kershaw Sidebottom, Esq., to be Captain; William Bayley, jun., Gent., to be Lieutenant; Henry Algernon West, Gent., to be Ensign; Feb. 10.

3rd Company of Cheshire Artillery Volunteers—For Second Lieutenant Henry Pooley, read Henry Pooley, the younger.

10th Company of Rifle Cheshire Volunteers—Philip Stapleton Humberston, Esq., M.P., to be Captain; Henry French, Gent., to be Lieutenant; Edward Dixon, Gent., to be Ensign; Feb. 25.

8th Derbyshire Volunteer Rifles—Captain Haughton Charles Okeover to be Captain Commandant.

8th Sussex Rifle Volunteer Corps—Brian Barttellot to be Lieutenant; George Charles Joad to be Ensign; Feb. 23.

9th Sussex Rifle Volunteers—The Most Noble Henry Granville, Duke of Norfolk, E.M., to be Captain; Thomas Evans to be Lieutenant; Reginald Augustus Warren to be Ensign; Feb. 28.

St. George's Rifle Volunteer Corps—Gordon Maynard Ives, Esq., late Captain Coldstream Guards, to be Captain; Sir JohnEdward Harrington, Bart, to be Captain; John Chichester Knox, Esq., late Second Dragoon Guards, to be Captain; Charles Harley Savory, Gent., to be Lieutenant; Henry Bennett, Gent.

Digitized by Google

to be Ensign; Robert Lincoln Cocks, Gent., to be Ensign; the Rev. William Bentinck Hawkins, Clerk, to be Honorary Chaplain; Feb. 28.

West Middlesex Rifle Volunteer Corps—Charles Francis Compton, Esq., late Captain Retired List Madras Army, to be Captain; Reginald Howard Alexander Ogilvy, Esq., late Captain Forfar and Kincardine Militia Artillery, to be Captain; Feb. 28. Henry Thompson, Esq., to be Surgeon; Feb. 22.

London Scottish Rifle Volunteer Corps—The Most Honourable James Hamilton, Marquis of Abercorn, K.G., to be Captain; Septimus Edmundus Carlisle, Esq., to be Captain; James Henry Conway, Esq., to be Captain; Feb. 18. Now ready, in 8vo. with 150 illustrations, price 10s. 6d.

THE NAVAL CADET'S GUIDE, AND SEAMAN'S COMPANION, containing Practical Rules for Fitting and Placing Riggings, Managing Sails, &c., also Complete Illustrations of all Standing Rigging, the Knots, Bends, and *Hitches in use*, and a Catechism on Rigging Ships, Boat Sailing, Bending, Reefing, and Furling Sails, Working Anchor Gear, Manœuvring, &c. Used on board H.M. Training Ship Britannia. By GEORGE S. NARES, Lieut. R.N.

Portsea: JAMES GRIFFIN. London: LONGMAN & Co.

THE ARMY PRINTING OFFICE, 102 & 114, HIGH STREET, PORTSMOUTH.—HENRY LEWIS.—Company Ledgers, Pay Books, Order and Day Books, Defaulter Sheets, District and Garrison Forms.

DOUDNEY & SONS' RIFLE SUITS.—1st SURREY, 4*l.* 2*s.*; SOUTH MIDDLESEX, 4*l.* 10*s.*; RIFLE BRIGADE, 4*l.*—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s.* ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; *this superiority* of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' *Gentleman's* Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l.* 4*s.* Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l.* 12*s.* Mappins' Travelling Dressing Bag for Ladies, 4*l.* 4*s.* The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. *Manufactory*, Queen's Cutlery Works, Sheffield.

HERALDIC STUDIO, 4, OLD CAVENDISH STREET, W.—New Designs for Monograms and Armorial Bearings in every style. Arms, Crests, &c., found by sending Name and County. Sketch, 3*s.* 6*d.* Paintings, Seals, Dies, and every kind of Engraving, in a superior style, by D. T. BAKER.

N.B. Mr. BAKER's ten years' connection with the Heralds' College guarantees correctness and excellence of execution.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured *permanently* the moment it is touched by the dye. In cases at 5*s.* 6*d.*, 10*s.* 6*d.*, and 21*s.* at UNWIN & ALBERT's, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times.*)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.

[Late "Household Words" Office.]

THE ARMY AND NAVY GAZETTE IS SOLD BY J. MENZIES, Bookseller, Princes Street, Edinburgh.

WANTED FOR A RIFLE COMPANY, in one of the central counties, a person competent to undertake the duties of SERGEANT to the Company. He must have obtained a First-class Certificate from Hythe, and produce unexceptionable testimonials of character and knowledge of Drill and Duties from his late commanding officer. Apply by letter only to M.E.Z., RICE'S Library, Mount Street, Grosvenor Square, London, W.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 10, 1860.

The laboured thought and great experience which have been brought to bear within the last two years upon the question of the future of the Indian army, have, we believe, at last been moulded into a practical result. Its precise character will doubtless be very shortly communicated to the public, but some of its principal features have been recommended by such great authorities, by such palpable considerations of sound Imperial and Indian policy, that we cannot be very wrong in indulging in an anticipation of some of its more important points. The consideration of the question has been beset by difficulties of a character so varied and complicated, and the interests involved are so great, that the delay which has taken place may well be excused, however it may occasion anxiety to particular interests, and to individuals whose professional position is entirely dependant on the change.

Since the exhibition of disaffection among the European troops last year, the views of those who favoured the retention of a local force of this description have undergone considerable modification, while the case of the advocates of amalgamation was proportionally strengthened. Some persons in high authority in India have, we believe, come round to the more Imperial views; and we look forward to find that the Government have finally decided not to retain a local European army, but that all the white regiments garrisoning India should be regular soldiers of the line, officered as regards the future on the same system, and liable to the same reliefs, &c. as the present Royal regiments of infantry. There will, we believe, be no more native artillery maintained, and all will be the Royal Artillery. As regards the present officers, however, the promotion will go in each corps separately, and as if no amalgamation had taken place. The European cavalry of the Bengal army, now number little more than 1000 men, and we presume they will be formed into Queen's regiments of cavalry of the line with their present officers, and an infusion from the present Imperial cavalry service.

As regards the details of such an amalgamation as we hear is probable, of course there are many difficulties to be contended with. Perhaps the principal of these relates to the various funds the Indian army maintains and benefits by. An officer of the Indian forces who has subscribed to these funds must of course have his interests guarded, no matter how he may merge into a member of the Imperial army; and in this respect proper consideration for existing interests will be manifested. With this exception, however, it appears almost inevitable that for the future the Government itself must undertake the management and equitable distribution of these accumulations.

The future regulation of the Staff in India is not altogether a purely military question. Officers of the Army are employed in all kinds of functions, diplomatic, judicial, political, as well as military, and upon the general efficiency of that body must depend, to some extent, the future, and we hope, better administration of Indian affairs. At present, we find regiments with half their effective officers detached on various services, and instances have been known in which officers thus employed have come back to their corps on attaining the rank of command, having almost entirely forgotten the elements of their soldier's education. When officers seek for employment of this kind, it is time their regimental place should be filled; and we look forward to find, under the new regulations, a Staff corps organised for India, consisting of officers who, having served a certain time with their regiments, and being able to prove their fitness by undergoing a competitive examination, shall be found willing to give up regimental position for the superior pay and occupation of the Staff corps. Their promotion might be very well regulated by their tenure of office, and their practical discharge of its duties during a certain term of years. Officers of any regiments serving in India would be eligible, and thus a new and desirable profession, so to speak, would be thrown open to those of the military service who are able and willing to manifest their fitness.

We believe that the points to which we have thus briefly alluded are not unlikely to form part of the plan for the re-organisation of the Indian army upon an Imperial footing, and we are convinced that when the whole scheme comes before the public, it will be found that the most careful consideration has been given to the details of a measure in which such enormous interests are involved.

In the orthodox old almanacs which give us the feasts and festivals of the Church, the 7th of March is followed by a significant word "Perpetua!" So may it be! Let the ceremonials and rejoicings of that day prove the foundation stone of a tower of strength which shall endure as long as the glories and liberties of our Empire!

Encouraged by the head of the State—the fountain of all honour—received in her palace by her Majesty the Queen—cheered and encouraged with sympathetic words and kindly acts by the Chief of the Army, supported by Lords and Commons, rooted in the good will of the representatives of nearly every class of Englishmen, the Volunteers have now no enemy to fear, and no resistance, passive or active, to apprehend outside their own ranks, unless the great occurrence, the contingency of which has given the movement life, should arrive to test the worth, strength, and spirit of its offspring. Have the Volunteers, then, nothing inimical to their existence to dread? We had almost answered "No." After the proceedings of last Wednesday, there can be but one thing which can harm them or diminish their power—The danger comes from within. It is apathy alone they have to guard against; and it would grieve one to suppose that such a feeling could arise on the part of the Volunteers, who have set out on their course surrounded by unprecedented exhibitions of good feeling from the Queen and from the country. But, as the Duke of Cambridge pointed out, and as all their friends suggest, they must not relax their efforts. The nation relies on the Volunteers as a permanent defensive institution. It relies on them with confidence and with pride to be ready when the day of trial comes, be it near at hand or far distant.

Those who saw them in the streets on that dreary and ungenial day might well take pride in being the countrymen of the British Volunteers, when they considered that they were but the representatives of a force which can now be numbered by its myriads,—which has sprung up of its own free will, as it were, from the soil on which we tread. The Cadmus teeth of the threatend aggression and hinted invasion, were but sown, and up sprang legions of armed men. Let us have no "buts" or "ifs." Let us not hint any doubts as to efficiency, or hesitate dislikes as to uniforms. Let us accept the spontaneous act, and recognise in it at once the spirit of a great people determined to maintain their liberties, their laws, and their country intact. We have reason to believe and to know that not only did their countrymen feel proud of the appearance of the Volunteers, but that her Majesty was sensibly moved by the order, decorum, and graceful loyalty of the immense crowd of gentlemen who were presented to her, and that her fatigues—great as they must have been—were lightened by the pleasure which was afforded to her as the Queen of England by as grand a sight in its moral aspect as ever gladdened the eyes of a great constitutional sovereign, or touched the heart of a good and gracious woman. The millions of slaves of

SUPPLEMENT TO

THE ARMY AND NAVY GAZETTE.

No. X. SATURDAY, MARCH 10, 1860. GRATIS.

THE VOLUNTEER COURT.

THE great event of the week—the reception by the Queen of the Volunteer Officers, and the attendant festivities, passed off most successfully. It has been described as the celebration of the "Coming of Age" of the new defensive force, upon which the Country relies in any event that may occur demanding the development of the spirit and the bone and sinew of England, and no majority could be attained under circumstances more propitious. We append full particulars of the incidents of this most interesting and important ceremonial. Owing to the great number of presentations, over 2,300 in number, the lists published by our daily contemporaries are full of errors and omissions, which we are happy to be able to correct, having been kindly favoured with a list of the officers presented to her Majesty on Wednesday last—compiled with great care, and which we believe will be found correct.

THE QUEEN'S RECEPTION OF THE VOLUNTEERS.

Her Majesty the Queen held a Court yesterday afternoon in St. James's Palace, for the reception exclusively of officers of Volunteer Corps.

The officers began to arrive at twelve o'clock, and were conducted to the Drawing Room, Queen Anne's Room, the Guard Chamber, Banquet Room, and other apartments of the Palace, and were formed into companies.

Her Majesty the Queen and his Royal Highness the Prince Consort arrived from Buckingham Palace soon after two o'clock, attended by the Ladies and Gentlemen in Waiting.

Their Royal Highnesses the Prince of Wales and Prince Alfred, his Royal Highness the Duke of Cambridge, General Commanding-in-Chief, his Royal Highness Prince Frederick of the Netherlands attended the Court.

Her Majesty's Royal Body Guard of the Hon. Corps of Gentlemen at Arms was on duty in the State Saloons, under the command of the lieutenant.

The Queen and Prince Consort were attended by the Duchess of Sutherland, Mistress of the Robes; the Countess of Caledon, Lady in Waiting, Viscount Sydney, Lord Chamberlain; Earl of St. Germans, Lord Steward; Marquis of Ailesbury, Master of the Horse; Earl Spencer, Groom of the Stole to his Royal Highness; Viscount Bury, Treasurer of the Household, and Commandant, 38th Middlesex; Viscount Castlerosse, Vice Chamberlain; Lord Proby, Comptroller of the Household; Viscount Torrington, Lord in Waiting; Lord Waterpark, Lord in Waiting to his Royal Highness; Colonel the Hon. Sir Charles B. Phipps, Keeper of her Majesty's Privy Purse; Major-General the Hon. Charles Grey, Private Secretary to his Royal Highness; General Sir Edward Bowater, Groom in Waiting; Colonel F. Seymour, C. B., Groom in Waiting to his Royal Highness; Lord Alfred Paget (Clerk Marshal), Equerry in Waiting; Colonel the Hon. A. Hardinge, Equerry in Waiting to the Prince Consort; and Messrs. Phipps and Boyle, the Pages of Honour in Waiting.

Her Majesty wore a train of Dahlia velvet trimmed with point lace, the petticoat of white satin, trimmed with dahlia velvet bows to correspond.

The Queen wore a diadem of opal and diamonds as a headdress.

The Court was attended by Viscount Palmerston, First Lord of the Treasury; the Right Hon. Sidney Herbert, Secretary of State for War; the Captain of the Hon. Corps of Gentleman-at-Arms; Field-Marshal Viscount Combermere, Gold Stick in Waiting; Earl de Grey and Ripon, Under Secretary of State for War; Lieutenant-General Sir George Wetherall, Adjutant-General; Lieutenant-Colonel Sir William Topham, the Lieutenant of the Hon. Corps of Gentlemen-at-Arms; Major-General Sir Travell Phillips, Lieutenant of the Royal Body Guard of the Yeomen of the Guard; Major-General Forster, Deputy Adjutant-General; Colonel M'Murdo, Inspector of Volunteers; Colonel F. H. Seymour, Equerry and Groom of the Robes; the Lord Mayor, Major Harmar, Standard-bearer of the Hon. Corps of Gentlemen-at-Arms; Colonel Prince Edward of Saxe-Weimar, Aide-de-Camp to the Queen; Colonel Lord Dynevor, Colonel Adair, Colonel Wilson Patten, M.P., Colonel Steele, C.B. (Coldstream Guards), Colonel Sir T. Troubridge, Bart., C.B., and Colonel J. W. Gordon, C.B., Aide-de-Camp to the Queen; Lieutenant-Colonel C. Morris, C.B., Lieutenant-Colonel Luard, Major Hume, Major Nelson, and Major Harman, Assistant-Inspectors of Volunteers; Duke of Wellington, Lieutenant-Colonel Victoria Rifles; Marquis of Donegal; Lieutenant-Colonel Hon. Dudley de Ros, Equerry to his Royal Highness the Prince Consort; Colonel Howard Vyse, 2nd Life Guards, Silver Stick in Waiting; Sir William Martins, Gentleman Usher to the Sword of State; Hon. Spencer Ponsonby, Comptroller of the Lord Chamberlain's Department, the Adjutant of the Royal Body Guard of Gentlemen-at-Arms; Colonel Fitzmaurice, Adjutant of the Yeomen of the Guard; Colonel Airey, C.B., Captain of the Queen's Guard; Captain Macdonald, Exon in Waiting; Captain Parker Rickford, Exon of the Yeomen of the Guard; Major-General Digole, K.H., Lieutenant-General Sir Frederick Smith, K.H., Mr. A. Blackwood, Mr. C. Heneage, Colonel Stephens, Lieutenant-Colonel Home Purves, Captain R. T. Bedford, R.N., and the Hon. Frederick Byng, Gentlemen Ushers to the Queen; Sir A. Duff Gordon, Bart., Assistant Gentleman Usher; Rear-Admiral Blake (in Waiting), and Major-General Ridley, C.B., Gentlemen Ushers to his Royal Highness the Prince Consort; Lieutenant-Colonel Cooke, Secretary to the Captain of the Honourable Corps of Gentlemen-at-Arms.

The officers of volunteers were joined in the Drawing-Room by the following Lord-Lieutenants of their counties, who accompanied them to the Throne Room, and introduced them to the Queen. In the absence of the Lord Lieutenants they were introduced by the Under-Secretary of State for the War Department.

The Earl of Abingdon, Lord-Lieutenant of Berkshire; Lord Carrington, Lord-Lieutenant of Buckinghamshire; the Earl of Hardwicke, Lord-Lieutenant of Cambridgeshire; the Marquis of Westminster, Lord-Lieutenant of Chester; Lord Vivian, Lord-Lieutenant of Cornwall; the Duke of Devonshire, Lord-Lieutenant of Derbyshire; the Earl of Shaftesbury, Lord-Lieutenant of Dorsetshire; shire; the Earl of Ducie, Lord-Lieutenant of Gloucestershire; the Marquis of Winchester, Lord-Lieutenant of the county of Southampton; Mr. Philipps, M.P., Lord-Lieutenant of Haverfordwest; Earl of Verulam, Lord-Lieutenant of Hertfordshire; Viscount Sydney, Lord-Lieutenant of the county of Kent; Marquis of Exeter, Lord-Lieutenant of Northamptonshire; Duke of Newcastle, Lord-Lieutenant of Nottinghamshire; Duke of Marlborough, Lord-Lieutenant of Oxfordshire; Viscount Hill, Lord-Lieutenant of Shropshire; Lord Portman, Lord-Lieutenant of Somersetshire; Lord Hatherton, Lord-Lieutenant of Staffordshire; Earl of Stradbroke, Lord-Lieutenant of Suffolk: Earl of Lovelace, Lord-Lieutenant of Surrey; Marquis of Lansdowne, Lord-Lieutenant of Wiltshire; Lord Lyttolton, Lord-Lieutenant of Worcestershire; Lord Wenlock, Vice-Lieutenant of the East Riding of Yorkshire; Earl Fitzwilliam, Lord-Lieutenant of the West Riding of Yorkshire; Earl of Zetland, Lord-Lieutenant of the North Riding of Yorkshire; Colonel Lloyd Watkins, M.P, Lord-Lieutenant of Brecknockshire; Earl Cawdor, Lord-Lieutenant of Carmarthenshire; Sir Richard Bulkeley, Lord-Lieutenant of Carnarvonshire; Colonel Myddelton Biddulph, Lord-Lieutenant of Denbighshire; Mr. Mansel Talbot, Lord-Lieutenant of Glamorganshire; Lord Mostyn, Lord-Lieutenant of Merionethshire; Lord Sudeley, Lord-Lieutenant of Montgomeryshire; Sir John Walsh, Lord-Lieutenant of Radnorshire; Earl of Eglinton, Lord-Lieutenant of Ayrshire; Earl of Fife, Lord-Lieutenant of Banffshire; Hon. G. S. Duff, Lord-Lieutenant of the county of Elgin; Lord Panmure, Lord-Lieutenant of Forfarshire; Lord Lovat, Lord-Lieutenant of the county of Inverness; Earl of Selkirk, Lieutenant and Steward of the Stewartry of Kirkcudbright; Colonel Hugh Baillie, Her Majesty's Lieutenant for Ross-shire; the Lord Provost, Lord-Lieutenant of Edinburgh; Colonel Fraser, Vice-Lieutenant of Aberdeenshire; and Viscount Eversley, Governor of the Isle of Wight.

The following officers, in the order of their respective counties, were introduced to the presence of the Queen:—

ARTILLERY.

An officer of the Westminster Volunteers thus describes the ceremony of the presentation to Her Majesty:—"The presentation—if it may be so called—was the simplest affair imaginable. I looped up my sword, but even this was unnecessary, for there was no taking off of glove, no kneeling, and no kissing of hand, as at an ordinary levee. All the formality was the following:—As the captain of each company approached the Queen he handed a card, containing his own name and that of the lieutenant and ensign accompanying him to a gentleman-in-waiting, who passed it to the Lord Chamberlain, this personage standing immediately to the right of the Queen. The Lord Chamberlain then read the name of each individual as he arrived before her Majesty. The Queen then graciously bowed, and the officer passed on, returning the royal condescension as gracefully as he might, and also, if he had sufficient presence of mind, bowing to Prince Albert, who sat to the left of her Majesty, the Prince of Wales being on the right. It was essential, in retiring from the royal presence, to back a few paces in order to double round the opposite side of the throne-room, the path to be traversed being in the form of a horseshoe. I could not help, for a moment, pitying Her Majesty, when I remembered that she would have to receive two thousand officers—(the greatest number ever known at a levee has been, I believe, one thousand)—the mere physical exertion of making two thousand bows must be frightfully exhausting. The Presence Chamber was, of course, filled with high court functionaries and a number of gentlemen-at-arms. On quitting this sanctum sanctorum of royalty you had to run the gauntlet of the gaze of the mass of Volunteers still waiting, and a number of spectators. It was fortunate that my presentation was over at an early hour, because it enabled me to get a little needful airing before returning home to write this, as notwithstanding all I had heard of the closeness and inconvenience of the suite of reception-rooms in St. James's Palace, it was exceeded by the reality.

VOLUNTEER SERVICE DINNER.

A banquet took place in St. James's Hall, under the presidency of His Royal Highness the Duke of Cambridge, the Commander-in-Chief, organised by the Secretary and Committee of the proposed Volunteer Service Club.

The great hall, with the exception of simple devices in flags ranged round the sides of the galleries, was devoid of any but its customary decorations. There were six tables, extending nearly the whole length of the magnificent chamber, at the top of these the principal table, and beyond it two others which were elevated in the orchestra. The guests numbered altogether about 680, and as nearly the whole of these were officers of Volunteer corps in their respective uniforms, it may readily be imagined that the effect was imposing, though much less glittering than an assemblage of officers of the regular Army.

We have seen complaints to the effect that statements were made to persons intending to dine by the managers of the dinner which induced them to purchase tickets and that those statements were not adhered to subsequently. It is alleged by the writers that they were informed extra accommodation would be afforded at a sort of *succursale* banquet on the basement story below the Hall, at which Lord Ranelagh was to have presided, but that no such entertainment took place, a fact we think on which those who intended to be present should rather be congratulated, considering the proposed site of the feast.

The galleries were graced by the appearance of many ladies in full evening dress.

At seven o'clock a flourish of trumpets announced the arrival of the Royal Chairman, who was loudly cheered on entering the hall.

His Royal Highness was supported on his right by the Lord Chancellor, and on his left by Earl Spencer. There were also at the chief table Lord Colville, Lieutenant-Colonel Hicks, Captain Mildmay, the Lord Provost of Edinburgh, Hon. Captain Bruce, the Lord Mayor, Viscount Valletort, Earl of Dudley, the Marquis of Abercorn, Earl de Grey and Ripon, Earl Grosvenor, Lord Elcho, the Lord Advocate, Hon. Colonel Lindsay, Colonel M'Murdo, General Tremenheere, Sir. G. Tremenheere, Mr. Deedes, M.P., &c. &c.

Grace having been said by the Rev. J. E. Cox, of the South Middlesex Militia, who appeared in the full uniform of the corps,

His Royal Highness the Chairman, who on rising was most enthusiastically greeted, said that in the discharge of his duty as chairman he had now to propose the first toast, and it was one which he had never the smallest difficulty in proposing at any great meeting in this country. But if there were a time or an occasion on which there would be even less difficulty than ordinarily, it would be on that occasion, when he saw around him so many gentlemen whom he had now the honour to address, and who had come there to prove their devotion and loyalty to their Sovereign, and their determination, at the sacrifice of their own personal comforts, to support the honour and interests of the country in any emergency. He would therefore not detain them longer by calling upon them at once to drink with him "The Health of Her Majesty," to thank her for the reception which they had met with that day in her palace, with which he was sure they were all delighted, and to offer her their homage as volunteer officers.

The toast having been responded to with repeated rounds of applause,

The Royal Chairman next gave "The Healths of his Royal Highness the Prince Consort, Albert, Prince of Wales, and the rest of the Royal Family," and in doing so mentioned that the Prince of Wales had become colonel of the Oxford University Volunteer Corps.

Earl De Grey and Ripon then rose and asked them to drink "The health of his Royal Highness the Commander-in-Chief of the British Army." He would not remind them of the enthusiasm which that toast had ever awakened amongst Englishmen, and they were particularly fortunate on that occasion in having the presence of his Royal Highness. The volunteer service were not the rivals of the Army, but only intended to supplement it, and aid its labours; and his Royal Highness had been pleased to mark his sense of the movement, not only by presiding over them on that occasion, but by consenting to become an officer of a Volunteer corps. He (Earl De Grey) could speak from his own official knowledge of the valuable assistance his Royal Highness had given to every measure calculated to give effect to that movement, sometimes under circumstances of no ordinary difficulty, therefore he was sure that not only the spirit of loyalty which animated every Englishman, but the respect and regard which they all felt for his Royal Highness, would induce them to respond most cordially to the toast which he had proposed.

The toast was drunk amidst great and prolonged cheering.

His Royal Highness, in replying to the toast, said—My lords and gentlemen, I rise to respond to the toast which has been so kindly and considerately given by my noble friend the Under-Secretary of State for War, who has personally taken such an interest, and so large a share in the organisation and extension of the Volunteer movement. Gentlemen, I have myself the honour and advantage of being selected as honorary colonel of a Volunteer corps, but I was, nevertheless, not a little surprised at the request made by my noble friend, that I should take the chair on this occasion. When I was first informed that this great meeting was to take place, and that a wish was expressed that I should preside, I certainly felt some diffidence in the matter as to my selection for that position. On reflection, however, it occurred that there would be no better mode of proving to the nation at large that the Army was delighted to see this movement going on than by the head of the Army occupying the chair on this occasion. It is with those feelings that I am glad now, in my red coat, as Commander-in-Chief of the Army, to meet the Volunteers of the kingdom in their dresses of various descriptions. Having had the pleasure and satisfaction of meeting you under the circumstances I have described, I must pay you the compliment of saying that a better "turn-out" of officers I hardly ever saw. I am delighted to hear what has fallen from my noble friend. He said that the Volunteer movement was not intended to supplant the Army, but that it was a reserve which might be rendered available for the defence of the country in any emergency. Gentlemen, that is entirely my view of the case. The position which you take is the very thing which will render the movement valuable: it is the very thing that is wanted; and it will, in my judgment, secure us from any danger which is likely to threaten us. On the part of the Army, therefore, gentlemen, I beg to thank you for the honour you have done us in drinking our health; and I accept with pleasure and satisfaction the voluntary assistance which, on all important occasions, I am persuaded you will give the Army. The speech of the Duke was received with the liveliest satisfaction repeatedly expressed.

His Royal Highness then, in very complimentary terms, proposed "The Navy," which was briefly acknowledged by Mr. W. H. De Carteret, Paymaster, R.N.

His Royal Highness the Chairman then proposed the toast of the evening—"The Volunteer Service"—and in doing so spoke as follows:—I can only congratulate you, gentlemen, upon the large assembly that I see around me this evening, for it is an earnest of what this movement really means. It is a proof, in my opinion, of your anxious desire that this movement should continue. To make it really valuable, of course it must be continuous. Were it not so, indeed, it would be utterly impossible to count with any degree of certainty upon the force which this country could put forward in time of need. It is undoubtedly essential, therefore, that the movement, if it is to be of any use at all, should be sustained. Now, gentlemen, some people object to the movement because it is an aggressive one. I consider that it is not at all aggressive. It is the last thing I should think of to put it upon any such ground. It is simply a movement of defence. It is a movement called for by the altered circumstances of the time, and the age in which we live. England was formerly very snug and secure behind her wooden walls, which took care that no one with hostile intentions could possibly come to her across the Channel from any quarter of the globe. Now, however, the improvements of science come upon us with such rapidity that we scarcely know from day to day what the next day will bring forth. Look at the Whitworth gun—look at the Armstrong gun. All these circumstances put together led us to the conviction that to be in a state of real comfort, ease, and security, it is essential—it is absolutely necessary—that a great country, a great empire such as ours, should be always secure against attack. Now, what are panics but a sense of insecurity. Gentlemen, we are not afraid of anybody—but, in order not to be afraid, we ought to be prepared. That, gentlemen, is just what we wish to be, and just what we are; and I am sure that I, for my own part, as well all everybody in this hall and everybody in this country, wie rejoice if our services shall never be called for, unless it be on some festive occasion like the present; but, on the other hand, if they should be called for more serious purposes, I am sure there is not one person here—there is not one in the country—who would not come forward and exclaim, "Here we are; come if you dare!" (A tremendous burst of applause). I cannot help saying that there could be no greater error than to allow the army to get into a state of inefficiency. That would be a great error, gentlemen, on your part. With your ordinary avocations you cannot devote much time to drill without great inconvenience, and therefore you cannot wish the army not to be maintained in a high degree of efficiency. The army is the first defence of the country, the militia is the next; the volunteer force is the reserve in aid of both these forces. (Cheers). There has of late been a great deal said about 'loose drill.' Loose drill is in fact very excellent drill. As a military man I look upon loose drill as a very difficult thing to master. In learning what use to make of this tree and that bush there is a great deal more than meets the eye at first sight, and I believe that until you can drill steadily it is impossible for you to drill loosely. Having thus characterised the position in which we relatively stand to the other portions of the military service of the country, I can only say that I have heard with great pleasure and satisfaction that this movement has taken root downwards, and that even our young friends in public schools are beginning to have drill. It is absurd to suppose that boys at school can be very useful as soldiers, but drill is the best mode of instilling into their minds those qualities which might make them useful to their country hereafter; and it is the only thing, moreover, which is likely to make the movement permanent. We are not, it is true, a military nation in the common acceptation of the word; and thank God we have no conception of any such distinguishing characteristic; but where is the nation which can boast of so much military spirit as ours? You have this great Volunteer movement; and, in addition to it, you must remember that the whole of our naval and military services are constituted upon the same voluntary principle. Gentlemen, I thought it might be agreeable to you that you should hear from me, as head of the Army, the view which I take of the great movement in which you are engaged, and I can only say, in conclusion, that I never spent a more satisfactory day than this in seeing what I did this morning and what is presented to me this evening. Let me only say further, that in entering this building I was received by a body of gentlemen Volunteers forming a guard of honour, and belonging to a corps of which I have the honour to be colonel, and I was very much struck by the clean, excellent, and accurate manner in which they turned out. When I come to think that this movement originated only a few months ago, when not one of you ever dreamt of becoming Volunteers, the efficiency you have attained is highly creditable to you. When we are told that we are not a military nation, it is really wonderful how suddenly and promptly you have embraced those military notions, which cannot be otherwise than advantageous to you under any circumstances, as well as to all associated with you. I cannot, gentlemen, conclude without complimenting my noble friend who will respond to this toast, for the ability, zeal, and energy with which he has performed his duties in connection with this movement. I give "The Volunteer Service, coupled with the health of Earl De Grey."

The drinking of the toast was followed by a remarkabl exhibition of enthusiasm and energetic feeling.

There are considerable discrepancies in the versions of His Royal Highness's speech given by the various morning papers. The leading journal's report puts a high compliment into the Duke of Cambridge's mouth to the militia acquirements, which we do not find elsewhere. His Royal Highness is there said to have used these words:—"Your function is not to take the place of the regular army, but to assist it, and I feel sure that the very best supplement of the regular army will be yourselves. There is the militia service, for which I have the greatest respect. I go down and inspect regiments of militia, and really when I see the line and militia regiments together I do not know one from the other. (Cheers.) These I call the first reserve of the army. The volunteer force, of which you are the officers, I trust will be the second reserve." (Cheers.) And in another passage, the Duke, according to *The Times*, said, "But it would be a great error to suppose that because I, the head of the army,

Digitized by Google

appear at a meeting of this kind, that the army is any way deficient for defensive purposes."

These are interesting and important observations from the Commander-in-Chief of the Army; and there is another in reference to drill, which is given in such a way as to deserve quotation, as it is differently rendered by most of the other papers. "I have a great idea that to make a good soldier a man must know his drill. If you do not know your drill, shooting, in my opinion, is nearly thrown away. I have heard a good deal of talk about loose drill; but depend upon it that you must first drill steadily. Drill steadily first, and then you may afterwards become loose, *degagé* riflemen."

The speech was delivered with great spirit and energy, and made a remarkable impression on the audience, many of whom referred to it repeatedly at the Ball in the evening.

Earl De Grey, in responding, alluded in eulogistic terms to the Volunteer movement, which he observed had received not only every encouragement from the Government, but also the seal of Her Majesty's approbation, and expressed an earnest hope that the Service would take its place by the side of the regular army, the militia, and the yeomanry as a part of the established and permanent military forces of the country. The Volunteer corps throughout the kingdom might now be fairly calculated at 80,000 men, and by the summer he had no doubt they would reach the vast number of 100,000 strong. That day they might be said to have come of age, and to have celebrated their majority. He wished to remind them, however, that their difficulties had only just begun, and that it depended upon the course they took in the future whether the movement would be worthy of England, or whether it was to make them the laughing-stock of the world. They had proved that a Volunteer force could be raised in this country, and it remained for them to show that firmness and solidity which foreign nations acknowledged to be characteristic of the English Army. It was the earnest desire of the Government to aid the movement in the important matters of discipline and drill, and for that purpose inspectors of Volunteers had been appointed under Colonel M'Murdo. With a view also to their proper military organisation, it was their intention to form the different corps into battalions, without, however, interfering with their independent existence, or their own internal regulations. The Government would be enabled to afford the assistance of experienced adjutants, paid by the State; and by the adoption of that plan, it was believed that the Volunteer corps would be available upon any sudden emergency.

The proceedings were brought to a close soon after ten o'clock, to enable the company to attend the ball in the Floral Hall, Covent Garden.

At intervals during the evening, the band of the Grenadier Guards, under the direction of Mr. Godfrey, played various popular airs; and Mr. G. Perren sang very effectively a ballad, "Great Britain's Riflemen," composed by himself for the banquet.

VOLUNTEER BALL.

In the evening this *fête* came off at the Floral Hall with all the *eclât* and brilliancy that might have been expected from its cause and occasion, as well as the high patronage which has attended it from the first period of its announcement.

Her Majesty's reception of the officers of the Volunteer Rifle Corps of the United Kingdom at the Court of St. James's yesterday morning imparted to this ball something of the character of a national acknowledgment of the Queen's recognition of her subjects' zeal and loyalty. In point of grandeur, numbers, and general arrangements, it far exceeded any similar celebration for a long time past, and can only be compared with the great entertainment given to the allied Sovereigns in Guildhall 40 years ago. The aristocracy followed the gracious example of Her Majesty, who was the first to accord her patronage to Mr. Gye's happy proposal of the *fête*. Although the largest covered space in London, and, it is said, the largest public building in the world adapted for such a purpose, had been selected for the ball, yet the manner in which the idea was received and the liberality and profusion of the patronage at once volunteered, rendered a great extension of space necessary, and this was effected by adding the Opera-house to the hall. The general character of the arrangements then stood as follows:—The ball-room proper was the Floral Hall itself; the supper-room—the basement or crypt of the hall; the refreshment-room—the stage of the Opera-house; the retiring saloons and lounges—the Opera-house itself.

The appearance of the hall as decorated fully carried out its picturesque title. It was a light and airy fabric, garlanded with flowers and lighted by diamond sparks. The delicate aërial tint and French white—the pervading colour of the building—supplied an exquisite background to the roses, happily selected as the sole material for ornamentation. The light vaulted roof was profusely garlanded with these flowers, red and white. The 16 graceful pillars that support it were each bound in the centre with three fillets of deep red roses. The arcades between them were adorned in like manner with floral devices; while the architraves and cornices, which, it will be remembered, are gilded, were made to stand out in contrast by a band of dark-green leaves, in the centre of which, forming, as it were, the *nœud* of the band, a large red rose shone conspicuous. From above these garlanded cornices and friezes all around the hall, and upspringing in circles to the top of the great dome, was an architectural illumination of 3,000 jets of gas, defining in brilliant golden light the admirable outline of the building. Seven garlanded chandeliers of large dimensions hung high suspended in the vaulted arch above, shining amongst the masses of flowers. Three vast stars glittered at the farther end of the hall above and about the gallery erected for the musicians, facing that of the ladies patronesses. Twelve gilded chandeliers, each of 24 burners (softened down to moonlight by cleverly arranged glasses), hung between the pillars and illustrated the arcades, garlanded, as before described, with devices of flowers on each of the pilasters, and pendulous baskets of flowers interspersed with lights innumerable. A carpet of deep crimson or marone colour covered the wide expanse of the floor.

Such was the ball-room, out of which, on the right hand side, two terraced staircases led, the one to the body of the Royal Italian Opera-House, the other on to the stage. On the other side, at either end, were doors leading by descending staircases to the supper saloon in the basement of the building—a crypt, or vaulted hall, of very large dimensions—220 feet in length and more than 100 feet in width. The roof of this spacious apartment is supported by 40 pillars in 10 rows, round each of which was a broad gilded garland, from which sprang 10 lights. The arched roof above was almost concealed by a closely-interwoven web of garlands of flowers, and along the whole length of its walls were tables laden with every delicacy that the experienced catering of Messrs. Staples could supply. There was the mediæval boar's head, and the ancient dish of peacocks—the standard ornament of the table, hung with French and English medallions of imperial and royal personages. There was an evident concord in the kitchens of both nations for this occasion—the *mayonnaise* of salmon, the *aspic de Volaille*, the salad *aux legumes*, the *huitres en caisse*, lay side by side with our old friends, the cold chickens, the solid hams, and the substantial sirloin. The supper was in fact both perfect and plentiful, and the wines could not have been better if the new tariff had already come into operation. The stage was surrounded and built in with scenery, so arranged as to represent three sides of a great hall or reception-room in an Italian palace. Along each of these three sides were tables supplied with refreshments in Gunter's usual taste and profusion. The fourth side was, of course, the body of the house. The hall was lighted at nine o'clock, when the perfect brilliancy of effect at once made itself acknowledged. The addition of wax candles in every panelled recess of the walls on either side imparted a delicate completeness to the illumination, and set off in still greater effect the floral decorations already described. At half-past nine the doors were opened for the admission of company. Already a long line of carriages was in waiting, but such were the admirable arrangements of the authorities that nine parties were enabled to alight at once beneath the colonnade of the Opera-house, whence passing up the grand staircase the visitors were introduced into the ball-room. This went on for half-an-hour, at the expiration of which the hall heretofore vacant became thickly dotted with different parties, which soon accumulated into a crowd. At ten o'clock the orchestra, consisting of 50 musicians, under the conduct of Messrs. Coote and Tinney, struck up with military punctuality the opening quadrille. The company at once responded with all the ease of a private ball-room, and arranged themselves for the dance; thus giving a most agreeable index of what the evening promised. Presently the ladies' patronesses began to enter the gallery set apart for them. Amongst the earliest arrivals were the Duchess of Wellington and the Duchess of Somerset, followed by the Duchess of Montrose, the Countess Craven, the Countess of Fife, the Countess Constance Grosvenor, the Countess Frances Waldegrave and Lady Saltoun, the Hon. Mrs. Sidney Herbert, and many other ladies of distinction. This gallery was a source of great attraction during the evening, not only from the exceeding beauty of many of its fair occupants, but from the illustrious names they bore, and the pleasure which their presence on such an occasion imparted throughout the assembly.

The ball now becoming more full, two lines of dancers were formed, and all went merrily—gossips reporting among the promenaders that the line of carriages outside the building even now extended to Hyde-park, which made those who had arrived earlier congratulate themselves upon their foresight.

When the hall was well filled, the *coup d'œil* was very striking, in consequence of the unusual brightness imparted to the scene by the almost universal adoption of uniform.

After a few dances, the earlier arrivals began to retire into the Opera House, on the stage of which refreshment tables were arranged for the service of ices and other light refreshments by Messrs. Gunter. From these tables the company strolled into the body of the house, the boxes and stalls of which became gradually filled, presenting a scene of unusual animation and variety. Viewed from the boxes, the stage itself had all the semblance of a magnificent banquet scene, and the grouping was occasionally of a striking and picturesque character.

The music was admirably conducted, and despite the great extent of the building, filled every portion of it. In a vast assembly of this character, it is of course impossible to chronicle the names of even the leading personages present. Let it suffice that every section of the community, as well as every district of the country, had its representatives; and probably it may be added, as a very remarkable fact, that none who were present left the hall dissatisfied. To Mr. Gye no higher compliment could be paid, and we offer him our congratulations.

VOLUNTEER RIFLE INSTRUCTION AND DRILL.

We publish the following circular memoranda to Officers Commanding Corps and Companies, Rifle Volunteers.

"Having had the gratification of seeing the greater number of the authorised Corps and Companies at drill, I feel it incumbent on me to signify, in general terms, the high opinion I have formed of the Volunteer Corps in Glasgow.

Time did not admit of my visiting all the Companies, or of taking more than a cursory glance at those I did inspect,—in fact, my instructions did not justify me in doing more.

My general impression is, that all are working zealously, under a good military system. It would be invidious, when all are doing their best, to particularise Corps or Companies. Various circumstances may have made some better than others, such as superior drill instructors, longer training, better parade ground, and more leisure for practice, or the very great advantage of having officers who have attended the School of Musketry at Hythe, or had former military experience.

When I hereafter return to make a thorough inspection, it will be my duty to speak of Corps and Companies more specifically as I find them.

From the proficiency obtained in so short a time, it is evident that the greatest credit is due to all ranks. The officers must have worked with untiring energy; those under them have most zealously seconded their efforts. Two most remarkable and important elements of discipline particularly struck me—the perfect silence and steadiness on parade.

Referring to the peculiar organisation of Rifle Volunteer Corps, it had occurred to me, indeed it was, I think, to be expected, that, composed as they are of all classes of the community, whom conventionalities may separate, but patriotism has united, an unwillingness might have been evinced to bear with the military authority naturally and even necessarily assumed over them by instructors. It has afforded me the highest satisfaction at observing such is not the case, and let me assure you, that when on parade, it is absolutely necessary to forget your relative positions in social life.

A few suggestions I would offer on Rifle Instruction and Drill in general.

Of the former I entertain a reluctance to speak, because I have not yet passed through the prescribed course at Hythe, yet from the knowledge I have been able to gain, I am decidedly of opinion that it is indispensable to inculcate in the minds of all Members, that they should not look upon the prescribed preliminary course of musketry instruction as a troublesome process gone through before they are allowed to shoot, but as *the process* by which they will become good shots—a mere expenditure of ball ammunition, without this, will never ensure proficiency.

The instructors of musketry must also take care that their squads are well practised in position drill, so that the left arm may be strengthened—a most important matter, for it does the whole work of sustaining the rifle at the "present." I would therefore suggest, that Commanders of Companies should occasionally, while marching, cause the arms to be changed, that is, to carry them in the left hand.

With respect to Drill—

I am of opinion that the complicated manœuvres performed by the regiments of the Line are inapplicable to Volunteer Corps, and I would recommend Officers Commanding not to lose valuable time by permitting such to be taught, at least for the present.

I would desire to have Volunteers taught as rapidly as possible the "Skirmishing Drill;" and as soon as they have learnt the principles of extended order upon the parade, it would be desirable, where practicable, to take them over broken ground, to teach them the value of cover and the manner in which bodies of skirmishers occupy positions, however small and trifling—how to advance as under fire—files working independently — taking advantage of any cover between them and the enemy. It is a great object also to teach Volunteers, when compelled to retire, to understand and appreciate good "cover," and to form rapidly upon the first man who reaches it.

Forming "Advance and Rear Guard" should occasionally be practised—also the mode of advancing and retiring over bridges and through defiles in skirmishing order.

Adverting to those battalions now existing, and those in course of formation, a few words I consider may not be out of place.

Organised as Volunteer Battalions must be, a very great responsibility will rest upon Officers commanding Companies.

It is alone by *their* exertions a battalion will ever become effective.

The Commanding Officer, however experienced, is comparatively helpless, from the peculiar constitution of Volunteer Corps.

It is to Captains and Officers Commanding Companies he must therefore look, and he has a right to demand their utmost aid.

It is on private parades, drill and discipline must be enforced; I therefore would desire to incite a rivalry—an honourable rivalry among Companies, that each should strive to excel in drill and discipline, for any laxity in these points by a Company at its private parade, will but recoil upon itself when brought into battalion. However good a Corps may be, a few ill-drilled files, scattered through its ranks, will destroy movements. I therefore earnestly intreat Captains and Officers Commanding Companies to pay *strict* attention themselves, and to exact perfect obedience from their Companies at their private parades.

I *must* call particular attention to the fact, that a work, entitled "Drill and Rifle Instruction," price 6*d*., for the Corps of Rifle Volunteers, published by Clowes & Co., London, has been authorised by the Secretary of State for War, for Volunteers. No other book on Military Drill can therefore be recognised. Right or wrong, it should be adhered to; any deviation therefrom would lay a corps or company open to remark. Consequently, I must say, I trust none other may be used in the instruction of members. When a Corps or Company can correctly perform *all therein laid down*, then, and then only, might the effort be made to obtain a knowledge of the more tedious detail and complicated manœuvres contained in the Drill Book for Her Majesty's Army, which, though necessary for the soldier, is to a very great extent inapplicable, as I have before remarked, to Volunteers.

By strictly adhering to this Drill Book, Officers Commanding Companies would be enabled to tell if their Drill Instructors be correct; if otherwise, they could readily check them. They should order drills to be carried out according to the prescribed means.

By such means an Officer, to a certain extent, would become independent of the Drill Instructor, and certainly could more readily make himself efficient.

In short, an uniform system, which I regret to say is not the case at present, would thus be established throughout all Corps and Companies. Without strict attention to this most essential and important point, it will be impossible to work so large a body as the Glasgow Volunteers on a general parade; much more so in the face of an enemy.

As the weather becomes finer, I hope Volunteers will attend drill regularly—especially when undergoing the preliminary drill and target practice. Officers in command should insist on regular attendance; and except from urgent necessity, a Volunteer of proper spirit and feeling ought not to miss a single drill.

In conclusion, let me point out, that though a certain degree of efficiency has already been obtained, yet greater results can only be acquired by a continued perseverance in that application by all ranks to their duties, which has evidently heretofore been the case with the Rifle Volunteer Corps in Glasgow.

A. Abercromby Nelson, Major,
Assist. Inspector Rifle Volunteers, Scotland.

NATIONAL DEFENCES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The strictures on the article in the *Cornhill Magazine* relative to Volunteers, and whatever tends to throw light on or provoke discussion of that most important subject, our national defence, is at present of the deepest interest.

Every humane soldier who has witnessed the ravages and horrors of war must indeed have rejoiced that the modern rifle has given such advantages to defensive over offensive warfare, and will consider it almost a sacred duty to combat and confute any opinions, especially if emanating from high quarters, which may tend to deprive the peaceable inhabitant of self-confidence, and deter him from combining with his neighbours in organised resistance to any invader.

Those who in any way deprecate or oppose the formation of Volunteer corps, whatever may be their military rank, can never have witnessed and never have reflected on the historical events of irregular warfare wherever brave men have united to defend their country.

Of innumerable cases the most prominent and recent are the far more than twenty years that Schamyl repelled the vast forces of Russia; the Chouans in La Vendée; the Miguelets in Spain, and Garibaldi's Bersaglieri, who drove before them disciplined Austrian troops, commanded by their best general.

We have not their vast mountains, passes, rocks, and fastnesses; but the eye of every practised soldier entitled to the appellation of *General* (of which the only definition is an experienced soldier, possessed of a general knowledge of every branch of his profession) will have perceived that, under leaders such as can be found on her soil, Great Britain has advantages for organised resistance equal to any country on the face of the globe.

Heaven has given us uneven grounds, hills, woods, rivers, watercourses; man's labour, inclosures of every description, embankments, hedges, ditches, deep dykes, canals; and art has placed an arm of before-unknown *precision* and *length of range* in the hands of a *most dense population*,—sons and brothers of men of that red wall never broken on the field of battle, and of whom an overwhelming number, ay, millions if required, would be speedily conveyed by our network of railways to whatever point they might be needed.

How totally in error are those who would endeavour to reduce to, and to test by, the rules of regular warfare, the system of defence of any country, especially such as is Great Britain. He, and he alone, is calculated for a command in that most important and glorious task who can best call into play, and guide with skill, energy, and above all, prudence, every element of national resistance. And in this, non-combatants acting on a previously well-arranged system, and under the direction of engineers and staff officers, may act a most important part. The peasant with his pickaxe, axe, and shovel, may throw such obstacles in the way of an advancing enemy as may enable very inferior forces to resist and detain him long under such a terrific fire as will drive back or annihilate him. For he will obstruct roads with felled trees, deep trenches cut across them, causeways cut, bridges (where not points such as are susceptible of prudent defence) he will break down or blow up; and in some cases form rifle-pits, a stoccade, or entrenchment; of course driving off, or destroying whatever would otherwise fall into the hands of the enemy, and serve to feed, drag, or carry.

Have those who think so lightly of all but regular troops ever witnessed (as I did in the Peninsula) the 95th Riflemen, in conscious security as concealed, deliberately selecting their objects, and compared the effect of their fire with the almost aimless volleys or file-firing amidst volumes of smoke of lines themselves under the fire of the enemy, and then reflect on the delays and difficulties which a country inclosed as ours is, would oppose to the deployment of columns, consequently the length of time they would be inevitably under the fire of innumerable practised riflemen? Also that in very many, indeed most cases, the ground and communications would render the parallel advance (i. e. mutual support) of columns a work of infinite labour and delay.

Supposing one of those who hold all but regular troops lightly, had to force his way—being a general in command of a strong column—through a country, of which every road was as hereinbefore explained, obstructed by artificial obstacles, rendering also natural obstacles, as rivers, &c., very difficult to pass or force, he being under the incessant fire of a vast body of riflemen on his front, flanks, and probably also rear. Could he do aught else but endeavour to keep them at such a distance, by throwing out his tirailleurs, that they might not approach so near as to pour a constant hail of balls on his column whilst engaged in surmounting the impediments? or for that purpose would he employ his cavalry?

His tirailleurs would meet with insuperable difficulties. They would be outnumbered; many to one, their enemy obviously would act on a segment of an exterior circle, of which the radius would be the range of their rifles (1000 yards), longer than that of the interior circle which they would occupy. Consequently theirs would be divergent, and excentric opposed to convergent and concentric fire. Besides this, totally unacquainted with the ground, they would, in advancing, be constantly compelled to show the whole of their persons to a concealed enemy, to whom all its advantages were well known; and how could they cross fields, especially if of any extent and heavy ground, of which the hedges or other boundaries were lined with practised shots?

To convey and land on our shores any considerable force of cavalry would require too much time and shipping, nor in our inclosed country could it often act; nor would our mounted yeomanry be long in learning from our regular corps how to gallop through or over it, especially if they were organised and led by an officer such as Lieut.-Colonel Conolly's paper in the MILITARY AND NAVAL GAZETTE proves him to be.

Some military writer, I think Schuderhorst, proposes that light cavalay opposed to a force of heavy cavalry, which it dare not meet, should, with the heads of their horses, as much as is practicable for the purpose, turned towards the rear, and in proportion to the circumstances of the ground, and relative speed of their own horses, and those of the enemy, await his charge, and, deliberately discharging their carbines at the distance of from 50 to 100 or more yards, gallop off with full speed. Contemptible as the fire of cavalry with carbines doubtless is, I am still disposed to believe that sportsmen, young farmers, and all who can ride and shoot, might, by a similar method with their double-barrelled guns, empty innumerable saddles, and almost or totally with impunity, as they could leap hedges, ditches, gates, &c., and get across the country mocking the pursuit of every trooper.

Next to that of preparing the population by the best arms, organisation, and instruction, *most rigorously confined to that exclusively which is really necessary* (and how very little is ever requisite in the field?), and *thus inspiring self-confidence*, the following is certainly the most important defensive measure which can be adopted.

A regular system of defence should be framed with a view to every probable contingency, and the calling into organised opposition to an invader, with the *greatest energy and promptitude, every element of national resistance.* It must of course embrace mainly all the accessible points of our coast, and the roads and other ground over which an enemy must pass in his way to any important points; the modes by which his advance may best be impeded; the points where the flanks being protected, and the retreat if rendered necessary secured, our troops of the Line and Militia (who it must be expected will be inferior in number, and partly in experience) can, as they are able to oppose at least an equal front or serious obstacles, offer a more or less permanent resistance; this being possibly sometimes merely to check his advanced guard, and compel it alone or the head of his column or columns also to deploy under the deadly fire of our numerous riflemen. Obviously most important will be the survey of those transverse communications by which troops and supplies can be conveyed along the coast, and next to these, those railways by which men and every requisite can be transported from and to that great centre, the capital; and, after a full consultation with its directors and engineers, a system well understood by all their dependents should be combined, by which most expeditiously the greatest number of armed men and other requisites may be conveyed by each railway and a combination of all of them to whatever point they may be needed.

The question of fortifications, on which such an enormous sum appears about to be expended, is indeed most important, far less on account of the vast amount of their cost (and what will constantly be required to protect, and keep them in repair), than other important military considerations.

Except where indispensable, as to cover most important points—dock-yards, arsenals, shipping, &c.—they often may be most dangerous. How injurious to the defence of Spain were her frontier fortresses, which the French seized on at the very outset of the war. The very limited number of regular troops ever stationed in this country can afford but very small garrisons for our fortresses; and these men, separated from their head-quarters, lose much which they have learnt. Fortresses, if duly garrisoned,—and *how vast garrisons would not regular works require?*—absorb so very large a proportion of troops as to leave very few of the Line to meet the enemy in the field, or rather, in our case, to serve as a nucleus to which our Militia and Volunteers would gather. And, if not duly garrisoned, any one of them fell into the hands of the enemy, it would obviously be to him a most important base of operations, or *point d'appui*, protecting his supplies or plunder, aiding his advance, and covering his retreat, or, if a port, his shipping. That an invader could lay *regular siege* to any fortress within these isles is impossible, for millions would rush to the rescue.

Long may the present ruler of France, as his universally-acknowledged wisdom proves he will, preserve the "*entente cordiale*," so important to the whole world! But his successor may, from the "*panic*" so generally attributed to us, from the degrading notice taken of the contemptible vapourings of his Bobadil colonels, be tempted to seek popularity by insulting our shores.

The object of our fortifications, therefore, must be to protect important points from a *coup-de-main*; and with a limited force, and principally of not regularly disciplined troops, to cover such an extent of ground as may at least temporarily keep an enemy at such a distance as to prevent his doing any serious injury by means of his projectiles. This apparently very difficult problem may, I believe, be solved by substituting for the customary works on permanent fortification a full consideration of the events of past warfare, and remembrance of the cleverly-constructed, and bravely and ably defended, *mere Bicoques*, which have resisted armies. The celebrated siege of Gerona was, in fact, little more than the defence under that excellent Irish officer, Brigadier Nash, of the outwork Mongici, the besiegers being incessantly harassed by the repeated ingress and egress of Generals Henry O'Donnel and Sarsfield with provisions and aid. Fortified convents repulsed our army from before Burgos, and twice did large French armies sit down before Saragossa before they forced merely an old wall, houses, churches, and convents, and defended by very few but Aragonese peasants. May I, therefore, be allowed to suggest *for discussion, and doubtless improvement*, the following method. I have seen those at the head of a column who had got inside the works slaughtered in the barricaded streets of a besieged town. This could not but lead me to perceive that fortresses so rarely have been defended so long as they might from the want of confidence, because there was no safe rallying point such as to enable the garrison, after the breaches were carried and works taken, to oppose a successful resistance in rear of them, and if unable to expel the enemy, avoid the customary slaughter and capitulate, or in the confusion unite, cut their way out, and retreating fight their pursuers, or disperse. For the object here in view, a requisite number of small detached works would virtually answer the same purpose, *i.e.* of affording adjacent rallying points to whichever garrison might be overpowered. Let each work, a species of bastion, be so small as to be defended by a few resolute men; closed at the gorge, which should be very narrow, the flanks narrowing in from the flanked angle, and a ditch *round the whole of the work.* To render escalade difficult, if not nearly impracticable, I should renew my suggestion, offered many years ago, that the bottom of the ditch, in lieu of being as is usual horizontal, should *slope downwards, deepening towards the counterscarp, at such an angle*, probably 25° or 30°, *as would not allow the foot of the scaling-ladder to rest anywhere but against the base of the counterscarp*, thus necessitating an inordinate length. Between these small works a parapet, or possibly in many parts a strong, loop-holed wall, with the same sort of ditch, protected by their fire, should be carried all round the space enclosed, wherever natural obstacles, as inundations, &c., may not render it unnecessary. Works such as these would cost little and be found strong enough without garrisons of any force or disciplined troops.

Volunteer corps will, I trust, henceforth ever, as with our politic transatlantic descendants, be a permanent national establishment; and occasionally in the field, *on ground of different descriptions*, learn how to act, especially as tirailleurs; indeed, that every Briton, or at all events those near to our seabord, whose purse and vigour permit, will keep and learn how to use his rifle; for who, in case of an enemy's descent to insult our coasts, would consent, as helpless, useless, and unarmed, to run away with the women and children?

In such a case, with the fullest confidence in the speedy annihilation of the invader by their terrific fire (if they are properly commanded), the Volunteers will have as a companion "*Blanchi sous l'harnais*" in every quarter of the globe.

AN OLD GENERAL.

FIRST COMMISSIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I understand that the rules and regulations for admitting young men into the Army as officers are, at the present moment, under consideration at the War Office, with a view to their amendment. I therefore venture to pen a few suggestions on the subject, to which I beg you will give publicity.

The public service has hitherto suffered much from the secrecy in which arrangements of this kind have been enveloped; the object of that secrecy having been, at a time when candidates were plenty and commissions eagerly sought after, to afford undue facilities for entrance into the Army to men who had powerful interest, no matter whether they were good candidates or bad ones.

The reply, "that the commander-in-chief's list was full, that the applicant might possibly obtain a commission; but that the military secretary could not say when—if ever," followed by the knowledge, that a later applicant of inferior qualifications, but with stronger political or social interests, had been immediately gazetted to one, has sent many a disappointed and heavy heart away from Whitehall, and has unwisely and unjustly deprived the country of the services of many a stout arm and clear brain.

Why should any mystery be maintained on such a subject as this, in which all loyal subjects of the Queen have an equal interest? Why should it not be known that on the day on which a parent applies for a commission for his son—there are, say, thirty names before him on the list at the Horse Guards, and that, when these thirty have been gazetted, his son's turn shall come, provided he shall have fulfilled, in the meantime, the social, educational, and physical conditions prescribed by the Queen's regulations?

When regulations for the admission of candidates are drawn up, they ought, in fairness, to be published and republished in the *Gazette*, as ought every subsequent alteration or modification of them the moment it is determined upon, instead of being, as they have hitherto been and still are, privily stowed away in official crypts, to be given only to those who ask for them. How is a parent in the north of Ireland or in the Western Islands to know that the conditions as to age have been relaxed, and that his son, rejected as too old last year, is eligible in that respect now that he is a year older? At present, the arrangements respecting such points as these give an enormous advantage, and afford great temptations to job to the subordinate *employés* in our military establishments, and to staff officers who are in a position to obtain an early knowledge of any changes. Publicity and the *London Gazette* will cure this evil, and nothing else will.

It is most desirable, too, that the emulative element should be introduced into the spiritless examinations which at present take place before the Board of Military Education; that candidates should be assured that certain professional advantages will be the immediate reward of superior industry and intelligence. We should hear much less of the hardship of the examinations, if the youths who presented themselves were assured that they should be classed according to their proved merits; and that one hundred commissions in the Guards, Cavalry and Line being vacant, they would be allowed to select, according to their position on the class-list, the arm of the Service and the regiment to which they preferred to belong.

Such an arrangement is practised in the French army with much success. The only thing that can be urged against it is, that it is obstructive to the exercise of private patronage; but surely the days are well-nigh spent when the interests of private patronage are allowed to prevail against the general public good.

What is mainly required, is, more daylight at the Horse Guards. There ought to be no more mystery kept up about public lists and private lists—we ought to hear no more about these lists being full to parties without interest, and empty to parties with interest. Instead of scheming with Horse Guard clerks, and toadying aides-de-camp and members of the Legislature, a parent ought to be able to say, "I have educated my son for the Army, I want a commission for him; I see that in order to obtain it he must fulfil certain conditions, and I know that when he has fulfilled those conditions he will obtain what he requires at a certain definite period, if he is worthy of it, as surely as if I were a duke or a county M.P., or if I had the best cook in London, and the most desirable deer forest in Scotland."

When augmentations are about to take place, the greatest possible publicity ought to be given to the fact that more candidates than usual for commissions will shortly be required. The greater the numbers that present themselves for admission, and the greater the certainty that they will be admitted on their proved merits, and on their proved merits alone, the better choice the public service will have.

These suggestions may possibly be distasteful to the few who profit by the existing state of things, but they will be recognised as necessary and proper by all those who really know what has hitherto been the practice with regard to the apportionment of the patronage of first commissions.

I am, sir, your obedient servant, H.

THE DEBATE ON THE PURCHASE SYSTEM.

The long expected discussion upon Sir De Lacy Evans's motion, the result of which has been looked forward to with a good deal of anxiety in the military service, came off on Tuesday evening. We regret to be obliged, by the great pressure on our space this week, to summarise all the speeches delivered except that of Mr. Sidney Herbert, which so admirably describes the present state of the question, and the intentions of the Government respecting it, that we reproduce it in its integrity.

Sir De Lacy Evans's motion was in the shape of an address to Her Majesty, praying that she would be pleased to order the gradual abolition, as soon as practicable, of the sale and purchase of commissions in the Army (having due regard in doing so to existing rights), with the view of substituting, for the purchase system, promotion partly by selection, partly seniority, grounded on war services of merit, length of colonial and home services, and attested professional fitness. In a speech of considerable length (a very small portion of which could be heard), he pointed out the evils of the purchase system, and discussed the arguments urged in its favour, reminding the House that he did not propose the sudden abolition of the system.

The motion was seconded by Mr. Rich, who said the question substantially was, whether merit or money should be the passport to rank in the Army; and he asked the House whether, at the present time, it would say that it was desirable that promotion should be purchased by money,—a system against which he urged various objections.

Captain L. Vernon moved, as an amendment, a resolution (not in very good English), "that whereas the promotion in the seniority corps already existing—viz., the Royal Artillery, Royal Engineers, and Royal Marines—being of an unsatisfactory character, it is not desirable to extend the seniority system to the whole of the Army." He argued that the seniority system was not so entirely one of unmixed good as the mover and seconder of the motion supposed, and he supported this argument by showing the results of the system in the special corps he referred to, numbering 45,000 men, and in the Indian Army, where promotion was so slack that the officers invented a purchase system of their own. As a proof that merit obtained promotion without purchase, he cited the case of Sir De Lacy Evans himself, who, in six months, by his meritorious services, had advanced from the rank of Lieutenant to that of Lieutenant-Colonel without the expense of one shilling, whereas, in a seniority corps, he could not have got beyond the rank of captain. Without deciding what was the best system of promotion in the Army, he denounced the seniority system as the worst.

Colonel Dickson, in supporting the amendment, complained of the influence which the Press exerted to the prejudice of the Army, by publishing unfounded charges against it. He was quite aware, he said, that great abuses had crept in under the purchase system, but there was a vast difference between improvement and total destruction. If the purchase system was abolished, it was impossible for a poor man to enter a cavalry regiment unless the pay was increased to a very large extent. Its abolition would cost the country a large sum, and the system would not fail to re-enter the Army. Selection, so far from being a remedy, would, in his opinion, be the ruin of the British Army by extinguishing its esprit de corps, one of its leading features.

After a few remarks by Mr. O'Brien in support of the original motion,

Sir F. Smith observed that he did not see how selections and seniority could be combined. Who was to make the selection, and what were to be the grounds? What was to be the length of service, and who was to attest professional fitness? He recommended that things should be left as they were; as the present system had produced the finest regiments in the world.

Captain Jervis said, if the purchase system was done away with, the pay of the Army must be increased, so as to induce men to enter it, who would be obliged to support themselves by their pay.

Colonel Lindsay, after noticing the case of an officer who had been passed over eighteen times, but who stated that if there had been no purchase he should have been longer in attaining his rank, expressed his belief that the system of purchase was most efficient, both for the Army and the public good. A system of non-purchase did exist, however, to a considerable extent; but purchase was quite compatible with every principle of examination, and merit was a frequent ground of promotion. There was a control and a species of discipline attached to the purchase of commissions under which our regimental system had never failed.

Colonel Percy Herbert hoped the House would not be led away by the opinions of officers in foreign services. He had conversed with foreign officers, and had always found that they laboured under the misapprehension that under our system of purchase commissions were put up to the highest bidders; but when they understood the system they admitted it was an admirable one. He wished, he said, to put the defence of the system not on personal grounds, but on the ground of its efficiency, and on that of public economy.

Mr. S. Herbert.—The subject which the House is called upon to consider is one of the most difficult and complicated that can be submitted to it. In the first place, it is well that we should be certain that we are using clear and definite terms, and describing, as we intend to do the subject we are discussing. I agree, as an abstract proposition, with the opinion advanced by the gallant officer who moved the amendment, that seniority by itself is a bad method of promotion; but when you use that expression it seems to imply that seniority promotion was something unknown to our present system. The fact is, as has been stated in debate, we have several distinct corps, which are said to be governed upon different principles in respect to promotion. We have the infantry and cavalry of the Line, the household troops, the two scientific corps, and the Indian Army. These are also seniority corps, with this distinction between them, that the Queen's Service is a seniority system accelerated by purchase, and the other is seniority pure. The man who stands first for a death vacancy in the Queen's Army gets it, or, if he does not take it, the man who stands first for purchase, having the money, gets it, and so on. Having said so much, I must add that there is no subject which has been so overlaid with arguments that are not tenable, and by statements which are gross exaggerations, as this question of purchase. I must also say that the gallant general, in my opinion, made some very extravagant assertions respecting that system. The gallant gentleman opposite (Colonel Herbert) has truly said that the argument of the gallant general leads to this, that the greater loss of cavalry horses in the Crimea was attributable to the purchase system, while the greater vitality of the Artillery horses was traceable to the absence of that system. On the other hand, the supporters of the present system declare that the whole spirit and value of the Army depends upon what is certainly an artificial system after all. The gallant general argued that purchase was not only incompatible with education, but that money and education are positively antagonistic. That is a great social and moral discovery, in which, however, I do not believe, but on the contrary I am of opinion that it is so ordained by Providence that you may truly say poverty and ignorance go together, because education costs money, and is therefore more within the reach of those who have money. There is nothing more erroneous than the notion, into which those who advocate the abolition of the purchase system have fallen, that the non-purchasing officer is necessarily a hard-working, meritorious man, devoted to his profession, while the man who purchases is therefore to be regarded as a man not devoted to his profession or deserving of his promotion. There is one argument which on both sides is extremely doubtful. I have heard most sanguine expectations held out by the advocates of entire abolition of purchase that a change of system would procure for us a different class of officers, and would bring the sterling ambitious characters, who would give immense force and strength to the Army. It is said, on the other hand, that if you abolished purchase, you would lose the means of officering your Army with gentlemen, and I am one of those old-fashioned persons who believe that gentlemen officers are a great advantage. In this country, which is not a military nation, and which possesses few notions of military subordination, I am not ready to give up that which secures to our officers a ready and willing obedience. I believe that both those assumptions are incorrect. If purchase were abolished to-morrow, I do not think you would find the slightest difference in the class of men who officer regiments. It is said, and truly, that the Army is an ill-paid profession; but it carries with it honour, and station, and reputation. The very fact of its being an ill-paid profession will cause its officers to consist in a great degree of men who have something else besides. But then, if you think the abolition of purchase will deprive the Army of that class of gentlemen and all the professional and middle classes comprised within that term, I ask why should the Army be worse off than the Navy, where no purchase exists, and whose officers I am sure the army will admit will compare in any way with military officers? Then it is said by some that the Army is completely aristocratic, and that the Indian Army is a middle-class army. But what is the English Army but a middle-class army? Having said so much upon the general subject, I will pass to another point. I was a member of the Duke of Somerset's Commission. The report of the commission was drawn up with great ability, and gave a true and impartial account of the advantages and disadvantages of purchase. The greatest stickler either for or against purchase would admit that the case on either hand is fairly put. When I came into office, among the various topics which presented themselves to my attention was the effect which the purchase system had upon the Army and on the public service. I don't know why the gallant general says I inveighed against purchase, but certainly I have listened to and adopted, and am ready to act upon, any scheme by which I can see a way to get rid of the abuses and scandals that overlay the practice of purchase. I find, looking at purchase fairly, and admitting that it quickens promotion, that to a great degree it is valuable. Some one has said that purchase does not procure physical vigour, and is incompatible with intellectual vigour. I don't admit that. It is true that as president of the commission of 1854, I found that purchase alone would not insure vigour among officers, and that it was necessary to supplement it by additional measures of retirement; but with those supplemental measures it is quite possible and easy to keep the Army on a safe footing. My gallant friend (Sir De Lacy Evans) quarrels with me for what I did, and read extracts from my letters, and if I was at all thankful for his inaudible tones, it was when he quoted from my letters. The case is this:—I found that an old controversy existed between the War Office and the Treasury respecting the cause of the difficulty in filling up the cornetcies in cavalry regiments. The matter was a very serious one. There were vacancies equivalent to all the cornetcies in seven regiments, which could not be filled up. It had been said that this was entirely owing to your making men pay subscriptions to the band, and to the deductions made from their forage allowance. I asked what was the cost of the outfit of a cavalry officer. Several estimates were given me, none of which were under 1500*l.*, and some reached 2000*l.* Now, will 1*s.* 5*d.* a day drive away from the cavalry men who are willing to pay 2000*l.* to begin with, and who afterwards pay large sums for their steps—as high as 17,000*l.*, I believe, for a lieutenant-colonelcy? It was absurd to suppose that such a small amount would deter men from entering this branch of the Service. Then I had to find some other cause, and I think the true cause has been correctly stated by the hon. and gallant member for Limerick (Colonel Dickson). He said that the difficulty was not occasioned by the price of the cavalry commissions, the cost of the forage, the subscriptions to the band, nor even the expenses of messing. The chief expenses of a cavalry regiment, he added, lie outside the barrack-yard—that is to say, in the expensive amusements of wealthy men. Now, of all the recipes you can supply for repressing these, none are so inefficacious as attempts by authority to impose sumptuary laws. Why, the very fact of attempting it would drive the officers into further expenses. There is another way of accomplishing your object. What is it that gives a tone to a regiment? There is a passage in Carlyle's "Life of Stirling," where, talking of the English public schools, he says, the schoolmasters are always exclaiming, "See how we administer these schools; what men we produce; what a tone there is!" This is all nonsense, says Mr. Carlyle; it is not the masters but the boys who produce this tone—who produce it, moreover, not in obedience to the masters, but half the time in spite of them. It is through the boys that the spirit of combination, of resistance, and of honour which prevails in our public schools is maintained, and Mr. Carlyle laughs to scorn the claims of pedagogues to be considered the creators of this English tone and feeling. So it is in our Army. It is the officers themselves who give the tone to a regiment. The best plan is to try and introduce fresh elements of a sounder public opinion into those regiments—to bring in men who cannot afford to lead this kind of life—to set their public opinion against that of the wealthy and extravagant; and as soon as there are enough of those who have not the means of indulging in these expenses you will restore a healthy tone to these regiments. I am sorry that the gallant officer objected to my course in this particular. I had to deal with the price of the commission. He says I aggravated the evil. On the contrary, I diminished it by one-third. He says the plan will fail. Now, I don't like to prophesy, but I think I shall prove right when I say that it will succeed. I know that already the applications to the Horse Guards for cornetcies have increased; and I myself have had letters from friends who have sons in the Army, and who say "We have kept our sons in the infantry because we could not afford the price of the cavalry commissions; but we had now much rather that they were in the cavalry." The feeling is, that the reduction in the price of commissions will diminish the extravagance, which two things together have always hitherto made an inconvenient hole in the parental pocket. The Duke of Somerset's Commission took evidence upon these points at great length and from very able men. It is unnecessary for me to attempt to decry the character of the officers who were examined on either side. They were all excellent men, and there was a variety of opinion. Some spoke in favour of purchase without the slightest qualification whatever. Some, again, only deprecated the abuses of the purchase system, and thought that efforts ought to be made to check them. Well, what are the abuses which mark the purchase system? At the outset I would say that both in England and abroad the system is very much misunderstood. A French newspaper, giving a *resumé* of the life of Lord Raglan, said that such was his enthusiasm for the profession of a soldier that, though the son of a duke, he scorned to enter the Army by purchasing a colonelcy, but came in as a simple ensign. That is very much the measure of the foreign view of the purchase system. In England I know it is commonly thought that when a rich man goes into a regiment he can get what rank he chooses by holding up his finger; that he is certainly obliged to follow in the natural order of the military hierarchy, but that he passes over men's heads as he likes. That is not the case, and in the lower ranks it may happen that a poor man may gain by the system. Suppose, for instance, that a man has risen from the ranks, and that, as somebody expresses it, all the officers superior to him in his grade "get out of his way" by purchase. He finds himself thus at the top of his rank: the first time a death vacancy occurs he is there ready for it to fall into his mouth; and after having served for a certain number of years he may retire with a small fortune gained in the Service by these means. No doubt, this purchase system is indefensible in theory, but in practice it is extremely useful, and I think you should pause before adopting any sweeping measure of abolition. Where is it that the great scandals of purchase arise? Not in the lower ranks. The great prices are given in the superior grades by very wealthy men, who want a position which gives them power, responsibility, and reputation. It is in these cases that public feeling is justly shocked. We hear, too, of exchanges made for the purpose of trafficking in this way, and sometimes a regiment is thus deprived of its step. A case has been mentioned by Lord West. An officer in a certain regiment wished to sell, but his juniors were poor; he had no prospect of getting a high price for his step, and he therefore exchanged with a lieutenant-colonel into another regiment, where there was a rich man who was ready to pay any price for promotion, and his own regiment therefore lost the advantage of the step. Such cases are always attributed to the Duke of Cambridge and the Horse Guards, and it may not be unnatural to suppose that the officer who is at the head of the whole system has it in his power to stop such an abuse; but the Duke of Cambridge does not know, and cannot know, of such an intention. How is he to trace the motives for the different exchanges which come before him? A few months after they are effected he may find out that he has authorised an exchange for unfair purposes, but he is perfectly powerless to apply a remedy. The system of exchange is much complained of, and sometimes with justice; but in all professions, and especially in so severe a one as our Army, it is often a great advantage to enable men who have served perfectly well in other parts, to avoid serving in India, or in climates which they are perhaps unable to endure. I don't see much inconvenience or evil in such a system. The Duke of Somerset's Commission recommended that, in order to check the great prices which are given in the upper ranks of the Army, purchase should be confined to the rank of major and the grades below it. The importance of a lieutenancy-colonelcy was so great, it was argued, that succession to it should not be allowed by seniority—that is, by seniority either with or without purchase. The Commission objected very much to the system of seniority. So do I. I have always been opposed to it. I was responsible for the introduction of a system which I freely admit has been much complained of in the Army, but which I am sure has added very much to its efficiency, by which officers are selected from among the colonels, are made either brigadiers or temporary major-generals, and ultimately attain the rank of major-general. That, therefore, is not promotion by seniority, but by selection. Of course, these changes are very disagreeable to a body like the Army. Of course, men who are not selected feel great disappointment and discontent. But, after all, the public service is the first thing to be considered. You may regret to wound the feelings of officers; but you must keep in view something higher and more important still—namely, the efficiency of the Army of which they are individual members. The Duke of Cambridge in this respect is very much opposed to the system of selection, as casting upon the person who has to select a burden which it is almost impossible for him to bear. He says that the duties of the commander of

Digitized by Google

a regiment are of the most important kind. But, if you contrast the seniority system with the system of selection, you find the former open to the gravest objection; because under it, with your eyes open, seeing the incapacity of an officer, you are forced deliberately to put him into an office of responsibility and trust. As to the effect of this system, what is said by General Simpson? He is a most excellent officer, has had great experience in inspecting troops, and has been in command of a district; in reply to Sir H. Jones, he stated that he had known several officers who were not equal to the command of the regiments which they held. He was unable to say what proportion had obtained their commissions by purchase, but the effect was the same where the promotions had been by seniority. He was asked if this could not be remedied by a system of selection, and he replied that it could, but to pass over a man would be a very serious matter. Some gallant members appear to think it would be very easy for the Commander-in-Chief to exercise a veto in any case where the officer succeeding by seniority is deemed unfit for the post. The hon. gentleman cheers; there are two ways in which this veto may be exercised, and I shall be glad to learn which method he considers least invidious. Either you must tell a man, "You are a good officer, I have no fault to find with you, but there is another still more able and with higher professional qualifications whom I must prefer;" or you must say, "You are utterly unfit and incompetent for the situation, and I therefore must appoint another man over your head." The Commander-in-Chief expressed his willingness, if supported by public opinion, to exercise the power which he possessed, but he found the thing was in itself so invidious as to render it impossible to do so. General Scarlett gave his opinion that selection in the upper ranks would operate as a check on those enormous sums which are given for commissions over and above the regulation price. We, who signed this report in 1854, conceived that if a stop were put to the purchase of the rank of lieutenant-colonel, by which an indefeasible right is acquired to the successive steps of major-general and lieutenant-general, with the command of a regiment, and all the perquisites and emoluments attaching to that important position, the same inducement would no longer exist to give extravagant prices in the junior ranks of the Service. There have been very important changes in the system of promotion during the last six years; formerly every officer rose to be a captain, and then obtained a brevet, becoming, in course of time, lieutenant-colonel, major-general, and so on. He might never have served a day in command of a regiment, or acquired any experience of that character, but he was eligible for command, and could retire on half-pay. It is impossible to imagine any worse system than this; not only was he promoted, though he had no service, but he had better chances than a man with service, because he did not go to unhealthy climates. This mode of promotion has been swept away, and in its stead has been substituted that of promotion for service. At the present moment no man can rise above the rank of lieutenant-colonel unless he has held a regimental command for a certain period, or served for a certain time upon the staff. The staff will be very soon closed to everybody who has not passed through the Staff College. The mass of regimental officers of course will not go there—in fact, it would be very inconvenient if they were to do so—and you will consequently have a number of excellent officers whose only chance of rising to the higher grades of their profession will be by having five years' service in command of a regiment. How are they to obtain this qualification? I will suppose the case of officers who have not the money sufficient to purchase their promotion. I hear it said that they may acquire the necessary qualification by attaining retired full pay or by death vacancies. But again I ask, with the long list which precedes his own name, and the few opportunities which can thus occur, how is it possible for the necessary qualifications to be obtained by deserving officers? As a broad and general rule I believe it will be very difficult for a man who cannot purchase his lieutenant-colonelcy to rise to the higher ranks; and, if such a rule should once become established, the injustice will be felt to be intolerable, and will lower the Army as a profession in the eyes of the British people. It is therefore necessary to devise some means by which the rule may be broken through in favour of those who have not money, and who may not succeed in getting the death vacancies. The view of the Commission was that the cessation of purchase of the rank of lieutenant-colonel would open an avenue to those who could only rely on meritorious services for their claims to improved position, and would also diminish what I believe is the unanimous disposition of the lower ranks—to give illegitimate prices. You found it impossible by the "declaration of honour" to check this tendency; the only way, therefore, to do so, will be by diminishing this temptation. I come now to some other points which have been raised in the discussion. It is said, in answer to the proposals of the Commission, that the danger of selection will be very great, on account of the likelihood of favouritism and political pressure. Gentlemen say that under a despotic government you may select the best officers for particular services, but that in a free country it is impossible to do so. I believe that is a libel on free institutions. Selections are made now under the influence of public opinion brought to bear on them by this House. I believe the statement of the impossibility of selections under free institutions, when examined, really means this—that by the criticism to which the selections are liable you give the selector a very uneasy life. That is quite true; but in proportion as it is true it is a guarantee against favouritism and jobbing. The apprehension of public criticism of a job prevents a job being done; the whole system of publicity rests on that criticism. Look at the Admiralty; for many years the Admiralty was in the habit of making political promotions; it was notorious. Public opinion was against it, and the House of Commons took the chief part in putting it down. Now, no one to influence a division, or for any political motive, would dare to give a ship to an officer incapable of commanding her. Such is the susceptibility of the House of Commons on this subject that I recollect a strong attack was made on a right hon. baronet opposite because he wished to get a naval officer into the House to assist him with his professional experience in conducting the public business. I think it was a very proper course for him to take, and I only mention the case to show how jealous the House is of all such influence. But it is said the person making the selection of officers in the Army should not be the Commander-in-Chief only, it should be somebody else. How the Secretary of State can make the selection I do not know. He would have no personal knowledge of the merits of any of the officers. He must go to some military man to make any selection for military reasons. It is argued that the selection by the Commander-in-Chief is not only liable to be influenced, but that it cannot be made with proper regard to efficiency. I doubt that very much. I am quite sure that the Commander-in-Chief has the means of knowing the character, capacity, and intelligence of every officer in the Army, if he goes to the proper quarter to ascertain them—the Adjutant-General's Office. I have myself been repeatedly sent for by Lord Raglan to discuss the fitness and ability of officers required for a particular service. Sir G. Simpson and Lord Panmure both state that the Commander-in-Chief has full means of knowing the character of every officer. It is said that this power of selection may be exercised during a war, but not in time of peace. In peace, promotion should be given by seniority—seniority accelerated by purchase. But there is a difficulty of selecting in the case of officers serving abroad. The Duke of Cambridge says he can select officers at home, but not so well abroad. I admit there is a difficulty in doing so. Though in India, or wherever large bodies of troops are collected, the means exist of comparing officers together; yet, where the force is less, there are less means of comparison. I have gone through the objections raised to the question of selection for the rank of lieutenant-colonel. I have in this blue-book evidence on evidence, from men whose opinion is entitled to great weight, that the command of a regiment should not be held for a very long period by one officer. This is the opinion of Sir C. Yorke and Lord Panmure. The distinction drawn by the commission of which I was a member is, that it is in the upper ranks of the Army the sale of commissions gives rise to scandal and injustice, but that in the lower ranks it gives that acceleration to promotion necessary to keep the Army in proper physical youth and vigour without being attended by evils it causes in the upper grades. When I signed the report of the Commission I did so with the conviction that on a very difficult question this was the best course to take. I view with apprehension and alarm any proposal for the entire abolition of purchase; I do not see what is to replace it. I have looked carefully at the plan of Sir C. Trevelyan; but I think his proposals would weigh hard on the officers of the Army, and throw a very heavy burden on the Government. His plan, on paper, shows a great saving, but practically, I do not think it would prove so. The principle we follow is not open to many of the objections urged against the system of purchase, while it removes it from the ranks in which the greatest evils and scandals arise from it. I signed the report, believing it laid down the best course to pursue, and I have seen nothing since to shake my opinion. Holding, as I do, that purchase in some shape, to some extent, in some ranks, is necessary, I believe it better to preserve that system and make it more useful. Without pledging myself to details, because many points will require very careful consideration, I may state that the principle laid down by the Commission is the principle the Government acknowledges in dealing with this question. It will be my duty to prepare a scheme founded on that principle, and lay it before the military authorities for consideration. On one side it may be said this is a miserable course of proceeding, and a very small measure of improvement. My right hon. friend behind me will say the change is too hasty, too sweeping, and too rash. I have been accustomed to live between two fires; and, between two extremes, I am not sure but we are nearer the truth. As far as I see my way I am prepared to wait. It must depend, of course, on the Government how the measure can best be shaped. There are great difficulties to encounter, strong prejudices to be met; but beyond the point to which I see my way I will not move an inch. This great machine, the English Army, is not a thing to play with. The value and reputation of an army does not depend merely on its numerical force, but on the spirit by which it is animated, and we must not deal lightly with anything that concerns it. I have, for a civilian, had much experience of military matters; and every day I am disposed to think more highly of the English Army, its working and administration. I have told you the principle on which the Government are prepared to act. I will lay before the military authorities a scheme based on that principle, and which will carry our views honestly into effect. I trust the House and the country will support us in bringing this scheme to a successful issue. I listened with the greatest attention to the evidence which was given before the Commission by Lord Clyde, General Spencer, Lord West, and other officers who were in favour of the total abolition of the system of purchase. They saw all the abuses and scandals by which the working of the system was attended, but they did not appear to think of the substitute for it which was to be provided, or how a remedy was to be applied to the evils of which they complained. The simple remedy of plunging our arms into the public purse will not do. Then what course, let me ask, is open to us? For my own part, I think that purchase ought to be limited to the ranks of the service below that of lieutenant-colonel, in which position I think due care ought to be taken that an incompetent man, to whose charge the lives of 1000 men are committed, should not be placed. While, however, I deem it right to act upon the principle which I have just laid down, I will not be driven to go one inch beyond the point to which I distinctly see my way. Our Army is a machine too delicate to be lightly handled, and while I shall seize the earliest opportunity consistent with due deliberation to submit to the House the scheme to which I have referred, I feel bound to dissent from the resolution of the hon. and gallant member for Westminster, as well as from the amendment of the hon. and gallant general the member for Berks (who was one of the members of the Royal Commission on purchase in 1857).

Mr. E. Ellice differed from the Secretary for War as regards he change in the plan of appointing lieut.-colonels. He said the scheme would only aggravate the evils complained of, and he advised the House—both those who desired the abolition of the purchase system and those who thought it should be maintained—not to assent to a proposition which was accompanied by so many difficulties. He insisted that the power of selection in the higher ranks would open a door to partialities and favouritism; and he should like to see, he said, instead of this piece of patchwork, a scheme that would settle the affairs of the whole Army, that of India included.

Colonel North believed that the project of Mr. Herbert would introduce the small end of the wedge that was ultimately to destroy the existing system. For the future, the prospects of an officer would be restricted to the rank of major.

Lord Stanley said, as a member of the commission, he was aware that the attempt to abolish the purchase system would be a work of great difficulty and enormous expense, and no plan had been proposed. A compromise resulted in the scheme proposed by Mr. Herbert, and, if the House proceeded to a division, he should vote against the motion.

The amendment having been withdrawn, the House divided upon Sir De Lacy Evans's motion, which was negatived by 213 to 59.

THE INSTITUTION OF NAVAL ARCHITECTS.

The Institution of Naval Architects held its first meeting on Thursday week Sir John Pakington, Bart, G.C.B., in the chair. There were present about a hundred and fifty gentlemen, including several members of the National Defence Commission, Admiral Martin, sea lord of the late Board of Admiralty, and many of the first ship-builders and marine engineers in the kingdom. The Rev. Dr. Woolley, late Principal of the School of Naval Construction, Portsmouth, read an able and elaborate paper on the present state of the mathematical theory of Naval Architecture. This was followed by a luminous exposition of the Wave Line Theory of Ship-building by its author, Mr. J. Scott Russell. A third paper, On the Strength of Iron Ships, was also read by Mr. John Grantham.

In the evening of the same day a second meeting was held, the Earl of Hardwicke in the chair, at which a paper written by the Astronomer Royal, G. B. Airy, Esq., on the compasses of iron ships, was read by the secretary, Mr. E. J. Reed, editor of the *Mechanic's Magazine*. This paper was followed by some valuable remarks made by Mr. Archibald Smith, the editor of Dr. Scoresby's recent work on the first voyage of the Royal Charter. Mr. G. W. Lenox, the sole manufacturer of cables for the Admiralty and Trinity Boards, then read a paper on chain-cables, which was succeeded by a brief discussion. On the following Friday a paper on iron ships was read by Mr. W. Fairbairn, F.R.S., in which he advocated the addition of a considerable quantity of iron arranged lengthwise on the upper deck or near it, for the purpose of increasing the longitudinal strength of the ship, and rendering her equally strong above and below, after the fashion of the Britannia bridge, and expressed his belief that iron passenger ships might be constructed so strongly that scarcely any amount of knocking about, even on rocks, would send them to pieces. He also spoke strongly against "Lloyd's Rules." Mr. Scott Russell joined issue with Mr. Fairbairn on some of his leading statements and opinions, and contended that it would be unwise and impolitic to follow implicitly either Mr. Fairbairn's views on the one hand, or "Lloyd's Rules" on the other. The proper course was, he said, for all such persons to meet together as they were then meeting, and to give each other the benefit of their various experiences. A paper on certain experiments which have been made on some of Her Majesty's ships for ascertaining the positions of their centres of gravity, was read by Mr. F. K. Barnes, of the Controller of the Navy's Department, which was said to possess a very high professional value, and was listened to with the greatest possible interest.

A fourth meeting was held in the evening, at which papers on an Improvement in the Form of Ships, by Mr. Joseph Maudslay; on a Diagonal System of Ship-Building, by Mr. John White (West Cowes); and, on How to Economise Fuel in Marine-Boilers and Engines, by Mr. Robert Murray, Surveyor to the Board of Trade, are being read.

The series of meetings was concluded by a fifth meeting held on Saturday, at which Mr. Barnaby, of the Admiralty, read a paper on Ship-building Inventions; and Mr. Scott Russell completed his disquisition on the Wave Line Theory.

The meetings were not only eminently successful, but were attended by one very important result which the public will learn with satisfaction. It is well known among shipbuilders and shipowners that "Lloyd's Rules" have been very wisely denounced as a great hindrance to improvements in shipbuilding, owing to the fact that no shipbuilder is at liberty to depart from them unless he forfeit all claim to the registration of his ship in Lloyd's list, without which merchants will not venture their cargoes in them. At the late meetings this subject was brought forward on two successive days. Mr. James Martin and Mr. J. T. Ritchie, Lloyd's two chief surveyors, frankly undertook to co-operate in all reasonable ways with the Institution of Naval Architects (of which they are officers), with a view to the continual improvement of the art of shipbuilding. Thus a most serious question has been settled to the manifest advantage of the public, for while every real improvement of our passenger and merchant ships that may be suggested will be guaranteed against obstruction, no countenance will, of course, be shown to any injurious change by the practical shipbuilders who compose the Institution. This single result will amply repay all the pains taken in the establishment of the Institution of Naval Architects.

The Court held by her Majesty on Wednesday has been commemmorated by an extremely neat medal, specially designed and manufactured for the occasion by the Messrs. Pinches and Co. of Oxenden Streei.

By the last Indian Mail we learn that the Nepaul campaign is officially announced at an end, the Commander-in-Chief having issued a general order of thanks to the Trans-Gogra Brigade, under Brigadier Holditch, C.B. It is stated, moreover, on the authority of the *Lucknow Herald*, that Jung Bahadoor has surrendered the Begum and the young Prince Burjis Kudr, and that they have actually arrived at Gondah on their way to Lucknow.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street North, Strand, in the county of Middlesex.—SATURDAY, March 10, 1860.

Xerxes moved him to tears—the thousands of Volunteers of Queen Victoria can cause no sorrow, save to those who envy our greatness; they menace no one, even though they cry out "come who dare;" but they enable the English statesman who may be threatened by invasion or war to say to the greatest monarch in the world, "*Contempsi Catilinæ gladios—non pertimescam tuos.*"

We stated last week that the change in the prices of cavalry commissions had been followed by an increased number of applications for cornetcies; and our statement was confirmed by the Secretary for War in his speech of Tuesday evening on Sir de Lacy Evans's motion. We are glad to add that during the present week the demand has still further increased; and in a short time we shall no longer see the gaps which disfigure the list of cavalry subalterns. Parents have no objection to give their sons some extra allowance to enable them to meet the expenses of a cavalry regiment, now that the authorities have given an implied guarantee that these expenses will be brought within something like reasonable limits, and that it will be no longer necessary to have recourse to their bankers for a fortune to provide for each step of regimental advancement. We hope this new and more healthy state of things will be permanent; but we confess we should look to that result with much more confidence if the authorities had acted with greater liberality in one or two respects. Mr. Sidney Herbert wishes, as far as possible, to work a reform in the expenditure of cavalry officers by bringing in a class of young men whose means will not allow them to indulge in the absurd extravagance hitherto in vogue in these regiments; but he has not received the encouragement he has a right to expect from some of his colleagues. The forage stoppages still remain, and the Treasury, with whom the financial part of the arrangements rests, determinedly refuse to give their aid to the Secretary for War in his efforts to restore efficiency to the commissioned ranks of the cavalry. The reasoning upon which they found their refusal is very illogical. They say if we give more advantages to cavalry officers it will only have the effect of increasing the sums given for commissions. They appear to forget that extra sums are not given for first commissions, that a cornet would get no increased advantage as regards forage for his chargers by purchasing his lieutenancy, and, therefore, that it is most unlikely he would pay more money for a step which would bring him no more relative advantages than at present.

There is another grievance in connection with the change which we are sorry to find Mr. Sidney Herbert expressing his intention of inflicting on the present holders of cavalry commissions. In replying to Colonel Dickson the other evening, he said that these officers in purchasing their future steps would not get credit for the larger sums paid by them under the old regulations, but that they would have to pay the infantry difference just the same as those cornets who are now coming in at infantry price. This answer has given universal dissatisfaction; and we are not surprised at it, because it appears to us to be highly unjust to these officers, and most impolitic as regards its effect upon the general change of "tone" which the authorities are anxious to bring about in these regiments. A cornet who has purchased under the old regulations has paid 840*l.* for his commission; if he now purchases a lieutenancy (value under new regulation 700*l.*) he is asked to pay an additional sum of 250*l.*!—that is to say, the Government having fixed the price of a lieutenancy at 700*l.*, demand 1090*l.* for it from those officers who were in the Service before the 1st of March. A great deal has been said about paying sums over regulation for promotion, but what becomes of all these moral sentiments when we find the Minister of War himself asking a cavalry cornet to pay 390*l.* above the regulated price for his lieutenancy? If one of the existing cornets sold out and re-entered the Service, he could set it right, because the Government would have to repay him his 840*l.*, and give him the same article next week for 450*l.* It is hardly right or politic to place a man in a worse position because he remains in the Service than if he left; but this is just what Mr. Sidney Herbert states he will do. Existing cavalry officers may expect a just consideration for what they have invested, but not until they sell out. If it be held out as a premium for "cutting" the Service, then it will be successful, but not otherwise. No doubt the Secretary for War may say that the advantages or emoluments offered for the old price are not diminished; but is it a wise thing to have one set of officers in a regiment getting promotion under one system, and the rest under another? Is it politic to continue to make the payment of large sums a condition of promotion, even though those affected are the men who entered the cavalry under a system which gave them no right to expect otherwise? As we have before stated, many of the younger cavalry officers possess small means, and they certainly are not unworthy of a little generous consideration. We venture to hope that Mr. Sidney Herbert will not refuse it to them; and as a little sop to a financial administrator, we should propose that cornets who have purchased their commissions for 840*l.*, should at least be allowed to attain a 700*l.* lieutenantcy, on renouncing their claim to the odd 140*l.* on selling out. Although, strictly speaking, not a fair compromise, this would eventually relieve the Reserve Fund, and, we think, would satisfy those who now so loudly and so justly complain.

We understand that the Purchase System is not unlikely to be the subject of another debate in Parliament next week. A noble lord, long and intimately acquainted with the working of our military organisation, is, we hear, about to bring before the Upper House a motion directed against any interference with the existing regulations.

We believe that Major-General Sir William Mansfield has declined the appointment of second in command of the China expedition to which he was gazetted at home some two or three months since. He will now in all probality remain with Lord Clyde as Chief of the Staff until his resignation, when Sir William will have the chief command at Bombay in succession to Sir Hugh Rose.

Although we are not able to say it is officially settled, we believe it is most probable that Lieut.-General Sir John Pennefather will succeed General Knollys in the chief command at Aldershot.

Lieut.-General Sir George Wetherall, on being relieved as Adjutant-General by Sir James Scarlett, will in all likelihood be appointed to the command of the Northern District, in succession to Sir John Pennefather.

Major-General Lord William Paulet, C.B., now in command of a Brigade at Aldershot, will be the new Commander-in-Chief at Portsmouth, vice Sir James Scarlett.

Major-General the Hon. A. A. Dalzell will succeed Major-General Eden in the command of the Cork district on the 1st of April.

Major-General Duncan A. Cameron proceeds to Edinburgh as Commander-in-Chief in Scotland, in succession to Lord Melville, whose period of service has expired.

The Brigade at Aldershot, vacated by Major-General the Hon. A. Spencer, and to which Major-General Cameron was appointed, will be commanded by Colonel David Russell, C.B., formerly of the 84th, and now head of the Recruiting Department. Another Brigade at Aldershot is rendered vacant by Lord William Paulet's appointment to Portsmouth.

The Earl of Cardigan's period of service as Inspector-General of Cavalry having expired, Major-General Lawrenson, formerly of the 17th Lancers, and now commanding the Cavalry Brigade at Aldershot, will succeed him in that post.

Colonel Lord George Paget, C.B., will have the command of the Cavalry Brigade at Aldershot, vacated by Major-General Lawrenson.

Lieut.-General Sir Henry Somerset, K.C.B., will resign his command at Bombay, and return home on the 27th of this month. He will be succeeded in the chief command of the Presidency by Lieut.-General Sir Hugh Rose, G.C.B., who will retain it until the return of Lord Clyde from India.

We some weeks ago stated that Major-General Sir John Inglis, K.C.B., was about to be transferred from the Bengal to the Madras Presidency. We now find the transfer notified in General Orders along with the gallant General's resignation of the Cawnpore division.

Lieut.-General Sir J. Hope Grant was to leave India for China in H.M.S. Feroze, during the present month, and will be succeeded in the command of the the troops in Oude by Brigadier-General Sir Robert Walpole, K.C.B.

Colonel Adams, C.B., 28th Regiment, has been appointed a brigadier of the second class at Poona, in succession to Brigadier Sutton, 31st Regiment, who accompanies his corps to China.

Lieut.-Colonel Elkington, 6th Royal Regiment, goes as Assistant-Adjutant-General, and Captain Green, 77th, as Deputy-Assistant-Adjutant-General to Sir John Michel's division for the China expedition.

Colonel the Hon. R. Rollo, Assistant-Adjutant-General, at Montreal, has been appointed Military Secretary to the Commander of the Forces in Canada, and Lieut.-Colonel Conolly will fill his place at Montreal.

The Medical Warrant, which was sent to Lord Canning for promulgation, has not yet been published by His Excellency, and a memorial in reference to the delay is being prepared by the medical officers in India. It is stated that the Warrant was sent to the Indian Government on 15th December, 1858, and that it was again communicated to them in August, 1859. The cardinal defect in the administration of Lord Canning of public affairs is his habit of procrastination, or, at all events, the great delays which take place on the part of the supreme government in deciding upon important State Papers and questions.

Dr. Linton, C.B., Inspector-General of Hospitals, has returned to Calcutta, after a long tour of inspection of the various stations in his division from Benares to Darjieling.

H.M.'s 99th Regiment are permitted to take volunteers from 53rd and 60th Regiments before embarking for China.

James Brown Gibson, Esq., M.D., C.B., the director-general of hospitals, who was appointed successor to the lamented Thomas Alexander on Tuesday last by Mr. Secretary Herbert, entered the Service as an hospital assistant in December, 1826; became assistant-surgeon in January, 1829; surgeon, 2nd July, 1841; surgeon-major, 15th May, 1851; deputy-inspector, 1st May, 1855; inspector-general, 31st December, 1858. His services are not recorded in Hart, but he is well known as an old and meritorious officer, who has been now engaged in all parts of the world for 34 years of full-pay service.

LATEST INTELLIGENCE.

HOUSE OF COMMONS.—Friday.

In the House of Commons Sir C. Wood stated (in answer to a question from Mr. Gregson) that in consequence of a suggestion made by Lord Stanley when in office, the Governor-General of India had expressed an opinion that it would be advisable to transfer the control of the government of Singapore and the Straits of Bengal to the Colonial office. The noble Duke at the head of the Colonial office had not yet declared, whether he was willing to receive the territory under the control of his department.

A passage having appeared in the *Oude Gazette* respecting discontent among the troops in India, General Peel called the attention of the Secretary of India to it, and asked whether there was any truth in the statement.

Sir C. Wood was able to state that the statement contained in the paragraph had not received the slightest confirmation in any of the communications received by the Government.

Sir F. Smith, Sir J. Elphinstone, and Mr. Lindsay, having urged the necessity of establishing harbours of refuge, Mr. Milner Gibson announced that government had considered the subject and came to a determination which would be explained to the House as soon as the state of public business would permit.

In reply to a question from Mr. Way, Sir C. Wood stated that there existed no intention to deduct the amount of batta granted to the troops who were present at the siege and capture of Delhi, from the prize-money due to them.

General Buckley asked the Secretary of State for War, what number of officers had been appointed as inspectors of Rifle Volunteer Corps, whether they were appointed to that duty only, and if so, what pay and emoluments did they receive.

Mr. Sidney Herbert's answer to this question was very indistinctly heard, but he was understood to say that the pay of the officers in question was 9*s.* 6*d.* a day.

On the question of the adjournment to Monday, desultory discussions ensued upon a variety of topics. Among other things the Savoy question came upon the carpet; and Lord John Russell stated that he had sent copies of the correspondence with France on this subject to St. Petersburgh, Vienna, and Berlin. From the first no intelligence had yet been received; but the courts of Berlin and Vienna had declared their concurrence in the views of the British Government. Switzerland still continued its opposition to the annexation of Savoy. The Government had received a despatch from Sardinia, stating that the question of annexation would be submitted to the vote of the people of Savoy.

The debate on the commercial treaty was resumed by Mr. Horsman in a powerful speech. He concluded by moving an addition to the address praying her Majesty to effect the omission from the treaty of the article prohibiting the exportation of coal.

In the House of Lords the Marquis of Normanby introduced an interesting discussion on the affairs of Italy.

It has been decided that batteries shall be erected on the Middle Ground, Caranjah Shoal, Butcher's Island, and the Oyster Rock, for the better fortifying of Bombay. The Home Government have been requested to send out 50 or 60 Armstrong guns.

A Board of officers has assembled at the Horse Guards for the purpose of inquiring into the mode of letting the canteens at the various barracks, and into the canteen system generally, with the view to several alterations and improvements some time in contemplation by the authorities being made in that department. Colonel the Hon. A. Gordon, C.B., Deputy Quartermaster-General, is appointed the president.

The railways agreed to accept of one fare to and from London from Volunteer officers going from Glasgow to attend her Majesty's *levée* on Tuesday last. Officers got tickets at half-fare, on presenting their commissions to the railway clerks, available from the 5th to the 10th instant.

NAPOLEON III. ON ENGLAND.*

"Can we from the writings of Napoleon III., whilst a prince in exile, form any decided opinion as to his real sentiments and intentions with respect to England?" Such is the very pertinent question with which the editor of this little volume commences his Preface, and which, if we answer in the affirmative, gives to this book a peculiar value; while, if we decide the other way, these pages must still be eminently interesting, as furnishing, in some sort, an insight into the workings and train of thought of, probably, the most profound mind of the age.

As we read these—Louis Napoleon's—views on many of the most important political questions, we naturally try to find some connection between the words of the exile, and the deeds of the Emperor; and it is, in truth, curious enough to contrast the opinions of the first, as they are here expressed, with the policy and actions of the second.

Here is what the Emperor, who makes war for an "idea," says upon the subject:—"People are incessantly repeating to us that peace is a blessing, and war is a scourge. But one thing is not said often enough, which is, if war is often a necessity when a great cause has to be defended, it is, on the other hand, a great crime to make it from caprice, without having a grand result in view, an immense advantage to justify it." (Page 192.)

Here is what the greatest despot in Europe remarked in 1832:—"According to the opinions which I advance, it will be seen that my principles are entirely republican." (Page 45.) But, with that facility for excusing himself from acting on any principle whatever, for which the Emperor is somewhat remarkable, he is prepared conveniently to disregard this one, and, sorely against his will, gives preference to the monarchical form, because "such a government is more suited to France, inasmuch as it will give more guarantees for a state of tranquillity, of authority, and liberty." (Page 45.) And we can readily believe Napoleon III. when he tells us, in the same page, that, "if the Rhine were a sea, if virtue were always the only moving power, if merit alone rose to govern," then he would act up to his avowed principles, and have "a republic pure and simple;" but the natural and moral phenomena aforesaid would certainly not be the most surprising features of such a contingency.

If the friends of Italy have any faith in the infallibility of Napoleon's axioms, it will be satisfactory to them to be reminded that "the wars of the Empire have been like the overflow of the Nile: when the waters of this river cover the plains of Egypt, one might believe that there was nothing but devastation; but they have scarcely returned to their channels when abundance and fertility spring up wherever the floods had extended." (Page 23.) It is only to be regretted that the harvest, in this particular instance, has been so backward.

It will scarcely be as satisfactory to the Savoyard to know that the man who is about to annex his country to that of France, held, twenty-eight years ago, such opinions as the following—"Harmony between the government and the governed can exist in two ways only: when the people permits itself to be governed by the will of a single individual, or when the chief governs in accordance with the wishes of all. In the first case it is despotism. In the second, it is liberty." (Page 46.)

Perhaps the most interesting pages of the book are those headed "Napoleonian Ideas," in which, under cover of an enunciation of the ideas and motives of the Great Napoleon, we arrive at many of the sentiments of his not less illustrious nephew; but it would be impossible to select from thirty-nine pages of "ideas," pregnant with significance, isolated passages, as likely by themselves to furnish any key to the powerful mind whence they have emanated. It would be as futile as a midnight attempt to explore and appreciate the beauties of some vast cathedral by the light of a solitary "dip." The "ideas" should be taken *en masse*, and not in homœopathic doses; for though there is much to ponder over in every page, and each line should be carefully considered, it is only when we have read the whole that we are in a proper position to judge of Napoleon's sentiments and views respecting the different questions—chiefly those of home and foreign policy—herein discussed.

"Some books," Bacon tells us, "are to be tasted, others to be swallowed, and some few to be chewed and digested." This is one of the latter class.

The "Historical Fragments," also, demand a careful perusal; they are more of the nature of graphic marginal notes upon certain passages in our history; "fragments," as they are truly termed, through the chinks and fissures in which we can distinguish, shining clear and bright, the powerful intellect of the imperial author.

It will be generally allowed that a complete History of England thus annotated by the Emperor Napoleon would be an extremely valuable book, but probably no part of it would be more so than that which, in its fragmentary form, we have here, tracing the causes which led to the fall of the Stuarts, and the re-establishment of civil and religious liberty in the person of William of Orange. The principles, "clear, precise, and applicable to all countries," which the Emperor tells us he derives from a study of these periods of English history, and which he presents to us with all the emphasis which italics and small capitals can bestow, are, when considered in conjunction with recent events, and with a mental panorama before us of the nineteen years which have passed since the words were penned, so remarkable and so characteristic that we cannot refrain from quoting them:

"Foreign aid is always incompetent to save those governments which the nation will not adopt. . . . Walk at the head of the ideas of your age, those ideas will follow and will sustain you.

"Walk behind them, they will drag you along. Walk in opposition to them, they will overthrow you." (Page 176.)

Though most of the passages in this volume have some sort of reference to this country, the chapters on "Personal Freedom in England," "The Conservative Party," "The Slave Trade," and the "Relations between France and the Powers of Europe," are peculiarly worthy of attention, as treating more directly of our institutions, habits, and mode of government; and we believe that a perusal of these will satisfy the reader that, as Mr. Simpson observes in his Preface, "In the writings of Louis Napoleon . . . we fail to discover any symptoms of hostility to England; quite the reverse. Frequently and without variation, he expresses his admiration of her constitutional government, her power of public opinion, her freedom of the press, and his great admiration for her Protestant religion." (Page iv.)

How much value is to be attached to the expression of these sentiments it will be for the reader, according to his estimate of the Emperor's character, and his belief in his sincerity, to decide; nor does Mr. Simpson, in presenting them to the public in a collected form, pretend to do so; he has merely strung together, with considerable judgment, such selections from the writings of Napoleon III., as were likely to prove interesting to Englishmen at large, and in so doing he has not only made a valuable addition to our political literature, but has produced a book which cannot fail to be read with much interest by whoever cares to study the minds and characters of great men, or may desire a more intimate acquaintance with the inner man of that remarkable sovereign who, of all now reigning, exercises probably the greatest influence, for good and for evil, upon the councils and destinies of Europe.

Napoleon III. on England; Selections from his own Writings. Edited and translated by John Hawkins Simpson. (Saunders, Otley, & Co., South Conduit Street.)

THE SHRAPNEL SHELL.*

There is, perhaps, no projectile, on the merits of which artillerymen are so much divided, as the Shrapnel shell; and the value of this book will therefore be readily appreciated, as containing the opinions on the subject of so good an authority, and of an officer of such lengthened experience as General Bormaun.

The first part of these pages was "originally written in English, having been destined to be inserted in an English military journal, in order to rectify some erroneous statements on the Belgian metallic fuze for explosive projectiles" (Preface), and to this was subsequently added the author's remarks "On the use of Shrapnel shell in the late Crimean war; and," continues General Bormaun, "relying on the indulgence of my readers, I have preferred leaving the whole in English, as the most important of my quotations are from works in that language" (*Idem*).

The first fifty-eight pages of the book, then, are devoted to a discussion on the relative merits of the different kinds of fuzes at present in use, in which the author, naturally enough, expresses himself strongly in favour of the Belgian metallic fuze, which, he tells us, he "some twenty years ago (1835), proposed as the basis of an improved Shrapnel and shell system." (P. 4.) And on this very interesting though, at the same time, open question he brings to bear all the arguments which his knowledge of the subject can suggest; with what success, however, it must be for others better qualified for the task than ourselves to decide. Indeed, of so purely professional a nature is this portion of the book, that we have purposely abstained from critically examining it. Regarding the value of the shrapnel shell, General Bormaun has much to say, and he undoubtedly urges his remarks in its favour with considerable force.

Quoting from different works on the Crimean war, he endeavours to show that, in not employing this projectile more frequently during the siege, our Artillery—of whom he everywhere expresses the highest opinion—committed a great error, and that, wherever we did employ it, the effect was invariably very destructive.

At p. 72, General Bormaun states that, "as to the siege, properly speaking, it appears certain that Shrapnel fire was not used at all by the English against Sebastopol, with one single exception, viz., on the very last day of the siege;" though, as a note on this passage, he gives us another quotation from Colonel Hamley's "Story of the Campaign of Sebastopol," showing that spherical case were also used on the 20th of July, with very destructive effect. But, with the exception of these two occasions, General Bormaun assumes that the use of Shrapnel shell was entirely neglected by our Artillery.

Now, this is far from being the case. In the official journal of the siege of Sebastopol, compiled by Major Reilly, Royal Artillery, we find frequent mention of the employment of Shrapnel; indeed, one battery of 8-inch guns was specially furnished for the purpose; while, looking at the number of rounds of each description of projectile which were expended during the siege, we find a total of 3318 Shrapnel shells.

Again, General Bormaun leads us to suppose that the use of Shrapnel was *invariably*—in the field and in the trenches—attended with good results.

This is also incorrect; for, at p. 122 of the official journal we have just referred to, we find the following passages:—"June 18th, No. VIII. battery of the right attack opened with Shrapnel shell, with Boxer's fuzes, at the Malakoff, upon the parapets of which masses of men were standing firing at the French. *The shells burst most accurately, but with no apparent effect;* the Russians stood their ground. Colonel Dickson directed round shot to be used, which, ploughing through their ranks, after a few rounds cleared the parapets."

Elsewhere in this journal we certainly read that Shrapnel did, on some occasions, succeed admirably, but such was far from being invariably the case, and the general opinion of those artillery officers who used them was unfavourable; and when, with a view to giving the discussion of the subject a more practical form, each captain of artillery who had commanded a battery was called upon to report on the merits of Shrapnel, and asked which they would use in case of a column advancing, round shot or Shrapnel; with one exception the answer was "round shot."

We have mentioned these facts rather to show that General Bormaun's conclusions drawn from our use, or rather disuse, of Shrapnel shell during the Crimean war, are not always those of artillery officers who were present, than with the intention of proving that his opinion regarding the value of this projectile is necessarily incorrect; for few artillerymen would be found to deny that, when perfected, the Shrapnel will prove the most destructive missile, or that, even at present, in its comparatively rude state, it may frequently be employed with great success.

Probably Sir William Armstrong's beautiful shell is nearer perfection than any description of Shrapnel which has yet been invented. And if General Bormaun were acquainted with it, he would, we feel sure, at once erase the passage, at p. 2, to the effect that the military world has been deceived in the expectation they entertained that further "improvements, which the projectile invented by General Shrapnel was judged by experienced officers still to want *to render it fit for field* service, would come from England, rather than from any other country." The person to whom this book would, in all likelihood, afford *least* satisfaction, could he peruse it, would be General Shrapnel himself; for, however gratifying it might be to him to find the merits of the shell which bears his name so ably advocated, it would at least be a disappointment to him to read such a passage as the following, correcting the popular error that the origin of this projectile is English, and that it was invented about fifty years ago by Henry Shrapnel, then a Captain of Artillery—"*The Shrapnel shell is a German invention of the sixteenth century*, as has lately been discovered. For this discovery the Germans are indebted to a distinguished officer of the Royal Prussian Artillery, Captain Toll, who in his historical researches found in the library of the Heidelberg University a manuscript of the year 1573, which incontestably proves that the German artillerists of that epoch knew perfectly well the principle on which the present Shrapnel fire is founded; and that, notwithstanding their rather limited means, they had even succeeded in the application of this projectile, which was then called '*Hagelkugel*' (hail-shot)." (P. 59, 60.)

Another subject which artillerymen will find for discussion in this volume, is a suggestion of the author to develop still further our Shrapnel system, by employing it for vertical as well as for horizontal fire, and by introducing a projectile to which he has given the suggestive name of "incendiary hail-shell," and in which the bullets of the ordinary Shrapnel "are replaced principally by metallic incendiary bodies" (P. 74.)

The General enumerates many instances in which such a projectile might be employed with terrific effect, as against shipping and artillery ammunition-waggons, and, generally, against the *matériel* of an army, as opposed to *personnel*.

The suggestion is, at least, worthy of consideration; for the "carcases" at present in use but ill answer the purposes—somewhat similar to the above—for which they are employed; indeed, so much confidence has the General in the destructive effects of incendiary projectiles, as applied in the form of "incendiary hail-shells and bombs," that he considers it necessary to offer a sort of apology for proposing the introduction of so deadly a missile; and we will conclude our notice of this extremely practical and interesting book by a quotation from its pages, which may not be wholly unsatisfactory to such as view with a humane regret (however false) the introduction of such terribly effective weapons as Armstrong's guns, and read with a shudder of the five-mile range which has been attained by Mr. Whitworth. "Notwithstanding this tendency to incendiary warfare, the civilisation of our age may be said to have

* *The Shrapnel Shell in England and in Belgium, with some Reflections on the Use of this Projectile in the late Crimean War.* A Historico-Technical Sketch. By Major-General Bormaun, Aide-de-Camp to his Majesty the King of the Belgians. (Libraire Européenne, Brussels; and Trübner & Co, London.)

equally exercised its beneficent influence on the manner in which war is carried on. This influence consists in the progress of the art of war in general, but especially in the considerable improvements of our fire-arms as powerful means of destruction; for if we are notoriously superior to our enemy in that respect, we may evidently expect to bring him soon to the conviction that wherever he seriously opposes our will, he merely will be destroyed; the natural consequence of this will be, besides our physical superiority over him, a great moral one; that is to say, we may adopt in modern warfare as a principle—*to try to obtain the desired result rather by threatening to destroy than by destroying;* so that the inevitable sacrifices of human life in war operations may be at present considerably less than in former times on both sides.

"But, once in possession of such mighty engines of destruction, it evidently would be as reprehensible to use them *unnecessarily*, for the mere pleasure of destroying, as it would be to refuse to employ them for our self-defence, and *thus sacrifice unnecessarily the lives of our own troops:* a sacrifice which cannot be justified, even by the most brilliant victory." (Pp. 108-109.)

THE SIKH SOLDIERY.

(*Continued from page* 96.)

The Sikh soldier played by far too important a rôle in 1857 and 1858. To him we owe it, and no one is better aware of the fact than himself, that India had not to be reconquered in all its length and breadth. Humbled in some degree by the reverses of 1845 and 1849, the military pride and arrogance of the soldiers of Runjeet Singh sprang into life again in 1857. Overwhelmed by the revolt of our Sepoy army, and the wide-spread machinations of the Mahomedans in northern India, at that moment the Punjab alone faced the wave of rebellion, which, rolling from the south and east, from the Hooghly and the mountains of Nepal to the Sutlej, broke and wasted its strength around the walls of Delhi.

Guided by the undaunted will of Sir John Lawrence, and backed by three thousand British soldiers (all the support we could spare), the Sikh people boldly took up arms in defence of those white men whom but eight short years before they had met and fought at Goozerat. Those who condemn our countrymen in India, and who would attribute the loss of one native army to their intense pride and contempt of the Sepoy soldier, will do well to ponder this fact. The men who failed to command the allegiance of the soldiers with whom they had served for one hundred years, wrought into efficient and devoted warriors the rough and shapeless bands of Sikh villagers* as they received them from the hands of Sir John Lawrence, and with a celerity truly marvellous. Among the remarkable events of 1857, and they were many, the creation within three months of a second native army is the greatest, and that of which every Englishman has most reason to feel proud. Whatever the errors of the system, however faulty the organisation of the late Bengal army, they were no ordinary men who, in that extreme crisis, when our possessions between the Sand Heads and the capital of the Moguls might have been computed by the square foot, turned the hand of the conquered people against those very troops by whose aid, and under our leading, the Punjab had been reduced to a province of British India. Mere animal courage sinks to a secondary place when we permit ourselves to dwell upon the rare military ability and intuitive genius that were displayed by that band of Englishmen, between May and December, 1857, in the north-west of Hindostan. That page of our history is at once the brightest and the most terrible. We gained more glory, it may be truly said, in the losing of India than in its conquest. And lost it had been, but for the kilts and red tunics hurrying to the scene of strife.

From May until the 21st of September the tide of revolt was stemmed by the disciples of Gooroo Nanuck. True, a handful of British soldiers before Delhi, by their indomitable spirit, surprised Hindoos and Mahomedans into a recollection of the deeds of Clive, Lake, Coote, and Munro; but it must be borne in mind that without the moral and material support drawn from our alliance with the most military nation in India,—we speak of the Sikh people,—this handful of men would have perished by the road-side or in the narrow lanes of the Subzee Mundee, had they ventured, with flanks and rear uncovered, to sit down before that walled city. Standing beneath the walls of Delhi, crouching by their camp-fires around Jhansi, watching the fords along the banks of the Sutlej, protecting the high-roads and preserving our communication, or escorting long lines of grain and ordnance waggons moving to the south, our Sikh soldiers called to mind and repeated to each other the old tradition of their race, that, led by a white man, the Khalsa† should picket their horses in the palaces of the Great Mogul. Drunk with success, with vanity, with their self-importance, and with the imagined plunder of all India at their feet, these rough Pindarees of the North came to look upon the Feringhee too lightly, too much as the means by which success was to be secured to them, our soldiers and our masters!

Delhi became a holiday and a show. A few weeks later and these men, blind with conceit and self-esteem, found themselves in the presence of a British army, and in presence of that army their importance passed away; but not so their pride and vanity. Hurt and disappointed, reduced in an instant to the rank of mere subsidiaries, our Sikh friends adopted that tone of mind which sees a slight in every word and act. "*We were your brothers at Delhi, now we are nobody.*" This feeling, mistaken and childish in its early stage, we had not then time to correct. The probabilities are, that it was not noticed. Other and grave matter pressed upon our attention. Oude, Rohilkund, and Gwallior left us no room to study the littlenesses of our new Sepoy. Over-rating their past services, discontented with their position, these men may have argued to themselves somewhat after this fashion: "With independence before us, we were fools enough to sacrifice our country and liberty to the Feringhee, and this is our reward. What, if it be not too late to rectify our error?" Men blinded by jealous anger seldom argue well. Taking advantage of this *pique*, it is impossible to say how far the emissaries of Tantia, the Nana, Mamoo Khan, or the Begum, may have succeeded in fanning the feeling into one of a more hostile character. Indeed the knowledge would now avail us little. Here and there facts oozed out sufficient to warn those among our Indian officers who were not too old and too bigotted to have benefited by the lessons of 1857. Again, but the other day, we had to record the discovery of a *rapprochement* between our Sikh outposts and the rebels within and along the frontiers of Nepaul. Ignoring, on the score of past services rendered to the State, the extent to which our Punjabee troops may stand criminated, we may be permitted to consider those measures by which a military combination against our Indian Government will be made most difficult to them.

We are inclined to attach more importance to the disposition than to the present strength of the Sikh force. Fifteen thousand armed Sikhs, quartered in the Punjab, are a palpable danger; but scatter fifty thousand of these troops over the broad plains of Oude and Bundelcund, and the danger becomes infinitesimal. If we must have a native army, be it Sikh, Goorkah, or Poorbeeah, we shall do well to apply to it the remark of Sir John Malcolm, "It is, politically speaking, expedient that our native army be in the habit of serving in every part of India, and far from desirable that they should remain in the vicinity of the provinces of which they are natives." Had our Sikh force been posted in Oude, and the Oude Sepoys been scattered through the Punjab, Scinde, and Burmah, the mutiny of 1857 had not occurred. Preserve, we say, the character of each race of these soldiers intact, and then isolate it. Put the Shastres into a Mahomedan musjid, and the Koran upon Brahma's head, and over Mahomed and Brahma, standing back, place full private John Jones. This is the key to our Indian possessions. We shall probably be told that the Sikh troopers upon the banks of the Raptee did not hesitate to correspond with the rebel Sepoys. To the one who did so, one hundred may have been deterred by the long miles lying between them and their homes.

(*To be continued.*)

* It must be remembered that many thousands of the old Khalsa soldiery were among the levies.—[Ed.]

† Chosen ones.

PRUSSIA.

PROPOSED MILITARY REFORMS.

The Prince Regent of Prussia has declared that he looks upon an increase of the Prussian army as indispensable. The question has already been brought before the Prussian Chambers. His Royal Highness some time since developed his views in an anonymous pamphlet, entitled "Observations on the project of law for organising the defence of Germany."* In this pamphlet the royal author insists upon a three-years' continual service of recruits as the alpha and omega of the efficiency of the Prussian army. He, moreover, insists upon an annual additional recruitment of 20,000 men.

As regards the proposed plans for the defence of the German coasts, those laid down in the Prussian Memorandum have been unanimously adopted.

As regards the reform of the military organisation of the army of the German Confederation, Prussia insists upon the maintenance of articles 5, 12, 13, 14, and 15, of the military constitution.

Those articles are to the following intent:

Article 5. No state of the Confederation whose federal contingent forms in itself one or more *corps d'armée* can unite in the same division the contingents of other states to its own.

Article 12. In war the Federal army is *one*, and commanded by one commander-in-chief.

Article 13. The commander-in-chief is appointed by the Confederation, each time that the formation of the Federal army is ordained; his functions cease when the Federal army breaks up.

Article 14. The Federal commander-in-chief takes oath to the Federal Diet, his only authority.

Article 15. The designation and execution of the plan of operations is entirely at the will of the commander-in-chief. He is personally responsible to the Confederation, and may be cited before a Council of War.

* Published by A. W. Hahn, of Berlin.

The Ministerial Propositions "relative to a new Constitution of the Prussian Army." (Preussische Heerverfassung.)—The following is the abstract of an article on the above subject:—

"The doubts which have hitherto existed relative to the superiority of the present constitution of the Prussian Army have acquired some consistency by past experience and the onward march of events. The *five* mobilisations especially, which have taken place since the year 1848, have greatly increased the necessity for such reforms, and the present ministry have boldly grappled with them. Taking first the purely military point of view of the project of law laid before the Prussian Chamber, it states that, according to the present system of warfare, the active army (*Feld-Armee*) is to be made easier of mobilisation, and able to take the field; that, therefore, deficient *cadres*, as they existed especially in the *Landwehr* (men mostly estranged to military routine), were no more to be continued; that the reserves are to be increased and made easier of mobilisation; and that the whole active field army is to be placed on the fresh vigour of men above twenty years of age, as the *third* decade of man's existence is that most fit for military toil and exertion."

The project of law supports these demands, by the much easier and quicker concentration of foreign armies on the frontier, consequent on the existing system of railways throughout Europe, and the long line of the Prussian east and north-east coast, which presents a desirable scope for the operation of steam-flotillas. Before, marches of many weeks' duration made it possible for the unskilled or long ago disbanded soldier to acquire a little additional drill; but now, a day or two may only intervene between the men leaving their homes and the brunt and onslaught of the battle. Another reason for the proposed reforms lies in the hitherto want of a sufficient *réserve*. The Prussian battalions of the line had hitherto only their effective number of the war *état*, and as from various causes, such as invalidity, emigration, &c., 26½ per cent. of every year's *état* were lost during the three years' obligatory service in the line, even the *Landwehr* of the first call had often their full complements.

As according to the reform project for the army, the general obligation for military service will be re-enacted, the yearly amount of *recruits* will be raised from 40,000 to 63,000 men; and as the duration of actual service will be raised to eight years (!), the new-formed Prussian Army will consist of 252 battalions of the line, 224 squadrons of cavalry of the line, 108 field batteries, and 9 battalions of pioneers. Still, even after this increase, the new law will leave 150,000 men disposable for the reserve of the great corps of the army.

RUSSIA.

The Imperial Russian Navy in the Pacific.—It was at the termination of the great continental wars in 1813, that in Russia also a new energy was implanted into public affairs, in which various endeavours, such men as Prince Adam Czartoryski, Count Roumanzoff, then Cabinet Ministers, took a great part; men to whom nothing of importance going on in Europe escaped. It was, probably, the splendid results of the French Expedition *aux Terres Australes*, as well as those of the Flinders-Brown's voyage of discovery, which induced Count Roumanzoff to fit out the first Russian circumnavigation of the globe at his *own expense*. It was conducted by Captain Kotzebue, and was later followed by those of Krusenstern, Lütge, and others, the latter now the companion and adviser of the Grand Duke Constantine. In the meantime, the Russian *American* Company was also established; and Baranoff, who was a sort of *génie administrateur*, brought the colony of Sitka (on the N.W. coast of America) to a very flourishing state. Soon, the fur production in Sitka, as well as in Kamtschatka, had attained a great importance, and the communications by sea with the former became habitual; the voyages of discovery into the Pacific changed into those of a purely mercantile and official character.

As things stand now, the Russian Imperial Admiralty despatches every two years a frigate of about 1000 tons from Kronstadt, officered and manned partly by the Imperial Navy, partly by that of the Russian American Company, which, in modest imitation of the former East India Company, has also its naval establishment. These vessels proceed first to Rio de Janeiro to refit, take in fresh provisions, &c. The next run is to Sydney, where Russian officers and sailors have become quite *habitués*. From Sydney they perform a long and difficult navigation through the many isle-clusters of the Pacific to Kamtschatka, on the north-east coast of Asia. Here, they discharge the half of their most varied and multifarious cargo, including books and objects of art, medicinal stores, pig-iron, glass, &c. But it is at Kamtschatka also where they receive in exchange another less varied but costly cargo, those precious furs of the blue fox, the so-called noble marten, the ermine, &c. From thence the Russian man-of-war has to cross the Pacific over to Sitka, where a similar process of discharging stores and taking in of furs is gone through. Although Sitka (Russian America) has undoubtedly its future (!), yet the approach to that harbour is one of great difficulty in some parts of the year. Heavy fogs cover the sea of that *Ultima Thule*, and prevent any observation being made for considerable periods. Thus, the ships have to guess their being under the required parallel, and begin to fire their guns. If not answered, they have to shift their course and fire again, until the much-desired response from the walls of the Russian forts is heard. The value of the furs taken on board in these two settlements amounts to about one million of silver roubles; and it is with these furs that the courts of Pekin and Stambul are dressed. Those for the former have to be conveyed from St. Petersburg through Siberia to Kiachta, whence the Chinese caravans take them to their capital.

We may here state, by way of interpolation, that it was not in any part of Europe, or the United States, that the riches of California were anticipated or known. It is now more than twenty years ago, that the natives (*Kaloshes*) of Sitka said that the land to the south was rich in gold, as is plainly stated in the Russian work of Captain Chromtschenko, of the Imperial Navy. The Russian government, however, was not in a position then to avail itself of this most important communication. Still the commercial intercourse between this Russian colony and California is now of a yearly improving character. From Sitka the Russian men-of-war go down to the Cape Horn, put in again at Rio, and then proceed homewards. If the piercing of the isthmus of Suez is an undertaking much interesting France and Italy, the making of the Panama canal is one which will much advance Russian commerce and civilisation. The Amour settlements also progress at a ratio of which we have no idea in Europe, and those grim solitudes are fast covering with every contrivance of commerce and industry. If the canal of Panama be once constructed, those huge war-steamers now building will be able to approvision the American and Asiatic settlements of Russia in a fast increasing ratio, and bring their produce to the markets of Europe. This is a *legitimate* way how to occupy and improve a nation of 68,000,000 of people, which no sensible mind can gainsay. These repeated visits, however, to the Pacific and its numberless isles have also, of late, diverted the attention of the Russian government towards the forming of a permanent establishment in one of these charming and healthy stations.

The Caucasus.—The Emperor has decreed various promotions in reference to the late successes of the Army of the Caucasus, amongst which are Prince Orbelian as Governor of Tiflis; Prince Dadian and Baron Nicolai to fill especial missions at the Army of the Caucasus, &c. Prince Bariatynsky, now at St. Petersburg, also contemplates great administrative and financial improvements in the Taurida and the Caucasus.

The Government have nominated Lord Londesborough to the honorary office of vice-admiral of the Yorkshire coast.

TO PARENTS AND GUARDIANS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I hear great complaints of the severity of the examinations before the Board of Military Education. I am told by parents, whose sons have passed many years of their lives at our best public schools, and who have left those schools high in their upper classes, that they have nevertheless been "issue" when they have presented themselves before the Examiners at Chelsea. I have been asked, "Ought not a boy in the upper division at Eton to be considered sufficiently well educated for an ensigncy in a marching regiment?"

To this I have replied, "That depends upon what the boy has learnt at Eton. If his masters have done justice to him and to you, there is no question but that he ought to be quite fit for an ensigncy; but if they have merely taken your money, and allowed him to be tided up by time to a respectable position in the school, without caring much whether he was fit for it or not, you must blame the Eton system, and not the Board of Military Education, for your and his disappointment."

Eton bears the reputation of being the best public school in England. Our crack regiments contain always a large proportion of Eton men. The school is fuller now than ever it was before. It contained, at Christmas last, 850 boys. Of these 750 were in the upper school. They were taught by 15 masters in the upper school and by 5 in the lower school; in other words, each master had to teach above 40 boys—*which is impossible.*

The study of modern languages being now a *sine quâ non* in the army and the public service; amongst the class of boys who are sent to Eton to be educated, H.R.H. the Prince Consort has judiciously and generously placed certain prizes at the disposition of the Eton masters for proficients in French.

To teach 850 *boys French there is one French master provided at the first of our public schools.* He is remunerated by an extra charge of twelve guineas per boy per annum. He must either be a very wealthy man, or very few boys must attempt to learn French at Eton. Yet, to enter the army and manyof the public offices, French is absolutely necessary.

The legislature takes great pains, and goes to great expense, to inspect the schools of the lower classes; it would be surely money well spent, and trouble properly taken, could a half-yearly inspection and report be made on the schools of the upper classes. If it is important that the education of the poor should be attended to, how much more important is it that the education of the governing classes should be good? And when we reflect on the educational statistics which I have here given you of our largest and most celebrated public schools; when we hear every day that youths who have spent many of the best years of their lives at them, experience a sudden blight on entering their career, from the fact that they connot spell or write their mother tongue correctly, that they know no French, and are utterly defeated by the elements of arithmetic, or by the three books of Euclid; and when we feel they would have been much better off for such information had they been educated at their village schools, anongst the children of their fathers' tradesmen, is it not time for British parents and guardians to look about them?—I am, sir, your obedient servant,

A PARENT.

RELATIVE PROMOTION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Your correspondent "H.," in comparing the promotion of certain regiments, has selected the corps of Royal Marines to prove that promotion by *seniority* has been more advantageous to the Service than when assisted by the purchase system, and apparently makes it out to his satisfaction. He is, however, wrongly informed when he says the Marines had not been increased for 20 years up to January, 1856; for, during that time, the increase had been no less than 6000 men, viz., from 10,000 to 16,000. He says the proportion of field-officers in the Marines to captains is 1 to 4½; the same rule would give to a regiment of the Line 1 to 2½ captains.

The Marines, though now 18,000 strong, have the same number of field-officers they had 25 years ago, when the corps was only 9000 strong. A visit to any of the headquarters will show them deficient in officers of all ranks; and yet this year's estimates provides for 1000 more men *without* additional officers. I am, &c., HANDSPIKE.

SENIOR CORNETS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Thanking you most sincerely for the manner in which you at all times advocate the interests of the Army and Navy, I venture to address you, in the hope that you will kindly take into your consideration a most deserving class, though few in number, whom I consider to be most cruelly neglected. I trust by these means their case may obtain general publicity, and attract the attention of that distinguished officer, Sir De Lacy Evans.

During the Crimean war, and immediately following, some half-dozen meritorious non-commissioned officers were appointed cornets in the cavalry. There are now some of them standing on the top of the list in their respective regiments as senior cornets, while young lads, many of whom were actually learning their facings at the time of their promotion are constantly being passed over their heads. There are instances of some seven or eight cases of this kind in one regiment.

I will conclude by asking you one question,—what must be the feelings of a good soldier, from thirty to forty years of age, who, having served his country for many years truly and faithfully, with three or four medals on his breast, finds a lad of nineteen or twenty, just from college, and in the hands of the drill-sergeant, passing over him, because he has 340*l.* at command; or when he sees a favoured individual from another regiment, whose mamma does not wish him to go to India, brought in and placed over him again and again?

The Army generally expected justice from the hands of the Duke of Cambridge, and the small body I represent claim it at his hands. Surely his Royal Highness did not purchase?

By the insertion of this in your next paper, you will, sir, very greatly oblige, AN OLD SOLDIER.

NEWS FROM THE MEDITERRANEAN.

MALTA, 1st March.—The arrival of H.M.S. Hannibal, bearing the flag of Rear-Admiral Rodney Mundy, on the 25th ultimo, and that of the Cressy on the 27th, have added two line-of-battle ships to the fleet already here. The Hannibal left Corfu on Saturday the 18th of February, and having encountered foul winds and rough weather, did not reach Malta—a distance of some 350 miles—before the following Saturday. The Cressy, arriving from Naples, reports the death of her paymaster, George Gustavus Nelson, an officer whose loss will not only be deplored by his own family and relatives, but regretted by many of his old shipmates, on whatever station they may happen to be when the news of his death reaches them. He was a paymaster of Nov. 1848, and had served both in the Baltic and Black Seas during the late Russian war, and subsequently in H.M.S. Shannon, under the command of Sir William Peel.

The distribution of the Mediterranean fleet at the present time is nearly as follows:—At Malta, the Marlborough, Hibernia, Hannibal (flag ships); Exmouth, Cæsar, Victor Emmanuel, Orion, and Cressy (screw liners); Terrible (f.), Cadmus, Medina, Intrepid, Lapwing, and Alacrity (smaller steamers). At Gibraltar, the James Watt and the Renown (s. l.), the Doris and the Vulture (s. f.), and the Scylla and Mohawk (s. s.); the Racoon (s. c.) is at Leghorn, and the Argus (s. s.) is at Messina. Certain changes in the above will have taken place before this reaches you, as the Hannibal will by that time have left for Gibraltar, the Exmouth for Corfu, and the Cadmus for the coast of Syria. Meantime, the presence of so large a fleet at Malta, and the opportunity of securing the patronage of no less than four admirals, the captain of the fleet being included, had been wisely used by those interested in the welfare of the Malta Sailors' Home for holding a bazaar in aid of its funds. "The Seaman's Institute," as the Sailors' Home is called,—a grandiloquent nomenclature that is far from an improvement upon the more homely name of such establishments in England,—is, notwithstanding, a very great advantage in Malta. And as facts are stubborn things, the results as published in the report of 31st Dec., 1859, prove better than any amount of argument that it was a desideratum. Since its opening on the 11th October, 1859, to the end of the same year, a period of rather less than three months—no less than 1669 persons have slept in the house, whilst a much larger number have partaken of refreshments, including breakfasts, dinners, and suppers. The reading-room which supplies both books and newspapers has proved, as was expected, a great attraction, and was a part of the scheme dictated by good sense, and a knowledge of the tastes of seamen. It is a great mistake to suppose that "blue-jackets" do not care for reading, and one that would be quickly removed by observing the avidity with which they pore over books which might be thought beyond the range of their comprehension. Perhaps newspapers are just as much prized by sailors as by any other men of similar opportunities; and it is a sight worth seeing, when on the day of the mails' arrival on board a man of war, the master-at-arms proceeds to deliver the letters and papers, each man answering to his name as it is called out, and receiving his quota of communication from home. The fortunate possessor of a late newspaper becomes at once a centre of attraction, and the prized paper is borrowed and reborrowed until it is almost worn to ribbons. The "smoking-time" is the period at which most attention is paid to the politics and general intelligence, when one "good reader" may be observed reading out for the benefit of a surrounding group, who, at the close of an article, contribute their remarks for the edification of their fellows until the reader has taken breath, and is ready to begin again.

The projectors of the Malta Seaman's Institute deserve great praise for having made the news room so prominent a feature in this establishment, as no one can doubt the increased intelligence imparted by the habit of reading the newspapers of the day. Like all similar undertakings, the Sailors Home finds its first year the most expensive, inasmuch as besides the necessity of prudently paying the rent in advance, there must be a large outlay of capital in the purchase of furniture, an expense which, of course, occurs but once, and will be gradually absorbed by the credits of succeeding years. The report states, in conclusion, that there is a sum of 13*l.* 10*s.* as "cash in hand;" but this, when compared with amount of "bills unpaid" 34*l.* 10*s.*, leaves a liability of 21*l.* To liquidate this debit, and to recruit the little treasury, are the objects of the Fancy Bazaar. The only military news I have heard, is that the 21st Regiment, stationed in this island since the conclusion of the Crimean war, is in hourly expectation of removal hence to the West Indies; Barbadoes and Demerara are said to be its destination.

Malta has been visited of late by rather rough weather, and as the rain has been succeeded by a hard dry wind, the quantity of dust carried about renders walking, if the most healthful, by no means the most agreeable exercise out of doors.

A candidate at one of the recent examinations for direct commissions, denies that the ordeal is "absurdly severe," as it was designated in the debate on the purchase question in the House of Commons on Tuesday. "Surely," he says, "no one should be deemed fit to hold a commission in her Majesty's Army unless he knew his own language, could write it grammatically, and had, besides, an acquaintance with the elementary branches of mathematics—with this, and a knowledge of either the classics, a modern language, history and geography, drawing, natural or experimental sciences, the candidate need not fear being "plucked;" as I can assert by experience that the examiners are far from being illiberal in the allotment of marks (of which 1800 only are absolutely necessary for qualification). I will cite my own case as a fair example. For two years I had not been studying, and devoted but a few weeks to my preparation for the examination, and yet, with only four subjects (English, French, obligatory portion of mathematics, and drawing) I obtained 3110 marks. The advice given to me, while under preparation, may be useful to those who are studying for the examination:—'Confine yourself to a few subjects, give especial attention to the elementary portions, bearing in mind that it is better to do a little well, than much indifferently.'"

CAVALRY COMMISSIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—the General Orders of the 23rd of February have appeared, and it was intended that they should reduce the expenditure, and improve the position of the cavalry officer. Now I will ask you, sir, in what single way these orders have tended to improve the position of the cavalry officers at present in the Service? First comes an order which allows captains and subalterns to select two chargers from the regiment at the remount price. Well, most of the officers at present in the cavalry are mounted, and have paid long prices for their chargers, so this order does not avail them much; and it is well known that any cornet who may come into a regiment and exercise his right of selecting two chargers from the remount will at once render himself very unpopular with his colonel; and the latter has only to point out to the Inspector-General at the half-yearly inspection that such a horse is unfit for one of his officers, and he, the cornet, is ordered to mount himself on a different style of horse at once. Then the authorities think they have done a very liberal thing by allowing two bâtmen to attend upon an officer. This would be all very well if the services of the two could be obtained; but they cannot; for the order finishes up by saying that one of these bâtmen, in case of there being not sufficient men, is to attend mounted parades; and as there are always non-effectives and sick men, this order amounts to very little. But the order which I and every cavalry officer in the Service would have wished to see published would have been the order for the abolition of the unjust and unfair forage deduction; this would *really* have been a saving; the others are merely claptraps to catch the public. Pray, therefore, use your best efforts to get this illiberal, unjust deduction for forage done away with; and if you succeed you will claim the support of every cavalry officer.—I am, sir, your most obedient servant,

A CAVALRY OFFICER.

London, 7th March.

VOLUNTEER MOVEMENT.—The Lord Warden of the Cinque Ports, the Earl of Dalhousie, has, during the past week signified to the members of the Rifle Corps established in Folkestone, that her Majesty has accepted their services. The Company was established in November last, and the reason assigned for the long delay which has taken place before it was notified to them that they were accepted, has arisen from a question of privilege between the Lord-Lieutenant of the county and the Lord Warden as to which has the right to grant commissions in the Cinque Ports, the Lord Warden claiming the entire right without reference to the Lord-Lieutenant; a curious question arises in Folkestone, seeing that the Lord-Lieutenant as long back as November last having granted a commision to a captain and two lieutenants of a Volunteer Artillery Company, and the Company having been drilled by non-commissioned officers of the Royal Artillery, and having been clothed in the uniform of the county on the strength of such commissions. It is now stated that the commissions granted must be cancelled, and new ones granted by the Lord Warden. No notification has, however, been received by the officials of the Company, and there the matter rests.

Two conversations took place in the House of Commons on Thursday evening respecting the Whitworth gun. Mr. W. Egerton asked whether it was true that the offer of Mr. Whitworth's gratuitous services in aiding to adapt the Enfield establishment to the production of rifles on his system had been refused by her Majesty's Government; and, if so, whether he had any objection to state the reasons why; and whether any calculation had been made of the cost of the Whitworth rifle if made at the Enfield establishment. Mr. S. Herbert said he had looked back into some of the minutes of the committee which had sat on the subject of the Enfield and Whitworth rifles, and had found that in November, 1858, Mr. Whitworth had proposed, not to the War Office, but to the committee, to give instructions at Enfield with a view to enable rifles on his principle to be manufactured at that establishment. He had not been able to discover any record of a refusal of that offer, but he gathered from a resolution at which the committee had arrived that they had rejected it, and that their rejection had been based on the fact that they conceived the principle of rifling which was adopted by Mr. Whitworth required a different metal from that which was employed at Enfield—which was less strong and homogeneous than that which he used—thus rendering the expense of his rifle 10*l.*, while that of the Enfield was only 2*l.* 13*s.* 6*d.* At another part of the evening, in reply to Mr. C. Leigh and Mr. Turner, Mr. S. Herbert said that Mr. Whitworth had proposed that an attempt should be made to apply his principle to the metal used at Enfield for the purpose of manufacturing rifles, the adoption of which course would entail, according to that gentleman's own calculation, an additional cost of only 5*s.* per barrel. The House would not, however, fail to perceive that where a large number of rifles were to be manufactured a considerably increased expense would be thus entailed. He might add that, as far as the evidence which had been laid before him went, he was not satisfied that the principle of rifling which Mr. Whitworth employed could be with advantage adapted to the metal which was in use at Enfield. The way, of course, to test the soundness of that view was by means of actual experiment.

Under date of 1st of February, 1860, the Emperor of Austria has decreed that in future the cavalry tents for the artillery shall consist of the new marching tents for ten men each, instead of the tents actually in use.

The Turkish medals for the Turkish contingent have been received in England, and will be immediately distributed.

THE SPANISH ARMY.—According to the *Correspondencia* of 1st February, the following is the actual strength of the Spanish army:—Army of the Peninsula and adjacent islands, 100,000 men; reserve, 69,000. Canary Islands, 7000 men; with 10,600 reserve (coast-guard); Carabineers (gendarmerie, 12,000; Cuba, 24,000 men, and 16,000 reserve; Portorico, 3800 men, and 3200 reserve; Gulf of Guinea, 150 men; Philippine and Mariana Islands, 4000 men, and 3600 reserve; on active sea service (sailors, marines, &c.), 20,000 men of all arms. Altogether 274,350 men.

Messrs. Gibson, 12th Lancers, Whitty, 5th Regiment, Innes, 52nd Regiment, McKinnon, 42nd Regiment, have taken passages from Calcutta for England.

Obituary.

Major-General Henry Charles Russell, Royal Artillery, expired on Wednesday at his residence, Rose Cottage, Charlton. The deceased officer was a veteran in the service, having entered the regiment as second lieutenant in April, 1802. His subsequent promotions were—first lieutenant in September, 1803; captain in July, 1808; major in May, 1825; lieutenant-colonel in January, 1837; colonel in November, 1846; and major-general in June, 1854. Although of advanced age, the deceased had not retired from the corps, and would have been appointed to the command of one of the new batteries.

Our obituary records the death of Sir Robert C. Hill, C.B., who commanded the Blues in the Peninsular war and at Waterloo. He was the last surviving brother of the first Lord Hill. Four of the brothers were in the Peninsula and at Waterloo—General Lord Hill, Sir Robert C. Hill, Major-General Clement Hill (died in command of the Mysore division of the Madras army at Guersoppa, Jan. 20, 1845), and Sir Thomas Noel Hill. Sir Robert C. Hill and his brother Clement were both severely wounded at Waterloo. Sir Robert Hill died in the house where he was born, Prees Hall, Shropshire.

We have to record the demise of Sir Lovelace Stamer, Bart., who died at Beauchamp, his seat in the county Dublin. The deceased was born 29th April, 1797, and married 25th September, 1828, Miss Tomlinson, only daughter of Mr. John Tomlinson, of Cliffe Ville, Staffordshire. He entered the Navy in 1810, and served as midshipman in the Cerberus for five years under Sir William Hoste, in the Adriatic, and obtained a medal and clasps for Lissa and Graon, and was wounded in the former action. After the peace in 1815 he entered the Army, and was in the 4th or Royal Irish Dragoon Guards, from which regiment he retired in 1830. In January, 1838, he succeeded to the baronetcy on the death of his father.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CHRISTOPHER—Feb. 27, at Seamount, near Castletown, Isle of Man, the wife of Commander Christopher, R.N., of a son.
DAVISON—Feb. 29, at Sedgefield, the wife of Thomas Davison, Esq., late Captain H.M.'s 84th Regiment, of a son.
ERROLL—March 4, at Slains Castle, Aberdeenshire, the Countess of Erroll, of a daughter.
GEIG—Jan. 18, at Doorunda, Chota, Nagpore, the wife of Captain H. L. Gleig, 32nd N.I., of a daughter.
GORDON—Feb. 18, at Constantinople, the wife of Major E. C. Gordon, Royal Engineers, of a daughter.
GORRINGE—Jan. 9, at Ahmedabad, Bombay, the wife of J. Gorringe, Esq., surgeon, 1st Battalion 4th (King's Own) Regiment, of a son.
GREY—Dec. 30, at Bangalore, Madras, the wife of William Farar Grey, Esq., Madras Horse Artillery, of a daughter.
HICKMAN—Feb. 1, at Cirencester, the wife of Captain W. T. Hickman, 22nd Regiment, of a daughter.
LAW—Feb. 21, and while proceeding on her voyage home overland, the wife of Colonel Law, H.M.'s 66th Regiment, prematurely, of a son, stillborn.
NIGHTINGALE—Jan. 19, at Mominabad, Nizam's Dominions, the wife of Captain Geoffrey Nightingale, Commandant 3rd Regiment Hyderabad Cavalry, of a daughter.
SCOTT—March 5, Lady Walter Scott, of a son and heir.
SHAW—March 5, at the Royal Artillery Barracks, Woolwich, the wife of Major Shaw, R.A., of twins.
TOTTENHAM—March 3, at Brighton, the wife of Captain Loftus Tottenham, Rifle Brigade, of a daughter.
TRESTRAIL—Jan. 13, at Mallegaum, the wife of J. C. Trestrail, surgeon, H.M.'s 6th Regiment Bombay Native Infantry, of a son.
WADE—Feb. 27, the wife of Arthur R. W. Wade, Esq., late Captain 72nd *Highlanders*, of a daughter.
WARREN—March 6, at the Lodge, Harmondsworth, the wife of Colonel R. Wright Warren, of a daughter.

MARRIAGES.

CHARLEWOOD—TRUSCOTT—March 1, at St. George's Church, Hanover Square, by the Rev. G. E. Carwithen, Captain E. P. Charlewood, R.N., to Sarah Truscott, niece of the late Rear-Admiral W. W. Henderson.
CLARKE—DANIEL—March 6, at the church of the Holy Trinity, Brompton, by the Rev. S. R. Cattley, M.A., incumbent of St. John's, Clapham, Edward Francis Clarke, Esq., Lieutenant R.N., son of the late Colonel Clarke, C.B., Scots Greys, to Julia Courtenay, only daughter of the late Howe C. Daniel, Esq., 7th Dragoon Guards.
LLOYD—MYERS—Jan. 26, at Ootacamund, C. Lloyd, Lieutenant I. Navy, eldest son of Rear-Admiral G. Lloyd, R.N., to Isabella Duncan, youngest daughter of J. P. M. Myers, Esq.
MARTIN—STEHELIN—Feb. 21, at Erith, Kent, by the Ven. Archdeacon Smith, and assisted by the Rev. J. Farley, William Martin, Esq., only son of the late George Frederick Martin, Esq., of Castleacre, Norfolk, to Cicely Clarissa, third and youngest daughter of Captain F. W. Stehelin, late H.M.'s 13th Light Infantry, P.A.O., granddaughter of Lieutenant-General Stehelin, Royal Artillery.
MURRAY—YOUNG—Jan. 2, at Mussoorie, Lieutenant William G. Murray, 93th N.I., Topographical Assistant, Great Trig. Survey of India, to Florence Isabella, daughter of the late Captain J. D. Young, Brigadier-Major Queen's Troops, Fort William, Calcutta.
PALMER—MACTIER—Jan. 7, at St. John's Church, Meerut, by special license, by the Rev. J. Rolton, M.A., Captain Conolly O'Brien Palmer, H.M.'s 1st European Bengal Fusiliers, son of S. G. Palmer, Esq., late of the Bengal Civil Service, to Annie Bagley, youngest daughter of the late Anthony Mactier, Esq., of Durris, Kincardineshire.

DEATHS.

CARRE—March 1, suddenly, at Caverse Carre, Vice-Admiral Robert Riddell Carre, of Caverse Carre, aged 79.
CHUDLEIGH—Feb. 28, at Beauchamp House, Leamington, Charlotte Joanna, only daughter of the late Major Chudleigh, of Kinsale, county Cork, Ireland, aged 60, most deeply regretted.
DIGBY—March 5, at 22, High Street, Vice-Admiral Joseph Digby, aged 74.
ELDRIDGE—March 5, at the residence of her sister-in-law, No. 7, Pitt's Place, Old Kent Road, Eliza Susannah, relict of Lieutenant Eldridge, R.N., aged 75.
FRASER—March 5, at Newton, South Devon, Henrietta Jane, the beloved wife of Lieutenant-General James Stuart Fraser, aged 50.
FRENCH—Jan. 5, in the wreck of the Northerner, between Humboldt Bay and Cape Mendocina, Arthur French, third and last surviving son of the late Captain T. W. French, formerly of H.M.'s 47th Regiment, and Barrack-Master of St. John, New Brunswick.
GALLOWAY—March 2, at Torquay, Isabella Rachel, daughter of the late Major-General Sir Archibald Galloway, K.C.B.
GARDINER—Feb. 28, at No. 115, George Street, Edinburgh, Frances, third daughter of the late Lieutenant-General William Gardiner.
GRAVES—March 4, at Woodbine Hill, near Honiton, aged 88, Mary, only child of the late Vice-Admiral Sir Thomas Graves, K.B.
HAMES—Feb. 23, at Bedford Place, Brighton, aged 86, Major Charles Hames, late of the 32nd Regiment, whose lamented death removes a distinguished officer from the few remaining heroes of Waterloo and the Peninsula.
HENDERSON—March 7, at 23, St. John's Wood Road, Regent's Park, David Henderson, Esq., Lieutenant, R.N.
HILL—March 5, at Prees Hall, Shropshire, Colonel Sir Robert Chambre Hill, C.B., aged 82.
HOLMES—Jan. 9, at Gondah, East Indies, aged 26, Francis George Holmes, Esq., Lieutenant H.M.'s 20th Regiment, son of the late Lieutenant-Colonel Holmes, K.H., and grandson of the late Major-General Sir Patrick Rose, G.C.M.G., deeply lamented.

V. R.

VOLUNTEER RESERVE OF SEAMEN.

IMPORTANT TO SEAMEN.

Extract from the Speech of Lord Clarence Paget, Secretary to the Admiralty, made in the House of Commons on Monday, February 13th, 1860.

"I know what Seamen are. They are fine, noble, hearty creatures, but men of remarkably suspicious character, and if there are any people they are suspicions of, it is the Admiralty. Captain Brown reports from the different merchant ports that the men say, 'We think the inducement very fair. We think it very handsome; but they only want to kidnap us. The moment we put our names down they will send us off to China.' It is very curious to see men labouring under that delusion. I have been asked over and over again by directors of the great shipping companies, and by men of importance in these commercial ports, for some assurance on the part of the Government that the men will not be called out until war is declared. I told them I could not give that assurance; but I also told them that it was perfectly certain there was NO INTENTION TO CALL THEM OUT except in the event of a critical emergency; that THE THREAT OF IMMEDIATE HOSTILITIES, OR OF SOME NATIONAL DANGER WHICH WOULD OBLIGE US TO MAKE THE GREATEST EXERTIONS FOR THE PROTECTION OF OUR SHORES, WERE THE ONLY CIRCUMSTANCES UNDER WHICH THE GOVERNMENT WOULD CALL FOR THEIR SERVICES. If I can reassure them by what I say to-night, I really believe little more is wanting to induce them to flock to the force. (Hear, hear.) It is so far satisfactory that they are beginning to get over this extraordinary idea. I WISH TO DECLARE TO THEM THAT HER MAJESTY'S GOVERNMENT HAVE NO SORT OF INTENTION TO KIDNAP THEM INTO THE NAVY. (Hear, hear.) And perhaps I had better add a more practical assurance—THAT, IF WE WISHED, WE COULD NOT ENTER THEM IN THE NAVY, because the number is complete, and except for casualties we have no means of entering any considerable number of men over and above what we have at present. (Hear.) I think this is a very satisfactory state of things, and that the House will be glad to hear THERE IS NO DIFFICULTY IN GETTING MEN."

QUALIFICATIONS.

A Volunteer must have served five years at sea, be an A.B., and under 40.

ADVANTAGES.

£6 Retainer, payable quarterly.
A Pension of £12 after requisite service, and when worn out.
Eligibility for Coast Guard or Greenwich.

OBLIGATIONS.

Twenty-eight days' Drill in every Year, with Pay and Allowance for victuals and lodging.

To appear once in Six Months, unless on leave for long voyages, which will be granted on application to a Shipping Master.

To serve in the Navy on an emergency, if required by Her Majesty.

The time of service not to exceed 3 years, unless there is actual war, and then not to exceed 2 years more, with Extra Pay for the extra time.

☞ For particulars as to Inrolment, and for detailed conditions, application should be made to any Shipping Master or Customs or Coast-Guard Officer.

THE BENEVOLENT SOCIETY OF ST. PATRICK.

INSTITUTED IN THE YEAR 1784.

UNDER THE PATRONAGE OF HER MAJESTY.

THE SEVENTY-SEVENTH ANNIVERSARY OF THIS SOCIETY will be celebrated on ST. PATRICK'S DAY, SATURDAY, 17TH MARCH, 1860, at the FREEMASONS' TAVERN, GREAT QUEEN STREET, S.W.

THE RIGHT HON. THE VISCOUNT MASSEREENE AND FERRARD, K.P., IN THE CHAIR.

VICE-PRESIDENTS.

The Duke of Manchester.	The Lord Adolphus Vane-Tempest, M.P.

OFFICES—London, 40, Cannon Street, E.C. (temporary); Lisbon, 4, P. Rua Boa Vista.

This Company, formed for the purpose of establishing a line of steam service between England, Portugal, and the Brazils, and completing the essential link of communication between Milford Haven, the seaport of the Great Western and South Wales Railways, and Santos, Bahia, and Pernambuco, the seaports of the three important railways of the Brazils, has been incorporated by a Royal charter from His Majesty the King of Portugal.

The commercial transactions between Great Britain, Portugal, and the Brazilian empire are of immense and increasing importance, as is shown by the annual trade returns. From 1850 to 1857 our exports of British manufactured goods to the Brazils increased from 2,544,837*l.* to 5,447,566*l.*; and the passenger traffic between Portugal and that empire, which is already very great, is constantly and largely increasing, and will be very much further developed by the railways now in course of construction.

The Brazilian ports send coffee, dyewoods, drugs, diamonds, silver, and other valuable products to this country every year; while we import 60,000,000lb. of coffee annually, two-thirds of which may be furnished by the Brazils, in exchange for British manufactures. These facts alone will give some idea of the present and prospective commerce between the three countries, and of the necessity of the connecting link furnished by this Company for the regular, rapid, and frequent transit of goods and passengers.

In sanctioning the formation and assuming the official position of Protector of the Company, His Majesty the King of Portugal fully recognises the importance of the extensive and increasing trade that exists upon the line the Directors have adopted. His Royal Highness the Duke of Oporto, His Majesty's brother, by accepting the President's chair, also gave expression to his opinion as to the importance of the undertaking.

The statutes under which the Company has been incorporated give its vessels special advantages over those of other nations, and the Directors are assured that their ships sailing under the Portuguese flag will be able to command a very large share of the passenger traffic existing between Great Britain, Portugal, and the Brazils.

The Directors have entered into a contract with the Portuguese Government for a subsidy for the carriage of their mails to the Brazils, by which a payment is secured to the Company equal to about 15,000*l.* per annum of our money. A contract has also been entered into with Her Majesty's Postmaster-General, on highly favourable terms, for the conveyance of the British mails from this country to Portugal and the Brazils, and a subsidy will also be received from the Brazilian Government for the conveyance of their mails, equal to about 15,000*l.* a-year. In addition to these contracts already concluded, the Company have negotiations in progress which the Directors confidently anticipate will terminate satisfactorily, and in that case the Company will be in receipt of a gross sum of 85,000*l.* a-year for postal service.

The line was opened on the 3d of October last.

The following is an extract from the report of the Directors of the South Wales Railway to their shareholders on the 20th of February, 1860:—

"The arrangements for through booking with the Anglo-Luso-Brazilian Royal Mail Steam Navigation Company, which were adverted to at the last half-yearly Meeting, have been brought into operation. One of the ships of the Company arrives at and departs from Milford-haven in each month.

"The traffic in connection with them has already become of material importance to this Company, and from information which the Directors have received they believe that the undertaking itself bids fair to be a profitable one to its promoters, and of permanent advantage to the South Wales Railway."

Applications for shares to be addressed to the Directors of the Company, 40, Cannon Street, London, E.C.; or to the Brokers of the Company, Messrs. De Zoete and Edwards, 17, Throgmorton Street, London; or Messrs. Knight and Coleman, 1, Royal Exchange Buildings, London. Each application for shares must be accompanied by a payment at the rate of 1*l.* per share on the number of shares applied for. If the application be not acceded to, the deposit will be returned in full.

Prospectuses may be had at the Offices of the Company, and from the Brokers and Agents.

CENTRAL ASSOCIATION FOR IMPROVING THE CONDITION OF THE WIVES AND FAMILIES OF SOLDIERS AND SAILORS.

PATRON—Her Majesty the QUEEN.

VICE PATRONS.

H.R.H. the Duke of CAMBRIDGE, K.G., Commander-in-Chief.
His Grace the Archbishop of CANTERBURY.

PRESIDENT—The Earl of SHAFTESBURY.

CHAIRMAN OF COMMITTEE—WM. ANGERSTEIN, Esq., M.P.

The Central Association appeals to the Public for a continuance of that support so generously accorded to it in times past.

War, with its exigencies, has by no means ceased, for at this moment there are more than 100 applicants for help, whose husbands, now serving in India or China, have been absent from them during periods varying from two months to three years, without, in many cases, sending any money home for their support.

And even were there no such claims on the Association, a wide sphere of usefulness would still lie before it in time of Peace, and it earnestly hopes to be able to continue its efforts to carry out those more extended objects which it was originally designed to effect, viz.: the permanent improvement of a numerous and too long neglected class.

By God's blessing the Association has alleviated many a bitter pang, and not its least effort to afford relief to the objects of its solicitude was the recent contribution of upwards of 1300*l.* towards the outfit of a large number of soldiers' wives with their families, in conjunction with Her Majesty's Quartermaster-General and the Emigration Commissioners, on their embarkation to join their husbands and fathers in India.

But the chief object of its operations is now directed to the maintenance of local branches at such places as Woolwich, Chatham, Parkhurst, Portsmouth, Plymouth, Dublin, Winchester, Ballincolig, and other large garrison and seaport towns, where efforts are being, or will be, made to keep up lying-in hospitals, cheap lodgings, children's nurseries, and work societies affording remuneration and elevating employment.

For this benevolent purpose, subscriptions and donations, however small, are earnestly requested, and will be thankfully received by the Treasurer, the Hon. A. KINNAIRD, M.P., at Messrs. Ransom, Bouverie, & Co., 1, Pall Mall East, S.W.; or by the Secretary, Captain S. F. JACSON, at the office, 7, Whitehall, S.W.

To Gentlemen, Watch Manufacturers, and others, 140 Gold and Silver Watches, WATERLOO MEMORIAL, Pianoforte, Household Furniture, &c.

MR. P. HENMAN will SELL by AUCTION on TUESDAY and WEDNESDAY, MARCH 20 and 21 (by order of the executors of J. W. Thompson, deceased), in the large room of the Shakspere's Head Tavern, opposite the deceased's residence, Percival Street, Clerkenwell, the finished and unfinished Stock, Tools, Good-will of the Business, Household Furniture and effects, and a "Gold mounted Snuff-box taken at the Battle of Waterloo."—On view Monday, and morning of Sale; Catalogues three days previous of the Auctioneer, 50, Pentonville Road, Clerkenwell, N.

W. R. LOOKER & Co., ARMY, NAVY, EAST INDIA, AND COLONIAL AGENTS.

Full and Half Pay, Pensions, Dividends, &c., received and remitted.

Loans effected in connection with Life Assurance.

Joseph Messenger, Esq., Spring Gardens, S.W., and Folkestone.

MANAGER OF THE HOTEL.—Mr. G. Giovannini.

SECRETARY—R. T. Alison, Esq.

OFFICES—20, Walbrook, City, E.C.

This Company is formed for the purpose of purchasing and enlarging the premises well known as the West Cliff Hotel, Folkestone, and advantageous arrangements have been made with the Proprietor, who has agreed to sell to the Company the whole of this property by Mr. Woodthorpe's valuation, and to take a large portion of the purchase-money in paid-up Shares. Possession of the property will be given to the Company on Ladyday, when completion of the purchase will be effected.

A novel system for the security of Shareholders is proposed to be carried out by the Directors of this Company, and it is intended to receive Shares *at their par value as cash payments from Shareholders who may at any time visit this Hotel.* This arrangement being purely of a Tontine character, presents a pleasing method to any Shareholder for realising the value of his investment, whilst at the same time the interests of the remaining proprietors are greatly enhanced by every Share thus cancelled.

The Directors propose to enter into arrangements with the London Bridge Railway Terminus Hotel Company, with the view of establishing a system "en-correspondence" between the two Companies, which will result in great advantages to the Shareholders of both Companies.

Applications for Shares not later than the 20th inst. to be addressed to the Secretary, 20, Walbrook, E.C.; or to the Brokers of the Company, 29, Threadneedle Street, E.C., where detailed Prospectuses can also be obtained. A deposit of 10*s.* on each Share applied for must be previously paid to the Bankers of the Company; and in the event of no allotment being made, the deposit-money will be returned.

ONCE A WEEK. PRICE 3*d.*

NEW FIRST-CLASS NEWSPAPER FOR THE COLONIES.

"THE ENGLISH MAIL," a Newspaper specially prepared for Circulation throughout Australia and New Zealand. Published in time for despatch by the Mails which leave England (*via* Marseilles) for Australia on the 18th of every month.

The want of a well-edited and first-class newspaper for the Australian colonies—one which shall give the news of the month, Domestic, Commercial, and Foreign, easily arranged in the order of its significance and occurrence, and clearly condensed for its ready perusal by colonists eager to know what is going on at home—has led to the starting of *The English Mail.*

To the Australian colonists *The English Mail* cannot fail to be of the greatest service. It claims to be their "reporter," as it were, to note and impartially record all events of public interest relating to Australia, occurring in this country. Special reports of Meetings of Banks, Mining and Insurance Companies, Postal Communication, Mail Service, &c., will find a place in its columns; and it enjoys the advantage of an exclusive connection with the "General Association for the Australian Colonies," established at the Australian and New Zealand Rooms, Jerusalem Coffee House, Cornhill.

Although *The English Mail* is specially intended for Australian circulation, yet owing to the general character and perfect arrangement of its Miscellaneous News, it has found readers elsewhere—in India, China, Canada, and the Cape of Good Hope, and even at home—and it may fairly be considered as *the Englishman's Newspaper Abroad.*

Arrangements have been made to ensure an ample distribution of the paper throughout the various townships in each of the Colonies, as well as at home; and with the assurance of an extensive circulation, it is confidently recommended as a most valuable medium for Advertisements, *Home* and *Colonial.* Price 8d. (Postage to Australia *vid* Marseilles, 3d. extra).

SUBSCRIBERS' NAMES for copies of *The English Mail*, intended for transmission to Australia, must be sent not later than the day previous to publication; and must be accompanied by Postage Stamps for the full price of the paper (either with or without postage).

ADVERTISEMENTS will be received up to the evening of the 17th of each month. The charge for six lines is 3s. 6d.; 6d. a line after.

Office for Advertisements and Subscriptions, No. 1, St. Bride's Avenue, Fleet Street, E.C.

DYCE'S SHAKESPEARE.

In 6 vols. demy 8vo. price 4l. 4s. bound in cloth.

THE WORKS OF SHAKESPEARE. The Text revised by the Rev. ALEXANDER DYCE.

*** In this Edition the Notes are placed at the end of each play.

"A minute examination has satisfied us that this is the best text of Shakespeare which has yet been given to the world. . . . . This at least is beyond doubt, that we have never possessed so admirable a text of Shakespeare before; and we would suggest to the thousands of people who are always inquiring for something interesting to read, that they should read again the works of the monarch of literature, and read him in the edition of Mr. Dyce."—*Quarterly Review, January,* 1859.

Feb. 13, 1860. EDWD. F. D. WALSHE, Hon. Sec.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

PATRONS:—

Her Most Gracious Majesty the QUEEN.
His Royal Highness the PRINCE CONSORT.

At every Examination for Naval Cadetships since May, 1857, Pupils from this Establishment have taken the first or second places. Those Pupils who have entered the Army and Military Colleges have been equally successful.—Applications to be addressed to the Rev. E. BURNEY, M.A., Gosport.

AT THE LATE COMPETITIVE EXAMINATIONS, the following successful Candidates passed directly and on First Trial from MR. DE BURGH'S MILITARY ESTABLISHMENT, Dublin, no pupil of his having failed.

ROYAL MILITARY ACADEMY, WOOLWICH.—Examination commencing January 4th, 1860.—Mr. W. J. Galway; Mr. J. L. Morgan; Mr. R. A. Livesay; Mr. Carlile Greer.

Mr. Galway obtained 4433 Marks and the Tenth Place; and Mr. Morgan 4108 Marks, and the Fourteenth Place. These high Marks were obtained without the aid of Classics as a subject of examination, those for Mathematics alone having been 2555 and 2110 respectively.

The gentlemen who passed from the UNIVERSITY OF DUBLIN were also pupils of Mr. De Burgh.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—Examination commencing January 16th, 1860.—Mr. H. P. Hardinge obtained the SECOND PLACE on Marks less by 32 than those of the First Place.

ROYAL MILITARY COLLEGE, SANDHURST.—Examination commencing November, 1859.—Mr. O'Neil Power, Tenth Place.

DIRECT COMMISSIONS IN THE ARMY.—Examination commencing February 1st, 1860.—Mr. A. Clarke (Marks 5334); Mr. G. Yeo (Marks 3805); Mr. Meredyth (Marks 3040); Mr. Burton (Marks 3140); Mr. Knox (Marks 2715); Mr. L. Norman; Mr. J. Mansfield.

Mr. DE BURGH'S references to the Parents of present and former Pupils include the following:—Right Hon. and Right Rev. the Lord Bishop of Meath; Right Hon. Joseph Napier; Ven. the Archdeacon of Meath; Colonel Lake, C.B., Dublin Castle; Colonel Knox, J.P., Thurles; Colonel Morgan, R.A., Swansea.

19, Trinity College, Dublin, March 10th, 1860.

NAVAL CADETS.

OF THE 50 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, on the 13th December, SIXTEEN were from the Establishment at NORTH GROVE HOUSE, Southsea, viz., Messrs. Moysey, Dicken, Eyres, Mandeville, Clark, Gataker, Steavenson, Lang, English, Tyler, Greenway, Ranking, Wood, Burt, Brereton, Wallace. 11 Cadets passed from the Establishment in September, and 11 others last June.

N.B. Twenty candidates out of seventy were rejected in December, 1859.

W. JOHNSON, Naval Instructor; W. BELL, Chaplain; J. A. BURROW, Chaplain and Naval Instructor.

ROYAL NAVAL ESTABLISHMENT, EASTERN PARADE, SOUTHSEA.

CONDUCTED BY MR. THOMAS EASTMAN, R.N.

The following Gentlemen have passed from this Establishment since *June*, 1859:—Messrs. Alexander, G. A. Ellis, Garnier, Mallory, Hoghton, Boddom, Maycock, *Gillum*, Osborne, Nuthall, O'Brien, Bedingfield, Powell, Hodges, Jackson, *Lysons*, Browne, Roberts, Hunt, Walters, Pascoe, Pugh, Freeland, Jaffray, Lord Albert Clinton, Messrs. Weld, Fairfax, Hutchinson, Atkinson, Brabazon, Law, *Hazel*, Needham, Gibson, *Abbot*, Smith, Nottidge, Chambrè, Forder, Smart, Bird, Giles, Rust, Compton, Russell, Thompson, Mitchell, Haswell, Ellis, Hawes, Calder, Hebden, Tully, Hyman, Milman, Hough, Dugdale, Coddington, Gissing, Lindeman Bancroft, Campbell, Lambert. 346 gentlemen have passed from this Establishment as Naval Cadets, including 116 under the Admiralty Regulation of 23rd February, 1857.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, officers who had read at this Establishment have twice come out first on the list.

Apply to Captain LENDY, Sunbury, S.W.

EDUCATION.—BRIGHTON.

FRENCH, GERMAN, AND CLASSICAL SCHOOL, 15, Eaton Place, Kemp Town.

PRINCIPAL—MR. L. W. SCUDAMORE, B.A.

Pupils prepared for the Army, Civil Service, Oxford and Cambridge Examinations, &c. French and German constantly spoken. Terms moderate. References to the friends of pupils, many of whom have taken high places at the above Examinations.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

MILITARY TUITION.—PUPILS under 16 years of age PREPARED FOR THE ARMY and other Examinations by a Graduate of much experience and success in teaching. Terms very moderate. Resident foreign and other masters. For particulars, address F. G. L., Mr. SIMPSON'S Library, 31, King's Road, Brighton.

HANWELL COLLEGE, Middlesex, W., is still retaining its high character; it has long been known as one of the most successful Institutions in the kingdom. A Prospectus will be forwarded on application to the Rev. Dr. EMBERTON, Principal.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"NEW GUN.—Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times*.

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

RIFLED CANNON.—The Patentee of the latest improvement in the construction of Cannon, and which improvement has been adopted by Her Majestey's Government, is willing to supply British Colonies or Volunteer Corps with guns of the newest pattern at a price varying slightly according to the size of gun, but averaging about 2*l.* per cwt.

The method of construction is equally applicable to the largest ordnance as to the smallest; to a mortar capable of throwing a shell weighing several tons as to the lightest mountain howitzer.

Manufacturers desiring licences under this Patent may apply to Messrs. CUNLIFFE & BEAUMONT, 43, Chancery Lane, W.C.; to W. BROOKES, Esq., 73, Chancery Lane, W.C.; to Messrs. ROBERTSON, BROOMAN, & Co., 166, Fleet Street; or to the Patentee, Captain BLAKELY, Holywood, near Belfast.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

REVOLVERS, GUNS, & RIFLES OF THE FINEST LONDON MANUFACTURE.

ROBERT ADAMS (Gunmaker to H. R. H. the Prince Consort), 76, King William Street, London, E.C., supplies, wholesale and retail, his PATENT REVOLVER, as exclusively adopted by H. M.'s War Department and the Indian Army; together with Military and Sporting Guns, Rifles, Breech-Loaders, Ammunition, and Appurtenances of every description.—Price Lists by post on application.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. DE LA COUR, 327, High Street, Chatham.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,
JAMES COULSON & Co.,

Beg to intimate that their only London Depôt is at
No. 46, PALL MALL, S.W.,
A few doors West of the Army and Navy Club.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARE, Chemist, 171, High Holborn, London, W.C., in bottles, 1*s*. each.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

CONDY'S PATENT FLUID, OR NATURAL DISINFECTANT,

Not only deodorises but disinfects perfectly, and DESTROYS FOR EVER the cause of infection. Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease, and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

Patronised and reported upon by the Board of Health and all the most eminent medical men of the day most satisfactorily.

Sold in Quart Bottles, 4*s*.; Pints, 2*s*.; Half-pints, 1*s*.; and in bulk, 10*s*. per Gallon. Sold by all first-class Chemists.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission,
Author of "Adulterations Detected." "The Urine in Health and Disease," &c.
Wimpole Street, 20th January, 1860.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE
THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
WOTHERSPOON & Co., Glasgow and London.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.
Black or Green Tea, 2*s*. 8*d*., 2*s*. 10*d*., 3*s*., 3*s*. 4*d*., to 4*s*.

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

THE KOH-I-NOOR (OR MOUNTAIN OF LIGHT) CANDLE.—The name of KOH-I-NOOR has been appropriately given to a new and BEAUTIFULLY TRANSLUCENT CANDLE, manufactured only at the WEST OF ENGLAND SOAP AND CANDLE WORKS, AT PLYMOUTH. They are preferable in appearance to Wax or Spermaceti; are equal in brilliancy of light and durability in burning; and are supplied at *one-third less cost* than Wax and Spermaceti.
West of England Soap and Candle Works, Plymouth.

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious Vinegar, ensure purity, and effect a saving of 50 per cent. See Report of Dr. Letheby, City Officer of Health; Dr. Hassall, of *The Lancet* Commission, and others. Sold by the Trade, in bottles, labelled and capsuled. Wholesale
63, King William Street, London Bridge, E.C.
Sample for Six Quarts, to any Railway, for 3*s*. 6*d*., P. O. O. or Stamps.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, HORATIO MORGAN, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

GAY & SONS' DRESSING-CASES are the best and most reasonable.
113, High Holborn, W.C. Established 1820.

A TESTY old man of the sea lately wrote to a powerful cotemporary, and called Sir John Pakington and Lord Clarence Paget to account for daring to hold converse touching the dispersion of the Channel Fleet, and of sundry collisions and adventures that befel Her Majesty's ships, as well as the narrow escape from entire destruction of the frigate Diadem with 500 souls on board. We really do not see upon what grounds Sir John should be forbid to improve the occasion whenever it offers, or why, in his thirst for nautical knowledge, he should not now and then attempt to elicit for general information some of those valuable truths which needs must abound in that great storehouse of naval wisdom, of which the Secretary of the Admiralty may be said to be the watch-dog. One of our modern poets, in pleasant rhyme, depicts the feelings of a Count Arnaldos, who, when he heard an ancient helmsman chant a tale of the sea, felt his soul full of longing to understand its mysteries, and very naturally requested that, for the love of heaven, he, too, might be taught that wondrous song. The enterprising Chairman of Quarter Sessions is merely another Arnaldos, Lord Clarence the obdurate seaman, who in churlish mood bids him go to sea before he can comprehend its mysteries. But we say, be of good cheer, O thou seeker after truth—persevere! for we, all we, who cannot go to sea, but who are equally full of these same cravings for naval knowledge, are with you. Persevere, most noble baronet; for though you were answered with pleasant *badinage*, almost worthy of the member for Liskeard, and partaking but little of that blunt, sailor-like frankness which Lord Clarence can so easily assume, your question has brought more than one fact to light.

We are now aware that those who wish to know aught of the proceedings of the Channel Fleet, which has cost so many millions, and has taken so long to get into trim, must correspond with the midshipmen embarked in it. For, although a bad joke was made at the expense of these embryo Nelsons, it is very certain that the Admiralty had no better information to give than that quoted by the late First Lord of the Admiralty. It is that want of information which astonishes us. There is nothing strange in the dispersion of a fleet by a February gale. We do not wonder, from what we have heard of the doings of the long American frigates under sail, that ours should have been run into by the line-of-battle ships; but we maintain that the Admiralty are expressly expected to give the House of Commons, when called upon, explicit information, and the earliest information, upon all such points; and they must not run away with the idea that they are totally and entirely irresponsible to those who furnish them with the means of carrying out all their fancies in naval architecture, or that they are to think it unreasonable when we require through our representatives to know—why such dispersion and accidents occurred; and why, after keeping the Fleet in the Channel ports for the major portion of the winter, the Admiralty should have suddenly ordered it into the Bay of Biscay before the gales of the vernal equinox had blown themselves out. And what is the consequence of this real or feigned ignorance—this attempt at mystifying the public? Why, that in twenty-four hours afterwards, we find a communication in the *Times*, in which we are told that the ships are not manned by sailors, though they are well commanded; that the lieutenants of the watches are inexperienced; and, stranger still, some very angry naval officer tells all England, what most of our seamen expected, that these long frigates, these Diadems, are so unwieldy under canvas, that, instead of being the "eyes" or "legs" of a fleet, they may not even approach it without the risk of either being run into, or running into another vessel. Now, if this be the case—and we feel that we are on the trail of a great fact—the question put by Sir John Pakington will hereafter bear important fruit, though not perhaps the "pippins" he himself would have desired. For, be it remembered, these "streets of guns," as our sailors call the new 50-gun frigates, were especially the creation of the Board of Admiralty when Sir John Pakington was First Lord. Reference to Hansard will show how he, when in office, having been judiciously crammed by his naval prompters at the Board, came down to the House and quoted some despatches of Lords Nelson and Collingwood, who in the earlier part of the present century bemoaned their want of "frigates;" and Sir John drew a touching picture of the present forlorn position of Britain, who, though she had more ships than she had seamen to man them, was still without 50-gun frigates. Ignoring despatch gunboats, despatch paddle-steamers; forgetful of screw corvettes, twice as powerful as any frigate of the olden day, and of the thousand and one steamers of huge power now available to do the work which in ancient times used to be done by the lamented frigate, the veterans at Whitehall succeeded in obtaining a large grant of money to create, upon American models, a parcel of showy useless vessels—at least useless to us who have plenty of screw two-deckers, and only needed in a navy like that of America, where they have not a single screw line-of-battle ship afloat. As Sir John Pakington in the first place brought these "streets of guns" into existence, and has subsequently been the means of throwing light upon the fact of their total unfitness for the very purpose for which he suggested they should be built, we trust he will follow up the subject, and remedy in Opposition an error into which he was led by those who, to use the seaman's metaphor, rather steer by the lights which glimmer on the land far far astern, than by the beacons which are showing in the day dawn on the land ahead.

There is no more important subject connected with the vital question of Army organisation than that of Recruiting, for upon the success of this branch of the Service depends the very existence of the Army itself. In this country, where there is no conscription, and the nature of our constitution renders all military service voluntary, surely not only the easiest and cheapest mode of obtaining the best class of recruits should be resorted to, but every obstacle that impedes the success of our recruiting departments should be promptly removed. Unfortunately, the reverse is the case; for although there are three separate organisms through which our recruits are obtained, viz., the ordinary recruiting staff of the Army, and those of the enrolled Pensioners and Militia, yet the jealous antagonism prevailing on the part of the last-mentioned to the other two, causes the loss of many valuable men to the Service; for latterly, at the instance of their adjutants, many colonels of Militia refuse to grant the releases which were hitherto never refused, so that a recruiting party of the Line or Pensioners cannot enlist a man after he has been enrolled as a Militia-man; which is done in this way: he gets some one to take him before the adjutant of a Militia regiment, and on his offering to join his name is taken down, 10*s.* is handed to him, and 5*s.* to the man who introduces him,—the recruit and bringer get 15*s.* between them, which, as a rule, they forthwith spend in drink; and thus a man is lost to the Line by this mode of decoying men into the Militia, and then withholding the release. And in the case of men residing at a distance, how can it be expected that a man living 20 or 25 miles from the head-quarters of his regiment will go that distance to obtain a release, before he can enlist, when there are two, or perhaps more, recruiting parties in his own town? Frequently Militia-men enlist, swearing they were not in the Militia, thereby increasing the amount of perjury and desertion, for which the colonels who offer such jealous opposition, by withholding the releases when their regiments are disembodied, must be considered morally responsible.

This withholding of releases is peculiarly hard in staff-officers of Pensioners, who within the last two years have very properly been constituted recruiting officers for the Army; their best men have been taken for the Militia staff, and if an enrolled Pensioner exhibits a peculiar aptitude for obtaining recruits, he is immediately applied for by the adjutant of Militia, and the staff officer is obliged to part with him, and in return meets with the most jealous opposition from the adjutant. But why should the departmental conflict be permitted to continue to the detriment of the Service, for the furtherance of which both are employed? If the Militia were regarded in their true light as a constitutional force, organised as a reserve for the regular Army, recruited, officered, and quartered within their own counties, and only removed when the withdrawal of the Army by a foreign war necessitated it, the Militia would be a very different and a very superior force, viewed in its proper aspect, to what it has become, by disregarding the importance of the local elements which constitute the original and sound basis on which this constitutional force was first established. Enlistment by means of the Pensioners we consider a superior medium to the former; for their success is in most instances the result of the slow but sure process of working in the seclusion of a country district upon the sentimental element in our nature, by describing the dangers and successes of their own career, and the prizes that were open to all, and which so many of their comrades secured; whereas the former in most cases succeed by a vulgar appeal to the vain and sensual element, by displays of ribbons, and by treating in public-houses at country fairs and markets. There is a much greater probability of securing a good soldier from a recruit who enters the Service after deliberation, and on conviction of its advantages as a course of life, than from the one who enters it in a state of inebriety, and for years, perhaps never, ceases to feel the disgust inseparable from having been entrapped; and which too often ends in utter recklessness of conduct, and indifference to the fair prospects of success that the Army now offers to the classes from which we obtain our recruits.

VOLUNTEER DRILL.

A Correspondent, in reference to this subject, remarks that, if the Volunteers were wanted to assist the regulars, they ought to be acquainted with light infantry manœuvres; if they do not understand these, their numbers would indeed only tend to embarrass the movements of the regulars. In the regular Service, the time expended in making a regiment smart is very great, and every man is expected to move like a machine, and with the greatest nicety and caution; but in that of the Volunteers there would be no necessity whatever of their moving with such accuracy, provided they knew how to form close column, deploying, showing a front right, left, or about, together with the manœuvres of retiring, advancing, &c., and the "sounds" of light infantry. The great difficulty is the moving in masses and numbers; and unless the Volunteers are masters of this they would be but rabble. The officer in charge of the company, who is thoroughly acquainted with his duty, has no difficulty in putting his company in any position, even if the men are not thoroughly drilled; but if the officer is not well up to his work, the men soon fall out and in, and have not an idea where to go or what to do. As the Volunteers are only in small numbers together, their officers have no great opportunity of learning their duty thoroughly; if, however, there is a system of rope-drill introduced, it will be much easier for the officers to get the required information, inasmuch as a few men with ropes between them supply the place of companies.

The same remarks apply to mounted riflemen. For Volunteers, however, the riding-school drill is perfectly useless, inasmuch as all who join mounted regiments are no doubt sportsmen and fond of riding, and, in nine cases out of ten, good riders. Let them not introduce the heavy, useless, dragoon saddle; let them stick to the good, sensible, hunting saddle, in which a man can sit properly without being ruptured; let them have a bit sufficiently powerful to check a horse, and the good cross-country rider, with a light hand, will then be more effective than if he had been twenty years in the riding-school. The bits used by our cavalry are not sufficiently powerful. The horsemen in India have much more command over their horses than our dragoons.

THE ARMY.

5th Dragoon Guards. It appears that the 5th Dragoon Guards now stationed in the South Cavalry Barracks, Aldershot, have recently had a new set of colours and banners presented to them; and the old set in all their glory of Peninsular honours, from some cause, was not immediately sent to the Tower to be there deposited with the records and old colours of other regiments, but was kept in a room in the officers' quarters, used as a store for the officers' mess, and also as a practice-room for the band. On Friday, the 9th inst., on the orderly corporal of the band entering the room to see if all the junior members were present for practice, he observed that a great portion of the gold lace was stripped off from the belts used by the cornets to carry the banners. He immediately reported it, and on further inspection it turned out that the whole four rows of lace were taken off from two of the belts, and two rows from a third; a portion of the gold fringe and tassels were gone from the banners, and from one of them the white horse, wreath, and crown, had been clean cut out and taken away, with the lace, fringe, and tassels. The last time the colours had been examined, and found perfect, was on the 1st of the present month. On discovery of the above, intimation was immediately given to the police. Mr. Superintendent Howard promptly took the matter in hand; and through the vigilance and activity displayed by him and his force, in less than twenty-four hours they had three persons in custody—James Black, a private of the band, on charge of stealing it; Edward Rogers, a well-known camp ranger, and another well-known character named Avery, on charges of receiving it;—and had also recovered the whole of the lace and a portion of the fringe. The three prisoners were brought before the magistrates, F. R. Thresher, Esq., and Captain G. F. Birch, at Aldershot, on Monday last; the magistrates committed Black for trial, and discharged the other two. The police force stationed here is quite inadequate in number to the duties they have to perform.

4th Light Dragoons. It is reported that this regiment will move from Manchester to Piershill, relieving the 13th Light Dragoons.

7th Hussars. We are glad to learn that Sir William Russell, the senior Lieut.-Colonel of this gallant regiment, is likely to return to the House of Commons as member for Norwich.

9th Lancers. It is said this fine regiment will be moved up to Aldershot, to join the Lancer Brigade to be formed there during the summer.

10th Hussars. Colonel Wilkie is about to retire from the Service.

13th Light Dragoons, it is said, will move to York from Edinburgh.

16th Lancers, are likely to move to Aldershot.

Royal Artillery.—Woolwich, March 11. The following removals of master-gunners have recently taken effect, in accordance with orders from the Adjutant-General's Office, Royal Artillery, viz. :—Master-Gunner James Clarke, from Tilbury Fort to Dublin Bay, South; Master-Gunner Andrew Dowie, from Chatham Lines to Tilbury Fort; Quartermaster-Sergeant Charles Lee, of the 12th Brigade, to be Master-Gunner at Chatham Lines, vice Dowie.

Artillery Force in India.—In accordance with a general regimental order, issued by His Royal Highness the Duke of Cambridge on the 7th February last, 12 batteries of Royal Artillery, stationed in India, were transferred to other brigades; and by the terms of a subsequent order, the entire force of the 11th, 13th, and 14th Brigades, consisting of 24 batteries, will be distributed at the following stations, viz. :—Lucknow, Fyzabad, Mooltan, Gwalior, Futtehghur, Jhansi, Peshawur, Baroda, Secunderabad, Malligaum, Aden, Indore, Poonah, Benares, Calcutta, Allahabad, Roy Bareilly, Gorickpore, Dum Dum, and Saugor. The four batteries of Royal Horse Artillery will be stationed at Cawnpore, Meerut, Mhow, and Secunderabad.

Royal Engineers.—On the 1st of April next it is intended that some important alterations are to be made in the corps of the Royal Engineers. Each of the companies will be considerably augmented, and the corps increased by several hundred men. It is also intended to remove the Adjutant-General's Department from Brompton Barracks to Whitehall. The command of the A troop of the Royal Engineer Train will be transferred to Captain Duff, R.E., in consequence of Captain Siborne going to the Inspector-General of Fortifications' Department.

Lieutenant W. S. Maud, of the Royal Engineer train, has proceeded to Dover to be attached to the office of the Commanding Royal Engineer at that station. Lieutenant W. R. Slacke succeeds that officer in the Royal Engineer train, Chatham.

A number of army tailors arrived at the head-quarters of Royal Engineers at Chatham on Wednesday evening, to assist in making the new clothing belonging to the corps.

5th Fusiliers. Capt. R. H. Macfarlane, Ensign Tarleton, and 69 rank and file have left Cork for the Mauritius, to join the 2nd battalion.

8th Regiment. A detachment of 150 men of the 1st battalion of the 8th (the King's) Regiment, having been transferred to the 2nd battalion of that corps, left Chatham on Monday to join the depôt of the 2nd battalion at Templemore. The head-quarters of the 2nd battalion of the 8th are at Gibraltar.

16th Regiment. A detachment of the 2nd battalion of this regiment, consisting of 2 officers and 60 men, from Clonmel, has occupied the barracks at Carrick-on-Suir, which post has been taken up.

20th Regiment. Captain Lees, 23rd Royal Welsh Fusiliers, Lieutenant F. Wright, 1st battalion 20th, and Staff Assistant-Surgeon Rogers, left Chatham garrison on Thursday, in charge of 100 rank and file of the 1st battalion, to join the 2nd battalion of the 20th Regiment at Dublin. They proceeded by railway to Bristol to embark on board the Irish steamer for conveyance to that city.

24th Regiment. The Donald M'Kay, transport ship, 2670 tons, having on board the service companies of the 2nd battalion 24th Regiment, and a detachment of the 5th Fusiliers, sailed from Queenstown on the 10th instant, for the Mauritius. The following are the names of the officers and the numbers embarked:—24th Foot: Colonel C. H. Ellis, C.B., commanding; Majors the Hon. D. Finch and L. H. Bazalgette; Captains T. Clarke, F. C. D. Barclay, W. V. Munnings, E. W. Kent, W. P. Gaskell, E. T. Tarte, and H. J. Hitchcock; Lieutenants E. T. Dunne, W. Franklin, H. B. Pulleine, A. C. Hallowes, R. N. Surplice, R. S. B. Leech, E. H. Sawbridge, W. R. B. Chamberlain, Oliver Goldsmith, and C. A. Hewitt; Ensigns G. V. Wardell, H. Dewe, R. B. Airey, T. A. H. Yonge, W. Hitchcock, G. Paton, C. J. Bromhead, and W. M. Barclay. Total—3 field-officers, 7 captains, 18 lieutenants, 6 staff, 44 sergeants, 21 drummers, 40 corporals, 746 privates, 67 women, and 69 children.

28th Regiment. We stated in our paper of the 25th of February that Lieutenant M'Cormack would obtain the vacant company on Brevet-Major Godley's retirement. This was an unfortunate anticipation, as the gallant lieutenant fell while bravely leading on his men against the Waghirs. Lieutenant] Emerson, son of the Rev. A. L. Emerson, of Bath, and nephew of Capt. Emerson, late of the 10th Regiment, we believe obtains his company by purchase.

31st Regiment. Captain Cary is on leave from the depôt till the 9th of June.

36th Regiment. Three companies are to be detached from Plymouth to Falmouth.

Royal Marines.—Brevet-Major Cooke, of the Plymouth division, has proceeded to the School of Musketry at Hythe, for the purpose of qualifying himself as an instructor of musketry. The following officers have been granted leave of absence:—First Lieutenant Harrison and Second Lieutenant Kinsman, one month for the benefit of their health; First Lieutenant Evans, three months; and First Lieutenant Boase an extension of one month (under medical certificate). Colonel-Commandant Holloway, C.B., recently arrived from China, has been granted six weeks' leave of absence.

Vice-Admiral H. W. Bruce, the Commander-in-Chief at Portsmouth, dined with the officers of the Royal Marines at the mess, Forten Barracks, on Wednesday evening last.

A court-martial was held on Wednesday on board the Impregnable, at Plymouth, for the trial of First-Lieutenant John Richard Mascall, Royal Marines, upon a charge of drunkenness. The court consisted of Rear-Admiral Sir T. S. Pasley, and Captains R. S. Robinson, W. J. Williams, H. J. Cockburn, W. H. Stewart, and William Eastlake, Judge-Advocate. Captain E. G. Fanshawe, of Her Majesty's ship Trafalgar, prosecuted. The charge was "that the said First-Lieutenant John Richard Mascall, of the Royal Marines, being in active service and full pay in Her Majesty's fleet, and serving on board Her Majesty's ship Trafalgar, was, on or about the 8th day of March, 1860, drunk on board the said ship." The prisoner pleaded "Guilty"; the Court sentenced him to be reprimanded, to lose two years' service in the Royal Marines, and to be dismissed from Her Majesty's ship Trafalgar.

53rd Regiment, at Barrackpore, have received intimation from head-quarters that they are to proceed home almost immediately. India will lose one of the most popular corps that ever came to the country. The regiment will be regretted by everyone.

60th Rifles. The 1st battalion at Calcutta is under orders to return to England immediately.

Cavalry Depôt, Canterbury.—Wednesday was devoted by the Inspector-General of Cavalry, the Earl of Cardigan, to a minute inspection of the various cavalry depôts stationed in this garrison, consisting of the 1st, 2nd, 3rd, and 7th Dragoon Guards, and the 7th and 8th Hussars, under the command of Colonel J. C. H. Gibsone. The Inspector-General, who was accompanied by Colonel Douglas and Lieutenant Lowe, entered the barrack-square shortly after nine o'clock in the morning, and was received by a general salute by the whole of the troops assembled, in full marching order. Having been put through the various evolutions by Colonel Gibsone, a portion of each depôt then went through the riding drill. This concluded, his lordship proceeded to the riding-school, and inspected the officers' riding, and afterwards visited the hospital, and inspected its various wards. The Inspector-General then retired to the officers' mess-room, and lunched with the officers of the depôt battalion. The inspection was resumed by the examination of the cast, the young, and the officers' horses. The garrison school was then visited, and his lordship inspected the children and the arrangements made for their education. Attention was next directed to the books of the depôts, and the troop ledgers and other books carefully examined. At five o'clock a dismounted parade took place, when the troops were formed in columns, and the Inspector-General minutely inspected each. Afterwards they marched past in slow and quick time in admirable order and precision. The inspection concluded with the examination of the officers' and troop stables and their appointments. The Inspector-General expressed to Colonel Gibsone the unqualified satisfaction his lordship had derived from the inspection. The riding of the officers and men, his lordship remarked, was uniform and good, while the condition of the horses was excellent, and he had never seen a cleaner or a smarter parade. The Earl of Cardigan left by the last train for town.

Lieutenant Maxwell, of the Royal Horse Artillery, died at Umballah on the 26th ult. The deceased had seen a great deal of service, and distinguished himself in the Crimea. By his brother officers and friends he was much esteemed and respected.

The following order has been issued from the Horse Guards:—"The General Commanding-in-Chief observes that among the pecuniary embarrassments of young officers, which too often form the subject of complaint to His Royal Highness, debts due to messmen form a considerable portion—not for the mere ordinary mess expenses, but generally for money borrowed to pay sudden and casual demands—until, in the aggregate the amount becomes considerable. His Royal Highness has also reason to believe that debts to messmen are sometimes increased by their consenting to charge the messing to the officers' private accounts; and that the certificate required weekly, that all mess debts have been paid, is not always strictly correct. It is incumbent upon commanding officers and upon general officers, at their half-yearly inspections, to ascertain by personal inquiry from all parties, whether any officer is in debt to the messman, not only for messing but on any other account. His Royal Highness strictly enjoins commanding officers to prohibit, as a breach of good order, the reprehensible and unworthy practice of borrowing money from messmen, and recommends that in all mess contracts, a clause may be inserted, rendering nugatory all such transactions, and binding the messmen with penalties for any infraction of the rule."

A number of witnesses, selected from the principal officers at each of the large garrison towns, have been under examination by the Commissioners now sitting at the Horse Guards to inquire into the system of recruiting for the Army. The evidence of a number of officers who are thoroughly acquainted with the working of the present system has been taken by the Commissioners, and from what has already transpired it is understood that various improvements suggested will be adopted by the authorities, and several modifications introduced into the existing system of recruiting for the Army, including some alterations in the present scale of bounty to recruits and the daily pay of the troops.

Colonel Richard Gardiner arrived at Cork on Monday last from his late regiment, the 76th, in Dublin, and assumed his duties as Inspecting Field-Officer of the Cork Recruiting District.

The annexed Circular Memorandum has been issued from the Horse Guards, addressed to the Army "at home and abroad":—"His Royal Highness the General Commanding-in-Chief must insist upon the officers of the medical department being more particular in filling up the certificates attached to the committal paper of soldiers sent to military prisons. Numerous complaints have been made by the governors of those establishments that, notwithstanding the report of the regimental staff-surgeon, of offenders being fit to undergo prison discipline, disease has shown itself either at the time of, or shortly after, their committal, which could not have escaped observation had common care been used at the inspection. His Royal Highness will not fail to call to account any officer of the medical department, who, after this notice, is reported for a similar neglect of duty.—By command,

"G. A. Wetherall, A.G."

Assistant-Staff-Surgeon Guinness has proceeded from Chatham to Canterbury, and Assistant-Staff-Surgeon Dunlop to Winchester, for duty with the depôt battalions at those stations.

The following Circular has just been issued:—"War Office, March 10.—The Secretary of State for War having with the concurrence of his Royal Highness the General Commanding-in-Chief, decided upon transferring the general management of Army schools and military libraries from the Secretary of State for War to the General Commanding-in-Chief, and placing them under the immediate superintendence of the Council of Military Education, it is hereby notified that the above change will take effect from the 15th inst. In consequence of this change all communications relating to the following subjects should, on and after the 15th instant, be addressed to the Secretary to the Council of Military Education (all periodical returns being in like manner transmitted to the same address at the periods now prescribed by regulation), viz. :—1. Application for the training of schoolmasters and schoolmistresses. 2. The appointment of trained schoolmasters and schoolmistresses. 3. The appointment of acting schoolmasters and acting schoolmistresses. 4. The appointment of civilian schoolmasters in embodied regiments of militia. 5. Transfers of schoolmasters and schoolmistresses. 6. Promotion of schoolmasters and schoolmistresses. 7. Discipline, leave to marry, &c. 8. The monthly school reports required by Article 16 of the Army School Regulations, a duplicate of which report will, as heretofore, continue to be forwarded to the Assistant-Inspector of Army Schools in the district. 9. The supply of apparatus for the illustration of lectures for the entertainment and instruction of the troops. 10. Regimental and garrison libraries and reading-rooms. 11. Applications for new books and games for reading-rooms. 12. The quarterly report of the state of libraries. 13. Half-yearly reports of Royal Artillery and Royal Engineers' libraries, which are to be made in duplicate. Communications upon all school and library matters not specified above, and of a purely financial character, will continue to be addressed to the Under Secretary of State for War."

A number of troops who were disbanded at the termination of the East India Company's reign, arrived in the Mersey on Thursday from Calcutta by the Great Tasmania, Captain Gardigne. In all there are 20 officers, three officers' ladies, 2 children, 17 women, and 973 men.

COLCHESTER CAMP.

Colonel Dixon, C.B., commanding the 9th Depôt Battalion, Major West, 10th Depôt Battalion, Major Cooch, Brigade-Major, and other officers, have rejoined from leave of absence. On Wednesday the whole of the troops in camp, now numbering about 2700 of all ranks, marched out to the village of Lexden under the command of Colonel Blucher Wood, C.B. The new barracks are not to be commenced until the 1st of April. There is a rumour that the Government land, called Middlewick Farm, about a mile distant from the site of the present camp, is to be disposed of, and some more eligible land in the vicinity to be purchased instead.

SHORNCLIFFE CAMP.

The authorities seem disposed to do everything they can to promote the comfort of the troops in camp. In addition to the numerous improvements lately completed, they have this week commenced the erection of a large clock, with a dial face sufficiently large to be seen from all parts of the camp. The negotiations which have been for some time in progress between Government and the owners of the land in the neighbourhood of the camp, which was required for the contemplated extension towards the South Eastern Railway, have been brought to an unexpected close, the owners having received an intimation from the War Department that the extension has for the present been abandoned; the erection of the reading-rooms is being carried out with considerable activity: unlike the other buildings on the camp, they are of brick.

WAR OFFICE, PALL-MALL, March 13.

BREVET.

Brevet-Colonel David Russell, C.B., Inspecting Field-Officer of a Recruiting District, to have the temporary rank of Brigadier-General, while in command of a Brigade; March 13.

Captain Herbert Mackworth Clogstoun, 19th Madras Native Infantry, to be Major in the Army; March 13.

WAR-OFFICE, PALL-MALL, March 16.

2nd Regiment of Life Guards—Cornet and Sub-Lieutenant Charles Bruce Knight Alleyne has been permitted to retire from the Service by the sale of his Commission; March 16.

6th Dragoon Guards—William Edward Dakin, Gent., to be Cornet, by purchase, vice Gair, promoted; March 16. Arthur Jones, Gent., to be Cornet, by purchase, vice Blackett, who has retired; March 17.

1st Dragoons—Charles Leveson Lane, Gent., to be Cornet, by purchase, vice Caldwell, promoted; March 16.

6th Dragoons—Lieutenant Frederick Barclay Chapman to be Captain, by purchase, vice Edward Finch Dawson, who retires; Cornet John Baskerville to be Lieutenant, by purchase, vice Chapman; March 16.

15th Light Dragoons—The second Christian name of Lieutenant Bentinck is Theodore, and not Theobald, as stated in the *Gazette* of the 3rd ultimo.

16th Light Dragoons—Charles Carrington Churchward, Gent., to be Cornet, by purchase, vice Winthrop, appointed to the 15th Light Dragoons; March 16.

Coldstream Guards—Captain the Hon. George Herbert Windsor Windsor-Clive, from the 52nd Foot, to be Lieutenant and Captain, vice Adair, who exchanges; March 16.

5th Regiment of Foot—Assistant-Surgeon Julius Wiles, from the Staff, to be Assistant-Surgeon, vice Cameron, deceased; March 16.

11th Foot Arthur William Ball, Gent., to be Ensign, by purchase, vice Irwin, promoted; March 16.

13th Foot—Assistant-Surgeon Thomas Michael O'Brien, from the Staff, to be Assistant-Surgeon, vice Kirwan, who exchanges; Jan. 2.

16th Foot—George Ramsay Alured Denne, Gent., to be Ensign, by purchase, vice Taylor, promoted; March 16.

17th Foot—Captain John Bellamy, from the 2nd West India Regiment, to be Captain, vice Davidson, who exchanges; March 16.

25th Foot—Ensign John Talbot Coke, from the 21st Foot, to be Ensign; William Lisle Blenkinsop Coulson, Gent., to be Ensign, by purchase; March 16. The appointment of Ensign Henry Wilkinson to be Quartermaster, has been antedated to 30th Dec. 1859.

34th Foot—John Olphert Gage, Gent., to be Ensign, by purchase, vice Jordan, promoted; March 16.

37th Foot—Lieutenant Samuel Hawkes to be Adjutant, vice Bunn, who resigns the Adjutancy only; Jan. 14.

38th Foot—The surname of the Gentleman appointed to an Ensigncy on the 5th of August, 1859, is Sparks, and not Sparkes, as then stated.

46th Foot—Ensign Stewart James Carlow to be Lieutenant, without purchase, vice Hamond, promoted; June 6. Ensign Charles Benjamin Cole Speke to be Lieutenant, without purchase, vice Coucher, deceased; August 20.

49th Foot—Edward Roberts, Gent., to be Ensign, by purchase, vice Aldworth, promoted; March 16.

52nd Foot—Lieutenant and Captain Alexander William Adair, from the Coldstream Guards, to be Captain, vice the Hon. G. H. W. Windsor-Clive, who exchanges; March 16.

73rd Foot—Anderson James Ashmore, Gent., to be Ensign, by purchase, vice Galwey, promoted; March 16.

75th Foot—John Ormsby Moore Vandaleur, Gent., to be Ensign, by purchase, vice Tarby, who retires; March 16. The resignation of Assistant-Surgeon Robert Woods, as stated in the *Gazette* of Feb. 21, has been cancelled.

79th Foot—Lieut.-Colonel Robert Grove, from half-pay Unattached, to be Lieut.-Colonel, vice Brevet-Colonel Sir John Douglas, K.C.B., who exchanges; Brevet-Lieutenant-Colonel Thomas Brombead Butt to be Lieut.-Colonel, by purchase, vice Grove, who retires; Brevet-Major Keith Ramsay Maitland to be Major, by purchase, vice Butt; Lieutenant John Edward Allen to be Captain, by purchase, vice Maitland; Ensign William Henry McCausland to be Lieutenant, by purchase, vice Allen; March 16.

87th Foot—Assistant-Surgeon William Armstrong, from the Staff, to be Assistant-Surgeon, vice Collins, who exchanges; Jan. 2.

100th Foot—Augustus Frederick Tanner, Gent., to be Ensign, by purchase, vice Moorson, promoted; March 16.

2nd West India Regiment—Captain Frederick Augustus Davidson, from the 17th Foot, to be Captain, vice Bellamy, who exchanges; March 16.

RECRUITING DISTRICT.

Lieut.-Colonel and Brevet Colonel Alfred H. Horsford, C.B., from the Rifle Brigade, to be Inspecting Field Officer, vice Brevet Colonel David Russell, C.B., placed on the Staff as a Brigadier-General; March 16.

UNATTACHED.

Lieutenant John Evans, from the 38th Foot, to be Captain, without purchase; March 16.

HOSPITAL STAFF.

Assistant-Surgeon Charles John Kirwan, from the 13th Foot, to be Assistant-Surgeon to the Forces, vice O'Brien, who exchanges; Assistant-Surgeon John Collins, M.D., from the 87th Foot, to be Assistant-Surgeon to the Forces, vice Armstrong, who exchanges; Jan. 2.

BREVET.

Captain and Brevet-Major Alfred Bassano, 32nd Foot, to be Lieut.-Colonel in the Army; March 16.

Captain Thomas Rochfort Snow, 4th Bengal European Light Cavalry, to be Major in the Army; Jan. 19, 1858.

Captain and Brevet-Major Joseph Maycock, of the 53rd Foot, to be Lieut.-Colonel in the Army; March 16.

ROYAL UNITED SERVICE INSTITUTION, WHITEHALL YARD.—At the next evening meeting on Monday the 19th inst., the chair will be taken at half-past eight o'clock precisely. The following papers will be read: Mr. E. Loysel, Associate Inst. C.E., "Loysel's process for making Tea and Coffee in large quantities for troops." Captain Grant, late R.A., "Grant's new Cooking Apparatus as introduced into the Army."

THE CAVALRY IN THE CRIMEA.

A correspondence has been published this week between Lord Lucan and Sir De Lacy Evans relative to an opinion given by the latter officer, as to the relative superiority of the artillery over the cavalry organisation, as tested in the Crimea during the winter of 1854-55. Lord Lucan called Sir De Lacy's attention to his statement before the Chelsea Board to the effect that, as regards horses, the heavy cavalry only lost 50 per cent., and the light cavalry 65 per cent., while the artillery lost 67 per cent. Sir De Lacy thus gives his opinion more fully and advisedly upon the point, and we believe that all practical men will agree with him.

"I remarked, in reference to the injurious tendency of the purchase system, that the artillery in the Crimea were more efficient than the cavalry. My late divisional quartermaster-general, Colonel Herbert, asserted, on the contrary, that the cavalry were more efficient than the artillery, and, as he continued much longer in the Crimea than myself, I did not contest his counter statement. Of course, we both referred to the alleged loss of horses.

"If, however, I had recollected the controversies which took place, and, above all, the extremely exceptional position of the cavalry in the Crimea, the extraordinary privations under which they laboured, I certainly should not have made any reference to them; and I much regret, consequently, having done so, since, also, you appear to consider the comparison a censure on the commander and officers of the cavalry, which was most certainly remote from my wish or intention. I am glad, therefore, to think, from the terms of your note, that your lordship does not believe it probable I could have had any such intention.

"This would have sufficed, but you have pencil-marked some of the passages of your statement, which induces me to avail myself of the occasion—and I do so with pleasure—to state to you, what I have often stated to others, that in my opinion there was no officer of that Army who exerted himself more strenuously for the efficiency and credit of his corps than Lord Lucan; that no officer, in his difficult task, was so inadequately supported in the quarter whence he had a right to expect support; that, in regard to the gallant charge at Balaklava, it appeared to me that no officer in that or any other Army was ever so unjustly treated; and that this was, moreover, so unfairly managed as undeservedly to affect, even perhaps to the present period, your professional estimation. Time will elucidate these matters. I was myself an object of attack for years from a party far more powerful than were your lordship's assailants. I have survived it.

"But to return to the purchase question. I have to state, what appears to be forgotten, that I am myself one of the oldest cavalry officers; that, in the capacity of a regimental or staff cavalry officer, I had the honour of sharing in many of the greatest battles fought by the Duke of Wellington. This was at a period before some of my fiercest opponents on this question had assumed a military garb.

"And, notwithstanding my humble experience, thus referred to, in that arm, I was always under the impression that in point of efficiency our artillery ranked as No. 1; that the British infantry, if not No. 1, was certainly No. 2; the cavalry No. 3: such was my opinion—it may be all wrong, and that the precedency ought to be reversed."

A correspondent of the *Times* signing himself "C.," epitomises many orders issued by Lord Lucan while in command, showing inattention and lax discipline to prevail among the officers of the Cavalry Division.

ARMY CHAPLAINS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—At the beginning of the century there was a chaplain to every regiment: witness the notice of their rank in Queen's Regulations, page 7, ed. 1857.

This was given up, and when the Crimean war broke out there were only six commissioned chaplains in the whole army. Then many volunteered to serve; some were paid by the Government at the same rate as majors of infantry; some were paid 100*l.* per annum by the Society for the Propagation of the Gospel, 100*l.* by the Government, and were made the same allowances as the former. But at the close of the war, although all worked well, only seven additional commissions had been given. In October, 1856, there was an increase; seven more chaplains were commissioned, some of whom had been in the Crimea, and some of whom had served for many years at different stations. This raised the number to twenty. Besides these there were thirty-five assistant-chaplains. These had no commissions; and their time, though twelve or fifteen of them had served in the East, did not count. It was promised, moreover, in writing, that as vacancies occurred in the commissioned chaplaincies, they should be filled up from those holding this lower grade.

Two vacancies were so filled up. The one by a Crimean chaplain, the other by one who, with no greater length of service, had not been out of the country. Before any more fell vacant the new warrant of Nov. 5, 1858, was issued. By it all chaplains were to be divided into four classes, with certain differences of pay and rank. This will be seen at a glance by the subjoined scheme.

4th Class, until seven years are elapsed, 10*s.* per day, and 2*s.* 3*d.* for lodging, with rank of captain. After seven, and till fourteen years, 12*s.* 6*d.* per day, and 2*s.* 3*d.* for lodging.

3rd Class, after fourteen years, and till twenty-one years, 15*s.* per day, and 3*s.* for lodging, with rank of major.

2nd Class, after twenty-one years, and till twenty-five years, 17*s.* 6*d.* per day, and 3*s.* for lodging, with the rank of lieut.-colonel. After twenty-five years and till thirty years, 20*s.* per day, and 3*s.* for lodging.

1st Class, after thirty years, 22*s.* 6*d.* per day, and 100*l.* per annum for lodging, with rank of colonel.

A shilling a day as servants' allowance is also granted to all, and forage for a horse, if necessary, and absolutely kept to the two highest classes.

This is the warrant now in force, as the revision last November amounted to no more than the insertion of a clause allowing of promotion, before the specified time, for meritorious services.

In the operation of this warrant the objections are twofold. From the whole chaplains, as a body, and from that portion who served in the Crimean war. To take the first: It seems that to wait fourteen years for promotion to the third class is preposterous, and not borne out by analogy of any other department in the Service. Witness especially the medical warrant; by it an assistant-surgeon can be promoted to the next step in five years, and in five years more may be made a deputy-inspector-general, from which he may rise to the highest rank in three or five years, according as he has served abroad or stayed at home. So that, by comparing the two warrants, it will be seen that if a chaplain and a medical officer enter the Service together, the latter may, if he be efficient and fortunate, have attained the highest rank one year before the chaplain has gained his first step.

Or if we look to the fact that thirty years' service are required before the chaplain can rise to the first class. Supposing a man to join as early as possible (which, considering the age for ordination, and two years necessarily spent in the curacy, which gives him his title, as it is called, cannot be before he is twenty-five years old), he cannot be in the 1st class until he is fifty-five, which is the time prescribed for the retirement of surgeons and surgeons-major. In fact, however, a large proportion of those chaplains who are now in the Service are much older, and it is not likely that the majority of them will ever see the time when they may rank as first-class. If the chaplains' warrant were assimilated to the medical, or if seven years were made the *maximum* between each step, it would be more reasonable. As it is, the present conditions of the warrant are universally displeasing, and cannot but operate in keeping the better class of chaplains out of the Army.

It is the general opinion also that the scale of pay is less than it ought to be.

The second class of objections are those which are made by the chaplains who served in the Crimean war. Some of these received the pay and allowances of a field officer. Others as above stated received pay amounting to 200*l.* per annum, and the allowances the same as the others. All with, I believe, one exception, and that a Presbyterian, have now either 200*l.* or 250*l.* per annum, and 3*s.* per day lodging money. And in several instances this difference of amount is most arbitrarily settled—those who had the higher pay in the East having the lower rate here. When the assistant-chaplaincies were called into being, the holders were promised promotion. This would have given them the full pay, &c., of field officers. But before more than two vacancies had occurred this new warrant came out, which made them chaplains indeed, and gave them commissions, but it was "*vox et præterea nihil.*" They have no increase of pay, and, as shown above, have no prospect of it for an indefinite number of years.

These chaplains, therefore, over and above the general insufficiency of the warrant, think they had a special claim for consideration, and as they do not expect it will be altered, they feel they have a right to ask that at the least they be placed at once in the third class.

Your obedient servant, A CHAPLAIN.

THE DEBATE ON THE PURCHASE SYSTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I am an old soldier who have suffered in my youth from inability to purchase. Taking, however, a natural interest in the question, I went to the House of Commons to hear the debate on Sir De Lacy Evans's motion. His speech lasted for two hours and ten minutes. At first, he addressed an audience of about one hundred and twenty members, but before he had finished, they dwindled down to half the number. I was astonished to see so thin a house at the opening; the matter under discussion being, as the *Times* justly remarked, of great public importance, and calling for the fullest attention. But I felt no surprise, as the gallant general proceeded, that his listeners became "small by degrees and beautifully less;" for he was utterly inaudible, from the beginning to the end of his long harangue. It was impossible to catch a single consecutive sentence. All was *caviare*, alike to the Speaker he immediately addressed, to the members, the reporters, and the strangers in the gallery. Never was the quality of respectful deference for age and service more signally exhibited. There were no visible expressions of impatience, such as are often indulged in. "It is a pity," whispered one near me to his neighbour, "they have not been more fortunate in their spokesman." "Perhaps," replied the other, "they think the cause so good that advocacy is superfluous." Finally, when the friends of the motion, after the proposer had consented to withdraw it, injudiciously pressed for a division, they were defeated by a majority of 154 in a house of 263, one half of whom had certainly heard little or nothing of the arguments on either side.

As I walked home alone, I pondered over what had taken place. I had often heard that debates never change a single vote, and that Army estimates are usually disposed of by a House consisting of the Speaker and half a score of stray members; but I had never before witnessed such a marked instance of how important business can be transacted by a small section of the elected legislature, and how a senator can be suffered to occupy two mortal hours on a leading question, who lacks the physical power of making himself heard. It is fortunate that in so large a body as 656 representatives, all are not orators. If they were, debates would be interminable. But the selected speakers ought at least to be audible to the persons they address, and who are supposed, in some degree, to modify their judgment according to the facts and arguments set before them. If not, the time thus wasted might be more profitably employed.

Again, it might be thought that a majority at least of the House would feel it necessary to attend on a national question. How many times in a session can this majority be *whipped up* by the most urgent entreaties of the opposing leaders? It seems as if many men thrust themselves into Parliament for the express purpose of being absent when they are most required.

The English House of Commons is often set forth as the collected wisdom of the land; as the greatest and most august legislative assembly the world has ever seen. Foreigners in general are not very clear in their notions of our constitutional government. If one of any nation had entered the lower House on Tuesday last, for the first time, in the spirit of inquiry, he would assuredly have left it in a state of utter mystification at finding principle and practice placed in such direct antagonism.—Your obedient servant,

DENTATUS.

THE NAVY.

ADMIRALTY, MARCH 10.—APPOINTMENTS.—Commanders James Hunt (1854), who entered the navy in 1833, and has served in the West Indies, Spain, Portugal, Africa, coast of Syria, Mediterranean, China, on the coast of Borneo, south east coast of America, in the late Russian war in the Baltic, and recently on the west coast of Africa station, appointed to commission the Megæra, 6, screw troop ship, at Portsmouth; Walter J. Pollard (1854), to be inspecting commander of the Kilrush division of the Coast-guard, vice Dent, appointment cancelled; James E. Elliott (1854), from Carrickfergus Coast-guard station to Swansea, vice O. M. Crewe Read, period of service expired; William H. Jones (1859), to be inspecting commander at Carrickfergus Coast-guard station, vice Elliott.

Lieutenant James H. M'K. Robertson (1831), to be chief officer in command of the East End Lane Coast-guard station, vice Lindsay.

Surgeon Henry Arnot, M.D. (1856), to the Chesapeake, 51, at China.

Assistant-Surgeons Archibald L. Archer, M.D. (1849), and Donald G. Pendrith (1850), have been promoted to surgeons.

Midshipmen H. F. Yeatman, to the Mersey, 40, at Plymouth; E. C. Drummond, to the Nile, 90, at Devonport; Philip G. Lucas, to the Mutine, 17, Channel squadron.

MARCH 12.—PROMOTIONS.—Acting Second-Class Assistant-Engineers T. Booth, to the Haughty; W. M'Laurin, to the Medina, 4.

Acting Second-Class Assistant-Engineer E. Miles, to the Cyclops, 6.

APPOINTMENTS.—Lieutenants J. G. Mead, and A H. Alington, to the Megæra, 6.

Master D. Moore, to the Megæra, 6.

Second Master V. Jones, to the Royal Albert, 121.

Assistant-Clerk M. Inman, to the Mutine, 17.

MARCH 13.—Lieutenant R. Woodward, to the London, 90.

Staff-Surgeon R. T. C. Scott, to the Impregnable, 104.

Assistant-Paymaster E. A. M. Chaffers, to the Megæra, 6

MARCH 14.—PROMOTIONS.—Acting Chief-Engineer R. J. Hay, to the Slaney, 1.

Acting First-Class Assistant-Engineer W. F. Innes, to the Princess Charlotte, 104.

APPOINTMENTS.—Chief-Engineer J. Bridgman, to the Cumberland, for service in the Charybdis.

Lieut. the Hon. F. O'B. Fitzmaurice, to the Victory, 101.

Paymasters (Additional)—W. Horniman to the Megæra, 6; R. Bone, to the Cambridge; H. Braxton, to the Asia, 84.

Assistant-Clerk P. H. French, to the Ganges, 84.

MARCH 15.—Second-Class Assistant-Engineer W. M. Harvey, to the Nile, 90.

Acting Third-Class Assistant-Engineer L. Brewer, to the Nile, 90,

---

Alert was at Aspinwall by the latest accounts, with despatches from Nicaragua.

Amphion, steam-ship, 36, Captain Cochrane, late the guard-ship at Cork, is under orders for the Mediterranean, and her departure is expected daily. On Sunday last the Virago paddle-sloop arrived at Cork, with a number of volunteers for the new station, and after putting them on board the Amphion, departed.

Ariadne, 26, screw-frigate, Captain E. W. Vansittart, is under orders to sail for Lisbon, to join the Channel fleet, under the command of Rear-Admiral Sir Charles Howe Fremantle.

Arrogant arrived at Sierra Leone on the 21st of February, all well.

Barrosa, screw-corvette, was launched at Woolwich on Saturday afternoon, under the superintendence of Mr. Turner, master-shipwright. The usual arrangement of building a booth at the bow of the vessel was not carried out, and few persons were present except the officers and others connected with the yard. The ceremony of christening was performed by Miss Kate Compton; and the dogshores, &c., having been removed at three o'clock, the vessel glided gracefully from the slip into the river, and was immediately removed into dry dock, to be prepared for her machinery and engines of 400 horse-power. The Barrosa was laid down in August, 1858. A new screw steam-vessel, the keel of which has been prepared, is to be laid down forthwith on the same slip.

Bulldog, 6, paddle, was on Thursday removed from the steam basin to a berth alongside the north wall, Portsmouth.

Calypso. From Panama we learn that a marine, serving on board the British ship-of-war, Calypso, had been murdered and robbed by natives on shore near Taboga. The commander of the vessel sent a party of men on shore, who hunted up the murderers, and brought them on board the vessel, where they were tried and sentenced to be hanged, the civil government of the state agreeing to the justice of their fate.

Cambridge. Last week Major-General Hutchinson, Commanding the western district, with his staff, Colonel Pester, and officers of the Royal Artillery, Colonel Wright, Major White, and officers of Royal Engineers, Captain Stewart, C.B., Her Majesty's ship Impregnable, Captain Caldwell, C.B., Her Majesty's frigate Mersey, Captain Cockburn, Her Majesty's frigate Diadem, Mr. Biddlecombe, Master-Attendant of Keyham steamyard, and a large number of officers from the services, attended on board Her Majesty's gunnery ship Cambridge, in Hamoaze, Plymouth, to witness some experiments of firing shot with lines attached from 10-inch, 8-inch, and 32-pounder guns, at various elevations. This practice was in accordance with some suggestions of Captain Jerningham, of that ship, which arose through experiments made by him several years since with Manby's mortar. The results were very favourable. The ranges averaged between 250 and 400 yards, according to the respective elevations, which were of course more restricted when fired from the 'tween decks, through the portholes, than from the upper deck. One of the guns, a 32-pounder, was slung between the foremast and mainmast, at an elevation of 35 degrees; with 10 ounces of powder a range of over 400 yards was obtained. With a pound of powder the 10-inch gun, at 25 degrees, carrried a shot filled with lead, weighing 156 lb., having attached to it an inch and a-quarter line, a range of 360 yards. Successful trials were also made with 12-pounder rockets, having one inch lines attached. These trials will probably be resumed.

Castor, 36, intended for a training-ship for the Naval Coast Volunteers, is progressing very fast in her fitment at Chatham, and will very soon be completed, when she will proceed to Greenhithe, where she is to be stationed. She is only to be supplied with her main-deck guns, consisting of 18 32-pounders, each of 56 cwt., and 9 feet 6 inches long.

Dee, 4, paddle, Master-Commander Pullen, arrived at Portsmouth on Saturday, from Woolwich, with boilers and machinery belonging to ships fitting at that port.

Diadem, 32, Captain James H. Cockburn, had a bowsprit put in on Saturday. She will be ready to leave the Devonport Dockyard for Plymouth Sound in a day or two.

Dover, paddle steam-vessel, having undergone extensive repairs, is to be brought forward for service in the river Gambia, where she will be manned by a crew of Kroomen, and employed for the conveyance of the mails to various stations of Africa. She was previously lent to the Colonial Government for a similar purpose.

Euryalus. The damage to the Euryalus, 51, screw, Capt. J. W. Tarleton, C.B., in No. 7 dock, at Portsmouth, caused by her getting ashore on the coast of Syria, has not proved to be of so extensive a character as was anticipated. About 14 feet of her false keel is gone from forward.

Excellent. Several of Armstrong's guns have arrived at Portsmouth, for practice on board this vessel.

Falcon sailed for the south from Fernando Po on the 28th of January. H.M.S. Pluto, the U. S. gunboat Sumpter, and the French ship Destaing were in company.

Firebrand, 6, paddle, Commander James M. Bruce, steamed out of Portsmouth Harbour on Monday to test her machinery. In leaving the harbour she fouled the Sprightly paddle-tender, master-commander Allen, carrying away her own jibboom, and was compelled to drop her anchor for a short time in the middle of the harbour. She afterwards proceeded to Spithead, and after testing the working of her machinery returned into harbour. She will sail in the course of a few days for Malta.

Firefly, 4, has sailed from Spithead for Malta, where she will supply the place of the Tartarus surveying vessel.

Fire-Queen, paddle, Master-Commander Paul, came into the steam-basin at Portsmouth on Thursday to complete her repairs.

Frederick William. The launch of the Frederick William, screw, 86, will take place at Portsmouth in the forenoon of Saturday, the 24th instant.

Galatea, 26, 800 horse-power, is completed by the engineers, and will be at once undocked, when she will join the steam reserve at Chatham.

Glasgow, 51, screw. The stem, complete, weighing 12 tons, of this magnificent frigate building at Portsmouth, was placed in position on Tuesday under the direction of Mr. Harvey, boatswain of the Portsmouth dockyard, by means of a derrick and purchases, manned by convicts

Hecate, paddle steam-vessel, having undergone extensive repairs, was a few weeks since completely rigged, and pronounced ready for commission. It is, however, an extraordinary fact that her boilers have been taken out during the present week, and removed to the factory department, as it is considered they are defective.

Hornet, 17, screw, in No. 1 dock, at Portsmouth, is having her copper stripped off preparatory to having defects repaired, caused by the ravages of the *teredo navalis*.

Megæra, 6, paddle, Commander James Hunt, was on Monday taken out of No. 8 dock at Portsmouth into the steam basin.

Mersey, 40, Capt. Caldwell, C.B., has shipped some supernumeraries, and will shortly leave Plymouth Sound and join the Channel Squadron.

Nile. A court of inquiry has been held at Devonport on certain charges brought against the boatswain of the Nile, 91, screw, and which, it is said, will be the subject of a court-martial.

Orion, 91, Captain Frere, came into the Bay of Naples during the night of the 11th, from Malta, Mr. Elliot having telegraphed to the Admiral for a vessel.

Osprey, 4, screw steam-vessel, Commander Blomfield, arrived at Woolwich on Wednesday from the Mediterranean station, and is ordered to be admitted into the basin to return stores preparatory to being paid off. She was commissioned by her present commander in March, 1856, and is in excellent condition.

Pelorus. From the *Hobart Town Advertiser* of January 4, we take the subjoined particulars of a shocking catastrophe which had occurred on board one of the boats of Her Majesty's ship Pelorus on January 2:—"We are sorry to record that an accident, attended with fatal results, took place between six and seven o'clock yesterday morning, on board one of the boats belonging to Her Majesty's ship Pelorus. The following are the particulars furnished to us from the ship:—At an early hour yesterday morning six boats, with seamen and marines, proceeded to the beach under the battery in the Domain (the Queen's Battery), where, under a fire of blank cartridge from the boats, a body of seamen and marines were landed. So soon as the men were ashore, the ship's galley and two cutters, under Captain Seymour, were sent off from shore to fire one rocket each down the river. When the first cutter had got about 200 yards from the shore, the accident occurred. On the tube being fixed to explode the first rocket, it stuck in the tube, and the officers and boat's crew perceiving this, according to the orders issued to meet such occasions, immediately jumped overboard, but unhappily not in time to escape the effects of the explosion, whereby Mr. Battiscombe, senior lieutenant, was severely wounded, the greater portion of his nose being shot away, and his face also being injured. Mr. G. H. Borton, midshipman, was so severely wounded in the head, the side of which was almost completely blown away, as to leave not the slightest hope of recovery. Thomas Graham, A.B., was also severely wounded, and William Bord, A.B.; Joseph Palmer, O.S., and Alfred Gough, gunner's mate, slightly. Happily no damage was sustained by the galley and second cutter, which were close to the boat from which the explosion took place when the tube was fired, and the wounded officers and men were instantly picked up and taken on board. The tube which burst, it may be added, was repeatedly fired from last year with the same (24lb.) rockets, and of course there was not the slightest apprehension of danger. The melancholy accident has much affected the brother officers of the unfortunate gentlemen who suffered by the explosion, and particularly for Mr. Borton, a young officer, regarded by the other officers and the crew with the highest affection and respect, and much sympathy is also expressed in town that such a melancholy accident should have occurred."

Plover, built to replace the vessel of that name recently lost, has commenced receiving her engines, of 60 horse-power, from Messrs. Napier, of Glasgow.

Pluto sailed from Fernando Po on the 28th of January for the southward.

Porcupine, 3, paddle, surveying vessel, Captain H. Otter, at Devonport, will be out of the hands of the dockyard at the end of the month.

Prince of Wales, 131, screw, at Portsmouth, has been undocked from No. 7 Dock, and placed in the steam-basin.

Ranger, screw steam-vessel, recently launched at Deptford, has received her masts, and is to be rigged and got ready for service forthwith.

Rinaldo, 17, screw, which has been built in No. 7 Dock, at Portsmouth, has a number of hands engaged upon her to complete her coppering and other necessary works, in readiness for her undocking about the 22nd inst.

Rolla, Naval apprentices' brig, Lieut.-Commander Nelson, and the Sealark, novices' training-brig, Lieut.-Commander Johnson, both at Portsmouth, are nearly complete in their outfits for their summer cruising.

Royal George, 120, screw, in the first-class steam reserve at Devonport, is to return all her stores, preparatory to being cut down to a two-decked ship.

Sanspareil, 70. Letters from this ship at Cork, state that the crew is afflicted with smallpox to such an extent that the captain cannot obtain permission to leave her, although he has just experienced a severe domestic loss.

Spitfire was at Fernando Po on January 29. She had been to Old Calabar with the Consul at Fernando Po, who went to settle some misunderstanding between a supercargo and one of the native chiefs, which was satisfactorily done.

Sprightly, paddle, Master-Commander Allen, has hauled alongside Portsmouth Dockyard, to repair damages to her wheel caused by the Firebrand fouling her the previous day.

Sutlej, 51, steamer. Workmen are busy upon this ship completing her caulking and painting, previous to her being undocked on the 24th instant.

Terrible has arrived at Palermo, having been telegraphed for.

Trafalgar, 91, screw, Captain Fanshawe, at Plymouth, was paid wages on Friday week, and her crew granted leave. She was taken out of dock on Saturday. A strong gale from the north-west prevailed at Plymouth on Wednesday, and during a sudden gust she broke adrift from her moorings in Hamoaze. Her anchor was let go immediately, and she was brought up without damage.

Victoria and Albert has been taken into the steam-basin at Portsmouth and has shipped her superheating steam gear, &c.

Virago, 6, paddle, Commander Dunn, has left Plymouth for Queenstown and Pembroke.

Windsor Castle, 116, was removed on Monday from the basin in Keyham Steamyard to her moorings, near Wilcove, Hamoaze.

The Duke of Somerset held his first levee of the season at the Admiralty on Thursday. The following officers were present:—Vice-Admiral Collier, Rear-Admiral H. Austin; Captains J. B. Marsh, R. Jenkins, W. Morris, J. Rawstone, F. Patten, C. O. Hayes, G. Hickley, S. C. Cresswell, J. M. Hayes, F. A. B. Crawford. Commanders, G. W. Lang, W. H. Hood, H. H. Beamish, V. O. Inglefield, H. Nelson, C. S. Forbes, G. Blane, E. Hare, W. Armytage, J. S. Ellman, E. A. Glynn, J. S. Ross, and G. H. Gardner.

Admiralty orders have been received at Chatham for six additional line-of-battle and other steam ships to be laid down as soon as the required number of slips become vacant. The ships will include one line-of-battle steamer, to be named the Pitt, 91 guns, and 800 horse-power; one 51-gun screw frigate, to be named the Pomona, 400 horse power; one steam frigate of 22 guns, to be named the Menai, 400-horse power; one screw corvette of 22 guns; one of 17 guns; and one steamer of 4 guns, not named.

The two gun-boats Linnet and Pigeon, now being built by private contract for the Admiralty, at Liverpool, are ordered to be fitted for sea at Chatham Dockyard, and each to be supplied with one 68-pounder, 95 cwt., 10 feet long; one 32-pounder, 56 cwt., 9 feet 6 inches long; and two 24-pounder howitzers.

Various numbers, ranging from 300 to 900, hired artisans and others, working in Devonport Dockyard, are spoken of as likely to be discharged, in consequence of the diminution of the Parliamentary grant this year. The screw steamship Robust, 91, now building, will, it is said, remain some time in frame.

The shipwrights at Woolwich Yard recently forwarded a memorial to the Admiralty, praying for a revision of the system of job and task work which was introduced during the period of the Russian war. The ground of complaint, as stated by the men, is as follows:—that incompetent persons are employed to measure the work, and that the payment is based, not upon the amount of work actually performed, but upon the class of vessel upon which the workman is employed. A numerously attended meeting of shipwrights was held at Woolwich last week, when a reply was received from the Admiralty to the effect that no alteration could be made in the present system. Various addresses were delivered, and it was stated that Mr. Angerstein, M.P., had waited upon the Duke of Somerset, who had promised to consider the subject. Ultimately it was resolved to persevere in endeavouring to obtain a revision of the present system.

Shipwrights' and caulkers' apprentices have been entered for service at Woolwich Yard during the past week, being the first admitted under the revised system of competitive examination.

The hired transport Canaan, has arrived, with 150 naval invalids on board from Hongkong, in charge of Lieut. Woodman, R.N., Admiralty agent, and Dr. A. Watson R.N., surgeon in charge. The greater portion of the invalids

Digitized by Google

are from Admiral Hope's squadron, and were wounded in the unsuccessful attack on the Taku Forts, at the mouth of the Peiho River, on the 25th June, 1859. There are 16 cases where amputation has been performed, and many on board who were very severely wounded. Dr. Watson states that all the wounded have progressed most favourably, and that only four deaths have occurred during the voyage home. The following officers and passengers have arrived by the Canaan :—Mr. H. Ley, master, R.N. ; Dr. Charles A. Lees, assistant-surgeon, R.N., invalided ; Mr. W. Bicknell, second master, R.N., ditto ; Mr. Powlett, midshipman, R.N., ditto ; Mr. Moysey, assistant-engineer, R.N., ditto ; Mr. Bertram, assistant-engineer, R.N., ditto ; Mr. Mitchell, gunner, R.N., ditto ; Mrs. Bampfield, wife of Capt. Bampfield, 1st Royals, two children, and a servant ; Mrs. Rangall, family, and servant. The ship sailed from Hongkong on the 13th of October, 1859, calling at Singapore, Cape of Good Hope, and St. Helena.

Notwithstanding all that has been done in this country to demonstrate that plated ships of war are not impervious to shot, France is still constructing iron-sided ships. Three are already launched, and more are to be built. From this it would seem that the Emperor relies upon his *frégates blindées*. It is stated in French naval circles that these ships will be substituted for line-of-battle ships. Their timbers are of the scantling of three-deckers, and they are to be armed with 36 heavy guns, most of them rifled 50-pounders, which will throw an 80lb. hollow percussion shot. These frigates are cased with iron ; and so convinced do naval men seem to be in France (notwithstanding Armstrong's guns) of the irresistible qualities of plated ships, that they are of opinion no more lines-of-battle upon the old principle will be laid down, and that in ten years the stately three-decker will have become obsolete. *Nous verrons.*

Captain L. Vernon has given notice that on the 27th of March he will call the attention of the House to the report of the Packet and Telegraph Contracts Committee, and move a resolution thereon.

A letter dated Naples, March 6, says, "The English fleet has arrived ; part of it has anchored in the port, the other part proceeding to Castellamare. This event has caused a great sensation."

The Prussian transport Elbe, Lieut.-Commander R. Werner, arrived at Spithead on Saturday last from Hamburg, to accompany the Prussian squadron to China. The Elbe is fitted with a screw steam-launch.

Thetis, 36, Prussian frigate, and the schooner Frauenlob, sailed from Spithead on Thursday morning for China.

It is calculated that at the present time the steam fleet of France, together with the large transports at the disposal of the Emperor, is sufficiently numerous to carry an army of 60,000 men, with all its horses, provisions, and materials, for one month. The steam-fleet of France, at the present moment, consist of 40 steam line-of-battle ships, 6 iron-plated frigates, 30 screw-frigates, 19 paddle-wheel frigates, and 26 steam-transports.—"Report of a Committee appointed by the House of Commons."

The following ships of the line are receiving machinery at the different Home ports :—Victoria, 121 ; Prince of Wales, 131 ; Duncan, 101 ; Rodney, 90 ; Nelson, 90 ; Royal William, 90. The following frigates are being converted into screw ships—Phœbe, 51 ; and Sutlej, 51. The following frigates are receiving machinery—Severn, 51 ; Immortalité, 51 ; Narcissus, 51 ; Penelope, 16. The following corvettes are receiving machinery—Jason, 21 ; Camelion, 17 ; Cormorant, 4. The following gun-vessels are receiving machinery—Espoir, 1 ; Torch, 1 ; Plover, 1 ; Lee, 1 ; Penguin, 1 ; Steady, 1 ; Mullet, 1 ; Griffin, 1.

A return of the number of ships in the first, second, and third divisions of the steam ordinaries at the several home ports for the present month :—1st Division (ready with stores on board), 7 ships of the line ; 4 frigates ; 4 corvettes ; 17 gun boats. 2nd Division (ready, but stores on shore), 7 ships of the line ; 4 frigates ; 19 corvettes ; 15 gun boats. 3rd Division (fitting), 1 frigate ; 17 corvettes ; 25 gun boats. Total number of ships, &c. in the first, second, and third divisions, 121.

In reply to a question put by Lord Alfred Churchill in the House of Commons on Thursday evening, Lord Clarence Paget said that H.M.S. Fawn had been sent to Australia to relieve a vessel which had been ordered home, and not despatched by way of augmentation to our naval force in the Australian colony. With respect to the increase of the French establishment at New Caledonia, he had to inform the noble lord that it was a mistake to suppose that France had an establishment at that station. They had, however, an admiral in the Pacific, and a governor in New Caledonia, under his command. We had a commodore at the Australian station, and it was not the intention of the Government to convert that station into an admiral's command.

The following young gentlemen received certificates this week at the Royal Naval College, Portsmouth, as having qualified themselves at the examinations commenced on the 7th inst. For Naval Cadets :—A. A. Lee, A. St. J. Leacock, J. N. Callander, *C. H. Warren, †C. W. Herbert, *G. F. Trollope, *Edward Payne, F.D. Radcliffe, *A. C. Loveridge, E. A. Cooper, *F. T. W. Passy, *F. H. Haygarth, Joseph Swan, *C. H. Horne, H. W. A. Littledale, †A. Kingscote, J. H. Lee, S. A. K. Hamilton, B. W. Vernon, W. H. Monckton, E. F. Jeffreys, Hon. C. J. Cadogan, Arthur Malkin Williams, Hon. G. J. Lambart, G. S. M. Thomas, R. A. Brock, F. A. Harston, F. G. de Lisle, E. A. Holbeck, †L. F. Wells, A. Savage, †H. A. Baring, G. C. Cheather, A. Schomberg, G. S. Parker, *R. F. Orton, G. P. C. Gray, *J. G. W. Harrison, *G. C. Higgins, H. A. P. Probyn, L. Napier, E. C. L. Sturt, and Arthur P. Williams. For Second Masters :—H. Smith, F. Darbishire, R. F. Bellis, F. C. Forte, A. G. St. G. Ponsonby, †H. A. Easther, G. Browner, W. L. Bennett, R. W. Stephens, and J. F. G. St. John. Fifty-nine young gentlemen underwent examinations for naval cadets, forty-three of whom received certificates. These gentlemen enter the Britannia under the new regulations contained in the Admiralty Circular, dated October the 29th, 1859, and which will come into force on the 1st proximo. The 1st, 3rd, 4th, 5th, and 6th places of those under fourteen years of age were obtained by pupils of the Royal Naval Academy, Gosport.

Naval Cadets.—The following is a list of Naval Cadets now on board H.M.S. Training-Ship, Britannia, Captain Robert Harris, in Portsmouth Harbour :—Messrs. Evans, Roberts, Brown (*a*), Ross, Nicolson, Smith (*b*), Hunt, Brown (*b*), Reece, Niven, Aitkins, Ferris, Clifton, Lucraft, Walker, Hough, English, Wilmot, Shafto, Gilbert, Lord Beresford, Messrs. Tyler, Greenway, Campbell, Aylen, Foster, Pugh, King, Wilkins (*a*), Kemp, Bland, Festing, Weld, Musters, Walters, Hutchinson, Præd, Ramsden, Causton, Gibson, Atkinson (*b*), Langford, Hazel, Mann, Beddoes, Wood (*a*), Waight, Moreton, Mercer, Hildyard, Leventhorpe, Jaffray, Bedford, Bruce, Sunderland, Kemble, Smith (*c*), Fairfax, Gorst, Nowell, Verner, Sulivan, Riddle, Forbes, Ranking, Wood (*b*), Burt, Brereton, Harrison, Hallett, Ward, Wallace, Frances, Usborne, Tottenham, Ching, M'Donnell, Freeland, Law, Calcroft, Heathcoat Jenkins (*a*), Napier (*a*), Bancroft, Atkinson (*a*), Steavenson, Bolton, Patton, Lang, Crawley, De Courcy, Kyrle, Garbett, Grey, Smith (*b*), Osborn, Young, Fielding, St. John, Gillum, Bevan, Boddam, Stopford, Johnson, Campbell (*a*), Hennah, Moysey, Milman, Dugdale, Cole, Grenfell, Dicken, Hyman, Ducat, Carey, Eyres, Brown (*d*), Castle, Webb, Powell, Bromley, Menteath, Hodgson, Meade, Hodgkinson, Dundas, Hoghton, Dunn, Bowly, Wingfield, Willis, Wilding, Francis (*a*), Cotton, Pascol, Lord Clinton, Messrs. Wade, Duffield, Annesley, Wanchope, W. F. T. Mann, Napier (*b*), Maycock, M'Clintock, Fortescue, Henick, Snowden, Wiseman, Dacres, Garnier, Smith (*a*), Chowne, Bolders, Welby, Gedye, Jenkins (*b*), Abbott, Prevost, Gould, Rickman, Ramsey, Hill, Price, Brown (*c*), Eliot, Hardinge, Boys, Coventry, Needham, La Coste, Gawne, Brabazon, Black, Proby, Ballantyne, Booth, Mandeville, King (*b*), Gissing, Lindeman, Watson, Clark, Gataker, Coddington, Drury, J. A. Fraser.

Naval Movements in the Mediterranean.—Malta 10th March, 1860.—H.M.S. Hannibal (bearing the flag of Admiral Mundy, C.B.), left port on Sunday last for Gibraltar. The Exmouth left on the same day for Corfu ; the Terrible, on Wednesday, for Messina, and the Orion on Thursday for Naples, followed by the gunboat Lapwing. It is supposed that disturbances have broken out in the two Sicilies. The line-of-battle ships remaining in this port are the Marlborough (bearing the flag of Vice-Admiral Fanshawe, C.B.), Victor Emmanuel, Neptune, Cæsar, and Cressy ; also the corvette Cadmus, and several smaller vessels. H.M.S. Himalaya is hourly expected from Alexandria to embark the 21st Fusiliers for the West Indies. The Peninsular and Oriental steamer Delta only arrived last night. Amongst the passengers were Major-General Cunningham, Major Armstrong, Major Platt, Colonel Robertson, Lieutenant-Colonel Steele, Captain M'Kenzie, Captain Smart, and Lieutenant Spen. H. M.'s ships of war at Corfu on the 7th inst., were the St. Jean d'Acre, London, and Liffey. At Gibraltar, Agamemnon, James Watt, and Renown.

The following appointments have been made in the Coast-Guard :—Chief Officer, Mr. Edward A. Deane, Acting Second Master R.N., to command Branscombe Station. Promotions of Chief Boatmen in charge, and to be chief officers of the second class : Messrs. George Hay, to command Burnham ; John Dixon, Elmly Ferry ; James Hicks, Langstone Harbour ; Cornelius Driscoll, Beaulieu River ; W. R. Jeatt, Hill ; William Drew, Pendeen Cove ; George Arrowsmith, Pembroke Dock ; John Jones, Bangor ; James Crowden, Buckie ; Richard Jenkins, Killard ; Henry Bray, Tribane and Ross Townsend, Cromane Point Station.

NAVAL ENGINEERS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—A consideration of the article on Naval Engineers, which appeared in your valuable paper, has induced me to offer a few remarks which will, I think, tend to further elucidate the subject.

With regard to the Admiralty Circular which has lately appeared, there can be but one opinion. Its object is injurious, and its language most insulting. That quarter-deck officers should be classed with armourers, blacksmiths, and the other artificers of the ship—that they should be required to perform work totally unconnected with their own duties or profession—that their working-day should be defined to be of ten hours' duration—and that they should be remunerated for these indignities only when engaged in "actual manual labour" on board some vessel other than their own, not unnaturally excites among them the greatest indignation. All this is, however, only in accordance with the general line of treatment pursued by the Admiralty towards their engineers.

The grievances of which these officers complain are of two kinds : absolute and relative. By relative, I mean the differences in treatment between engineers and officers of corresponding rank in Her Majesty's service ; and by absolute, I mean the lack of those advantages and comforts which are possessed by the engineers of the marine, whether naval or mercantile. In this latter class may be included deficiency of pay and the absence of cabins, mess, cabin furniture, and servants. Not only is the actual money received at the end of each quarter less in amount than in almost any other service in the world, but out of this scanty salary servants, board, &c., have to be provided, while the British Navy has the unenviable distinction of being the only marine service where separate cabins are not assigned to all the engineers. I hope comment on these statements is superfluous. It is hardly too much to say that the officers of the first Navy in the world ought to be able to boast that they are better off than they could possibly be in any other.

The relative grievances of the Royal Naval Engineers are also numerous and important. The assistants, nominally ranking with second masters, are in most ships never invited to the captain's table ; they are not allowed to accept general invitations addressed to the "officers" of their ship ; none of their time counts towards their half-pay, though extending over an average period of at least ten years ; their uniform is inferior ; they have no commissions, have no progressive increase of relative rank ; and they are obliged to live by themselves in a separate berth, most commonly dark, ill-ventilated, and unwholesome ; and here I join issue with your correspondent. I am confident that a large majority of the Royal Naval Engineers would *much* prefer the gun-room to their present billet ; while in nine cases out of ten the objectors will be found to belong to that imperfectly educated portion of the class which obtained admission to the Service at a time when the demand for engineering ability far exceeded the supply.

The engineers can only justly be compared with the surgeons. All other branches learn their profession in the Navy ; these two come into the Service conversant with and prepared to do their duty. Either let the Admiralty treat the engineers as they do other officers, or else let them cease to delude by false expectations those who are gentlemen both by birth and education, and who only find out too late how bitterly they have been deceived.—I am, &c., X.

THE MILITIA.

The 3rd or Royal Westminster Middlesex Militia, under the command of Colonel Viscount Chelsea, will assemble on the 30th of April for 27 days' training and exercise at Turnham Green. It will be remembered this was the only Middlesex regiment that served in the Mediterranean during the Russian War.

Queen's Own Light Infantry. Colonel Dickson has forwarded to us a correspondence which has taken place between himself and Lord Wilton. The colonel refers to the fact that he has obtained a verdict against Lieut.-Colonel Walker, who succeeded him as lieut.-colonel of the regiment under the command of his lordship, accompanied with an apology and a retractation of the statements which originally induced his lordship to recommend his displacement, and expresses his belief that his lordship would now feel satisfaction in doing justice to an old officer by urging on Lord Combermere and the authorities his claim to be restored to his former position. Lord Wilton in reply states that in however favourable a light Colonel Dickson may consider the verdict at the recent trial, it in no way affects the position of Lieut.-Colonel Walker, who still remains lieut.-colonel of the Tower Hamlets Militia, and that he must decline to interfere in any way with the previous decisions of the authorities, sanctioned by Her Majesty, regarding Colonel Dickson.

The 1st Warwickshire Militia, under the command of Lieutenant-Colonel Boultbee, has received orders to assemble at Warwick, on the 30th April next, for 27 days' training.

The 1st Royal East Middlesex Militia, under the command of Lieut.-Colonel Alcock, will assemble for 27 days' training at Hampstead, on Monday, April 30, at nine o'clock, a.m.

Londonderry. We have to record the death of Sir Robert Ferguson, M.P., honorary colonel of this regiment, which occurred in Dublin on Wednesday.

A portion of the Fifeshire Artillery left Devonport on Saturday for Plymouth citadel. The detachments at Pendennis Castle, Falmouth, will follow the head-quarters.

The actual strength of the regiments of Militia in the United Kingdom at present embodied is in England 13,580 ; Scotland, 2684 ; Ireland, 7,471, giving a total of 23,735 effective men. This force is divided as follows :—14 English regiments of Infantry and six of Artillery ; two Scotch regiments of Infantry and three of Artillery ; eight Irish regiments of Infantry and four of Artillery. The English force has 787 sergeants, 265 drummers, and 12,528 rank and file ; the Scotch, 170 sergeants, 61 drummers, and 2453 rank and file ; and the Irish, 458 sergeants, 150 drummers, and 6863 rank and file. These numbers represent the effective force at present ; but the following are wanting to bring the Militia up to its establishment :—5094 men, including sergeants and drummers, for England ; 823 men for Scotland ; 2914 men for Ireland, giving a total for the United Kingdom of 8831. This force, if kept up to the established number, would be 32,523. Another return shows the numbers present at the last annual training of each disembodied regiment, and the number of absentees from each regiment on that occasion. The numbers present were 44,340, and absent 30,557.

Huntingdonshire Regiment of Militia—Captain Henry Godolphin Rooper, to be Adjutant, from the 14th day of February, 1860 ; Feb. 28.

Artillery Regiment of Royal Lancashire Militia—First Lieutenant Widenham Francis Fosbery to be Captain, vice James Middleton, promoted ; March 5.

East York Regiment of Militia—Thomas Oliver, Gent., to be Ensign, vice Harte, resigned ; March 6.

1st Royal Lanarkshire Militia—John George Brown, Esq., to be Captain, vice E. T. Dundas, resigned.

King's Own Light Infantry Regiment of Militia—Edward Francis Hart, Gent., to be Ensign, vice Beaumont, who retires ; March 12.

2nd Derbyshire Militia—Thomas Jones, Gent., to be Assistant-Surgeon, vice Newbold, promoted ; March 14.

2nd Regiment of King's Own Staffordshire Militia—Ensign John Wallace Pilkington Lowe to be Lieutenant, vice Woodward, promoted ; March 7.

Duke of Lancaster's own Regiment of Yeomanry Cavalry—Richard Henry Ainsworth, Gent., to be Cornet, vice Harbord, resigned ; March 1.

In the House of Commons a few evenings since Mr. Darby Griffith asked the Secretary of State for War whether, under the operation of the General Order of his Royal Highness the General Commanding-in-Chief, with the sanction of the Secretary of State for War, of date of the 23rd day of February last, by which cavalry officers below the rank of field-officer were enabled to obtain their chargers from the remount or other horses on the effective strength of the regiment, it would be the duty of the Inspecting Generals of cavalry to pass such horses, as fulfilling the obligation of officers to provide themselves with chargers adequate to the service ; or whether the Inspecting Generals were to continue to estimate the efficiency of officers' chargers by the same standard of excellence as had been the usage under the former system, by which officers had to provide themselves with horses of a much more expensive description on their own responsibility ? Mr. S. Herbert said the horses which would be selected would of course be the best that could be obtained. The Commander-in-Chief would of course take care that the object of the general order would not be defeated.

VOLUNTEERS.

METROPOLITAN.

The London Irish Rifle Corps.—The members of this corps met on Saturday afternoon at Hungerford-hall, for the purpose of being sworn in. The swearing in of the members commenced at a little after four o'clock, and continued until after five. The first to whom the oath was administered was the Marquis of Londonderry, who was followed by Mr. D. S. Kerr, M.P., Mr. Morgan John O'Connell, Sir J. Arnott, M.P., and nearly one hundred of the leading Irishmen in London. Many of the corps were equipped in their uniforms. After the swearing-in, the commandant delivered a short address to stimulate them to further exertion. They were next formed into line, and went through drill to the admiration of many military men who were present. The circumstance of the officers of the corps not appearing at the levee on Wednesday, was attributable to delays over which those interested in its promotion had no control. A special meeting of the general council was held on Tuesday afternoon at the Freemasons' Tavern; the Marquis of Donegal in the chair. There were also present the Marquis of Clanricarde, Lord Talbot de Malahide, Mr. D. S. Kerr, M.P., General Watkins, Sir John S. Lillie, K.C.B., Mr. Morgan J. O'Connell, Mr. Montgomery, Mr. Lyster O'Beirne, Mr. D. T. L. Clanchy, Dr. O'Connor, &c. After the transaction of some routine business, the Marquis of Donegal announced that he had made arrangements for the purpose of the drill exercise of the corps taking place at Burlington House, on Tuesdays and Fridays, from 5 o'clock p.m., and on Saturday mornings until 10 o'clock, in addition to the drill exercise at Hungerford-hall on the evenings of Tuesdays, Thursdays, and Saturdays, from five until nine o'clock. An election by ballot, according to previous notice, of seven members to form an executive council from the general council, in compliance with the rules of the corps, to aid the commandant in non-military matters, next took place, when the following were chosen: The Marquis of Conyngham, the Earl of Arran, Sir Justin Sheil, General Watkins, Mr. Montgomery, Mr. Morgan J. O'Connell, and Dr. O'Connor, captains of companies, to be ex-officio members. The Marquis of Donegal, commandant of the corps, next proceeded to swear in effectives from those present. Amongst those sworn in were the Marquis of Clanricarde, Lord Talbot de Malahide, Sir J. S. Lillie, Mr. Lyster O'Beirne, General Watkins, &c. The duties of the general council having ceased on the election of the executive council, it was accordingly dissolved. A general feeling of gloom has been cast over the corps by the death last week of Mr. J. J. Dempsey, the Honorary Secretary, and the originator of the Irish Volunteer regiment. He was buried on Tuesday at Brompton, when a party of the corps, under Lieutenant Jones, attended, and paid the last honours to his remains. He held the rank of Lieutenant.

St. Pancras and North Middlesex Rifle Corps.—The first daylight drill of the St. Pancras and North Middlesex Rifle Brigade took place on Saturday afternoon at the Regent's Park Barracks, in Albany Street. There was a pretty good muster. After forming into companies the effectives were marched on to the parade ground, and went through various evolutions in a most efficient manner. A negotiation is in progress with reference to an amalgamation between the St. Pancras and North Middlesex and the Railway Rifles, which, if carried out, will give the brigade an effective strength of about 600 men.

St. George's Rifle Corps.—The next full dress parade and march out will be on Saturday (to-day) at half-past 4 o'clock precisely, at Burlington House.

Railway Rifles (20th Middlesex).—The gentlemen who have been for some time past associated with Mr. Thomas Dixon in the Special Division of the Railway Clearing-House, and now partially separated by recent alterations, have presented that gentleman with a sword and rifle as the memento of a happy and harmonious connection which has long existed, and an expression of their esteem and regard. The testimonial has taken the form named as the appropriate badges of English patriotism, and the important part Mr. Dixon took in 1857 and 1859 in promoting the Volunteer movement, and the valuable services he has rendered the Railway Rifles (20th Middlesex), as chairman and otherwise.

South Middlesex.—There was a field day on Thursday week in Hyde Park. Viscount Ranelagh, the colonel-commandant, put the brigade through various evolutions, some of which were of a complex kind; but the efficient manner with which the corps executed the various movements won the admiration of several distinguished officers of the Line who were on the ground. At least 10,000 persons were present, and the muster of the corps was nearly 600 effectives. The review was enlivened by the performance of the band of the corps (24 strong), conducted by Herr Schallen, formerly conductor at the Crystal Palace. The shooting-butt now erecting at Beaufort House, Walham Green, the head-quarters of the South Middlesex Volunteers, and the new club-room, are in active progress.

Queen's Westminster Rifle Volunteers.—Presentation.—On Wednesday evening the members of the St. Martin's division of the above corps celebrated the inauguration of the Volunteer movement by a dinner at the Swan Tavern, Hungerford Market, and availed themselves of the opportunity of presenting Sergeant W. Byrne, instructor of musketry, 2nd Battalion Scots Fusilier Guards, and Drill-Sergeant Joseph Page, 2nd Battalion Scots Fusilier Guards, with silver cups, in testimony of their efficiency in drilling the corps.

Paddington.—The funds now amount to very nearly 2000*l*. The effectives number about 160 members, and the drill takes place regularly and effectively.

BERKSHIRE.

Berkshire Rifle Volunteers.—Colonel Loyd Lindsay, V.C., late of the Scots Fusilier Guards, has issued an excellent regimental order on assuming the command of the corps. The regulations which he lays down are eminently practical and business-like, such as might be expected from one who had been an adjutant of a battalion of the household infantry. His own duties as commanding-officer he describes in language which we reproduce as an example for all commanding-officers. They are, he says: 1st. A general supervision of the drill and discipline of the whole force, in order to maintain that uniformity in the practice and movements of the different companies which will be found essential to sound military organisation when the companies are brought into combined operation. 2nd. Free communication with the officers commanding the several companies, and an active co-operation with them in their efforts to render the duties of the corps acceptable and popular with all the members of it, as the only means of giving to the present movement that permanence which alone can make it effectual for its purpose. 3rd. To be a centre to which the respective officers may at all times resort for consultation or advice, and to form a rallying point upon which the several companies may at once form in the event of foreign invasion, and the services of the regiment being required for the protection of the country.

DEVONSHIRE.

In our list of presentations at the Levee last week the Middlesex Volunteer Corps were placed before those of Devonshire. We are reminded that Devonshire has the honour of standing first on the list of Volunteer Rifle Corps.

HAMPSHIRE.

The first company of Hampshire Rifle Volunteers attended Divine service at Winchester Cathedral on Sunday last, when a special sermon was preached by the Very Reverend the Dean, who took his text from 2nd Samuel, x., 12. The venerable gentleman commanded the Volunteers 62 years since, and having just completed his 84th year, it was felt to be a very encouraging act on his part to undertake such a duty. The mayor (J. Naish, Esq., who is a member of the corps) and corporation of the city also attended in their official robes, and by the kind permission of the lord-lieutenant, the band of the Hants Militia headed the company to and from the cathedral, the band of the corps not being quite ready for public duty. The assemblage of the citizens throughout the line of march was immense, and the cathedral was crowded. Colonel Faunce commanded, and the other officers lately presented to the Queen were also present. It is expected that the corps will be immediately reinforced by many other patriotic citizens becoming members, either effective or non-effective; and now that the uniform is settled for the 44th Regiment, there is no doubt but that the whole of the companies of the county will rise simultaneously to full strength, and meet ere long in battalions on Oliver's Battery, or Twyford Down, near this city.

KENT.

We are very sorry to read the following in a daily contemporary:—"Circumstances of an extraordinary nature have occurred at Chatham and Sheerness, in connection with the Volunteer Rifle Corps formed in those towns. At Chatham various disputes have taken place respecting the appointment of officers, and at a recent meeting of the corps a resolution was adopted calling upon Captain Stevens, who acts as ensign and commanding officer, to resign. Thereupon Captain Stevens forwarded a notice to each member of the corps, to the effect that he should strike off from the muster-roll the names of all those who sanctioned these proceedings, for disobedience and contempt of authority. At Sheerness, the appointment of Mr. Ward, a solicitor, being rejected by the Lord-Lieutenant, a notice was issued to the effect that the corps would be dissolved. The members, however, at a subsequent meeting, strongly protested against such a step, and forwarded a memorial to the Lord-Lieutenant of Kent on the subject."

Folkestone Volunteer Rifles.—A general meeting of this corps was held on the 9th inst. at Folkestone, for the purpose of hearing read a communication from the Lord-Warden, to the effect that Her Majesty had been pleased to accept the service of the corps, and for the election of a captain. The letter having been read, and also an enclosure, being a copy of that received from the Secretary of State, signifying Her Majesty's acceptance of the services of the company, the meeting proceeded to the election of a captain. Mr. Fry, a member of the company, then nominated Lieut.-Colonel Percival, late of the 1st Light Cavalry British German Legion, as captain; the gallant colonel was well known in the neighbourhood, and had intimated an intention, if elected, of residing in the immediate neighbourhood. On a ballot being taken, the colonel was unanimously chosen, and his name, so soon as it is notified that he has accepted the office, will be forwarded to the Lord-Warden for confirmation. The lieutenant announced that drill would be recommenced, under the superintendence of Sergeant-Major Downing of the 47th Regiment, on the evenings of Monday and Friday in each week.

MIDDLESEX.

12th Middlesex Rifle Volunteers, Barnet.—The Lords of the Treasury have kindly granted the free use of the County Court for drilling in during the winter; and meetings for this purpose have been held there every Monday, Wednesday, and Friday evenings, from half-past seven till nine o'clock. The rector of Potters Bar has also given the use of the National Schoolroom for drilling. A body, sometimes consisting of sixteen, meet there on Tuesday and Friday evenings. On Saturdays those members who could do so have assembled in the Militia Barracks Yard, Barnet, at three o'clock, and proceeded either to Mr. Williams's, at Everly Lodge, East Barnet, where there is a range of about 400 yards, or to Mr. Cox's, at the Moat, Highwood Hill, where the range extends to nearly 800 yards. Mr. Hyde has also permitted the use of his range at the Manor House, Hadley. The financial arrangements of the corps are in a very satisfactory condition.

SURREY.

Richmond.—The whole of the members of the Richmond Amateur Band offered their services to the corps at this place. They were accepted and enrolled, the committee of management undertaking to provide them with uniforms. The drills of the corps are held in a spacious hall in the town, the time being from half-past ten to half-past eleven in the morning, and again at seven until half-past nine in the evening.

Godstone Rifle Corps.—The services of the Godstone Subdivision Rifle Volunteers (now the 17th Surrey Rifles) having been accepted by the Government, drills have already commenced at Limpsfield, Godstone, and Bletchingly. The corps boasts of one of the longest and safest practice-grounds in the kingdom, and now numbers between 50 and 60 enrolled members, besides 45 honorary members; and we doubt not that under the command of Captain Turner, who had the honour of carrying a colour of the Guards on the glorious day of Inkermann—and of his Ensign, Mr. Granville Leveson Gower, that the Volunteers will make a very satisfactory progress.

YORKSHIRE.

York.—On Tuesday evening last, Major Briggs (captain-commandant) read a correspondence that had lately taken place between him and the War-Office concerning the long Enfields recently supplied to the second company of this corps, by the Government. The correspondence alluded to arose out of the stringency of the orders issued by the Secretary for War regarding the safe custody of the arms. A letter was sent to the War-Office some time since by the captain-commandant, in which the whole of the supposed injustice to the Volunteers was fully represented. A strong feeling exists in the second company that the Government ought to allow the individual members the custody of their rifles (to place them on a par with their comrades of the first company, who had bought their own arms), for which Captain Meek (second company) offered to be personally responsible for any injury that might be done to them, or that the rifles were put to no improper use. It was also represented that the difference between the two companies was so marked (one going to parade with arms and the other without), that the circumstance was acting detrimental to the interests of the corps. Another reason urged for the Government to withdraw the restriction was—the great loss of time in giving out the rifles from the armoury, and the opportunity that was lost for the riflemen practising the manual exercise. These circumstances have been fully considered by the War Office authorities, who, however, had decided not to concede the much-coveted boon, not even allowing the loyal Volunteers to keep their side-arms (bayonets). This decision, on being announced, was received with feelings of regret, as there can be no doubt that this fact alone will prevent many young men from entering to form a third company, which could easily be raised in the ancient and loyal city of Old Ebor.

Naval Volunteering in the North.—At Aberdeen a meeting of the seamen of the port was called last Thursday to hear from Mr. Batten, Captain Warren, R.N., and Mr. Kellas, the secretary of the Marine Board, an exposition of the advantages attending their being enrolled into this force. Mr. Batten graphically pointed out to them that if 1000 seamen joined it would be the means of from 7000*l*. to 8000*l*. being annually spent amongst their wives and children—no mean boon to them—whilst the seamen would have two months' keep also. As to flogging, the recent regulations of the Navy saved any good men from the chance of receiving that; and those who were afraid of being flogged were not wanted. Any chance of their being called out was very remote, whilst a force of 30,000 seamen, trained to naval gunnery (volunteers, moreover), would render our hearths and homes sacred from any foreign attack. Three cheers for Mr. Batten, who filled the chair, and also for Captain Warren, terminated the proceedings, which were of a most satisfactory nature.

21st West Riding of Yorkshire Rifle Volunteers (Doncaster)—Henry Foster Pilkington, Esq., to be Captain; William Edwood Smith, Gent., to be Lieutenant; John William Snowdon Collinson, Gent., to be Ensign; March 5.

Memorandum—7th West Riding of Yorkshire Rifle Volunteers—The Christian name of Ensign Sowerby is Francis Robert, and not Francis only, as previously gazetted.

1st Kircudbright Rifle Volunteers—George Hamilton, Gent., to be Lieutenant; March 7.

2nd Kirkcudbright Rifle Volunteers—John Bell, Esq., to be Lieutenant; William John Renny, Esq., to be Ensign; March 7.

Gloucestershire Rifle Volunteers—3rd Company—James Peat Heane, Gent., to be Honorary Assistant-Surgeon; March 13.

Memorandum—Gloucestershire Battalion of Rifle Volunteers—The correct name of Lieutenant Colonel Purnell is William Paston Purnell, and not William Purnell Purnell, as Gazetted the 6th of March instant.

Staffordshire Rifle Volunteer Corps—24th Company—William Biddulph Parker, Esq., late 60th Rifles, to be Captain; March 6.

25th Company—The Hon. Dudley Francis Stuart Ryder, commonly called Viscount Sandon, to be Captain; Robert William Hand, Gent., to be Lieutenant; John Lea, Gent., to be Ensign; the Rev. Croft Worgan Dew, Clerk, M.A., to be Honorary Chaplain; Henry Thomas Lomax, Gent., to be Honorary Assistant-Surgeon; March 6.

27th Company—Brevet Colonel the Hon. Arthur Charles Legge, to be Captain; Lieut.-Colonel Smyth to be Lieutenant; the Right Hon. William Walker, Earl of Dartmouth, to be Ensign; March 8.

Wiltshire Volunteer Rifle Corps, 13th Company—Henry Gaisford Gibbs Ludlow, Esq., to be Captain; Richard James Ward, Gent., to be Lieutenant; Henry William Pinniger, Gent., to be Ensign; John Hill Gibbs, Esq., M.D., to be Honorary Assistant-Surgeon; March 12.

11th Lancashire Artillery Volunteers—James Boyd Forsyth, Gent., to be First-Lieutenant; Claud Lapsley, Gent., to be Second Lieutenant; Mortimer O'Connor, Esq., to be Surgeon, Feb. 29.

12th Lancashire Artillery Volunteers.—Captain John Frederick Wieland to be Major; March 5. Henson Bancroft, Gent., to be Second Lieutenant; March 3.

2nd Lancashire Rifle Volunteers—William Alexander Cameron, Gent., to be Supernumerary Lieutenant; March 5.

6th Lancashire or 1st Manchester Rifle Volunteers—John Dugdale, Esq., to be Captain; Peter Hopwood Moore, Gent., to be Lieutenant; Joseph Jervis, Gent., to be Ensign; Feb. 29.

9th Lancashire Rifle Volunteers—Peter Leigh Sadler, Gent., to be Honorary Assistant-Surgeon; Feb. 25.

22nd Lancashire Rifle Volunteers—Lieutenant Lawrence Hodson Parr to be Captain; Frederick Barned Mozley, Gent., to be Lieut.; March 5.

40th Lancashire Rifle Volunteers—Robert M'Dowell Smith, Gent., to be Ensign; Feb. 29.

44th Lancashire Rifle Volunteers—William Naylor, Esq., to be Captain; John M'Kean, Gant., to be Lieutenant; Henry Hunt, Gent., to be Ensign: March 2.

45th Lancashire Rifle Volnnteers—Percy Castleden Dove, Esq., to be Captain; Thomas Henry Bowen, Gent., to be Ensign; Feb. 27.

51st Lancashire Rifle Volunteers—George Mahon Corry de Bentley, Esq., to be Captain; March 3.

55th Lancashire Rifle Volunteers—George Edward Lee, Gent., to be Lieutenant; Henry Kirkpatrick, Gent., to be Ensign; March 3.

[The following appointment is substituted for that which appeared in the *Gazette* of the 9th March instant.]

27th Lancashire Rifle Volunteers—James Broughton Edge, Gent., to be Lieutenant; Feb. 25.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In the names published in all the papers there is an error in the names of the officers present at the Levee of the 40th Lancashire Royal Volunteers. The name of Nolon is inserted instead of E. L. Glover. There is only one Nolon in the regiment, and he is Lieutenant only.

I am, Sir, yours faithfully,

London, March 9, 1860. EDWARD L. GLOVER.

THE DUBLIN GARRISON.

The following Brigade Order was issued by Major-General Cunynghame previous to his departure from Dublin:—

"Having been honoured by her Majesty conferring upon me a superior command, the painful duty devolves upon me of taking leave of the officers, non-commissioned officers, and soldiers of the 2nd brigade of the infantry of this garrison, which I have now commanded for some years.

"I leave this brigade with the satisfactory feeling that the regiments, as well as those who compose them, do credit to her Majesty's Service and to themselves, both as soldiers as well as citizens.

"I beg to express my thanks to Colonel Hemphill, commanding Cameronians, Colonel Smyth, C.B., commanding 76th regiment, and to Colonel the Hon. E. R. Littleton, King's Own Stafford, for the care, zeal, and assiduity with which they conduct the duties of their regiments, more especially praiseworthy in the last-named officer, who, although in a high civil position in his county, has shown himself ready to accept the labours of our profession, the duties of which he has fulfilled with so much zeal and assiduity, proving himself to be a first-rate commanding officer.

"I beg that these officers will convey to those under their command, to the regimental officers, the staff, and medical officers—to the non-commissioned officers, to the staff non-commissioned officers and those attached by the War Department, as to those excellent private soldiers composing the pith and sinews of these well-organised regiments,—my feelings of satisfaction and opinion of their services during the period I have commanded them.

"I beg to express my esteem and high sense of his merits

Digitized by Google

to Captain Morgan, my Brigade-Major, who with zeal and ability has conducted the duties of his office. Also to Captain Ellis, my Aide-de-Camp, who, previously to his being called upon active service in the *East*, most efficiently performed the brigade duties.

"I wish health, happiness, and prosperity to every individual, and thereby feel how much of each of these is to be obtained by a zealous and fearless discharge of their duty, and a strict attention to the admirable principles which it is clear are so largely infused in these well-disciplined battalions.

"(Signed) A. T. CUNYNGHAME,
"Major-General, commanding 2nd Brigade of Infantry,
"Dublin Division."

We are sure our military readers will regret to hear that M. Jullien is in a lunatic asylum, and without possessing any resources to provide for his family. There are few naval or military men who have not been at some time or other amused and pleased either by poor M. Jullien himself, or by his compositions played on their own bands; and we trust that in his affliction they will, to some extent at least, aid the effort now being made to provide the necessaries of life for him and those depending upon him for subsistence.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s*. 6*d*. per quarter, or 26*s*. per annum, payable in advance; and the postage—uniformly 1*d*. in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to JOSEPH SMITH. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

FRENCH EXHIBITION, 120, PALL MALL, S.W.—The Seventh Annual Exhibition of Pictures, the contributions of Artists of the French and Flemish Schools, WILL OPEN on MONDAY, the 19th instant.—Admission 1*s*., catalogues 6*d*. Open from Nine till Six daily.

MAYALL'S PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum*.

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

NEW WORK ON SEAMANSHIP.
Now ready, in 8vo. with 150 illustrations, price 10*s*. 6*d*.

THE NAVAL CADET'S GUIDE, AND SEAMAN'S COMPANION, containing Practical Rules for Fitting and Placing Riggings, Managing Sails, &c., also Complete Illustrations of all Standing Rigging, the Knots, Bends, and Hitches in use, and a Catechism on Rigging Ships, Boat Sailing, Bending, Reefing, and Furling Sails, Working Anchor Gear, Manœuvring, &c. Used on board H.M. Training Ship Britannia. By GEORGE S. NARES, Lieut. R.N.

Portsea: JAMES GRIFFIN. London: LONGMAN & Co.

THE ARMY PRINTING OFFICE, 102 & 114, HIGH STREET, PORTSMOUTH.—HENRY LEWIS.—Company Ledgers, Pay Books, Order and Day Books, Defaulter Sheets, District and Garrison Forms.

DOUDNEY & SONS' RIFLE SUITS.—1ST SURREY, 4*l*. 2*s*.; SOUTH MIDDLESEX, 4*l*. 10*s*.; RIFLE BRIGADE, 4*l*.—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s*. ELSTOB, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:
1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.
2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—RUDALL, ROSE, CARTE, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

MAPPINS' DRESSING CASES & DRESSING BAGS.—MAPPIN BROTHERS guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l*. 4*s*. Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l*. 12*s*. Mappins' Travelling Dressing Bag for Ladies, 4*l*. 4*s*. The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. MAPPIN BROTHERS, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

HERALDIC STUDIO, 4, OLD CAVENDISH STREET, W.—New Designs for Monograms and Armorial Bearings in every style. Arms, Crests, &c., found by sending Name and County. Sketch, 3*s*. 6*d*. Paintings, Seals, Dies, and every kind of Engraving, in a superior style, by D. T. BAKER.

N.B. Mr. BAKER'S ten years' connection with the Heralds' College guarantees correctness and excellence of execution.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 5*s*. 6*d*., 10*s*. 6*d*., and 21*s*. at UNWIN & ALBERT'S, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

The EDITOR begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 17, 1860.

We understand that Captain Leicester Vernon is to move, on going into Committee on the Army Estimates, an address to Her Majesty, "praying that she will be graciously pleased to order that the promotion from the rank of major to the higher grades by exclusive selection may not be adopted, as in the opinion of this House, the establishment of that system would be fraught with danger to the efficiency of the Service." This motion will, no doubt, be generally popular with the officers of the Army, who are, perhaps not without some reason, alarmed at the door which will be opened to jobbery, under the new state of things. We confess, however, we regret that Captain Vernon should have given such a notice; and we regret it, because we are decidedly opposed to the abolition of the purchase system. We believe that system can be permanently maintained, only under better regulations and more wholesome restrictions than those by which it is at present controlled; and we trust that Mr. Sidney Herbert will go farther than the recommendations of the Royal Commission on purchase prescribe. We have contended more than once in these columns for a reduction of the present unnecessary number of regimental ranks. There are but three kinds of duties, and there are five kinds of officers to discharge them. Why should not the Minister for War abolish the superfluous grades of *major* and *ensign*; have two lieutenant-colonels in each regiment, to be selected from the captains of the Army; and make every young officer undergo a preliminary course of practical military instruction, and join as a lieutenant? Upon this latter point the Council of Military Education, in a recent most interesting report, which we trust soon to see presented to the public through Parliament, have sketched out a plan by which each candidate for a commission after passing a moderate preliminary examination should go to Sandhurst for two years, and then be sent qualified to his regiment. Their plan, we believe, is as perfect as can be, as regards the course of instruction, and the self-supporting character of the enlarged establishment; but the difficulty consists in the Secretary of State's reluctance to sanction the large outlay, in the first instance, which would be necessary to adapt the existing college to the purposes of the 600 students who would be located there. The Council of Education have no doubt good reasons for naming two years as the time; but we cannot help thinking that a good practical qualification in the duties of a company or troop officer might be acquired in one year, and that with average industry and intelligence the candidate would in that time be able to join his corps as an effective officer, and be fairly entitled to the rank and pay of lieutenant. Under the present system, a young officer spends the first year of his military life at a depôt battalion, where he learns very little that is not likely to be detrimental to his future career, and he is paid by the public for very imperfectly learning the duties he has to discharge. With a preliminary practical course, he would come to his regiment at once fit to give some return for the pay he would receive as a lieutenant. Once in that position, his promotion could only be stopped for want of money at a single stage—that of captain—instead of at four, as now. Having gained the rank of captain, he would only have to show his ability and devotion to duty to acquire the rank of field-officer and its consequent advantages. We trust sincerely that Mr. Sidney Herbert will give his attention to some such suggestion as this. We are convinced it would be attended with great benefits to the Service, involving a great mitigation of the inequalities which undoubtedly prevail to some extent in our present purchase system, and not requiring any more extended selection than that implied in the change recommended by the Royal Commission. They propose to have all the lieutenant-colonels selected from the majors of the Army; we propose that the majors (or second lieutenant-colonels) should be selected from the captains of the Army, and that they should thus serve some little time with their new regiments, and learn something about them before gaining the chief command as senior lieutenant-colonels.

We are induced to think, however, that on reflection the officers of the Army will not be so much alarmed by that dreadful word, Selection. After all, the high posts of the Service superior to regimental command have been filled by selection; all the staff appointments up to the present have been filled by selection; and, what many will perhaps be surprised to hear, this very rank of regimental lieutenant-colonel has been within the last three years frequently filled by selection. We compile from memory the following list of officers who have been selected for the rank of regimental lieutenant-colonel by the present Commander-in-Chief, and doubtless a closer examination of *Hart's Army List* would afford some additions to it:—

Name.	Regiment.	Selected from.
Lt.-Cols. Foster,	1st Dn. Gds., now 16th Lncrs.	Unattached.
,, Walker	2nd Dragoon Guards	Staff.
,, Smith	3rd Dragoon Guards	H.-p. 15th Hssrs.
,, M'Mahon	5th Dragoon Guards	Staff.
,, Sulivan	5th Lancers	Scots Greys.
,, Harrison	11th Hussars	10th Hussars.
,, Knox	18th Hussars	15th Hussars.
,, Holcombe	1st Foot	Half-pay 13th.
,, Bruce	2nd Foot	Unattached.
,, Whittingham	4th Foot	Unattached.
,, Kirkland	5th Foot	Unattached.
,, Fraser	6th Foot	Retired Field-Officers raising 1000 men each.
,, Poulet Somerset	7th Foot	
,, T. M. Wilson	8th Foot	H.-p. 96th.
,, Horne	13th Foot	12th.
,, Bell	14th (now 23rd) Foot	23rd.
,, Mundy	19th Foot	H.-p. 33rd.
,, Last	21st Foot	1st West India.
,, Lowe	21st Foot	32nd.
,, Pratt	23rd Foot	H.-p., 41st.
,, Allan	25th Foot	81st.
,, Kelly	38th (now 47th) Foot	H.-p. 31st.
,, Herbert	54th Foot	75th.
,, Heyland	56th Foot	H.-p. 95th.
,, Radcliff	75th Foot	84th.
,, Herbert	82nd Foot	Unattached.
,, De Rottenburg	100th Foot	Staff.
,, Walpole	Rifle Brigade	H.-p.

Every one of these officers has been placed in the position he occupies as lieutenant-colonel of his respective regiment by the present Commander-in-Chief. Whatever difficulties may lie in His Royal Highness's way, therefore, in carrying out the recommendations of the Commission, inexperience will not be one of them; for the above 28 selections constitute a large proportion of the total appointments to the command of regiments made since the Duke's administration of the Horse Guards. We do not believe that Captain Leicester Vernon's motion will be carried, because the public and the House of Commons acquiesce in the purchase system, only because they believe it will be modified and made to exercise less influence on the higher commands in the Army. Some of the foes and friends of the system look upon Mr. Sidney Herbert's proposed alteration as the "thin end of the wedge," which will ultimately break it asunder. We regard it in a diametrically opposite light. Uncompromising conservation is apt to beget the most radical results; and it is for the purpose of obviating this that we advocate a moderate and safe reform.

Some of the causes which have contributed to the increase of the Navy Estimates are plain enough, and, unfortunately, they appear to threaten a further increase for the future. The demand upon the national purse is, of course, very great for machinery, coals, engineers, and the expense of the engine-room, none of which were known in former years. But, in addition to these, there is also the difference in the cost of construction of the ships themselves, which must be taken into account in calculating the difference between sailing and steam men-of-war. Thus, the Royal Albert, 131, the flag-ship of the Channel fleet, costs, in sea-wages alone, 36,000*l*. per annum, while a ship of the line of the 120-gun class, under canvas, cost in sea-wages only 27,000*l*.,—a difference of 9000*l*. a-year being occasioned in a ship of the first-class by the substitution of steam for sailing ships of war. The difference in sea-wages between the Shannon, 51, steam-frigate, and the Arethusa, sailing-frigate, is in round numbers 5000*l*. a-year.

The expense of sea-wages, however, is trifling, compared with the cost of building ships adapted for engines. Thus, the cost of a first-rate, such as the Royal Albert, is, for mere labour, 30,700*l*.; for materials, 76,000*l*.; for masts, rigging, sails, and stores, 20,000*l*.; for engines and gear, 46,000*l*., making a total of about 172,700*l*., or about 50,000*l*. more than is required for building a first-rate sailing-ship of 120 guns.

Large as these sums are, we must include the maintaining rate annually incurred, if we intend to grapple the subject bodily. Thus it costs the country annu-

Digitized by Google

ally, to maintain the hull of a first-rate in good fighting trim, 6377*l.*; for masts, 3748*l.*; and for engines, 4200*l.*, being more than 8 per cent. upon the original cost on the hull, and 9 per cent. on the engines.

An increased ratio in the cost of maintenance appears to apply to smaller vessels: thus a second-rate, as Agamemnon—8½ per cent.; a fourth-rate, as Euryalus—8¾ per cent.; a sixth-rate, as Curaçoa, 9¾ per cent; a sloop, as Harrier—9¾ per cent.

If we pursue this subject in all its bearings, we shall find what vast expenses naval powers will be called upon to bear by the introduction of steam into ships of war. Thus, in the year 1851 our expenditure for engines for the Navy did not amount to 100,000*l.* In 1852 it exceeded 200,000*l.*; in the next four years it amounted to 3,423,621*l.*, being an average of 570,503*l.* per annum. The last year, it considerably exceeded this sum.

But, huge as these increasing totals are, it would seem that the expansion of our ships and the expensive motive power so lately introduced into them are only subordinate to the expenditure required for new works, improvements and docks. The alteration in the size and length of steam-ships which has taken place since 1852, affords sufficient evidence what we may expect if we go on building ships of increased dimensions. The sums expended for "new works" since 1852 has been upwards of 4,000,000*l.*, and we are only just beginning—where we shall stop, it is difficult to say—for the last new line-of-battle ship, the Victoria, 132, launched at Portsmouth, is too large to be admitted into any dock in our chief naval port to receive her copper. But the Victoria is only a small ship when compared with the iron frigates now building, the cost of which we leave to more daring arithmeticians to calculate.

We have great pleasure in stating that in all probability Her Majesty will review the Volunteer Corps of the metropolis and such localities as may render attendance convenient, in the course of the month of June next in Hyde Park. We may anticipate that it will be one of the most brilliant sights witnessed in London for many years.

A Circular will be issued in the course of a few days, promulgating an Order in Council, increasing the rates of full and half-pay in the Navy.

Sir William Armstrong and Mr. Whitworth, we are told, met at the Meeting of the Institute of Civil Engineers on Tuesday evening, when Sir William explained the properties of his gun very fully, and, it is said, offered a challenge to Mr. Whitworth "to come to Shoeburyness and he would give him satisfaction." We understand that Mr. Whitworth will only accept the challenge provisionally, He is disposed to think that the Select Committee, who would be the official arbiters, are rather too much predisposed in favour of Sir William Armstrong; and as the public are not allowed to be present at experiments at Shoeburyness, there is a difficulty about admitting Mr. Whitworth's friends as he desires. Notwithstanding these obstacles, however, we trust that a full and fair trial will be given to these two famous weapons.

The arrangements respecting the new School of Musketry have not made progress since Mr. Sidney Herbert announced that it would be established at Fleetwood. Some representations have been made with the view of having the locality fixed in Scotland instead of Lancashire, and we understand that the authorities pause before confirming their original selection of Fleetwood.

Lieut.-General Sir George Wetherall has resigned the office of Adjutant-General, and the duties are carried on by Major-General Forster until Sir James Scarlett takes up his post on the 1st proximo. There are various rumours respecting further changes in the Head-Quarters Staff, which, though wanting official confirmation, have yet probably some substance. Major-General Forster, whose five years' tenure of office expired on the 27th of February, will, it is said, succeed Sir Charles Yorke as Military Secretary to His Royal Highness. Sir Richard Airey is reported as likely to succeed General Gascoigne in the Dublin district next month, although Sir Richard's period of service as Quartermaster-General will not terminate before the 26th of December next, Lieut.-General Knollys, it is anticipated, becoming the new Quartermaster-General. Of the remaining officers of the Quartermaster-General's department, Colonel Gordon's time is up on the 25th of August, and Colonel O'Brien's on the 1st of December next.

Colonel Russell, C.B., as we announced last week, proceeds to Aldershot to command a brigade. He will assume the command of the 1st Infantry Brigade, about to be vacated by Major-General Lord William Paulet. The 2nd Brigade, to which Major-General Cameron had been nominated before his appointment to the command in Scotland, yet remains unfilled. Colonel Russell has been gazetted to the rank of Brigadier-General under the new system, instead of Major-General. The change will bring about a decrease of expense; and officers gazetted to be Brigadier-Generals will obtain no permanent increase of army rank in consequence, but will revert to their former position as Colonel at the end of five years. At the same time most of the officers likely to be appointed Brigadiers will have become Major-Generals before the termination of their period of service.

We stated lately that a Court of Inquiry, with Major-General Gough, C.B., as President, had assembled in Dublin to inquire into certain charges brought to the notice of the Lieut.-General Commanding in Ireland, by Colonel Darby Griffith, of the Scots Greys, against Lieut.-Colonel Clarke, of the same regiment. We now learn that the court has terminated its inquiry, after protracted sittings, and that the result is satisfactory to all the parties, no blame being attached to any one. We confess, however, it would be more satisfactory if we heard less frequently of Courts of Inquiry in this gallant corps.

Major-General Pringle Taylor, an old and distinguished officer, will assume the command of the troops in Jamaica, in succession to Major-General E. W. Bell, whose command expires.

Colonel Whitmore, of the Walmer Depôt Battalion, goes to Ireland as Military Secretary to Sir George Brown.

We believe that Major-General Breton is about to resign the Mauritius command.

Colonel Horsford, of the Rifle Brigade, will succeed Colonel Russell, C.B., as head of the Recruiting Department, and a Lieut.-Colonel will be brought in from half-pay to sell out from the Rifle Brigade.

There are six infantry regiments in India now under orders to return home, in addition to the two regiments of cavalry—the 12th and 14th—already on their way to England.

Baron Watson, whose death on the judgment seat at Welshpool on Tuesday last has caused so painful a sensation, in addition to being an accomplished lawyer and an able judge, was, as is well known, in early life a distinguished cavalry officer. He never became formally disconnected from his old profession, being up to the time of his death a Lieutenant on half-pay of the Inniskilling Dragoons; and not very long ago he presided at a public dinner given by the Junior United Service Club to the Duke of Cambridge, on his return from the Crimea. His first commission was in the Royal Dragoons, with which corps he served in the Peninsular campaigns of 1813-14. Another distinguished member of the Bar, Mr. Montague Chambers, Q.C., is also the holder of a military commission, being an Ensign on half-pay of the 71st Light Infantry.

HYTHE SCHOOL OF MUSKETRY.

A visit to the above interesting establishment just now gives one a curious notion of how the British army is composed; for, amongst the detachments who have arrived here for the purpose of commencing the spring course of instruction, will be found some from the regiments of Guards, a sprinkling of the Line, Zouaves of the West Indian regiments, soldiers of the East Indian army, cavalry from the Canterbury depôt, and an endless variety of militia regiments. Platoon parade on the barrack green shows a curious conglomeration, if one may use the term; here a full-blooded negro, black as ink, in the undress uniform of a sergeant-major of an infantry regiment, drilling a squad of negro and half-caste non-commissioned officers belonging to the West Indian regiments, in the picturesque dress recently adopted for those regiments, being somewhat after the fashion of the Zouave costume of the French army; whilst next them we find a squad of the East Indian army, sturdy, short fellows, of about an average height of 5 feet 5 inches. Glance further along the parade, and the eye is attracted by a line of stalwart fellows, in a high state of drill, a kind of dark green rifle uniform, with black belts, averaging about 5 feet 11 inches; inquire what regiment they belong to, and you are told they are a detachment of the Irish constabulary force, sent here for instruction. And then comes a line of Volunteers, in all sorts of medley uniforms, with some in no uniforms at all, but dressed in their ordinary costume; all hard at work, not a word spoken but the short quick word of command from the instructors, "prepare to load,"—in four, six, or some other number of motions,—"fire a volley, rear rank standing," at five, three, or two hundred yards; and so on. Altogether the school deserves a visit from wayfarers in search of the picturesque. The following is a list of the detachments: Cavalry Depôt, Canterbury, Coldstream and Scots Fusilier Guards, 29th, 45th, and 86th Regiments, 8th, 9th, 12th, and 13th Depôt Battalions; Her Majesty's Indian Depôt, Warley, Irish Constabulary; Militia—Lanark, 1st Derby, 1st Devon, Guernsey, Flint, 1st, 3rd, and 7th Lancashire, 1st and 5th Middlesex, South Lincoln, West Suffolk, West Norfolk, 2nd Somerset, 1st Warwick, Worcester, 6th West York, Montgomery, Cornwall, Sussex, Brecon, Caernarvon, West Durham, Inverness, West Kent, Leicester, 3rd Surrey, North York, Cumberland, Northumberland, and Kerry. The following is a list of the officers: Lieut.-Cols. Dawkins and Lambton, and Captain Wigram, Coldstream Guards; Captains Beaumont and Rooke, Scots Fusilier Guards; Lieut. Hassall, 2nd; Lieut. Crowhall, 12th; Ensign Wills, 2nd battalion, 14th; Lieut. Layard, 2nd battalion, 15th; Lieut. Knox, 19th; Ensign Connor, 21st; Ensign Berkley, 29th; Ensign Hardinge, 32nd; Lieut. Newbolt, 36th; Ensign King, 37th; Lieut. Quayle, 41st; Lieut. Mitchell, 42nd; Lieut. Trimmer, 44th; Ensign Hooke, 45th; Ensign Rennell, 48th; Ensign Kerchmer, 49th; Ensign Fleury, 50th; Captain Herries, 65th; Lieut. Brockman, 66th; Ensign Poole, 67th; Captain Boynes, 80th; Captain Mytton, 85th; Ensign Raikes, 93rd; and Ensign Tanner, 99th; Cornet Brett, 2nd Dragoon Guards; Captain Sorell, Guernsey Militia; Lieut. Fitzgerald, 1st West India Regiment; Lieut.-Cols. Hume and Luard, Assistant-Inspectors of Volunteers; and Major Hillier and Sub-Inspectors Cronin, Garroway, Galloway, and De Gernon of the Irish Constabulary.

LATEST INTELLIGENCE.

HOUSE OF COMMONS.—FRIDAY.

Mr. Bazley asked the Secretary for War whether the medical officers of Her Majesty's Indian army have had all the privileges conceded to them which the Royal warrant of the 1st day of October, 1858, entitles them to receive.

Sir C. Wood replied that the warrant of 1858 could not apply in every respect to medical officers in the Indian army, because the pay and pensions of the Queen's Service differed from those of the Indian Service. But as regards pay, rank, and position, the Indian medical officers were on a footing of perfect equality with those of the Queen's Service.

Colonel Knox wished to know when the Secretary for War intended to propose that the House should go into committee on the Army Estimates.

Mr. Sidney Herbert hoped to get into committee some night before Easter.

Colonel Sykes asked whether it was true that telegraphic communication was established between Calcutta and Alexandria, and that a message had been sent from Calcutta to London in eight days?

Sir C. Wood stated that the communication was complete between Calcutta and Alexandria, and a message from Calcutta had been received in the City this day, dated Calcutta, March 10th. There was at present a break between Alexandria and Malta; when that defect should be supplied, messages would come from Calcutta to London in six days.

Mr. Arthur Mills asked whether there was any objection on the part of the Government to lay upon the table the Minutes in Council in Calcutta of the 2nd and 7th of January last by Lieutenant-General Sir James Outram and Sir B. Frere, on the question of the amalgamation of Her Majesty's forces with the British Army.

Sir C. Wood replied that he intended to lay on the table a mass of papers bearing on the subject, including the document referred to by the hon. member. He was fully sensible of the importance of the subject and the necessity for coming to an early decision respecting it.

Sir Frederick Smith asked whether the Government had any objection to lay upon the table of the House copies of any correspondence on the project referred to in the report of the Council of Military Education for the extension of the Royal Military College, Sandhurst, so as to admit of all candidates for the Cavalry, Guards, and Line who have passed the usual examinations for commissions, receiving at that institution a course of professional instruction and training previous to joining the Army.

Colonel Knox was understood to object to the nature of the examination which officers seeking staff appointments were compelled to undergo.

Mr. Sidney Herbert remarked that in the orders issued recently by the Commander-in-Chief, provision was made for appointing officers to the staff without examination who should prove themselves qualified by actual service. With respect to the question put by Sir F. Smith, there was no objection to lay before the House all the correspondence which had taken place relative to the plan for compelling all officers to enter the Army through Sandhurst. The present system, which allowed some officers to enter the Army direct, and some through Sandhurst, was unsatisfactory, and even unjust, inasmuch as the former were subjected to a less severe examination than the latter. A proposal for making it compulsory to enter the Army through Sandhurst was, he believed, brought before the cabinet in November, 1858, by General Peel. It was obvious that it was impossible to produce correspondence between heads of departments bearing upon that proposal.

Mr. Sidney Herbert took occasion to observe that he was mistaken in stating on a former evening that the Turkish medals had arrived. The ship Pomona, in which the medals were, had foundered, and it was doubtful whether the medals would be recovered.

Mr. Kinglake and Sir R. Peel called the attention of the House to the case of Savoy, and the latter insisted on the necessity of giving expression to the feeling which ought to animate all Englishmen against the outrage which France seemed determined on perpetrating against political morality and the faith of treaties.

Lord J. Russell declared that England and Prussia were agreed in their views on the subject. From Vienna and St. Petersburgh our Government had received no information which led them to believe that those powers intended to express any opinion against the proposed annexation of Savoy by France. He yesterday received from M. de Thouvenel a despatch announcing the intended annexation of Savoy. At present he would say no more than that the despatch, both as regarded Savoy and Switzerland, was of such extreme gravity and importance as to require for the answer to be given to it on our part the most serious consideration.

The Minister of War has been interrogated in the House of Commons this week respecting the reappointment of the Select Committee on the organisation of the Military departments, and his reply indicates that the Committee will shortly resume its work. We believe no more evidence will be taken.

We learn that a telegram was yesterday received in the City that the ship Redgauntlet was burned at Calcutta only six days ago.

The Calcutta and China mails will be delivered to-day, Saturday.

THE ARMIES OF THE CONTINENT.

The Russian Army.

Russia is, undoubtedly, the greatest military "system" in the world. The whole organisation of her government bears a military stamp. The Emperor, who is "Samodèrschez, or Autocrat of all the Russias," enjoys power supreme. He is generalissimo of his army as well as head of his clergy. His sons, the Imperial Princes, hold the highest military and naval commands; every Russian is, more or less, a soldier. It was Peter the Great who undertook the task of giving to the Russian army a European organisation. Since then the most careful attention has been paid by successive sovereigns to its development and perfection. Under Alexander I. the Russian army underwent a complete reform, and Nicholas I. devoted all his energies to it. It was this latter sovereign who instituted "military colonies" throughout the whole empire; these colonies serve as permanent depôts and cantonments of troops. They are so many military studs for breeding soldiers to recruit the army; they are divided on a regular system into so-called "districts" of agricultural soldiers. If we consider the enormous extent of the Russian empire (3,052,000 square miles, or about one-eighth of the inhabited globe), the importance of these colonies will strike even the most casual observer. They form a great chain of military stations, which may be connected with each other by the electric wire, and, as far as possible, by railway; for the Russian empire is not, like many other states, intersected by foreign strips of territory; it is a compact body; it spreads its mighty limbs in all directions; its head rests in the Frozen Ocean, whilst it keeps its feet warm in the Mediterranean*—one of its powerful arms extends to the Amour, and clutches at China,† whilst the other grasps Poland and Galicia in the very heart of Europe. Prince Bariatinski's recent achievements in the Caucasus, followed by the submission of Schamyl and other chiefs, open the road to Persia to the Russian army. The population of the Russian empire may be stated, in round numbers, at 73 millions.‡ In this population the prevailing element is Sclavonic.

Since the incorporation of the Polish army with that of Russia the strength of the Russian army on the peace establishment may be estimated at 665,640 men, namely 568,000 infantry, 97,640 cavalry and artillery, with 1672 pieces of artillery.§ This calculation does not include the army of the Caucasus and the irregular Cossacks. The Russian army is kept up by conscription in the proportion of from 4 to 5 conscripts per 1000 of the population. The question of the emancipation of the serfs—the most important step taken for centuries in Russia—is of a nature to alter considerably the law of conscription in Russia. Formerly every proprietor had to equip at his own expense (about 10 silver roubles per man) every recruit he was bound to provide. The usual time of service is 25 years. The Russian army is the worst paid army in Europe; the Government, on the other hand, makes ample provision for the sick, wounded, or disabled, and for the widows and children of the slain.‖

The Russian army consists of Regular and Irregular troops. By irregular troops we mean the Cossacks and other bodies, chiefly light cavalry.

The regular troops are divided into the active army and the reserve.

Infantry.—Each regiment of infantry of the 6 *corps d'armée* of which the Russian army consists (each regiment counts 2881 men), has, in time of peace, in addition to the three active battalions, a 4th battalion; and in the army of the Caucasus a 6th battalion, called "reserve battalion" (924 men strong), and completely distinct from the others. These troops, formed into a corps, make the reserve division 12 battalions strong.

The 6th battalions of the reserve of the regiments of the army of the Caucasus form the Reserve Division of the Caucasus, to which must be added the demi-brigade of the Caucasian reserve of the battalions of the line—altogether 18 battalions.

In time of war it is formed of the regiments of the 3 divisions of the guards and of the 3 divisions of grenadiers (the effective strength of the peace-footing of a regiment of the guards is 2052 men, of the grenadiers 1749 men), of the 3rd reserve battalions of 1164 men each, which 12 battalions of reserve take the name of "reserve division" of each respective corps. Moreover, in time of war, there is formed in the 6 *corps d'armée*, for every active regiment, a corresponding reserve-regiment (the regiment of 3 battalions, 4th, 5th, and 6th), and 3387 men strong. These 12 regiments are counted in 6 brigades or 3 reserve divisions, which form "a *corps d'armée* of reserve."

There are, consequently, 6 *corps d'armée* of reserve, altogether 18 divisions, or 36 brigades. Moreover, the *corps d'armée* are provided with regiments of substitutes. The battalions of chasseurs and sappers are also provided, in time of war, with reserve companies and substitutes.

Cavalry.—The regiments of the corps of the guards and of the reserve cavalry corps (the latter 2 divisions of cuirassiers, 1 division of horse artillery, 1 division of mounted pioneers) comprise 4 active squadrons and 1 reserve squadron; the seven divisions of light cavalry, 4 active squadrons and 2 reserve squadrons; the regiments of the corps of the Caucasus, 6 active squadrons, and 1 reserve squadron.

In time of peace all these reserve squadrons remain attached to the regiments. Each active squadron is 172-173 men strong; a cavalry regiment of the guards 824 sabres; a regiment of the 6 *corps d'armée* 821 men, and a regiment of the corps of the Caucasus 1206 men in time of peace. To place them on a war footing, the active squadrons of the regiment receive an increase of 48 men. In war time the reserve-squadrons are separated from their respective regiments. Of the 5th reserve-squadrons of the regiments of the guards and of the cuirassiers, reserve-divisions are formed of two squadrons, each 539 strong; of the 5th and 6th squadrons of dragoons, uhlans, and hussars, reserve-regiments are formed of 4 squadrons; each of these regiments counts 1097 men. The effective strength of the dragoon regiments of the Caucasus, as well as that of the reserve-squadrons, undergoes no change in time of war.

Artillery.—In time of war each battery of foot and horse artillery consists of 8 guns. The batteries of the Caucasus have a peculiar organisation of their own. In time of peace the batteries of the artillery of the guards, horse as well as foot, keep up the 8 guns, whilst in all the regiments of the foot artillery they are reduced to 4, whilst the 8 guns of the horse artillery remain.

Strength of a battery of foot artillery on the peace footing:—269-177 men; of a light battery, 152 men; of a horse battery, 329-274 men; of a battery of the corps of the Caucasus, 348-294 men; of a mountain battery, 489 men; 6 of the movable parks (of 290 men), that is to say, 1 of each brigade of the *corps d'armée*, are disbanded in peace time. Moreover, to place the active batteries from a peace footing to a war footing, as also to form the troops of reserve and substitutes of the active corps of the artillery (not comprising those of the Caucasus), 19,572 men, or, comprising the men on furlough belonging to the siege-parks, 21,508 men are sent in peace time into temporary *congé*.

The batteries of reserve of the corps of the Caucasus, have in men the effective for 12 guns, but only 4 pieces harnessed for each corps. In the other corps the state of a battery of reserve is, in peace time, for the foot-batteries of reserve of the guards, 376 men; for the grenadiers, 406 men; for the field-batteries, 282 men; for the so-called combined reserve horse-artillery, 275 men; for the reserve-batteries of the corps of the Caucasus, 262 men.

Garrison Troops.—These troops consist of:

1st. The brigade of invalides of the guards; 1 battalion of garrison of the guards and 15 companies of invalides of the guards.

2nd. The separate corps of the household troops; 49 battalions, 2 semi-battalions, 508 *commandemens d'invalides*, 213 *commandemens d'etape, &c.*

A garrison battalion numbers 993 men (840 privates). The 16th battalion numbers 1040 soldiers; the 49th and 50th, 920 men. Total, more than 48,000 men.

A command of invalides or d'etape, 46 men.

3rd. The corps of gendarmes. A demi-squadron of the guards, 1 regiment and 124 commanders in the districts. Finally, troops of administration, of artillery, and engineers.

The subjoined Summary is compiled from the latest statistical returns published:

The Regulars.—The Active Army.—Infantry.—*Corps d'Armée* on the Peace Footing: 1 Corps of the Guards.—3 divisons, 6 brigades, 12 regiments, 24 active battalions.

Chasseurs of the Guards.—3 active battalions.

1 Corps of Grenadiers.—3 divisions, 6 brigades, 12 regiments.

Chasseurs of Grenadiers.—3 active battalions.

6 Corps of Infantry.—18 divisions, 36 brigades, 72 regiments, 216 active battalions.

Battalions of Chasseurs.—18 active battalions.

1 Division Grenadiers.—1 division, 2 brigades, 4 regiments, 20 active battalions.

Infantry Divisions.—3 divisions, 6 brigades, 12 regiments, 60 active battalions.

Battalions of Chasseurs (1 Grenadiers).—4 active battalions.

Battalions of the Line.—4 brigades, 37 active battalions.

The Orenbourg Corps.—1 division, 2 brigades, 11 active battalions.

The Siberia Corps.—1 division, 3 brigades, 16 active battalions.

Troops in Finland.—1 division, 2 brigades, 10 active battalions.

Battalion of Chasseurs in Cantonments.—9 active battalions.

Battalion of Finland Chasseurs.—1 active battalion.

Cavalry (Regulars).—1 Corps of the Guards.—2 divisions, 6 brigades, 12 regiments.

Horse Grenadiers.—1 division, 3 brigades, 6 regiments.

Attached to the 6 Infantry Corps.—6 divisions, 18 brigades, 36 regiments.

Corps of Reserve Cavalry.—2 divisions, 4 brigades, 8 regiments.

Attached to 1st Division of Grenadiers.—1 regiment.

Attached to Infantry Divisions.—3 regiments.

Artillery (Regulars).—1 Corps of the Guards.—3 brigades, 6 batteries (foot), 5 batteries (horse), 1 battalion of sappers.

1 Corps of Grenadiers.—1 division, 5 brigades, 15 batteries (foot), 3 batteries (horse), 4 parks, 1 battalion of sappers.

6 Corps of Infantry.—6 divisions, 30 brigades, 90 batteries (foot), 18 batteries (horse), 24 parks, 6 battalions of sappers.

Corps of reserve cavalry.—1 division, 6 batteries (horse), 1 battalion of sappers.

To 1 division Grenadiers.—1 division, 1 brigade, 4 batteries (foot), 1 park. The division is completed by the "infantry division" of 3 brigades; 12 batteries (foot), 3 parks, 2 battalions of sappers.

Finland Chasseurs.—1 battalion sappers.

This gives for the active regular army of Russia:

31 divisions of infantry, 67 brigades, 112 regiments, 456 active battalions.

11 divisions of cavalry, 31 brigades, 66 regiments.

9 divisions of artillery, 42 brigades, 127 batteries (foot), 32 ditto (horse), 32 parks of artillery, 11 battalions of sappers.

Giving an effective force of 577,859 men.*

Irregulars (Cossacks).—Corps of the Don (comprising the regiments of the guards of the Hereditary Grand Duke).—58 regiments;† 348 sotnias (each sotnia counts 148 men), 14 batteries, 112 guns.

Tchernomorian Corps (not including a division of Cossacks of the Guards).—12 regiments of cavalry, 72 sotnias (cavalry), 9 battalions;‡ 4 batteries, 24 guns (horse), 8 of foot.

Corps of the Line of the Caucasus.—19 regiments cavalry; 114 sotnias (cavalry), 3 battalions (foot); 6 batteries,§ 32 guns (horse), 16 of foot.

Corps of Azoff.—10 sotnias (cavalry).

Corps of Astracan.—3 regiments of cavalry, 18 sotnias (cavalry), 1 battery, 8 guns (horse).

Corps of Orenbourg.—12 regiments of cavalry, 72 sotnias (cavalry), 6 battalions (foot), 3 batteries, 24 guns (horse).

Corps of the Ural (not comprising a division of the guards.)—12 regiments of cavalry, 60 sotnias (cavalry).

Corps of the Siberian Line.—10 regiments of cavalry, 60 sotnias (cavalry), 3 batteries, 24 guns (horse).

Transbalkan Corps.—6 regiments of cavalry, 36 sotnias (cavalry), 12 battalions, foot (each 1033 strong).

1 Regiment of Tobolsk.—1 regiment of cavalry (693 strong), 5 sotnias (cavalry), 1 battalion (foot) of 662 men.

1 Regiment Jakoutsk, and 1 Regiment Enisseish.—2 regiments of cavalry, 12 sotnias (ditto).

Irregular Regiment of Daghestan.—1 regiment of cavalry, 6 sotnias (ditto).

The so-called corps of the Baskirs is distributed over 28 cantons.

The irregular army of Russia therefore consists of 136 cavalry regiments; 813 sotnias of cavalry; 31 battalions of foot; 31 batteries; 224 guns (horse), and 24 guns (foot).*

We have stated that Russia is the greatest military system in the world. A glance at the organisation of her internal administration will corroborate the assertion.

Including the Imperial Grand-Dukes, the council of the empire consists exclusively of military men. The department of public worship is presided over by a general of infantry. If we look at the other ministries, with a few exceptions we have the same result. H.I.H. the Grand-Duke Nicholas is Inspector-General of the Engineers and Commander-in-Chief of the Cavalry of the Guard; H.I.H. the Grand-Duke Michel, is Grand-Master of the Artillery, and Commander-in-Chief of the Artillery of the Guards. H.I.H. the hereditary Grand-Duke Nicholas Alexandrowitch is Hetman-General of the Cossacks. H.I.H. the Grand-Duke Constantine is Lord High Admiral. The military resources of Russia are great, but it is rather from her annexed provinces than from the body of the empire that she derives her strength. The possession of Finland gives her the command of the Baltic, whilst the possession of the Crimea makes her mistress of the Black Sea.

It is true Bomarsund was bombarded and Sebastopol taken in the late war, but those events have not injured the power of Russia.* And yet it is precisely in her extremities that Russia is vulnerable. Finland, Poland, and the Crimea, are her strong and at the same time her vulnerable points. From Finland, Russia draws all the timber for her fleet; Poland is her European stronghold; the Crimea, her station eastwards.

Russia has recently acquired a port at Villafranca, not far from Nice, and this will probably induce her to oppose the cession of Savoy to France.

---

* Russia has now a naval station at Villafranca, near Nice.

† A line of telegraphs is nearly open between the Amour povinces and St. Petersburg.

‡ The statistical returns of 1856, without the population of the Caucasus, which, since the recent victories there, give an addition of 1,400,000 souls, state the population to be 71,500,000 souls.

§ *Vide* Summary.

‖ At St. Petersburg alone there are 9 large and 23 small military hospitals, 5 invalid-houses, and a military orphan establishment.

* This does not include the military train and gendarmes.

† The strength of each regiment is nearly 900 men.

‡ The strength of each of these battalions is 1063 men.

‖ The batteries of artillery number 258 men each.

CHASSEURS DE VINCENNES.

Apropos to the proposition, "that undisciplined forces must be inferior to disciplined forces," a brief notice of the Chasseurs of Vincennes, taken from *La Patrie*, may not be uninteresting to our readers:

In the month of May, 1841, a body of about 6000 men, active and energetic, entered Paris in a peculiar double-quick march to the sound of the bugle. They wore a dark, military-looking uniform, and were conspicuous from the steel scabbard of their sabre bayonet.

They were of robust and well-knit form, chosen from the entire army to form the new battalion, and were then designated the "Chasseurs de Vincennes." The number of battalions was subsequently increased to twenty, and they have since definitively replaced the light infantry.

Organised at St. Omer, they had come to Paris to receive their colours at the hands of the king, and on the following day some of the battalions left for Algeria.

They there soon became the terror of the Arabs from their death-dealing rifle, surmounted by its formidable sabre bayonet.

Than their sombre appearance when in line, with their sabre-bayonets flashing in the sun, nothing could be more awe-inspiring.

Constant drilling had rendered them so efficient as marksmen that certain death awaited the unhappy Arab, who, although almost invisible in the bush, came within range of their fire. Gymnastic exercises had so developed their activity, that the enemy, not without unconsciously trembling, saw them scale the rocks of the Atlas with almost superhuman ease and rapidity. Thoroughly drilled to load and fire when rushing to the attack, or when lying on the ground, they were able to oppose to their barbarian adversaries the difficult combinations of the school of "skirmishers." On the slightest attack of cavalry they knew how to form with almost unexampled rapidity into subdivisions and sections, opposing to the enemy a compact body bristling with bayonets. In case of surprise they form into square by fours (that is, the right foot of each meeting in the centre of the square, and the bayonet of each being directed to one outer side of the square); this, with their skill in fencing with the sabre-bayonet affords them a means of resisting the charge of cavalry.

In each company of Chasseurs there is a sergeant of instruction in firing. This sergeant is charged with every duty in relation to the rifle, and is chosen from the most intelligent of the men. A skilful and scientific man, he teaches the men thoroughly the principles of firing, the composition of powder, the different effects produced by expansion of gas in relation to the calibre and form of the rifle, the theory and practice of the sights, the laws of attraction on projectiles, and, in fine, everything necessary to the knowledge of rifle-firing. It is rare that this sergeant is not promoted to be an officer.

The principal duty of the Chasseurs is to cover the flanks of a column on march by a cordon of skirmishers.

In an attack they send a shower of balls on the enemy, which throws it into disorder, or makes such breaches in its mass, as to allow a successful charge by the bayonet.

In covering a retreat they are able to keep the advancing

* The Russian fleet is manned by a large proportion of marines, &c.

† The present Emperor whilst inaugurating a peace policy and devoting himself to the development of the internal resources of the empire, is nevertheless extending every recent improvement into his army.

Digitized by Google

enemy at a distance by the great range of their fire, and in the shortest time they can form into a body against cavalry who may be harassing the retreating forces.

The Chasseurs are on very friendly terms with the Zouaves, by whom they are called "Ravens" from the colour of their uniform, and who in return have obtained from the Chasseurs the soubriquet of "Jackals." When they meet, it is not uncommon for these regiments to salute each other with imitations of the cries of the raven and the jackal.

BREVET IN HER MAJESTY'S INDIAN NAVY

The following communication has been addressed to us by some officers of the Indian Navy. It is printed with a few omissions, but it is not unlikely the suggestions will be rendered impracticable by changes about to take place :—

1. Honours and promotion, promptly and generously bestowed, have been the award of all the officers of the Royal Navy, who, in command of the seamen from H.M. ships Shannon and Pearl, have, in co-operation with their brethren of the land forces, done such good service against the rebels in India.

2. Even more fortunate, indeed, than the officers of the Army has every naval officer been in the nature of the honours he has won; for whereas in the case of the Army the promotion bestowed has been only that by brevet, in the Navy substantive promotion to the higher grades has been granted in every case.

3. But this arises from the different constitution of the Services; there is no brevet in the Navy, for it is looked upon as one body, not composed, as the Army is, of several separate and distinct corps, but complete in itself. The members struggle upwards through the subordinate grades, helped on by merit, by interest, by promotion for war or other services, until they arrive at the coveted rank of captain, formerly called post-captain; then all promotion, except by seniority and in rotation, stops; there is no more going over the heads of others; interest can do no more for its *protégés* than procure them employment, or ensure them liberal honours and rewards, when occasion presents itself; but every officer, as he takes his standing in the list of captains, must gradually and steadily advance up that list in rotation as vacancies occur, becoming a rear-admiral only in his turn, and rising in the same manner to the top of the tree. Isolated instances to the contrary, such as that of Lord Lyons, may possibly occur, but these only serve as the exception to prove the rule.

4. Such, then, is the rule in the Royal Navy; there is no brevet, because such a system would be null and void in any but a composite service; just as brevet rank in the Army is of no effect, and gives its possessor no increased authority, except when the corps to which he belongs is brigaded, or on service with others; so, as it is not considered that there are separate or distinct portions or branches of the Navy, the whole being of one arm, and the fleets or squadrons serving on different stations being still looked upon only as detachments from the one main body, brevet in such a case would be a nullity, and therefore there is substantive promotion instead.

5. It is perhaps because the Indian Navy is also not a composite service, that no brevet has hitherto been given to its officers on any one of the several occasions on which their services have called forth the thanks of Parliament and received the approbation of the Crown; but an examination of the question of brevet in the Indian Navy in its different bearings will, it is believed, tend to show that no insuperable obstacle exists to its introduction.

6. The Indian Navy is a strictly seniority service; the standing of each member is fixed with his first appointment and remains unalterable. No exertion nor merit of his,—no zeal nor ability in the performance of his duty, however conspicuous,—nor conduct, whether in the ordinary routine of service or in action before the enemy, however laudable or distinguished,—neither talents nor any other quality which makes one man more valuable than another,—can raise him one single step above the laggart or the dullard, who may happen to have joined the service but one month before he did.

7. This principle of seniority is rigorously carried out, and is the recognised system of the Service; and being so, it is impossible to confer promotion to substantive rank on any officer of the Indian Navy as a reward for special service.

8. The brevet conferred by Her Majesty on the officers of the Indian Army gives them rank in her Majesty's European Army, and in the same way a brevet conferred on the Indian Navy might give its recipients rank in her Majesty's Royal Navy. Officers of the Indian Navy, ever since that body became an organised service, have been granted rank with the Royal Navy in the different grades, and by a recent order the officers of both Services now take rank together, according to dates of commission.

9. The brevet would give no increased pay* in any case, and no increased authority in the Indian Navy, or over any officer belonging to it, *except* when engaged in combined operations with any portion of the Royal Navy.

10. In the case of a squadron composed of vessels of both the Royal and Indian Navies serving together, the brevet rank of a commander brevet-captain, or of a lieutenant brevet-commander, would take no effect until casualties shall have made the rank he bears by brevet the senior of the whole force, and it would *then* entitle him to the command.

11. The case is parallel to that in the Army. The captain commanding the battery of artillery attached to a brigade is a brevet-colonel, and in the regiments composing the brigade there are no officers above the rank of lieutenant-colonel, or if colonels, whose commissions as such are of antedate to his brevet commission; yet the captain of artillery's brevet rank will take no effect except in case of the brigadier being placed *hors de combat*, when the command of the entire brigade will devolve upon him.

12. Brevet rank takes effect only when it entitles its possessor to the chief command, and only when the force employed consists of other bodies than that in which he holds his substantial commission.

13. That some system which shall open the road to promotion to the deserving, and be a means of rewarding meritorious or special service is much wanted, there can be no doubt; for while with scarcely any exception the commanders of the Royal Navy who served in the China war of 1842 were promoted to post rank, and a liberal number of lieutenants were made commanders, the officers of the Indian Navy co-operating with them have been left wholly unrewarded; and this not from any want of a just and generous appreciation of their services—for the thanks of the nation were bestowed on them equally with their brethren of the Royal Navy—but from the absence of any system or method by which a fitting reward could be bestowed.

14. Again, honours and rewards were bestowed on the officers of the Royal Navy who served in the late war in Burmah; at the same time the senior officer of the Indian Navy, a captain, and the only one of that rank present, was made a C.B.; but as it was contrary to custom, though not to statute, to confer this honour on commanders, and as under the existing system they were precluded from promotion, two of the commanders of the Indian Navy who had particularly distinguished themselves (Commanders Campbell and Rennie) received no other reward for their services than was to be found in the grateful acknowledgments of their countrymen bestowed in common on the whole of the forces engaged. Nor did any lieutenant, although several were honourably mentioned in the despatches, receive any further reward for conduct and exertions which had called forth the especial commendation of the chief authorities under whom they acted. The Court of Directors, however, anxious to mark in some special manner the meritorious services of the officers above named, presented to each a valuable sword, in recognition of their distinguished merit.

15. But the recent war with Persia, in which, in the naval operations, vessels of the Indian Navy alone were engaged, affords convincing evidence of the desire of the Government to bestow adequate rewards, and of the want of a system by which such rewards can be given. Bushire surrendered to the combined military and naval forces; the fortifications of Mohumrah, reported by the captain of a French frigate to be impregnable to the force which was to move against it, fell before the fire of the Indian naval squadron; and the expedition of gunboats up the Karoon River dispersed the last remnants of the army of Persia.

16. It was on this occasion that the honours of the Bath were first conferred on a naval commander; for although, according to the statutes of the Order, commanders, ranking with majors in the Army, are pronounced eligible, the custom had heretofore prevailed of granting C.B.-ships only to captains in the Navy. But, while the conduct of the whole of the naval forces engaged was declared to be "most honourable to the Indian Navy" (G. G. O. 22nd April, 1857), the energy and gallantry of Commander Rennie in the attack on Mohumrah and the expedition to Ahwaz had been conspicuous, and the desire adequately to reward those services was unmistakeably evinced in the bestowal, for the first time, of the red ribbon of the Bath on an officer of the rank of commander.

17. But for this Commander Rennie's well-earned reputation could have brought with it no corresponding reward; and in the absence of a brevet, the services of the other officers, commanders, and lieutenants who distinguished themselves on the same occasion, whose conduct had been brought to notice in the despatches, and many of whom had already gained honourable distinction in former wars, must remain, as at present, unrequited. And with these must also be included those Indian Navy officers who have been lately engaged against the rebels in Bengal, but who, in contrast with those of the Royal Navy, have, for services of a similar nature, been hitherto without reward.

18. It would never be attempted to compare the services of the Indian Navy detachments with the deeds of the "Shannon's" brigade before Lucknow; yet the manner in which the rebel Sepoys were attacked and defeated at Dacca, by the party under Lieutenant Lewis, Indian Navy, is not unworthy of consideration.

19. It would appear difficult (the Indian officers think) to discover any substantial objection* to the introduction of the system of brevet in H.M. Indian Navy, and the question whether brevet rank should bring with it any increased emoluments in no way interferes; nor would the officers of the Royal Navy, whom it would in some degree affect, be disinclined to see merited reward thus bestowed, any more than officers of the British Army object to the brevet in H.M. Indian Army, neither could it be prejudicial to existing interests in the one instance more than in the other; but on the contrary it would, as in one case so in the other, be an incentive to zeal and exertion, and an honourable reward for meritorious service.

20. To the senior officers of the Indian Navy (the captains, than which there is no higher grade) it would open the road to superior rank, and enable them to look forward to honours at present beyond their grasp; and, throughout the service, to every officer, young or old, it would impart a feeling of assurance that their endeavours to prove themselves worthy servants of the state would not be thrown away nor passed over unheeded, but that by exertion, and the cultivation and exercise of those talents and characteristics which best become the officer, they could secure to themselves an honourable advancement; and it would dispel the sense of disappointment and vexation which never fails to be engendered by the apprehension of services disregarded, or the apparent maintenance of an invidious contrast.

ROYAL NAVAL ANNUITANT SOCIETY, DEVONPORT.—Some benevolent gentleman has forwarded the munificent donation of 300*l.* towards the deficiency in the funds occasioned by the recently discovered defalcations in the moneys of this institution. The money was received anonymously, and as this indicates the donor's objection to publicity, it would be ungrateful to give his name, though we have reason to believe it is not unknown to the officials of the institution.

---

* The Indian military brevet gives no extra pay; but additional allowances, specified in Her Majesty's Warrant of the 14th October, 1858, clause 17, are granted to brevet officers of Her Majesty's European forces.

* No collision can possibly occur between the two Services in consequence of the introduction of this system, for it is expressly provided by H.M. Order in Council of the 1st January, 1844, "That the officers of neither Service" (Royal or Indian Navy) "shall have any command whatsoever over the ships, officers, and men of the other Service, unless under special orders to that effect from the respective Governments."

A STANDING NAVY AS A RESERVE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I feel that some apology is due for the apparent presumption of an officer of my standing publishing my opinions on such an important subject, and one that has engrossed the attention of far abler and more experienced men. My excuses must be zeal for the Service to which I belong, and a conviction that the present scheme of the "Naval Reserve" is not calculated to be attended with success because it relies too much on the resources of the mercantile marine, who are, as a class, with some few exceptions, ill-disposed towards serving in the Navy for either a long or short period.

Having now a large Channel fleet manned, and the "political horizon" looking clearer, the public may again be led into a feeling of "fatal security," and putting trust in the working of the present system, the great national question of manning the Navy may be allowed to die a natural death.

Several professional writers have lately advocated the system of recruiting by means of boys trained in brigs or small frigates, disposed at convenient ports around the coasts of the United Kingdom. With that system I quite agree, but we must go farther, and must make the Navy a standing force of men and boys, entered for certain periods, instead of the vote depending on the exigencies of the case, as at present.

Having spent some time last year in the neighbourhood of Toulon, I saw much of the working of the French navy, and I am convinced that barracks on shore, at the various naval arsenals, or hulks moored close to the dockyard, will be the only plan for keeping the Navy supplied, and bringing it to a state of proficiency. I well know the prejudice that did exist in our Navy against the adoption of this plan, but latterly, it has much worn out in the minds of practical professional men. I am sure the more efficient the crews are made, the better it will be for the Service generally; and I aver that it may be done without prejudice to their natural duties as seamen. The practice of disbanding a ship's company at the end of three years, half of which time has been spent in the drudgery, to both officers and men, of getting them into proper order, is ruinous to discipline, and most expensive to the country. The men are dismissed as if they cost the country nothing for their instruction; many enter the merchant service (for which the Navy has now become the nursery); some go to America and other foreign powers—all are scattered, never to meet or act again in the service they have left.

A proportion of the men now serving, entered the Navy as boys; many of them went to sea from choice, but all because they had not the means of living on shore, and they would have as readily entered for ten, twelve, or fifteen years as for three.

If the system of entering the Navy for twenty-one years, with a small pension after twelve years' service (if of good character) were granted, the whole Navy would be in a short time manned by them, which would secure a permanent naval force to the country.

The whole naval force—say about fifty thousand men, which is about the number of seamen and coast-guardsmen voted for the Navy—should consist of one body, each man taking his turn afloat according to a roster, kept in the same manner as for the Royal Marines, which would admit of the whole number of seamen circulating through sea-going ships and acquiring and retaining their sea habit; so that if the strength of the Navy was suddenly required, these men having been well drilled, would be immediately effective. The largely increasing duties of the steam reserve, and the general fitting, rigging, and other duties of the sea-coast, dockyards, river defences, revenue cruisers, &c., &c., should be performed by those men who had returned from their tour of foreign service, which would keep a sufficient nucleus in the home-ports to man and equip twenty sail of the line on an emergency.

By entering an additional number of boys for a few years, until the men now engaged for short periods were paid off, we should have the opportunity of re-entering for a permanency.

The entry, say, of 5000 boys annually, or 450 per month, will in a few years maintain and supply a Navy of 50,000 men, engaged for twelve or fifteen years' service; and if the lads are entered between sixteen and eighteen years of age, the effect would be to have the Navy composed of men in their greatest vigour. The adoption of such a plan would not involve any increased expense to the country, and would be far cheaper than either a 10*l.* or 8*l.* bounty.

As regards the senior ranks of officers, it will be necessary to reduce the lists, by which means constant employment will be secured to those on the active lists, all being allowed a liberal amount of leave, and taking foreign and home service by alternation, should they desire it.

To prevent the accumulation of officers in the higher ranks, which must occur if the entries of naval cadets are adequate to the demand for junior officers, and to remedy the paucity of junior executive officers below the rank of lieutenants, a further promotion should be extended to the seamen by introducing a class of middle-men, or superior warrant-officers. I feel that if it were certain that a seaman, comparatively young, might become by good character and intelligence first a petty, next a warrant officer, and ultimately by great merit, ability, or gallantry, a commissioned officer, that it would exert a powerful stimulus on young seamen educated in the Navy.

This class of officers would be most useful afloat, in duties of the discipline of the decks and holds, commanding boats, &c., and would in no way interfere with the duties of the mates and midshipmen, who at the present time are so very few in number, especially in the smaller vessels of the fleet.

Should the system of barracks be adopted, this class of superior warrant officer would be invaluable in preserving discipline, as it would be injudicious to allow the midshipmen or cadets to serve on shore till they had completed their five years' service, and passed the requisite examination. These few suggestions, without venturing to intrude longer on your columns, I beg to submit feeling that your pen has always advocated so ably and so well the permanency of a naval force.—Your obedient servant,

A COMMANDER, R.N.

Army and Navy Club, March 6.

THE "STORK" AND THE "OLD BRITON."

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Just now we are trying some costly experiments in building iron-sided ships. We are also trying some very costly experiments in knocking iron-sided ships to bits. This constructive and destructive process is performed by authority, and of course all for the benefit of the nation. No doubt it is very official and therefore very proper; for as the present is a transition period, the Admiralty, like all other bodies in that interesting condition, is labouring in a state of doubt and uncertainty as to what they shall bring forth.

My Lords appear to be particularly fidgetty about their "Rams," now being raised on the banks of the Thames. It is true that orders have been given that a couple of them must be ready soon, and their length, breadth, and powers of "butting" have been determined upon; nevertheless we hear from time to time of "plates" being subjected to the test of 68-pounders. It is therefore conjectured that even up to the passing hour their Lordships have not decided upon the coat of mail their iron monsters are to wear, and before fitting them with their jackets are particular about the material.

That some *arrière pensée* of this sort still agitates the official mind is pretty evident, for it was only within the last few days that the Stork gunboat-tender to the Excellent, gunnery-ship, at Portsmouth, was ordered, and did practice with a 68-pounder solid shot at short range against the side of the Old Briton frigate. This ship, it will be remembered, once did duty as a hospital, but now as a target, having a portion of her side *protected* with an iron plate said to be of novel decription. And what was the result?

The little Stork, with her 8-in. pivot gun, let fly at the slab, which appeared to be about four or five inches thick. I say appeared, for of course there was the usual amount of mystery exhibited, and nobody was permitted to inspect the plate closely, so that the result of the first shot could only be guessed at through a glass. Much time, however, was not allowed for the formation of wrong conjectures, before a second shot brought out a visible star across the plate; but the third shot smashed this last "novelty" in iron plates, and drove its large jagged splinters through the sides of the Old Briton. And there can be no doubt as to what would have been the effect upon the ribs of any "young Britons," had they been unfortunately stationed between decks. It seemed to be the prevailing opinion that no projectile yet invented, not even the most destructive shell, could scatter death, in the shape of lance and spear-headed fragments, with a more desolating effect; and, as at all former trials, the decks were strewed about with jagged scraps of iron, while the vessel's side was beaten into a hole as big as the plate armour which was intended to protect her.

In the case of the Old Briton, the authorities were very desirous to hide the effects of the trial from the public; for immediately after the conclusion of the firing, the hole was carefully covered up with canvas. It is doubtful why this screen was placed before the hole, for of course everybody with a "binocular" (and who went to witness the experiment without one) could examine at 200 yards the effect produced, as well as at ten yards with his unaided eye; so that the hole, and the deck seen through it, showed plainly that no novelty in iron plates had as yet been discovered capable of resisting the insinuating powers of a 68-pounder solid shot at short range.

If the iron-sided ships of war now in course of construction are to be protected with iron plates that will stand no harder hammering than the above, I shall not have much faith in them. That they must bear more powerful blows is, however, pretty certain, or be abandoned altogether, if we are to credit the report of the trial of Mr. Whitworth's rifled cannon. It was then admitted that, at all previous trials of that gentleman's gun against iron-cased floating batteries, he sent his shot as easily through the sides of those vessels as if they had been made of oak.

The writer of that report then states, it is supposed since those trials took place, that wrought iron armour-plates have been forged of greater strength, inasmuch as Sir William Armstrong's 70-pounder failed to make any serious impression on them. This statement may be correct with respect to Sir William Armstrong's gun; but what follows is not, if the writer refers to the recent trial of the Old Briton; for he says, "even that solid old bore the 68-pounder, at 200 yards, effected very little unless several shots struck in the same place, when the plate broke, though it let nothing through."

If the writer of the above had been an eye-witness of the trial, and had seen the Old Briton in dock a couple of days after she had been practised upon from the Stork gunboat—or if he goes to Portsmouth he can see her now, with her great gap, through which the fragments of the plate were driven—doubtless he will arrive at very different conclusions.

It is against this description of plate, I believe, that Mr. Whitworth is about to try his gun again; and with his present 80-pounder it is said the thickest plates of the Warrior will be pierced with as much ease as ever, even if backed up with the 22 inches of teak behind.

If, however, we grant that the Warrior may be invulnerable, will she attain speed sufficient to run down a line-of-battle or any other ship? And if she does, an important question arises, will the effect of the collision be most shocking to the shock-er or the shock-ee? How about the ram's guns, masts, screw, shaft, and steam-pipes?—particularly the latter,—and, further, where shall we find the engineer to "stand by" at the engine, and give his "turn a-head," or "turn astern," when, not only the heavy machinery may be expected to start, but the boilers to burst, and the volcanic fires be flung about in all directions? Have these things been thought about? For to make a mistake, and suppose that no confusion or dislocation of machinery will happen, is to disregard one of the commonest occurrences that takes place when heavy bodies come in violent collision.

Nevertheless, sir, I find that, regardless of the repeated failures of iron plates to resist shot, the following item appears in the Navy Etimates for the year 1860-61:—"For iron-cased ships, steam-vessels, and gun-vessels building by contract, 640,824*l*."

Surely before granting this enormous sum for experimental purposes, almost enough to build a small fleet, something more encouraging than a heap of failures was required to warrant such an outlay. For, supposing that the iron ship Warrior will be built stronger in her frames and timber than any ship ever constructed, recent experiments in gunnery have not re-assured us that she will be able to resist one of Mr. Whitworth's "punch-headed bolts," which, as mechanics know, if the Admiralty do not, instantly makes its way through the armour, when sharp-pointed or round shot fail. In brief, it is now understood that a round shot is one of the very worst shapes that can be for "drilling."

We have done some amazing things in our time. We have trained seamen at great cost, and then dismissed them to find employment in any other marine. We have bought back the worst of them at 10*l*. a head. We have built a splendid liner at Portsmouth, but it is conjectured—and, assisted by a two-foot rule, it is shrewdly suspected—that we have no dock in that yard big enough to copper her in. We are now throwing hundreds of thousands of sovereigns into Dover, Alderney, Holyhead, and other impracticable harbours; but it is questionable whether any of these official blunders equals in absurdity the plating enormous ships with slabs of questionable iron, which experience proves will be no protection against modern ordnance, but which will unfit them for contending with a heavy sea, and make them as slow and as ugly as hippopotami.—I am, &c.,

BLUE JACKET.

PERSONAL EXPERIENCES OF THE VOLUNTEER LEVEE.

[FROM A CORRESPONDENT.]

A reception at Court is an event in the lives of some people, myself for one; and it seems to me worth while to note, for the sake of the *olim meminisse*, something of my experiences of the 7th of March, 1860, when, as —— in the —— company of the ——shire Rifle Volunteers, I attended the Court of Her Majesty Queen Victoria, specially held for the reception of Volunteer officers. I do not propose to moralise on the subject of the demonstration—that has been done already, well enough; but just to describe, as well as I can, what sort of a thing a Court day is.

The doors of the reception rooms at St. James's were to be opened at twelve, the ceremony beginning at two, and the officers had been directed to attend, in appointed sets of counties, according to their numbers in the Army List, at certain half-hours—Artillery, Engineers, Mounted Rifles, and the St. Helena Rifles taking precedence of them all. ——shire being No. ——, our appointment was to enter between one and half-past.

At the entrance-door was pitched an immense marquee, floored with matting, which stood in good stead against the cold and sleet some hundreds of Volunteers who were there. We all thronged up to a door in a corner, and through it came upon a lobby leading to a staircase. Here, as we entered, gilding, marble, and other decoration, and brilliantly dressed attendants, came upon us suddenly with a flash of effect palatial and courtly. The Yeomen of the Guard standing sentry here and there up the staircase, in their Henry the Eighth dress, and with antique partisans in their hands, were a notable part of the scene here.

At the top of this staircase we got into the Armoury-room, oak-panneled, and ornamented with suits of armour and devices of arms. So far we were all mixed together, the officers of the several counties finding and keeping near each other as well as they could. There was a ceaseless rattle of loud talking, and everybody kept on their shakos and caps. A functionary in a blue uniform, overlaid with broad gold, busied himself with going in and out in the crowd like a lost dog in a fair. Him we asked where was our county's allotted place of rendezvous and waiting, which he most politely explained to be inside the next room, to the right, to be attained so soon as the crowd at the entrance should have melted down a little and we could get forward. Forward we presently got, and reached a barrier at the door, kept by two functionaries, who, I believe, are called gentlemen-at-arms, a guard especially attached to the Queen and the palaces. At first sight, I set them down, with their gilt helmets, red and gold coats, and gauntlet gloves, for officers of the Horse Guards on duty; they carry partizans, and are a sort of ushers as well as sentries, and as we passed in, some of us still keeping on our shakos and caps, they called out "*Uncovered*, gentlemen, un-*covered*."

We were now in the tapestry room, fitted with faded tapestry, crimson carpeted, as I think all the rooms were, only I had leisure to notice it here, and having a large handsome Tudor fireplace, with immense massive gilt dogs on each side of the grate. Cold as the day was there was no need of fires, and we were glad to have the windows opened at top. Large bay windows, with stone mullions and hangings above of crimson and gold, cut shield-shape, completed in these old-fashioned rooms a certain historical and regal effect, though there was no magnificence. Here the names of some six counties on printed cards were stuck up round the room, and the officers congregated together accordingly. We spent, I should say, an hour and a-half here, amusingly enough, meeting friends and taking note of the varieties of uniforms. I must say that nealy all looked well and soldier-like, and the officers were as a body a fine-looking gentlemanly set. There were some dresses that were not courtly, however serviceable, and some that were neither courtly nor intelligible. For instance, grey jackets plastered over with very broad silver lace, puffy breeches, canvas gaiters, and thick boots—Volunteer *formosus* upwards, ending in the gamekeeper. Other gaiters and thick boots also were there, without the incongruous broad silver. A Cornish artillery corps came in blue wove Jerseys, with their number, &c., lettered on their breasts. Almost all, however, came in the sort of dress that officers wear on state and festive occasions. "As full dress as you can bring," was the reply to an inquiry at the Lord Chamberlain's office the day before, and all the court bootmakers declared in chorus that shiny boots were *de rigeur*, and that they must be military boots—that is, with no components of buttons, half cloth, &c. The blue and gold gentlemen were here again, and we asked them how we were to carry our swords—hooked up, or in our left hands—and our shakos, &c., *quæstio vexata*. Were we to wear gloves? Swords might be hooked up if we liked; shakos in the right hand; gloves, none; gloves were not worn at Court.

Now and then a county was called from the further room, and we got at last up to the barrier at its door, kept by more gilt helmets, and gauntlet gloves, and our turn coming, we passed in. This and the next two rooms were at right angles in their plan, to those we had passed. We were led by a sweeping turn up the room and back again, towards the entrance, at the backward end, of a passage railed off, along one side, and met by a most polite captain, R.N., who was here doing the marshalling of counties. This morning's work practically illustrated to me the meaning of the word "courtly," the manner and address of all functionaries we came near being always most carefully, and, as in the instance of our captain R.N., sometimes most elaborately polite and attentive. It was really very pleasant. We were directed to form by counties and companies in line, in threes, and in that order we passed down the railed-off space, moving to the right, and, as said, at a right angle to the line of approach we had before followed, into another room.

Hitherto we had seen nobody but Volunteers, and the blue and gold uniforms, and gilt helmets and gauntlets; but we now came upon grandees, attending the Court, who lined the outside of our railings, and stared with apparently great interest and astonishment at the flood of Volunteer officers trooping on before them. The open-mouthed wonder of some gentlemen in scarlet and silver uniforms, whom I take to have been lords-lieutenant and people of high degree, was quite comic. Here and there a breastful of brilliant orders, or a broad jewel hung by a blue ribbon, flashed out, and recognitions passed occasionally between these courtiers and some of our body. We moved on quickly, however, our threes having now by order been turned into fours, and had short time to notice what was about us.

The next was the Throne-room; and at its entrance we were met by the Duke of ——, our lord-lieutenant, to whom our captain delivered a card, containing our names and ranks. Preceded by him, we moved on,—having been warned by an usher at the door to hook up or carry our swords, and not to trail them,—still along a railed-off space, beyond which was, I believe, a throng of fine people, of whom I took no notice; for the Queen, and nothing but the Queen, was in my mind. Her Majesty was before our eyes in half a minute.

At the foot of the throne stood a lady, bowing and smiling to each one of the line of officers, whose rank and names were read out as they passed her. I believe it was the Duke of ——'s voice that I heard reading those of our company. The Queen's demeanour was a master-piece of manner. It was that of a well-bred lady of the house receiving guests; and the wonderful part of it was, that each officer got a distinct individual recognition. It was not a sweeping general bow and gesture, but there was a graceful move and a smile, or a pleasant look, for each. The expression of face and manner seemed to show a desire—almost an anxiety—to be gracious, and to give a kind and attentive reception to each. It was not the manner of a sovereign receiving homage, but that of a thoroughly well-bred lady—I repeat it—receiving guests, and particularly anxious to show that she was glad to see them, and to miss attention to nobody.

We each bowed, and sidled off to the right, till we were out of the royal ken and well behind the corner of the crowd filling the middle of the room, and then we marched off out of the Throne-room.

I see by the papers that the Queen was attended by royal highnesses and high functionaries in number; but it is curious to me to know that I saw no one—no more than if they had not been there, though they were all plain before me—but the Queen, and just one other figure, Lord de Grey's, I believe, coming forward in a blue and gold uniform, as he introduced a Welsh officer, whose lord-lieutenant was not in attendance. Just this blue-and-gold figure for a second, but afterwards wholly and solely the Queen was what I saw. Of the Queen's dress I only noticed a general effect of light colour, with a slight dash of, I think, light blue or purple, and of shining fabrics; but of the gently-swaying bust and arms of the figure, and of the bending, white-jewelled head, and the gracious and welcoming expression of face, with a certain seriousness, and, as I have said, almost an anxiety to be polite, I have a most distinct mental photograph.

From the Throne-room we passed out into a gallery hung with portraits, and down a staircase, on which a clock showed just three o'clock. The ceremony did not end till after five. It is said upwards of 2300 officers were presented. Thickly jammed together on a landing above us we saw, as we went down, a crowd waiting for their turn. The staircase let us out into a different court-yard from the one by which we had entered the palace. State-liveried servants and flashy carriages were about; the band of one of the Guards' Regiments was playing in the next court; and in the street, in front of the palace, we found a troop of Horse Guards and their band, in state uniforms of gold-covered coats and black velvet caps, kettle-drumming and silver trumpeting. It was dirty under foot, and cold and snowy overhead, and my friend and I were glad to get away.

The Queen had received us inside the palace, and outside the Queen's Guardsman on sentry at the British Institution saluted us,—and this was the end of my St. James's Court of the 7th of March, 1860.

THE VOLUNTEER UNIFORM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—You inserted in your publication of the 4th ult. the letter of a correspondent, under the signature of "A LOOKER-ON," in which there is a personal attack upon our firm, and in answer to which and to a second letter by the same correspondent in your paper of the 11th ult., we solicit at your hands equal publicity to the subjoined statement.

We are the fortunate manufacturers of the Volunteer Uniform, preferred over those of our competitors, and therefore recommended by the council of gentlemen nominated by the Secretary for War to select the best and cheapest of those submitted for their inspection and judgment. "Small causes do," as "A LOOKER-ON" truly observes, sometimes "produce great results." Our ingenuity, enterprise, and moderation having won the golden opinions of the council, their recommendation has produced so unprecedented a demand upon our industrial resources that the envy of our unsuccessful rivals might reasonably have been anticipated—but not their malice. We have not courted success by any unworthy means; with us all has been fair and above board.

Digitized by Google

We have asked no favour. We enjoy no monopoly. If the uniform can be made as well and as economically by others, the market is open to them as to us. Our sealed garments lie for inspection at the War Office—they are not kept under lock and key—and every regiment or company is free to confer its patronage where it will. What is there in all this to justify the personal attacks of your correspondent?

But, sir, we fear we have offended beyond forgiveness in the moderation of our charges. It is notorious that previously to the decision of the inspecting council, certain firms had exacted 5*l.* and upwards for uniforms of greatly inferior quality and make, whilst for the uniform preferred and recommended by the council (comprising tunic, trowsers, cap, and accoutrements complete), we are content to receive 3*l.* 13*s.* 6*d.*, with 1*l.* 15*s.* additional for our patent coat-cloak and hood. We are also supplying a slightly modified uniform to meet the wishes of Lord Elcho and others in command of volunteer corps at the lower price (as given by us in the *Times*) of 2*l.* 15*s.* 9*d.*, the only difference being the substitution of a blouse tunic for the pattern garment deposited at the War Office. These, it must be admitted, are very moderate prices and can only be remunerative upon the extent of our success, which we had calculated upon, and which we have realised.

With respect to the assertion that we are the confidants of the War Office, it will suffice to state that from first to last we have had no communication whatever with that department except the transmission of the sealed uniform by our porter, under instructions from the council, in order that all competitors might have prompt and gratuitous access to the approved garments.

The statement that "Rifle Corps, who wish to adopt the Government suggestion, are compelled to employ these monopolists, who are at liberty to make their own terms," can only be met by our declaration of its untruth. We make no secret of our terms, we hold ourselves bound to those terms, and gentlemen Volunteers know that they are not compelled to employ our firm, nor will they do so unless convinced that, for quality, make, and price, it will be to their advantage.

"Looker on" writes as one who, jealous of any superiority in others, desires to participate in the pecuniary advantages achieved by their intelligence and industry. He would compel Messrs. Brown to sell their patent chains at the price of the unpatented and inferior article. He regards the law which protects the right of inventors as an injustice to the tradesman incapable of progress except in the worn-out rut of bygone times. We decline discussion of the point thus sought to be raised in the interest of dullards and pirates. But when he is pleased to denounce us as monopolists simply because we have earned and obtained honourable and optional preference over our competitors, he takes refuge in an abuse of terms which can only deceive men of shallow minds and devoid of the capacity of reflection. If there be anything in his assertions approximating to truth, all contracts by competition are monopolies and therefore objectionable, all competitive examinations undesirable, and all rewards for superior merit unjust!

We are called upon to prove that we are not monopolists by informing "A Looker-on" who were our competitors. We have no means of complying with his request. It is enough for us to know that we availed ourselves of information given in "the leading journal of Europe," and applied ourselves to the matter in hand without asking or caring to be informed against whom we should have to compete. Those "who ought to have been among the competitors" ought to have been equally awake with ourselves; and, not having been so, are now ridiculously too late in their absurd lamentations and censurably unjust in seeking by their attacks upon our firm the mental compensation, to which they can have no legitimate claim, for their own negligence or incapacity.

As to our having "specially retained the manufacturer of the cloth" recommended, we have promptly contracted with him for the supply we require—as any other firm might have done, and would have done had they deemed it a prudent commercial investment. We had confidence in ourselves, and we have not been mistaken. Hence the wailing and gnashing of teeth among our unsuccessful opponents.

The miserable joke about our being "Weedon martyrs" has no bearing upon the point at issue, unless to indicate the extreme vexation of our accuser. Professing only to be straightforward men of business, and content with the success we have achieved, we can good-humouredly invite your correspondent's recognition of the "*palmam qui meruit ferat*" principle, which has, and ever shall actuate, sir,

Your obliged servants, S. Isaac, Campbell, & Co.

The above letter having been communicated to "A Looker-on," we are enabled to close the correspondence for once and for all with his reply:—

Sir,—Messrs. Isaac and Campbell rely upon the indistinct recollection which the public must have of the contents of my two letters to you. I admire their ingenuity, and am sorry to defeat it by recapitulating the leading points of my former communications. Not as a rival of Messrs. Isaac and Campbell either in their general or in their peculiar line, but strictly as "A Looker-on," I complained that the late transactions between the War Office, Lord Elcho's committee, and Messrs. Isaac and Campbell had retarded the Volunteer movement; that the essential parts of a uniform, which from the nature of things ought to be open to the most unlimited competition, are patented, and that the patents are taken out by or assigned to Messrs. Isaac and Campbell. I also contradicted the assertion that a competition had taken place and I maintained, and still maintain, that after the appointment of the committee of which Lord Elcho was the chairman, notice ought to have been given to manufacturers and tailors to send in specimens of cloth and garments for the inspection and decision of the committee. I assert that no such notice was given, and consequently no competition could take place, unless it be that Mr. Isaac competed with Mr. Campbell, and that choice was made from several specimens of uniforms, which, in consequence of information received, were sent in by these enterprising individuals. And still further I complained that for three weeks after the labours of the committee were completed, its decision was kept a profound secret—that those who inquired at the War Office were referred to Messrs. Isaac and Campbell, from whom no information could be obtained—that this start of three weeks was given to and used by Messrs. Isaac and Campbell for the purpose of making preferential contracts with the patentee for Government cloth, and to complete other arrangements for securing a monopoly in the manufacture of the Government uniforms—and also, on their own terms, to solicit and obtain the orders of various corps, whose captains were told that the specimens submitted to them were those selected by Lord Elcho's committee, that none but the present exhibitors of the model uniform would be able to make it, and that the favour of early orders would ensure their prompt execution.

I leave you to decide whether anything in Messrs. Isaac and Campbell's letter refutes, shakes, or weakens these statements of mine. In one respect only I was mistaken. It appeared to me that Messrs. Isaac and Campbell had two prices for one article. From the information supplied by their letter, I must now conclude that there were three prices (4*l.* 4*s.*, 3*l.* 13*s.* 6*d.*, and 2*l.* 15*s.* 9*d.*) for two articles.

I am certainly a most determined opponent of hole-and-corner transactions, no matter whether or not it may suit those interested to disguise them under the popular name of competitions. I am equally opposed to secret awards and other scandals, which but too vividly remind me of the Weedon affair. That Messrs. Isaac and Campbell should look upon their martyrdom as a joke strikes me as strange; but there is no disputing about tastes. A Looker-On.

THE RE-ORGANISATION OF THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—It will not have escaped your notice, or that of your many readers who belong to the Indian army, that upon Tuesday night, when Colonel Sykes, in his place in Parliament, moved for certain papers connected with the re-organisation of the Indian army, and which motion might possibly have led Ministers to declare their intentions with respect to that army, the House was counted out.

It seems doubtful whether this result arose from the weariness engendered by the previous long debate on Italian affairs, or from a dislike to hear Colonel Sykes speak, or from an impatience at being troubled about anything "Indian." Possibly all these reasons contributed to the motion dropping still-born from the gallant colonel.

Nor, indeed, was any great object likely to be attained by his motion; but it is to be regretted that the "counting out" took place, as the report of the occurrence will tend to add to the depression already felt by the officers of the Indian army, and the conviction, too common amongst them, that their interests and prospects are utterly uncared for in this country, albeit they number several thousand English gentlemen who have for the last two years and three-quarters battled against every kind of difficulty in their country's service, and have endured an utter uncertainty as to their future position without a murmur.

I say that this will be the natural impression of many of these Indian officers; but it is, I firmly believe, contrary to the fact; and I entertain a confident hope, that when Ministers bring forward any scheme for the re-organisation of the Indian army, it will be found that that army possesses a large share of the interest and sympathy of our fellow-countrymen.

That Ministers will speedily make up their minds on the subject is fervently to be hoped; for any plan that can be devised will be felt as a relief after the past protracted uncertainty and doubt.

Personally I feel sure that it is alike the interest of the State and of ourselves, that the two armies should be amalgamated. As a local army of the Crown, we must ever occupy a much lower position than the other portions of her Majesty's army, and we shall be in all respects in a more unsatisfactory condition than as the old Company's army.

Moreover any re-organisation or patching up of the local army can only be looked upon as a temporary measure. This patching up may last the time of the older officers, but what the younger and far larger body of Indian officers should desire is, that their army should be so reconstituted as to enable them to feel certain that no further change in their prospects would take place, and this would be impossible without amalgamation.

I feel well assured that amalgamation can be carried out without a shadow of injustice, and certainly in a manner hat will prove at least as advantageous to the Indian officers as any continuance of a local army.

I could bring forward many arguments in support of the view I take, but I forbear from trespassing further on your columns.

What I desire above all things to urge is a speedy settlement of the question of re-organisation, and whether the Indian army is to continue local, or to be amalgamated with the great imperial army of her Majesty. Let us at once know our fate.—I am, &c.,

An Officer of the Indian Army.

Notice has been officially given that the next examination of candidates for the appointment of assistant-surgeon in her Majesty's Indian Military Forces will be held in the India Office on Monday, July 9, 1860; and that the probable number of vacancies to be then filled up will be twenty-five.

On Thursday afternoon an explosion of an extraordinary nature, which was fortunately unattended with personal injury took place at the brass-foundry of the steam-factory department at Woolwich dockyard. It appears that the explosion was caused by the steam generated in a hollow piece of metal during the process of melting. The report was heard at a considerable distance, and about 120 squares of glass were blown out, besides other damage, but the men employed in the building escaped without injury.

Commander John Hay, R.N., has been appointed nautical examiner to the Royal Mail Steam-Packet Company.

Alderman Watson, for many years the proprietor of the *Limerick Chronicle*, died on Saturday, at Kingstown.

The Channel Fleet.—The only ships belonging to the Channel fleet which are now at Portland are the Conqueror, Centurion, Blenheim, and Greyhound. The captain of the maintop of the Conqueror was killed on Sunday last by a fall.

Obituary.

Lieut.-Colonel Crowe, K.H., formerly of Her Majesty's 32nd Regiment, died at Fairlee Villa, near Bideford, on the 7th instant, aged 76. This officer entered the Service, by purchase, in 1800; became lieutenant, by purchase, in 1803; and captain, by purchase, in 1805. In 1826, he accepted an unattached majority, and became lieutenant-colonel by brevet in 1837. He served in the Peninsula, from 1811 to the end of the war, including the battles of Salamanca and Orthes, and the sieges of Ciudad Roderigo, Badajos, Burgos, and Salamanca; and was severely wounded at Quatre Bras, where the Light Company of the 32nd Regiment, which he commanded, was a part of the first British forces engaged on that day. He received the medal with two clasps for the Peninsula, the medal for Waterloo, and the third class of the Hanoverian Guelphic Order.

On the 2nd inst., at Ballylawlin, county Longford, aged 78 years, Captain John Sankey Kelly, late Sub-Inspector of Constabulary, and formerly of the 54th Regiment, and 9 3rd Roscommon Militia. During a period of 25 years in the Army, he rendered good service, particularly during the Egyptian war, for which he received two medals; he subsequently joined the Constabulary, from which he retired, after a service of 30 years, on a pension of 180*l.* per annum; still, not content with serving his country for 55 years, he again joined the Roscommon Militia.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Bedford—March 14, at Royal Crescent, Notting Hill, the wife of Captain G. A. Bedford, R.N., of a daughter.

Cottell—March 11, at Grove Road, St. John's Wood, the lady of Captain J. W. Cottell, H.M.'s 26th Regiment, Bombay Army, of a son.

Day—March 12, at No. 6, Howley Place Villas, the residence of her brother-in-law, Henry M. S. O'Brien, Esq., the wife of Commander George Flott Day, R.N., V.C., of H.M.S. Sphynx, of a daughter.

Ditmas—March 11, at Croydon, the wife of Major Fredk. Ditmas, of a daughter.

Gamble—March 10, at 51, Queen Street, Edinburgh, the wife of Major Gamble, 4th (the King's Own) Regiment, of a son.

Glyn—March 10, at 1, Upper Eccleston Street, Belgrave Square, the wife of H. Carr Glyn, Esq., Commander R.N., of a daughter.

Jervois—March 8, at 9, Southwick Crescent, Hyde Park, the wife of Major Jervois, R.E., of a daughter.

Lawes—March 11, at 200, Sanchiehall Street, Glasgow, the wife of Captain Lawes, West York Rifles, of a daughter.

Learmonth—March 11, at No. 17, Eaton Place, Belgrave Square, the wife of Lieut.-Colonel Learmonth, of Dean, of a son and heir.

Muriel—Jan. 7, at Meerut, East Indies, N.W.P., the wife of Captain George William Muriel, H.M.'s 75th Regiment, of a son.

Swan—March 13, at Seabrook, Shorncliffe, the wife of Deputy Assistant-Commissary-General F. G. Swan, of a son.

Taylor—March 10, at Kinsale, Ireland, the wife of Captain James d'Esterre Taylor, Royal Marines Light Infantry, of a son.

Wriford—March 12, at Norwich, the wife of Captain G. H. Wriford, Royal Marine Artillery, of a son.

Young—Jan. 5, at Government House, Hobart Town, Tasmania, the wife of His Excellency Sir H. E. F. Young, C.B., of a daughter.

MARRIAGES.

Anglesey—Burnand—March 8, by the Rev. H. T. Tucker, rector of Angersleigh, Somersetshire, the Marquis of Anglesey, to Ellen Jane, daughter of George Burnand, Esq.

Elphinstone—Arthur—Jan. 19, at St. Paul's Cathedral, Calcutta, by the Ven. the Archdeacon, N. W. Elphinstone, Deputy-Commissioner in the Punjaub, second son of Captain Elphinstone, R.N., of Livonia, Devonshire, to Georgina Henrietta Elliot, youngest daughter of the late Lieut.-General the Right Hon. Sir George Arthur, Bart.

Williams—Dickson—Feb. 23, at All Saints', Lambeth, by the Rev. William Holmes, Thomas Williams, Esq., of H.M.'s Customs, to Jane Alexander Allson Dickson, cousin to Colonel Lothian Dickson, of H.M.'s Life Guards.

Worsley—Hutchinson—March 13, at St. George's, Hanover Square, by the Rector, the Rev. Henry Howarth, Arthington Worsley, Esq., second son of Sir William Worsley, Bart., of Hovingham Hall, Yorkshire, to Marianne Christina Isabella, youngest daughter of Colonel the Hon. Henry Hely Hutchinson, of Weston, Northamptonshire, and Upper Brook Street, Grosvenor Square.

DEATHS.

Browne—Dec. 4, at Dunedin, New Zealand, aged 18, Peter James, eldest son of Peter Browne, Esq., of Belmont House, Ramsay, Isle of Man, late Captain 3rd Regiment (the Buffs).

Chamberlain—March 10, at Rock Ferry, Cheshire, Commander William Browne Chamberlain, Royal Navy, aged 79.

Conn—March 4, at Pimlico, Captain Henry Conn, R.N., late of Trennick, Cornwall, aged 66. Captain Conn was the only son of Captain John Conn, flag officer to Lord Nelson (and who led the Dreadnought, 98, at Trafalgar), and of Margaret, daughter of the Rev. Isaac Nelson, rector of Meldon, and nephew of the late Lieut.-General Spens.

Crowe—March 7, at Fairlee Villa, near Bideford, Lieut.-Colonel John Crowe, K.H., late of H.M.'s 32nd Regiment, aged 77, a soldier of the Peninsula and Waterloo.

Latham—March 10, at No. 3, Vicarage Terrace, Stratford, aged 77, Mrs. Elizabeth Latham, for many years of Greenwich and Peckham, relict of the late Chas. Latham, Esq., formerly Captain 3rd Provisional Battalion, mother of C. W. Latham, Esq., surgeon, Hackney Road.

Lloyd—Feb. 26, deeply lamented, Georgiana Caroline, the beloved wife of Captain Morgan Pryse Lloyd, of Glansevin, and eighth daughter of the late Colonel Sackville Gwynne, of Glanbrane Park, both in the county of Carmarthen, South Wales, leaving eight children to mourn the loss of a devoted mother.

Lovell—March 8, at 27, Harewood Square, Matthew Lovell, Esq., late of the H.E.I.C. Bengal Medical Establishment.

Lyall—Feb. 28, in the Nimrod, lost off St. David's Head, Captain Thos. Lyall, of that ship, formerly of Dundee, many years in the service of the Cork Steam Company, and in command of one of the Company's vessels in the Black Sea during the Russian war, much and sincerely regretted.

Lyle—March 14, at Torquay, Mary, the beloved wife of Captain John M. Lyle, 29th Regiment, daughter of Wellesley Pole Fletcher, Esq., of Dublin.

MacDermott—March 14, at the residence of his aunt, No. 3, Grove Terrace, Kentish Town, aged 26, after severe suffering, Reginald, youngest son of the late George MacDermott, Esq., Staff-Surgeon to H.M.'s Forces.

McDonald—March 8, at 1, Union Place, Aberdeen, Dr. Alexander McDonald, R.A.

Maunsell—March 12, at Thorpe Malsor, aged 74, the Hon. Caroline Eliza, wife of Colonel Maunsell, and daughter of the Hon. William Cockayne, second son of Charles, 5th Viscount Cullen, of Rushton Hall, Northamptonshire.

Murray—March 6, Vice-Admiral James Arthur Murray, aged 70.

Neale—Feb. 22, at Dawlish, Devon, Margaret Johnstoun, daughter of the late Captain Walter Young, R.N., and relict of Adam Neale, M.D., Physician to the Forces.

Otto—March 10, Colonel Richard Bayer Otto, formerly Quartermaster-General at Madras, at his residence, No. 7, Queen Street, May Fair, aged 78.

Porteous—March 12, at Crieff, Captain Alexander Porteous, late of H.M.'s 60th Regiment, aged 78.

Spring—March 10, from softening of the brain, Brevet Lieutenant-Colonel Spring, late 44th Regiment.

Stamer—March 5, at his seat, Beauchamp, in the county of Dublin, aged 62, Sir Lovelace Stamer, Bart., formerly Captain in the 4th or Royal Irish Dragoon Guards, eldest son of the late Sir William Stamer, Bart., of the county of Clare, and only brother of the rector of the parish of St. Saviour, Bath.

INDIA OFFICE, 12th March, 1860.

NOTICE IS HEREBY GIVEN, that the NEXT EXAMINATION OF CANDIDATES for the APPOINTMENT OF ASSISTANT-SURGEON in Her Majesty's Indian Military Forces WILL BE HELD in this Office on MONDAY, the 9th of JULY, 1860, and that the probable number of vacancies to be then filled up will be Twenty-five (25).

W. E. BAKER, Colonel, Military Secretary.

NOTICE.—INDIA-OFFICE, E.C., March 14, 1860.—The NEXT COMPETITIVE EXAMINATION OF CANDIDATES FOR ADMISSION INTO THE ROYAL INDIAN MILITARY COLLEGE, AT ADDISCOMBE, under the 34th Clause of the Act 21 and 22 Vict. cap. 106, will be held at the Royal Hospital, Chelsea, on the 16th of May, 1860, and following days.

The number of appointments to be competed for is sixty.

REGULATIONS FOR THE ADMISSION OF GENTLEMEN CADETS TO THE ROYAL INDIAN MILITARY COLLEGE AT ADDISCOMBE.

N.B.—All candidates for commission in Her Majesty's Indian Artillery and Engineers are required to go through a course of instruction at the Royal Indian Military College at Addiscombe.

I. Competitive examinations for admission will be held twice a year, in May and November. They are conducted by examiners appointed for the purpose, in the presence and under the superintendence of the Council of Military Education.

II. The candidates must be between 17 and 19 years of age.

III. The admissions will be determined by the result of a competitive examination, the subjects of which will be as follows, viz.:

		Marks.	
1. Mathematics.	Pure	2,000	
	Mixed — *i. e.*, Statics, Dynamics, and Hydrostatics	1,500	3,500
2. English.	Language, Literature, and Composition	1,000	
	History and Geography of England and its dependencies	1,000	2,000
3. Classics. Greek Latin	Language & Literature	1,000	
	Geography and History of Ancient Rome ...	500	
	Language & Literature	1,000	
	Geography and History of Ancient Greece ...	500	3,000
4. French Language and Literature ... The examination in French and Hindustani will be both written and *viva voce*.			1,000
5. Hindustani Language		1,000	
History of India		1,000	2,000
6. Experiemental Sciences, *i.e.*, Chemistry, Heat, Electricity, including Magnetism			1,000
7. Natural Sciences, *i. e.*, Mineralogy and Geology			1,000
8. Drawing.	Elementary Geometrical Drawing (including the use of drawing instruments)	500	
	Machinery, Architectural, Topographical, * Landscape, or Figure Drawing	500	1,000
9. The use of Astronomical and Surveying Instruments			750

IV. No candidate will be allowed to be examined in more than five subjects, of which one must be mathematics, and no one who does not obtain at least 1000 marks in mathematics, of which 700 at least must be in pure mathematics, will be eligible for an appointment.*

From the other subjects of examination, each candidate may select any, not exceeding four in number, in which he desires to be examined; but no one will be allowed to count the marks gained in any such subject, unless those marks shall at least amount to one-sixth of the total number of marks allotted to that subject, or section of a subject.

In English and Hindustani it will be understood that by gaining one-sixth of the marks allotted to language, literature, and composition, a candidate will be entitled to count in the first section of the subject; and, in like manner, by obtaining one-sixth of the marks allotted to history and geography he will be entitled to count in the second; but no amount of marks gained in one section will entitle him to count those gained in the other if below the prescribed minimum.

In Classics, the same rule applies as regards counting on one or other of its two sections (Latin and Greek), as has been explained in reference to the two sections of English; but, in addition, it must be further stated, that, unless one-sixth of the 1000 marks allotted to the Latin language and literature has been gained, a candidate will not be allowed to count the marks gained in Latin history and geography, even though above the required minimum of one-sixth of the 500 marks allotted to them: and similarly as regards the Greek langunge and literature, and the Greek history and geography.

In drawing also the same rule applies as regards counting as has been already explained in reference to the two sections of English.

In either French or Hindustani, every candidate will be required to obtain at least 100 marks for qualification in the language section, the marks to be gained on translation only, and in geometrical drawing at least 50 marks, whether he takes them up as subjects in which he desires to compete or not.

V. No candidate will be considered qualified unless he attains an aggregate of 2500 marks at least.

The following papers will be required to be transmitted by each candidate to the Under Secretary of State for India, one month previous to the date fixed for each examination:

1. An application for permission to compete.
2. An extract from the register of his baptism, or, in default of that, a certificate of age verified by affidavit.
3. A certificate of good moral character, signed by the clergyman of the parish to which he belongs, and by the tutor or head of the school or college at which he has received his education, for at least two years, or such other proof of good moral character as will be satisfactory to the Secretary of State for India.
4. A statement of subjects of examination, in which (in addltion to mathematics) he may desire to be examined.

VI. No person who has been dismissed or obliged to retire from the Army or Navy, the Royal Military College at Sandhurst, the Royal Military Academy at Woolwich, or from any other public institution, will be appointed to the College.

VII. Gentlemen who may be attending the junior division of the College at Addiscombe will be required to submit only the first and fourth of the papers above specified.

The candidates will be inspected by military surgeons on the first day of the examination, that it may be ascertained that they are free from any bodily defects or ailments calculated to interfere with the performance of military duties.

Extreme short sight, or any serious defect of vision, is regarded as a disqualification.

VIII. The period of study at the College will be one year and a half, at the expiration of which the cadets will be publicly examined and posted to the Engineers or Artillery, in the order of their merit, as declared by the public examiners, and according to the wants of the Service.

IX. The parents or guardians of the gentleman cadet are required to pay 50*l.* per term in advance, towards defraying the expense of his board, lodging, and education; also an entrance subscription of 2*l.* 2*s.* to the public library.

They are also required to pay the cost of his uniform clothing, averaging 15*l.* 5*s.* 6*d.* per annum, and of the books required for his use; also pocket-money at the authorised rates, viz., 2*s.* 6*d.* a week, with 1*s.* additional to censors, and 2*s.* 6*d.* additional to sub-officers.

X. Every candidate must deliver the names and addresses of two persons residing in London, or its vicinity, who engage to receive him on application to that effect by the Lieutenant-Governor of the College.

XI. A cadet is chargeable with the full payment for a half-year, however short a portion of it he may be in actual residence.

A cadet resigning or being dismissed during a term cannot lay claim to a return of a portion of the payment.

Cadets are chargeable for loss, damage, and destruction of books and other property.

No portion of their pocket-money may be paid in advance to the cadets.

No person belonging to the College may take charge of money for the private use of the cadets.

XII. Previous to the cadet's admission into the College, his parents or friends are required to furnish him with the following articles, viz.:

Twelve shirts, including three night-shirts.
Twelve pairs of stockings.
Six towels.
Eight pocket-handkerchiefs.
Two pairs of strong half-boots.
Two combs and a brush.
A tooth-brush.
A bible and prayer-book.
One pair of white trowsers.
A flannel jacket and pair of flannel trowsers to be worn when playing at football or cricket.

Case of mathematical instruments and box of scales of an approved pattern. To be seen at Messrs. Troughton & Simms, 138, Fleet Street; and at Mr. Elliot's, 56, Strand.

[To be repaired, or, if necessary, renewed by the parents or friends in the vacation.]

Each article of dress must be marked with the owner's name in full.

XIII. Engineer cadets will go through a further course of training at Chatham for one year as commissioned officers on full pay. Artillery cadets will undergo a professional training at Woolwich for six months as commissioned officers on full pay.

XIV. A cadet of the Senior Department, who, after a residence of one year and a half at the College, shall be reported by the Public Examiners to be not qualified for a commission in the Engineers or Artillery, in mathematics, fortification, civil and military drawing, surveying, and Hindustani, will forfeit his appointment. Also in case of misconduct a cadet will be liable to dismissal on the judgment of the Secretary of State for India in Council.

XV. Cadets of the Senior Department will be allowed to count as service for full-pay pension the time which they may have spent under official instruction at Chatham or Woolwich—but will not be allowed to count as service any part of the time spent in the College at Addiscombe. Their commissions as lieutenants will bear the date of their last public examination.

XVI. Young officers appointed to the Artillery or Engineers will be required to proceed en route to India within three months of the completion, by them, of the prescribed course of professional instruction at Chatham or Woolwich.

Note.—The Secretary of State for India in Council has determined to allow the sum of 100*l.* to each cadet who may obtain a commission in the Engineers or Artillery after a residence of three terms at the Addiscombe College, in aid of the expenses of his education and residence at that institution.

W. E. BAKER, Colonel, Military Secretary.

India Office, March 14, 1860.

---

* N.B.—The examination in arithmetic, algebra, plane geometry, logarithms, and plane trigonometry will be close and searching.

MONUMENT TO THE MEMORY OF THE LATE ADMIRAL LORD LYONS.

A MEETING of the Subscribers and Friends of the late Admiral will take place at BRIDGEWATER HOUSE on SATURDAY, MARCH 24th, at 3 P.M., for the purpose of inspecting a Model of the Monument proposed to be erected in St. Paul's Cathedral, and of hearing a statement of the condition of the Fund.

F. EGERTON, Hon. Sec.

OVERLAND ROUTE.

COMMUNICATION BY STEAM TO INDIA, AUSTRALIA, &c., viâ EGYPT. The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY BOOK PASSENGERS and receive Cargo and Parcels for Gibraltar, Malta, Corfu, Egypt, Aden, Ceylon, Madras, Calcutta, the Straits, and China, by their steamers leaving Southampton on the 4th and 20th of every month; for Gibraltar, Malta, Egypt, Aden, and Bombay, by those of the 12th and 27th of each month; and for Gibraltar, Malta, Egypt, Aden, Bombay, Mauritius, Reunion, King George's Sound, Kangaroo Island (for Adelaide), Melbourne, and Sydney, by the steamers leaving Southampton on the 12th of every month.—For further particulars apply at the Company's Offices, 122, Leadenhall Street, London, E.C.; or Oriental Place, Southampton.

CENTRAL ASSOCIATION FOR IMPROVING THE CONDITION OF THE WIVES AND FAMILIES OF SOLDIERS AND SAILORS.

PATRON—Her Majesty the QUEEN.

VICE PATRONS.

H.R.H. the Duke of CAMBRIDGE, K.G., Commander-in-His Grace the Archbishop of CANTERBURY. [Chief.

PRESIDENT—The Earl of SHAFTESBURY.

CHAIRMAN OF COMMITTEE—WM. ANGERSTEIN, Esq., M.P.

The Central Association appeals to the Public for a continuance of that support so generously accorded to it in times past.

War, with its exigencies, has by no means ceased, for at this moment there are more than 100 applicants for help, whose husbands, now serving in India or China, have been absent from them during periods varying from two months to three years, without, in many cases, sending any money home for their support.

And even were there no such claims on the Association, a wide sphere of usefulness would still lie before it in time of Peace, and it earnestly hopes to be able to continue its efforts to carry out those more extended objects which it was originally designed to effect, viz.: the permanent improvement of a numerous and too long neglected class.

By God's blessing the Association has alleviated many a bitter pang, and not its least effort to afford relief to the objects of its solicitude was the recent contribution of upwards of 1300*l.* towards the outfit of a large number of soldiers' wives with their families, in conjunction with Her Majesty's Quartermaster-General and the Emigration Commissioners, on their embarkation to join their husbands and fathers in India.

But the chief object of its operations is now directed to the maintenance of local branches at such places as Woolwich, Chatham, Parkhurst, Portsmouth, Plymouth, Dublin, Winchester, Ballincolig, and other large garrison and seaport towns, where efforts are being, or will be, made to keep up lying-in hospitals, cheap lodgings, children's nurseries, and work societies affording remuneration and elevating employment.

For this benevolent purpose, subscriptions and donations, however small, are earnestly requested, and will be thankfully received by the Treasurer, the Hon. A. KINNAIRD, M.P., at Messrs. Ransom, Bouverie, & Co., 1, Pall Mall East, S.W.; or by the Secretary, Captain S. F. JACSON, at the office, 7, Whitehall, S.W.

THE FOLKESTONE WEST CLIFF HOTEL COMPANY, (LIMITED).

Registered pursuant to the Joint Stock Companies' Acts, 1856-7, by which the liability of Shareholders is strictly limited to their Subscriptions.

CAPITAL, £60,000, IN 60,000 SHARES OF £1 EACH.

Deposit, 10*s.* per Share on Application, and 10*s.* on Allotment.

DIRECTORS.

J. Challice, Esq., M.D., Chairman of the London Bridge Hotel Company, Southwark, *Chairman*.
Benjamin J. Armstrong, Esq., Deputy-Lieutenant for Middlesex, Elmfield Lodge, Southall.
J. A. Bicknell, Esq., Cork Street, Burlington Gardens.
E. Gough, Esq. (E. Gough & Co.), Bush Lane and Greenwich.
Captain Gilbert Kennicott, R.N., Mayor of Folkestone.
G. Sheward, Esq., Director of the Sambre and Meuse Railway, Randolph Road, Maida Vale.

(With power to add to their number.)

BANKERS.

Messrs. Smith, Payne, & Smiths, Lombard Street, London, E.C.
The National Provincial Bank of England, Folkestone.

SOLICITORS.

Messrs. Tucker, Greville, & Tucker, 28, Saint Swithin's Lane, London, E.C.
Richard Hart, Esq., Folkestone.

BROKERS.

Messrs. Mackie, North, and Brown, 29, Threadneedle Street, London, E.C.

CONSULTING ARCHITECT.

Sydney Smirke, Esq., R.A., F.G.S., Grosvenor Street, London:

ARCHITECT AND SURVEYOR.

Joseph Messenger, Esq., Spring Gardens, S.W., and Folkestone.

MANAGER OF THE HOTEL.—Mr. G. Giovannini.

SECRETARY—R. T. Alison, Esq.

OFFICES—20, Walbrook, City, E.C.

This Company is formed for the purpose of purchasing and enlarging the premises well known as the West Cliff Hotel, Folkestone, and advantageous arrangements have been made with the Proprietor, who has agreed to sell to the Company the whole of this property by Mr. Woodthorpe's valuation, and to take a large portion of the purchase-money in paid-up Shares. Possession of the property will be given to the Company on Ladyday, when completion of the purchase will be effected.

From careful calculations made, the profits are estimated from 18 to 20 per cent., and the shareholders will have the benefit of the forthcoming season, as the proposed alterations, extensions, and improvements will be carried out without interfering with the present establishment.

FOLKESTONE WEST CLIFF HOTEL COMPANY.

NO further APPLICATIONS for SHARES will be received after TUESDAY, the 20th inst., from residents in London, and WEDNESDAY, the 21st, from the country. After which the allotment will immediately take place. By order, R. T. ALISON, Secretary.

13th March, 1860.

Applications for Shares (not later than the 20th inst.), with a deposit of 10*s.* per share, to be addressed to the Secretary, 20, Walbrook, E.C.; or to the Brokers, 29, Threadneedle Street, E.C., where detailed Prospectuses can also be obtained

Funds Invested	£847,000
Annual Income	116,000
Claims paid	1,150,000

BONUS YEAR.—Persons Assuring on or before the 25th March next will be entitled to one full year's share in the profits then to be divided. The Bonuses become vested after payment of the *Third* premium. The Profits will be divided in every *Fifth* year after the 25th March next.

No extra premium is charged for service in any Volunteer Corps within the United Kingdom during peace or war. B. HALL TODD, Secretary and Actuary.

BONUS DIVISION.

GLOBE INSURANCE, CORNHILL & CHARING CROSS, LONDON, S.W.

ESTABLISHED 1803.

Capital One Million, All paid-up and Invested.

The following are examples of the PROFITS accruing on Globe Participating Life Policies under the BONUS declared as at 31st December, 1858:—

AGE at Date of Policy.	Original Sum Insured.	Original Annual Premium.	Complete Years in force.	Bonus applied— By Addition to Policy.	Bonus applied— By payment in CASH.
25 Yrs.	£1000	£21 9 2	6 Years.	£72	£27 17
35 ,,	1000	28 2 6	6 ,,	72	32 15
40 ,,	1000	32 15 0	6 ,,	72	35 7
50 ,,	1000	45 12 6	6 ,,	72	42 9

(*Policies of One to Five complete Years Participate in proportion.*)

The above Profits are equivalent—if added to the Policy—to a Reversionary Sum at death equal to One Pound Four Shillings per Cent. per Annum on the Sum Insured for each of the completed years of the Policy:—Or, If taken as an Immediate Cash Payment, is, at most ages, considerably more than One Year's Premium.

The Bonus Periods are FIVE Years, and the Rates of Life Premiums, whether *With* or *Without* Profits, very economical.

FIRE, LIFE, ANNUITY, and REVERSIONARY business transacted. WILLIAM NEWMARCH, Secretary.

*** No Charge for Volunteer and Militia Corps.

For upwards of thirty years No Extra Premium has been charged by the Globe for service in the Militia and in Volunteer Corps in the United Kingdom.

Parties desirous of investing Money are requested to examine the Plan of the Bank of Deposit, by which a high rate of interest may be obtained with ample security.

Deposits made by special agreement may be withdrawn without notice.

The interest is payable in January and July.

PETER MORRISON, Managing Director.

Forms for opening accounts sent free on application.

SAILS FURLED AND REEFED FROM DECK BY FINLAY'S PATENT.

This invention was exhibited and fully explained by Captain Finlay in the News Exchange Room, Liverpool, on the 17th of February, to upwards of 400 Merchants, Shipowners, and Masters, at the conclusion of which Captain Ord, lessee of the Kooria Mooria Islands, publicly congratulated the patentee on producing the most perfect, simple, and practicable invention of the age. Captain George Forrest, of the ARABIA, concurred in this commendation, and gave orders to fit his first-class ship. Captain M'Garry, of the ship HELEN, Captain Jas. Tasker, Captain Roach, and all the members in port of the Mercantile Marine Service Association, have given Captain Finlay leave to use their names in approval of the invention. Seventeen ships out of the Mersey within a few days have left with the intention of fitting their yards and sails with Finlay's Patent at sea. Under this patent, topsails, topgallantsails, and royals are furled by running them into the bunt, and brailing them snugly against the mast by spilling-lines. Courses are reefed by the most perfect method yet known. Topsails also can be rolled round the yard in reefing without a cuddy yard. Captain Finlay has received hundreds of flattering testimonials.

Opinion of Captain Wm. Vincent, Managing Superintendent Royal Mail Company:—

"Southampton, Jan. 21, 1860.

"I consider the invention (Finlay's Patent) a very excellent, simple, and easy method of shortening sail, and well deserving the attention of shipowners generally, but particularly for sailing ships which have to carry a press of canvas to make a passage with comparatively few hands."

Apply to Captain FINLAY, 66, Queen Street, Liverpool; W. H. DOUGLAS, 8, Upper East Smithfield, E.; or to T. MOORE, 33, Regent Circus, Piccadilly, London, W.

DIVING APPARATUS.

C. E. HEINKE, SUBMARINE ENGINEER, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

BRITISH BIOGRAPHIES.

Part I. will be published on the 1st of July, to be completed in 24 Monthly Parts at 1s., forming Four Volumes.

This Work, conducted by Mr. CHARLES KNIGHT, will comprise the Lives of many hundred distinguished Persons who, whether as Statesmen, Lawyers, Warriors, Divines, Men of Letters, Men of Science, or Artists, have, during a thousand years, been building up our country's greatness and honour. These Lives will be arranged in chronological groups, so as to illustrate the public events of every successive period, and the general course of national progress.

BRADBURY & EVANS, 11, Bouverie St., Fleet St., E.C.

GROSVENOR, Lieut.-Colonel.

ROYAL NAVAL AND MILITARY ACADEMY, GOSPORT.

PATRONS:—

Her Most Gracious Majesty the QUEEN.
His Royal Highness the PRINCE CONSORT.

At every Examination for Naval Cadetships since May, 1857, Pupils from this Establishment have taken the first or second places. Those Pupils who have entered the Army and Military Colleges have been equally successful.—Applications to be addressed to the Rev. E. BURNEY, M.A., Gosport.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES who passed at the Royal Naval College, Portsmouth, 12th March, 1860, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Warren, Trollope, Payne, Loveridge, Passy, Haggarth, Horne, Orton, Harrison, Higgins. 41 Naval Cadets passed from North Grove House in 1859.

W. BELL, Chaplain;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

ROYAL NAVAL ESTABLISHMENT, EASTERN PARADE, SOUTHSEA.

CONDUCTED BY MR. THOMAS EASTMAN, R.N.

The following Gentlemen have passed from this Establishment since June, 1859:—Messrs. Alexander, G. A. Ellis, Garnier, Mallory, Hoghton, Boddom, Maycock, Gillum, Osborne, Nuthall, O'Brien, *Bedingfield*, Powell, Hodges, Jackson, Lysons, Browne, Roberts, Hunt, Walters, Pascoe, Pugh, Freeland, Jaffray, Lord Albert Clinton, Messrs. Weld, Fairfax, Hutchinson, Atkinson, Brabazon, Law, Hazel, Needham, Gibson, Abbot, Smith, Nottidge, Chambrè, *Forder*, Smart, Bird, Giles, Rust, Compton, Russell; Thompson, Mitchell, Haswell, Ellis, Hawes, Calder, Hebden, Tully, Hyman, Milman, Hough, Dugdale, Coddington, Gissing, Lindeman Bancroft, Campbell, Lambert. 346 gentlemen have passed from this Establishment as Naval Cadets, including 116 under the Admiralty Regulation of 23rd February, 1857.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, officers who had read at this Establishment have twice come out first on the list.

Apply to Captain LENDY, Sunbury, S.W.

EDUCATION.—BRIGHTON.

FRENCH, GERMAN, AND CLASSICAL SCHOOL, 15, Eaton Place, Kemp Town.

PRINCIPAL—MR. L. W. SCUDAMORE, B.A.

Pupils prepared for the Army, Civil Service, Oxford and Cambridge Examinations, &c. French and German constantly spoken. Terms moderate. References to the friends of pupils, many of whom have taken high places at the above Examinations.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

ARMY, INDIA CIVIL SERVICE, &c., EXAMINATIONS.—A Military Tutor, who has several CANDIDATES for the above reading with him for the NEXT EXAMINATION, will be happy to MEET WITH OTHERS, resident or non-resident. His Establishment can be highly recommended by persons of very high standing, whose sons have distinguished themselves. One obtained nearly the highest number of marks at the India Civil Service Examination last year. The best masters on every branch of education are in attendance, and the house, library, and general management afford every facility for rapid progress without cramming. Terms, &c., on application to M. A., GREGG'S, Porchester Library, Queen's Road, Bayswater, W.

DEMONSTRATIONS OF ANATOMY IN APRIL.

MR. CHRISTOPHER HEATH, Demonstrator of Anatomy at the Westminster Hospital, will give a COURSE OF DEMONSTRATIONS AND EXAMINATIONS UPON THE DISSECTED SUBJECT during APRIL. The Demonstrations will be given daily, from 3 to 5 P.M., at the Westminster Hospital, commencing on Monday, 2nd April, and will comprise the Anatomy of the entire body. Fee, Five Guineas.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"NEW GUN. — Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times*.

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

REVOLVERS, GUNS, & RIFLES OF THE FINEST LONDON MANUFACTURE.

ROBERT ADAMS (Gunmaker to H. R. H. the Prince Consort), 76, King William Street, London, E.C., supplies, wholesale and retail, his PATENT REVOLVER, as exclusively adopted by H. M.'s War Department and the Indian Army; together with Military and Sporting Guns, Rifles, Breech-Loaders, Ammunition, and Appurtenances of every description.—Price Lists by post on application.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. DE LA COUR, 327, High Street, Chatham.

THE NEW REGULATION BRIDLE.

A. DAVIS,
MILITARY SADDLER,
33, STRAND, W.C., AND AT ALDERSHOT CAMP.

OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfit in Saddlery.

A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

TO OFFICERS IN HER MAJESTY'S ARMY AND NAVY.

MATTHEW WILDSMITH having been favoured with the patronage of many Gentlemen in Her Majesty's Forces has paid special attention to the production of a BOOT that should combine strength with ease and comfort. He is now happy to announce that he has succeeded in obtaining a leather specially prepared which he can with confidence recommend for military use, being light in weight, pliable, and very durable. Indian and Foreign Orders executed with despatch.—1, Sherard Street, Regent Street, W., rear of County Fire Office.

THE ONLY CRACK PATENT MILITARY BOOT MAKER,

STOKES,
27, COVENTRY STREET, HAYMARKET, W.

MR. MARKWELL, Wine Merchant to Her Majesty, Nos. 35 to 40, & 45, Albemarle Street, and 4, Stafford Street, Piccadilly, London, W. Naval and Military Messes supplied.

DUTY OFF FRENCH PERFUMERY.

ED. PINAUD'S Choice Perfumes, Fancy Soaps, Pomades, Philocomes, Aromatic and Oriental Vinegar, Cosmetics, Elixir, Dentifrice, &c., &c., to be had of all Chemists and Perfumers throughout the Country. Wholesale Depot, and for Export, 27, Cannon Street West, London, E.C.

THOMSON'S REGISTERED FOUR-WHEELED DOG CART excels other dog carts as regards commodiousness, lightness, elegance, and economy. In addition to testimonials in *The Field*, the following are received:—

"Dalhousie Castle.

"SIR,—I have tried the Dog Cart several times, and am much pleased with it. I consider it a most perfect carriage of its kind. W. MAULE RAMSAY, Colonel.
"Jan. 20, 1860."

"Edmondstown, Feb. 29, 1860.

"MR. THOMSON,—I have received the Dog Cart safely. In justice to you, I must say that a neater, lighter, or roomier cart I have not seen. I shall have pleasure in recommending it. I remain, &c., &c.,
"ARTHUR COSTELLO, Captain, late 7th Dragoon Guards."

ELKINGTON & CO. desire respectfully to call the attention of Regimental Messes requiring PLATE to their Manufactures, which may be obtained in great variety from their establishments.

LONDON: 22, Regent St., W., and 45, Moorgate St., E.C.
DUBLIN: College Green.
LIVERPOOL: Church Street.

Manufactory and Show Rooms, Newhall Street, Birmingham.

Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

JOHN SHERWOOD & SONS, LICHFIELD STREET, BIRMINGHAM, SILVERSMITHS AND ELECTRO-PLATE MANUFACTURERS. Estimates for Mess Plate and Canteens supplied by return post. Licensees for the manufacture of the Hydrostatic Urns as in use at the Camp at Aldershot.

MILITARY DECORATIONS, WAR MEDALS, &c.

ORDER OF THE BATH, LEGION D'HONNEUR, and the MEDJIDIE, in all the different Classes and Sizes.

MINIATURE MEDALS, consisting of CRIMEAN, FRENCH, SARDINIAN, CAFFRE, and the whole Indian Series issued to the present time.

Clasps, Bars, Ribbons, &c., and Masonic Jewels of all kinds, manufactured and supplied by

PHILLIPS BROTHERS, Goldsmiths, &c., 22, Cockspur Street, London, S.W.

THE VICTORIA CROSS, OR NEW ORDER OF VALOUR.—The miniature Victoria Cross, made from the Gun-metal taken at Sebastopol, can only be obtained at C. F. HANCOCK'S, Jeweller and Silversmith to the principal Sovereigns and Courts of Europe. P.S. The Miniature Medals of the ORDER OF THE BATH, LEGION OF HONOUR, MEDJEDIE, with all the different clasps; also all the Miniature INDIAN MEDALS to the present time, with their clasps, bars, and ribbons, including the CRIMEAN, FRENCH, SARDINIAN, and CAFFRE.

38 & 39, Bruton Street, W.; and 152, New Bond Street, W.

20, COCKSPUR STREET, PALL MALL, LONDON, S.W.

E. WHITE, for several years principal assistant at Messrs. Dent's, of Cockspur Street, having taken the above premises (formerly occupied by Messrs. Green & Ward), respectfully solicits an inspection of his Stock, comprising a choice selection of CHRONOMETERS, WATCHES, CLOCKS, &c., all of which have been recently manufactured on the most improved principles, by workmen of the first talent.

20, Cockspur Street, London, S.W.

GOLD WATCHES, CHAINS, AND JEWELLERY, best quality, at moderate prices, at HASELDINE'S (Successor to Young), 3, Coventry Street, Haymarket, W. Diamonds, Pearls, and Plate purchased or exchanged.

BENNETT'S WATCHES, 65 & 64, Cheapside, E.C., in gold and silver, in great variety, of every construction and price, from 3 to 60 guineas. Every watch skilfully examined, and its correct performance guaranteed. Free and safe per post.

Money Orders to JOHN BENNETT, Watch Manufactory, 65 and 64, Cheapside, E.C.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

THE VOLUNTEER'S PATENT CLIP, the INDISPENSABLE, for suspending gloves or any other requisite instantaneously and safely. Send eighteen stamps to the Patentee, and by return of post one of these useful articles will be sent. Every rifleman in the country should have one.

CASTLE & Co., Patentees, 17, Colchester Street, Savage Gardens, E.C., and 3, London Road, Croydon, S.

COLOURED FLANNEL SHIRTS.
SOLD BY
THRESHER & GLENNY, 152, STRAND, W.C.

THE GORGET SHIRT, JOS. FRYER & Co., Patentees. 6 for 42*s*. Next door to the Haymarket Theatre, S.W.

HUGHES' "RIFLEMAN'S" Thrice Shrunk, Coloured FLANNEL SHIRTS; also their ANGLO-PARISIAN A 1 SHIRTS, 27*s*., 33*s*., 39*s*., 45*s*., per half-dozen; and FASHIONABLE COLLARS, 8*s*. 6*d*., 9*s*. 6*d*., 12*s*. 6*d*., per dozen, are unrivalled. Samples with infallible measuring instructions forwarded. Army, Navy, and General Outfitters, at SHIPPING PRICES, for India, China, Australia, &c. 203, Regent Street, W.

LEVEES AND DRAWING-ROOMS.

MESSRS. NICOLL have several SPECIMEN SUITS adapted for these purposes, and such are now ready for inspection or use, at Nos. 114, 116, 118, and 120 Regent Street, W., and 22, Cornhill, E.C., London, and No. 10, St. Anne's Square, Manchester, where, on personal application, official particulars may be obtained as to costume proper for persons of various ranks and degrees, who attend on state and other similar occasions.

SERVANTS' LIVERIES. — The best, at moderate prices, furnished, for cash payments, by H. J. and D. NICOLL, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, E.C., London; and No. 10, St. Ann's Square, Manchester.

LAWRANCE PHILLIPS' MILITARY OUTFITTING WAREHOUSE,
London, 28, West Strand, W.C.

UNIFORMS FOR THE ARMY AND NAVY.—An estimate for the outfit of any officer in H. M. Service post free.

VOLUNTEER CORPS.—Contracts entered into for the equipment of entire regiments. Single suits supplied.

PORTABLE FURNITURE.—An Illustrated Catalogue, with design, size, and price of every requisite for the barrack-room forwarded on application.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l*. 2*s*., from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

KOHLER'S PATENT HARMONIC CORNOPEAN.—An entirely new invention, and is in every respect worthy the attention of all Amateurs and Professors of Music. It is also most effective in a Military Band. Price 10*l*. 10*s*.

Estimates and drawings sent on application to JOHN KOHLER, Military Musical Instrument Maker to Her Majesty's Army and Navy, 35, Henrietta Street, Covent Garden, London, W.C.

ARMY, NAVY, EAST INDIA, AND COLONIAL AGENCY.

The undersigned act as GENERAL AGENTS in England for Officers and Members of the above services. A detailed Prospectus forwarded on application.

W. R. LOOKER & Co., 12, Pall Mall East, London, S.W.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,

JAMES COULSON & Co.,

Beg to intimate that their only London Depôt is at No. 46, PALL MALL, S.W.,
A few doors West of the Army and Navy Club.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especiallly for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARR, Chemist, 171, High Holborn, London, W.C., in bottles, 1*s*. each.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can *testify* that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission, Author of "Adulterations Detected." "The Urine in Health and Disease," &c.
Wimpole Street, 20th January, 1860.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, *Relish*, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of CROSSE & BLACKWELL, 21, Soho Square, London, W.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
WOTHERSPOON & Co., Glasgow and London.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.
Black or Green Tea, 2*s*. 8*d*., 2*s*. 10*d*., 3*s*., 3*s*. 4*d*., to 4*s*.

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

THE KOH-I-NOOR (OR MOUNTAIN OF LIGHT) CANDLE.—The name of KOH-I-NOOR has been appropriately given to a new and BEAUTIFULLY TRANSLUCENT CANDLE, manufactured only at the WEST OF ENGLAND SOAP AND CANDLE WORKS, AT PLYMOUTH. They are preferable in appearance to Wax or Spermaceti; are equal in brilliancy of light and durability in burning; and are supplied at *one-third less cost* than Wax and Spermaceti. West of England Soap and Candle Works, Plymouth.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, HORATIO MORGAN, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

GAY & SONS' DRESSING-CASES are the best and most reasonable.
113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street North, Strand, in the county of Middlesex.—SATURDAY, March 17, 1860.

A VERY interesting discusssion on the adaptation of metals to the construction of artillery, has been carried on at several successive weekly meetings of the Institution of Civil Engineers.* It could not fail to lead to the consideration of the systems of form and manufacture applied by different eminent inventors in their several propositions for the new rifled cannon.

Both Sir William Armstrong and Mr. Whitworth, the two great rivals now in the field, produced at different meetings a full-sized 12-pounder of their respective constructions, and each fully explained the good properties in them to which they laid claim.

The following points, however, suggested themselves to us during the discussion as being worthy of further explanation.

The very basis of the subject under discussion, namely, the nature of the force arising from the explosion of gunpowder, did not seem to be quite understood.

The reasonings on it were founded upon a fallacy, as regards artillery, in considering that the gun has only to resist the pressure of the volume of gas into which the solid substance of the gunpowder is expanded, laid down with much precision at so many pounds per square inch; whereas, by the rapidity of the action, there is a violent blow, as it were, to be provided for in addition. The force of this blow will hardly admit of calculation, but adds greatly to the pressure.

An illustration of this effect may perhaps be given in certain trials on the power of a spiral spring for buffers for railway carriages; these springs were found to possess great tenacity in drawing or resisting the gradual pressure of enormous loads, but when there was a desire to show that they might act beneficially in some cases of collision, and a locomotive was run upon a train of carriages at rest, although at a rate of only two or three miles an hour, they broke at once at the impulse.

Such is the shock, then, which the gun has to sustain, in addition to the pressure caused by the expansion.

There is another force also brought to bear on the gun, which has not entered into the calculations, and that is the great heat which is suddenly generated.

The very rapid expansion of the inflamed gas has a great tendency to disintegrate any fibrous material, and penetrates into the most minute interstices of the metal, and if it finds an outlet to the air through a small passage, it acts like a blowpipe. In this way the vents of the cast-iron heavy guns at the sieges in the Peninsula, after quick firing of hundreds of rounds, were enlarged from the size of a small quill to rugged openings that would admit two or three fingers.

It is these effects that have caused disappointment to many of the older inventors of guns, who had only taken the simple pressure into calculation.

The next matter on which discussion arose was the best material and principle of manufacture.

Here we have the old cast-iron and the brass, hoops applied hot or cold, twisted bars, envelope of coils of wire, the homogeneous metal, steel, &c.

Some gentlemen have declared that they have not lost all faith in cast-iron; but, as we think, with little reason.

The very great weight that must necessarily be given to cast-iron guns is a most serious disadvantage; but the main objection to them is in the uncertainty of their strength—some sustaining a very large amount of firing, while others yield at very much less. These guns are received from the founder, all manufactured of the same metal and with the same precautions, and all looking equally beautiful; and yet, on proof, many burst.

One gentleman, an officer of experience, quoted cases of the vast number of rounds which two or three individual guns had sustained; but they must be held as excedtions and not as establishing a rule.

After the experience of launching the Great Eastern we think that few engineers, where extraordinary efforts were required, would now trust to cast-iron for hydraulic presses.

The principal plea for the employment of cast-iron is that of turning to account the large stock in hand by rifling them; but even that plea is insufficient when the consequence will be a decidedly inferior article. And then it must be remembered that the shot and shells, which are by far the largest item in hand, will not form a part of the compromise, but will be entirely obsolete and only of the value of so much crude metal.

Brass guns are much more costly; but as they could be made much lighter, they were adopted for service in the field for the greater facility of transport; they did admirably for field pieces, that is, up to the 12-pounder, but failed for heavier guns.

Brass guns, however, were used till very modern times for battering-trains, in consideration of their lightness for drawing over difficult countries, or, at all events, when means of transport were always a very serious difficulty with an army; and although the system of firing them not oftener than five or six times per hour was laid down in books, the reason had been so far lost sight of that, during experiments tried at some French fortress on other objects, shortly before the Revolution, some heavy brass guns were fired rapidly, and gave way. The contractors who furnished them were brought to account, but were exonerated on proving the perfection of their metal and mode of manufacture.

This gave rise to distinct trials and investigations, when the truth was again discovered; but the Revolution then breaking out, and throwing everything into confusion, no decision was arrived at, and the result was not generally promulgated or known.

In 1811, for the first siege of Badajos, we procured a battering train from the neighbouring Portuguese fortress of Elvas, the guns being of brass, 18 or 24-pounders. Time was very limited, batteries for breaching hastily constructed, and the firing rapid and continued: the guns very generally failed, not by bursting, but by bending, the bores no longer remaining straight. The failure was attributed to the imperfection of Portuguese manufacture, whereas it was due to the properties of the metal, which will not stand the amount of heat generated by the continued explosions of such large charges.

At our subsequent sieges, we used cast-iron guns, not so much even then from being fully aware of the weakness of the brass, as because they could be more readily obtained, and were so much cheaper; the consequence, however, was rather striking, for the iron guns bore the most continuous firing, and most of them remained serviceable for the period of a siege; and this was one leading element in enabling the operations to be carried through so rapidly that, in an intercepted letter from Marmont (himself an artillery officer), he professed not to be able to understand how the siege of Ciudad Rodrigo could have been brought to a conclusion so early.

The reduced charges of rifled guns, and the breech loading, will greatly reduce the heating of the gun, but will probably not entirely get rid of the evil; and, as the other metals, and modes of manufacturing guns will, without being more costly, possess qualities superior to those of the brass, and will certainly remove the defect, we may consider the days of brass guns to be numbered. With regard to the other metals and modes of giving them strength, they are of such novel introduction that we can scarcely reason much at present on their comparative merits.

So far as the trials have yet gone, they all seem to be capable of being made of great lightness, and of a tenacity to withstand a great amount of firing; though more proof might be desirable with the heaviest calibres in this last item.

Other qualities, however, have still to be investigated.

The principal systems of rifling are the oval, the polygonal, and the grooved; the two former may be called smooth bores, may have their missiles of one hard metal, and may be made to load from the muzzle as well as the breech; the grooved requires a missile coated with lead or other yielding material, and must be loaded at the breech.

All of them have given great results in length of range, low angles of elevation, and precision of fire; some with greater perfection than others,—a matter of much value certainly. But other properties, such as durability, simplicity, and cost, must also be compared; for, putting an extreme case, that where all gave great results, and the one that produced the best effect in shooting, was far inferior in the other properties, it would reasonably be rejected on that account; therefore, the shooting qualities, the only ones as yet thoroughly tested, or even much inquired into, are not conclusive.

By durability is not meant alone the power of withstanding the effect of any amount of being fired, but ordinary wear and tear, also that of atmosphere by exposure for lengthened periods, and degrees of rough usage; to all which under every reasonable precaution they must be liable.

By simplicity is meant a form and mode of construction and manufacture, that can be ensured at all times in equal perfection and in large quantities; for it is not sufficient to show effects that can be only produced by a beautiful and elaborate effort of art, not capable of being indefinitely multiplied, with rapidity, and to the same perfection.

Relative simplicity is also to be considered in the several parts of which the piece may be composed, and in what is required in its service.

Cost, to a certain degree, is of the least consequence.

There is scarcely any extent of outlay to procure superior perfection in warlike implements that is not only justifiable, but thoroughly economical, in the indirect bearings which they may have on success in war, and perhaps with smaller means; and the greater expense absolutely necessary to attain this perfection we may suppose should be in favour of our country, which can best afford it, and which, by its foreign possessions, and many holds of minor importance, is best able to turn to account obsolete articles during a period of transition.

But, cost is of importance when not absolutely necessary to obtain an adequate amount of benefit. Thus, if there be only very moderate advantages in one system over another that can be procured at far less cost, then the expense will form a very influential item in the comparison.

In estimating the relative value of different systems, these properties of durability, simplicity of construction and use, and of cost, will be subjects for consideration with regard to the shot and shells, equally or even more so than as regards the gun; for they are required by hundreds of thousands, and ought to be such as will be always rough and ready, and efficient; and here, there is an inconvenience that pervades them all, which is the superior care that will now be required for them.

The old spherical shot and empty shells could be manufactured almost anywhere; they were knocked about in all directions, and with a little paint now and then remained for years piled in the open air. The new must be treated differently; they are of a more refined manufacture and must be housed, and perhaps require more or less even additional precautions to preserve them in an efficient state; and in this will be another element of relative value.

Artillery officers, from practice and experience,

* Amongst the engineers and others who took part in the discussion were Mr. Bidder, the President, Sir W. Armstrong, Mr. Whitworth, Sir John Burgoyne, Colonel Eardley Wilmot, Captain Boxer, Mr. Abel, Captain Moorsom, Mr. Longridge, Sir Charles Fox, Captain Blakeley, Mr. Anderson, Mr. Lancaster, Mr. Bashleigh Britten, Mr. Hadden, and others.

Digitized by Google

attach great consequence to the utmost degree of strength and simplicity in all the appendages and apparatus for working the guns; they find loose or separate parts objectionable, and require the adjuncts and appurtenances to be of as much solidity and as little in projections liable to accidents, as possible.

In most of the new guns, to produce the most striking effects in competitive or other trials, a refined system of sights and elevating and tangent screws have been applied, that at once give an appearance of liability to be disturbed; this might prove very objectionable unless they be so contrived that if accidents should occur to them the piece would be still quite serviceable, and still be capable of being used with great precision, although not quite to the utmost perfection attainable with them; and for this reason it will be of great importance to prepare the gun for the best service possible independent of them.

There is much contention on the part of the advocates for each gun as to priority of invention, the assumed borrowing from one another, &c.; it is to be hoped that some satisfactory arrangements may be made, to enable the final system for adoption to partake of whatever may be preferable in each, so as to make up as perfect a whole as possible.

As regards the effect of the rifled guns in actual warfare, it is evident that, combined with the improved rifle musket, it will require many changes in the principles hitherto practised.

We can as yet have but vague ideas on the subject. Much will have to be established by actual practice in war; few are competent yet to reason deeply upon it. Still, we cannot be too early in considering it in all its several bearings.

Among the first impressions that strike us will be, that masses of troops cannot be exposed to open view at rest, or in deliberate movements, as they have hitherto been.

In contemplating the terrific effect of these guns, we complacently adopt a kind of impression of a calm unobstructed service by them on a quiescent enemy; whereas, the result will no doubt be in action that, to reduce its destructive fire, artillery will hereafter act against artillery more than has hitherto been permitted, more ammunition will be expended; and that which shall carry the greatest number of rounds per gun will have a great advantage. But the influence of even the new artillery will be greatly reduced by the power of the rifle musketry against it.

We do not expect that its effects on attack and defence of fortifications for their absolute reduction will be so great as first impressions would lead to believe. For all cannonading that can be effective at considerable distances, and where near approach is not attainable, it will be very valuable; but all good works are so covered, that to force them it is absolutely necessary to close with them, and in close action no advantage is gained by the new weapon.

In enfilade and ricochet their capabilities have yet to be proved.

To vertical fire also (an important item in sieges) no attention has yet been turned, though no doubt a valuable system for it will soon be established.

In contests between shore batteries and shipping, these guns will be very essentially in favour of the former, from their great power and precision. They will also afford a perfectly new facility for cannonading from very long distances any great open space that may be exposed to view, though perhaps perfectly protected against close approach. Thus, arsenals and other valuable establishments may be ruined from distances never hitherto contemplated as possible; and to prevent which will require an enormous development of defences.

One consequence that will surely arise from the introduction of the rifled guns, though at present resisted, will be the substitution of much lighter pieces for the great mass of the field artillery with an army.

The field pieces were formerly chiefly 6-pounders, and were gradually augmented to 9 and 12-pounders, not on account of the weight of shot hitting a heavier blow, which against troops would be worth nothing; but to obtain superior ranges, low angles of elevation, and general precision of fire,—all of which are now as good with the 3 as the 12-pounder; while the weight of the piece, and what is of much more importance, of the ammunition, is so much less, that two horses will transport as many guns and rounds of ammunition in the one case as would require from 4 to 8 in the other.

The only objections stated are in size of shell, and effect in hitting guns or carriages; and these would be more than compensated by the greater numbers fired.

Mr. W. Gamble has been appointed, by competitive examination, to a clerkship in the gun-factory department at Woolwich Arsenal.

THE ARMY.

2nd Life Guards. There are now but two cornets on the strength of this regiment instead of eight. For more than a year no candidate has appeared to supply the vacancies.

2nd Dragoon Guards. Captain Horne, Lieut. Betty, and Cornet Weir have arrived in India to join head-quarters of the regiment.

6th Dragoon Guards. Surgeon Baxter is about to exchange with Surgeon Turnbull, 12th Lancers.

6th Dragoons. The retirement from the service, by the sale of his commission, of Lieut. Hon. W. O. B. Annesley, published in G.O. dated Simla, Aug. 3, 1859, is, under instructions from the Horse Guards, cancelled.

8th Hussars. Paymaster Duberly is on leave to Mount Aboo to July 15. Captain Webster is acting as paymaster in his absence.

12th Lancers. Colonel Fyler has arrived home by the overland route preceding the regiment. Surgeon Turnbull is about to exchange into the Carabineers.

14th Light Dragoons. The Commander-in-Chief has issued the following farewell address to H.M.'s 14th Dragoons, on leaving India for England:—"Her Majesty's 14th (the King's Own) Light Dragoons will embark for England by detachments on the 11th and 13th February, and the Commander-in-Chief, while congratulating the regiment on its return home, after a long tour of duty in India, desires to record the highly honourable and gallant service rendered by this distinguished corps since its return to this presidency from Bengal. The breaking out of the war with Persia altered the destination of the regiment from England to that country; on its return from that campaign, the regiment landed in Bombay, and was hastily despatched on field service to aid in the suppression of mutiny and rebellion in Central India. The distinguished and gallant conduct of the regiment in that brilliant but arduous campaign are matters of history, and won for it the frequent and well-deserved praise and applause of their distinguished Commanders, Colonel Sir Charles Stuart, and Major-General Sir Hugh Rose. Her Majesty has been pleased to acknowledge the brilliant service of this regiment by the distinction and promotions bestowed upon the officers whose noble leading has been so frequently noticed in the public despatches. In saying farewell to all, the Commander-in-Chief wishes the regiment a speedy and prosperous voyage home, and a happy meeting with long absent friends."

15th Hussars. A strong troop which had been detached to Castlebar has rejoined head-quarters in Dublin.

Royal Artillery. Lieutenant Stoney has been ordered home from India, and to report himself at the Royal Military College, Sandhurst.

Assistant-Surgeon F. H. Forshall, has leave to England from India.

Royal Engineers.—The recruiting in anticipation of the augmentation of the corps, which will take effect from the 1st of April, is proceeding briskly, and a number of intelligent young men, most of them good mechanics and handicraftsmen, have lately arrived at head-quarters, Chatham, to join the detachments.

Colonel Hadden, R.E., has succeeded Colonel Wulff, R.E., as commanding officer of Royal Engineers in the eastern district.

Lieutenant C. H. C. Halkett and Lieutenant F. G. Oldham, R. E., have left the Royal Engineer establishment, Chatham, and proceeded to Sheerness, where they are to be stationed.

Grenadier Guards. A large and very elaborate silver and ebony clock has just been completed by Mr. Hancock for the Earl of Sefton, for presentation to the officers of the 3rd battalion of Grenadier Guards, on his lordship's retirement from the regiment. The whole design of the clock is rich, though simple, its shape and outline very bold, and the general effect both handsome and in good taste. At the base of the pedestal on which the clock is raised are four statuettes, representing the non-commissioned officers who most distinguished themselves during the arduous service of the 3rd battalion in the Crimea. Over the clock are winged Victories, in silver, supporting wreaths; a large military trophy, of groups of flags and weapons, elaborately chased, surmounting all. The contrast between the frosted silver and the ebony is, of course, very marked, the metal being thrown up in strong relief, which sets off admirably the bold, yet easy military attitudes of the four statuettes we have mentioned, all of which are executed with considerable skill and truth to nature. Both the design and the way in which it has been carried out reflect high credit on Mr. Hancock's establishment. The clock has now been sent to Dublin, where the 3rd battalion are quartered, and where Lord Sefton will arrive to present it to the officers of the mess in the course of the ensuing week.

4th Regiment. Captain J. Constable and Lieutenant R. C. Durrant have been posted to 1st battalion. The details of this regiment, consisting of Ensigns W. Freeman, R. Bayly, and G. Sweny, and Assistant-Surgeon P. Kearny, in medical charge, and 267 rank and file, under the command of Captain T. P. B. Forster, were to proceed to Vaux Tomb, at the mouth of the Taptee, in the Peninsular and Oriental steamer Norna, on the 25th of February. The right wing, consisting of Captains F. Sheppard, C. P. Stokes, J. Howley, and J. Constable; Lieutenants C. E. Breton, F. Burridge, C. R. Hammond, C. E. Billing, and C. R. Durrant, and Assistant-Surgeon J. Aikin in medical charge, and 350 rank and file, under the command of Major F. Martin, were to embark from thence on board the Norna, and proceed to Aden. The steamer Pleiad left on the 24th for the mouth of the Taptee, to embark the wing on board the Norna. Captain Madden has arrived home from India in charge of sick detachments of various regiments.

7th Regiment. Lieutenant W. J Frampton is appointed to 1st battalion, and Captain H. Plummer to 2nd battalion.

8th Regiment. Captain W. F. Metge is posted to 1st battalion.

9th Fusiliers. Colonel Poulett Somersett, M.P., has arrived in England from Gibraltar to attend his parliamentary duties.

11th. Regiment. The 1st battalion will move from Aldershot to Portsmouth on Tuesday, relieving the 1st battalion Rifle Brigade.

20th Regiment. Lieut.-Colonel G. Bennett, Captain G. B. Duffin, and Lieutenant C. Enys, are posted to 1st battalion; Major W. D. S. Dickins, and Captain A. R. Warren, to 2nd battalion.

23rd Regiment. Captain C. F. Gregorie is ordered to join the 2nd battalion.

31st Regiment. The following officers and details of H.M.'s 31st Foot have proceeded by the following vessels to China, from Bombay:—Per H.M.'s steamer Assaye: Captain Mitchell, Captain McGregor, Lieutenant G. Gardiner, and Assistant-Surgeon C. Giraud, in medical charge, and 260 men, under the command of Major C. Swaffield. Per transport ship Earl of Clare: Captain S. Christian, Captain J. Harcourt, Lieutenant G. Hamilton, Lieutenant A. Jebb, Ensign A. Dangell, Ensign J. Wood, and Assistant-Surgeon W. Grant, in medical charge, and 340 men under the command of Major Eager. Per H.M.'s steamer Victoria: Captain T. E. Sweetenham, Lieutenant C. McIntyre, Ensign R. Huxham, Ensign F. Buller, Ensign A. Gow, and Assistant-Surgeon B. Giraud, in medical charge, and 226 men, under the command of Captain W. F. Macbean. Per transport ship Athlete: Captain G. Baldwin, Lieutenant F. Cassidy, Lieutenant R. F. Gould, Ensign W. Tibbitts, Ensign A. Mayward, Lieutenant and Adjutant W. H. James, Quartermaster C. Kettyles, Surgeon Watkinson, in medical charge, and 350 men, under the command of Lieut.-Colonel and Brevet-Colonel F. Spence.

34th Regiment. Lieutenant Cochrane has been appointed (temporarily) Aide-de-Camp to Sir John Inglis.

37th Regiment. Lieutenant Hawkes has been appointed Adjutant.

42nd Regiment. Assistant-Surgeon W. A. Mackinnon has obtained leave to England, under new rules, on m.c.

46th Regiment was under orders for Jullundur, according to the last intelligence from India.

Royal Marine Light Infantry. A general parade took place, on Thursday, at Woolwich, when Colonel Stransham presented to Acting Sergeant-Major Woon, late of the 1st battalion, serving in China, a silver medal, awarded to him by the Lords of the Admiralty for "meritorious conduct, especially for his gallant behaviour while serving in China." Sergeant-Major Woon has likewise been granted an annuity of 10*l*. This non-commissioned officer succeeded in saving the life of one of his officers, as also of a drummer-boy, about 14 years of age, during the assault upon the Chinese battery in the Peiho. Colour-Sergeant Francis, wounded in the foot under the Chinese forts, was presented at the same time, by Colonel Stransham, with a medal, awarded by their Lordships for long service and good conduct, which carries with it a gratuity of 15*l*. Several privates, invalids recently joined from China, for survey, on account of wounds, then present, were in succession promoted, in the presence of the battalion, to the rank of corporal; one corporal was made a sergeant, and the distinction of the colours was conferred on Sergeant Donnell, who had received three wounds.

The whole of the officers belonging to the Chatham division of Royal Marine Light Infantry, with the exception of those on service, are ordered to join head-quarters, the system of summer field-days having been ordered to commence to-morrow morning, and will be continued every Tuesday and Thursday. The marching of the battalion into the country for exercise has been discontinued.

52nd Light Infantry. Captain Bourchier has arrived in India from the depôt to join head-quarters.

53rd Regiment received orders on February 6th to hold itself in readiness to embark for England. The regiment was expected to leave about a month hence.

57th Regiment. Lieutenant Tragett is on his passage home from Bombay *vid* the Cape.

60th Royal Rifles. A letter from the head-quarters of the 1st battalion, Fort William, February 11, states that the battalion has received orders to proceed forthwith to embark for England. The 1st battalion, previous to embarking, will give volunteers to the 2nd battalion, which is to proceed to China; the 1st battalion has been in Bengal 15 years. Lieut.-Colonel Pretyman, of the 4th battalion, who would be placed on half-pay by the return home of the 1st battalion, has been appointed to the command of the Walmer Depôt Battalion, in place of Colonel Whitmore. Sir John Jones is transferred from the 1st to the 4th battalion. Captain Bowles and Lieutenant Heathcote have resigned the Indian staff appointment, in order to accompany their battalion (the 2nd), ordered on service to China.

74th Highlanders. Lieutenant R. F. Martin has arrived in England in command of sick detachments of various regiments in the Madras Presidency.

79th Foot. Lieutenant H. De Carteret, has leave home from India.

81st Foot. Assistant-Surgeon J. W. Mullan, has leave home.

83rd Regiment. Captain Meurant and Lieutenant Onslow have arrived home from India.

93rd Foot. Captain C. H. Levinge has obtained leave to Deyrah, from Jan. 14 to Oct. 14, medical certificate.

94th Regiment. Lieutenant Butler is appointed Fort Adjutant at Attock.

95th Regiment. Lieutenant Cubitt is on his way to England *vid* the Cape.

98th Regiment. Lieutenant C. H. Griffin has been appointed to the Station Staff at Raneegunge. Lieutenants S. H. Heywood and G. W. Smith are on sick leave to England.

Rifle Brigade. The 1st battalion, under the command of Lieut.-Colonel Lord A. Russell, will move on Tuesday from Portsmouth to Aldershot.

Cape Mounted Rifles. Orders have been received at Chatham from the War-Office for 140 non-commissioned officers and men of the Cape Mounted Rifles to be held in readiness to embark for the Cape of Good Hope early in the ensuing month, in the ship Theresa, from Gravesend.

Army Hospital Corps.—Orders have been received at Chatham, from the Army Medical Department, for Major S. G. Bunbury, commanding the Army Medical Corps, to discharge those men of the medical staff corps who have not volunteered. The number to be discharged is 54 men of all ranks, who have refused to join the new army corps.

Digitized by Google

CHATHAM GARRISON.—The following officers have joined their respective corps at this garrison :—Colonel R. N. Phillips to take the command of the 2nd battalion, and Lieut.-Colonel C. E. Fairtlough to command the 3rd battalion; Major J. Lawrie, 3rd battalion, vice Major Rowlands; Major Buchanan, 1st battalion, vice Major Ellis; Lieutenant S. T. Sargent, 43rd Light Infantry; Lieutenant J. M. Macneil, 53rd Regiment; Lieutenant W. H. Urquhart, 75th Regiment; Ensign W. W. Chard, 7th Fusiliers; Ensign W. Tolson, 35th Regiment; Ensign H. D. Rooke and Ensign W. E. S. Battiscombe, 53rd Regiment; Ensign C. C. Welman, 77th Regiment; and Ensign H. H. Roberts, 91st Regiment.

Colonel Dixon has returned to the camp at Colchester, after leave of absence, and has resumed the command of the 9th Depôt Battalion.

Orders have been received from the War Office for the commencement at Hartlepool of barracks to accommodate 800 men.

Orders have been forwarded from the Horse Guards to all the military storekeepers cancelling the order of the 23rd February, 1859, relative to the transmission of quarterly store accounts, which, under the new regulations made by Mr. Secretary Herbert, are considered to be no longer necessary.

Major-General Sir John Michel, K.C.B., who is appointed to the command of a division of the British Army in China, arrived in Bombay on the 24th February, from Mhow, accompanied by Lieut.-Colonel Elkington, A.B.C.

Lieutenant T. H. Ouchterlony, of the Regiment of Artillery has been appointed aide-de-camp on the personal staff of the Commander-in-Chief of Bombay.

It is determined, we understand, that the barracks in the hill stations near Simla shall in future be occupied by invalids from the various regiments, who are to be selected by the officers in command, and *not* by the medical men; and that no regiments will be stationed in those barracks in future. One wing of the Nusseeree Battalion will be stationed at Jutog, another in Kangra.

Major-General M'Cleverty who has lately been appointed to the command of a division of the Madras Army, sailed for his destination on Tuesday from Southampton.

Thomas Sharp, who lately kept the Club at Aldershot, has appeared this week in the Bankruptcy Court. It appeared that he was formerly in the East India Company's service, from which he had retired on a pension. Towards the close of 1856 he was induced to embark in the hotel business at Aldershot, which had turned out unfortunate. The bankrupt passed unopposed.

The *Sydney Morning Herald* states that the Government of India is about to establish a permanent cavalry depôt near Sydney. Colonel Atkinson will be the superintendent. The colonial journal believes that Sydney can supply a large proportion of the horses required in India, and instances the export of 5376 horses to Victoria during 1858. During 1857, 1858, and the first three quarters of 1859, no less than 2218 horses were shipped for India. They were officially valued at 52,540*l.*, or about 25*l.* a horse, but that figure of course does not represent the expense to Government.

The following casualties by death in the armies of India have been reported by the last mail :—Lieutenant Stuart J. M. Maxwell, Royal Horse Artillery, at Umballa, Jan. 23. Bengal: Captain H. Evans, Bengal Horse Artillery, at Meerut, Feb. 8. Madras: Major William Dhoyle, late 2nd Madras L.C., at Trichinopoly, aged 63, Feb 9; Lieutenant W. U. E. Gompertz, 16th N. I., of fever, Feb. 14. Bombay: Ensign T. H. Young, attached to the 23rd N.L.I., at Nassick, Feb. 4.

The following *Division Order* has been issued by Sir John Inglis on leaving Cawnpore for Bungalore :—"Head-quarters, Cawnpore, 15th Feb. 1860.—Major-General Sir John Inglis, in relinquishing the command of the Cawnpore Division, tenders his warmest thanks to all the officers of the Divisional and Brigade Staff for the cordial assistance they have afforded him, and for the readiness they have one and all evinced to meet his wishes on every point connected with their several departments. To Major G. S. Young in particular, as acting-deputy-assistant-adjutant-general, the major-general feels greatly indebted for the very valuable aid he has constantly afforded him, and for his friendly co-operation in carrying out his orders—and he must also express his great satisfaction with the zeal and activity displayed by Captain Maxwell, the acting-deputy-quartermaster-general in the performance of the duties of his office, which for the last six months at this station have been very arduous. Although Major MacDonald, of the same department is not now in the division, the major-general cannot refrain from expressing his acknowledgments to that officer for the very able assistance he rendered in superintending the movement of troops at Allahabad the last hot season. To all under his command the major-general bids a hearty farewell, and assures them he shall always rejoice to hear of their welfare and prosperity."

SHORNCLIFFE CAMP.

Detachments of the 47th Regiment have, during the past week, been engaged under the direction of instructors from the Royal Engineers in making fascines and gabions, to be used in the construction of a four-gun earthen battery, about to be formed near the new gun sheds at the north-east part of the camp overlooking the valley towards Seabrook.

The troops have discontinued the marching out, which has been carried on during the winter. Battalion drill has commenced, and is being carried out with considerable activity whenever the weather permits. The drainage of the square is now finished, and the result is that the ground has become dry on the surface, thus rendering it fit for any manœuvres that may be desired.

The drill instructors of the Royal Artillery are busily engaged daily in drilling a large number of recruits that have lately joined the corps; many of them are discharged artillerymen of the (late) East India Company's Service, who have joined Her Majesty's Army on their landing in England, after claiming their discharge in the East.

On Tuesday and Wednesday last the Shorncliffe and Folkestone military steeplechases took place in the meadows near Broadmead Farm, about half a mile from the camp; the sport gathered a large number of military men from Dover and Canterbury garrisons, as well as from Shorncliffe, and also a goodly sprinkling of civilians. The weather, unfortunately, was of an unsatisfactory character.

The authorities of the War Department having sanctioned the establishment of a soldiers' institute, for providing the means of instruction and rational recreation to the troops, a library, &c., is in the course of erection.

COLCHESTER CAMP.

Colonel C. Hadden has assumed the duties of commanding Engineer at this station. He is about to move his office from Harwich, where Colonel Wulff, his predecessor, resided, to the neighbourhood of the camp at Colchester. This will probably move Captain Clarke, R.E., from the camp to Harwich. Colonel Blucher Wood, C.B., has been been closely inspecting the books and interior economy of the two battalions in camp. He has also had each battalion at drill on the Government land at Middlewick Farm.

ARMY GAZETTE.

WAR OFFICE, PALL-MALL, MARCH 23.

1st Regiment of Dragoon Guards—Cornet William Potter Stephenson, from the 5th Light Dragoons, to be Cornet, vice Baillie, who resigns; March 23.

9th Light Dragoons—Lieutenant Alexander Morrogh to be Captain, by purchase, vice Brevet-Lieut.-Colonel Coles, who retires; Cornet Robert Bury to be Lieutenant, by purchase, vice Morrogh; March 2.

10th Light Dragoons—Ensign Charles Stephen Freemantle, from the Rifle Brigade, to be Cornet, vice Child, appointed to the 4th Dragoon Guards; March 23.

Royal Artillery—Brevet-Colonel Sir David Edward Wood, K. C. B., to be Colonel, vice Warde, removed as a General Officer; Brevet-Major John James Brandling, C.B., to be Lieutenant-Colonel, vice Sir D. Wood; Second Captain the Honourable Leonard Allen Addington, to be Captain, vice Brandling; Second Captain Major Francis Downes, from the Supernumerary List, to be Second Captain, vice Addington; March 8. Veterinary Surgeon Henry Hussey has been permitted to resign his commission; March 1.

Royal Engineers—Lieutenant Edward Osborne Hewett to be Second Captain, vice Brevet-Major Elphinstone, seconded; Feb. 1.

3rd Regiment of Foot—Archibald Cochrane Forster, Esq., to be Paymaster, vice Syms, deceased; March 23.

7th Foot—Ensign Frederick Charles Keyser, to be Instructor of Musketry, vice Captain Adrian Bennett, who has resigned that appointment; Jan. 4.

10th Foot—The second Christian name of Ensign Rendle is Edgcumbe and not Edgecumbe as stated in the *Gazette* of 9th instant.

14th Foot—Lieutenant Iver McIver to be Captain, by purchase, vice Vernede, who retires; Ensign James Stephen Johnson to be Lieutenant, by purchase, vice McIver; March 23.

16th Foot—Captain Annesley Cary, from the 31st Foot, to be Captain, vice Gammell, who exchanges; Ensign Robert William May Wetherell to be Lieutenant, by purchase, vice Chippindall, who retires; March 23.

20th Foot—Ensign George Edward Bolger, to be Lieutenant, without purchase, vice Holmes, deceased; Jan. 10.

25th Foot—Robert William Thomas Dawson, Gent., to be Ensign, by purchase; March 23. The transfer, of Lieutenant Edward Seppings Lock, from the 82nd Foot, as stated in the *Gazette* of 13th Jan., has been cancelled.

26th Foot—Lieutenant Edward Kempson, to be Instructor of Musketry, vice Lieutenant George Wilbraham Northey, promoted to a company; Feb. 21.

28th Foot—Francis Henry Palmer Duncan, Gent., to be Ensign, by purchase, vice Cuff, who retires; March 23.

30th Foot—Lieutenant Henry F. Morewood to be Instructor of Musketry, vice Captain Charles John Moorsom, who has resigned that appointment; March 1.

31st Foot—Captain Andrew Gammell, from the 16th Foot, to be Captain, vice Cary, who exchanges; Lieutenant George Bayley to be Captain, by purchase, vice Leeson, who retires; Ensign John Michael Bradley Wood to be Lieutenant, by purchase, vice Bayley; March 23.

34th Foot—Thomas Wheeler Gillham, Gent., to be Ensign, by purchase, vice Leeson, promoted; March 23.

36th Foot—Lieutenant William Fermoy Godfrey, from the 94th Foot, to be Lieutenant, vice Wilson, who exchanges; March 23.

46th Foot—Ensign George T. Delmé Radcliffe, to be Lieutenant, by purchase, vice Speke, whose promotion by purchase as stated in the *Gazette* of 23rd August, 1859, has been cancelled; Henry Patten Law, Gent., to be Ensign, by purchase, vice Carlow, promoted; March 23.

53d Foot—Brevet Major James Herne Wade, from the 90th Foot to be Captain, vice Cox, who exchanges; March 23.

56th foot—George Wilding Wood, Gent., to be Ensign, by purchase, vice Charley, promoted; March 23.

60th Foot—Ensign Pennyman White Worsley, to be Instructor of Musketry, vice Lieutenant J. K. Watson, appointed Lieutenant-Instructor at the School of Musketry at Hythe; Feb. 15.

61st Foot—Lieutenant Charles Henry Boileau to be Adjutant, vice Vicars, promoted in the 18th Foot; March 23.

62nd Foot—Lieutenant Charles Mesham, from the Ceylon Rifle Regiment, to be Lieutenant, vice Kerr, who exchanges; March 23.

74th Foot—Lieutenant Frederick Nind Woodall to be Instructor of Musketry, vice Lieutenant Henry Jamieson, who has returned home sick; March 2.

77th Foot—Ensign John Lenthal Davids to be Lieutenant, by purchase, vice Jordan, who retires; William James McClelland, Gent., to be Ensign, by purchase, vice Davids; March 23.

81st Foot—George Buchanan Bevan, Gent., to be Ensign, by purchase, vice William Mitchell Innes, appointed to the 13th Light Dragoons; March 23.

88th Foot—Sergeant George Hill to be Ensign, without purchase, in succession to Lieutenant Evans, promoted, without purchase, to an Unattached Company; March 23.

90th Foot—Captain George Herbert Cox, from the 53rd Foot, to be Captain, vice Brevet-Major Wade, who exchanges; March 23.

94th Foot—Lieutenant Clifford Wilson, from the 36th Foot, to be Lieutenant, vice Godfrey, who exchanges; March 23.

Rifle Brigade—Ensign Charles Walker Robinson to be Lieutenant, by purchase, vice D. A. Gordon, who retires; George Hope Verney, Gent., to be Ensign, by purchase, vice Robinson; March 23.

3rd West India Regiment—Ensign Frederick Chandos Clifton to be Lieutenant, by purchase, vice Green, promoted; Ensign Thomas Colclough McCormick to be Lieutenant, by purchase, vice Scott, retired; March 3.

Ceylon Rifle Regiment—Lieutenant John Manners Kerr, from the 62nd Foot, to be Lieutenant, vice Mesham, who exchanges; March 23.

Cape Mounted Riflemen—Surgeon John Knox Leet, from the Staff, to be Surgeon, vice Montgomery, who exchanges; March 23.

DEPÔT BATTALION.

Captain Edward Herrick, 12th Foot, to be Instructor of Musketry, vice Fairtlough, appointed Captain-Instructor at Hythe; Feb. 27.

HOSPITAL STAFF.

Inspector-General of Hospitals James Brown Gibson, M.D., C.B., to be Director-General of the Army Medical Department, vice Director-General Thomas Alexander, C.B., deceased; March 23.

Surgeon Alexander George Montgomery, from the Cape Mounted Riflemen, to be Surgeon, vice Leet, who exchanges; March 23rd.

BREVET.

Colonel Francis Warde, to be Major-General, vice Russell, deceased; March 8.

In consequence of the promotion of Colonel Warde, the under-mentioned officers, on retired full-pay, who stood next above him on the effective list at the time of their retirement, to be Major-Generals :

Colonel Anthony Richard Harrison; March 8.

Colonel Henry Richard Wright; March 8.

Brevet-Major Charles T. E. Hinde, 65th Bengal Native Infantry, to be Lieut.-Colonel in the Army; July 20, 1858.

Captain Ralph FitzGibbon Lewis, 86th Foot, to be Major in the Army; March 23.

THE FIELD-DAY ON PORTSDOWN HILL.

On last Thursday some brilliant manœuvres were executed by the whole of the garrison at Portsmouth. The troops engaged consisted of the 1st Battalion of the Rifle Brigade, 1st Stafford Militia, the East Kent Militia, and the Bedford Militia. The Militia regiments were furnished with 10 rounds and the Rifles with 15 rounds of ammunition. At an early hour the East Kent and the Bedford Militia turned out, and marched to the foot of Portsdown Hill. From what we could gather, it appeared the Rifles and the Bedford Light Infantry left their barracks and proceeded along the Landport Road, where they also halted, and threw out pickets so as to command the country from the approach of Southwick, to the left, and as far as the road leading down towards Waterloo on the right of the Petersfield Road. This was the advanced position, and was under the command of Lord A. G. Russell.

Another portion of the garrison, consisting of the East Kent Militia, left barracks at 8·15, and took up a position at the little village of Milton, and halted in a field on the right of the road.

The Staffordshire Militia left barracks at 8·30, and marched by Landport to the field in the rear of the new lines on the left side of the road. This regiment then sent out a strong picket to Cosham, and patrols on the road to Porchester and Havant.

If, to the above disposition of the forces, we add that the battery at Hilsea, under the command of Major-General Foster, took up a position on the summit of Portsdown Hill, to command the approaches from the north, and to act in conjunction with the Rifles and the Bedford Light Infantry, under the command of Lord Russell, we shall have indicated the whereabouts of the different bodies previous to the commencement of the attack.

The first intelligence that the supposed enemy was in sight came from two guns on the crest of the Down. The fusillade then began, skirmishers popping about and lining the hedgerows; the artillery being in position on a knoll in the rear. After a considerable deal of firing the skirmishers retired upon their supports, and this process of fighting and retiring was repeated at all the available positions, until the main body reached the windmill, so conspicuous from all parts of the surrounding country. From the windmill the Rifles, the Bedford Militia, and the Artillery retreated down the hill (having we presume been driven off) to the junction of the Havant and Chichester Roads. At this point the Staffordshire and the East Kent came up and covered their retreat; the two latter regiments then took up strong positions at the rear of the creek that forms Portsea Island, in front of the new works. A furious cannonade and volleys of musketry here saluted the imaginary foe, and as our march into Portsmouth was from that time unmolested, it is supposed that the enemy had been beaten off.

The weather, which had been very boisterous on the previous day, broke out fine on the morning of the attack, and with the exception of a slight shower for about five minutes, continued clear the whole of the day.

The troops were commanded by Major-General Sir James Yorke Scarlett. Amongst his staff we noticed Colonel Somerset, assistant quartermaster-general; Colonel Thackwell, assistant adjutant-general; and Major Breton, aide-de-camp.

This manœuvre will, it is presumed, terminate the military displays with which General Scarlett has, from time to time, enlivened and instructed the garrison during the period he has held command of this district. The brilliant field-days on the common during the summer, and the night attack of the town in the autumn, familiarised the troops with duties they may some day have to perform. This last field day on Portsdown Hill was a novelty, and was all that remained to be done to complete the display of *la petite guerre* within the capabilities of the garrison..

THE NAVY.

ADMIRALTY, MARCH 17.

APPOINTMENTS.—Master A. J. N. Breton to be additional to the Blenheim.

Chief-Engineer J. Ryley to the Megæra.

Acting First-Class Assistant-Engineer J. Davenport for temporary service in the Megæra.

Second-Class Assistant-Engineer T. Gissing to the Megæra.

Acting Third-Class Assistant-Engineers G. M'Leod to the Megæra; and W. A. Stewart to the Asia, for temporary charge of the machinery of the Snapper.

MARCH 19.—Engineer J. M'Cool to the Cumberland, for charge of machinery of the Plover.

MARCH 20.—PROMOTIONS AND APPOINTMENTS.—Engineers R. Cowan, promoted to chief engineer, and appointed to the Racoon; T. Obree, promoted to chief engineer, and appointed to the Cumberland, for service in the Tartar; and J. H. C. Bishop, promoted to chief engineer, and appointed to the Cumberland, for service in the Miranda.

Chief Engineers O. N. Brooker, to the St. Jean d'Acre; J. Brown, to the Wellington, for service in the Phœbe; and W. Gill, to the Wellington, for service in the Forth.

Acting Third-Class Assistant-Temporary-Engineer W. Bryan, to the Cumberland, as supernumerary.

MARCH 21.—APPOINTMENTS.—E. D. Green, to the Arrogant, as supernumerary.

MARCH 22.—PROMOTIONS AND APPOINTMENTS.—Lieutenants C. E. Buckle to the Hero, E. T. Parsons to the Centurion, and H. T. Boger to the Excellent.

Masters H. G. Raynes to the Donegal, and A. De G. Sutton confirmed to the Atalanta.

Second Master J. I. Covey to the Skipjack.

Paymaster G. Hickman to the Pearl.

Clerk J. W. Torbett to the Fisgard.

Engineer J. Rice promoted to the rank of Second-Class Assistant-Engineer in the Princess Royal.

COAST-GUARD OFFICE, MARCH 22.

REMOVALS.—Chief Officers: Mr. Ambrose J. A. Berton, Master, from Chichester Harbour to Hope Cove. Second Class: Messrs. Ross Townsend from Cromane Point to Whitegate; William Hayward from Southerness to Maryport.

Ajax. The Royal Marines and seamen of this ship have presented Chief-petty Officer John Midgely with a gold medal, as an acknowledgment of the kindness and good-will he has always shown them. The medal, which has been struck for the purpose by Her Majesty's silversmiths, Messrs. E. & E. Emanuel, of Portsea and Portsmouth, bears on one side a finely-executed engraving of the ship, and on the other the following inscription:—"Given by the Marines and seamen of H.M.S. Ajax to John Midgely, chief petty officer, as a token of their respect."

Arachne, 18, Commander J. E. Montgomerie, six weeks from Barbadoes, arrived on Saturday evening in Plymouth Sound, and saluted the flag of Port-Admiral Sir Barrington Reynolds, K.C.B. She was towed into harbour on Monday, and taken alongside the Dockyard to be dismantled and paid off on the 28th inst. None of her internal fittings are to be removed.

Ariadne, 26, screw, Captain E. W. Vansittart, sailed from Spithead at any early hour on Saturday for Cork, and thence on a short cruise.

Avon, paddle steam-tender, arrived at Portsmouth on Thursday from Devonport.

Barrosa, screw-corvette, recently launched at Woolwich, having been coppered in dry dock, has been removed into the basin for completion. Workmen are now employed in clearing the slip from which she was launched, in order to lay down the keel of the North Star, a precisely similar vessel.

Brunswick, 80, the crew of which were recently paid off at Plymouth, was placed in Keyham basin on Tuesday to have her machinery overhauled and repaired.

Cambrian, 40, Captain J. J. M'Cleverty, C.B. By letters received from this ship, dated Hong Kong, Jan. 30th, we learn that she was going to the Peiho with the admiral. This ship was having her upper deck prepared for carrying 4 troop-boats to the north. Captain M'Cleverty is to command the naval brigade. It was rumoured at Hong Kong that the ships and gun-boats coming from England would be detained at that place and Canton to protect the inhabitants.

Castor, 36, fitting for a training-ship for the Naval Coast Volunteers, is ordered to proceed from Chatham to Greenhithe on the 31st inst., to be stationed in the river Thames.

Conqueror, 101, Captain J. Wilcox, C.B., belonging to the Channel squadron, is expected at Plymouth to repair, she being leaky abaft, near the stern-post.

Dee, steam store-vessel, Master-Commanding Pullen, arrived at Woolwich on Wednesday from Plymouth, and is ordered to reload with machinery for vessels fitting out at the western yards.

Exmouth, 90, Captain Stopford, left Malta on the 4th instant, but her destination was not stated.

Firebrand. We are sorry to learn by telegraph that at three o'clock yesterday (Friday), during the strong wind at Portsmouth, a boat from the Firebrand, in entering the harbour, was capsized, and out of eight men six were drowned.

Hannibal, 91 (bearing the flag of Rear-Admiral Mundy, C.B.), Captain Conolly, left Malta for Gibraltar on the 4th, and was hourly expected at the latter port when the Ceylon left.

Havannah, 19, at Devonport, is to be sent to the Committee of Ragged Industrial School at Cardiff, for a training ship.

Hero, 91, arrived at Plymouth on Thursday afternoon, from Lisbon on the 14th. She landed mails and despatches, which were forwarded per evening train.

Himalaya arrived at Malta, from Alexandria on the 14th, and leaves for Barbadoes with the 21st Regiment on the 17th.

Howe. The rigging of the Howe is going on most rapidly. She will soon be ready to go round; they are getting up her topmasts.

Megæra, iron screw troop-ship, Commander James Hunt, went out of Portsmouth harbour on Saturday to Spithead, to test her machinery. She afterwards returned to the harbour to receive her masts and complete her outfit for sea service.

Mutine, 17, sailed from Plymouth under canvass on Saturday for Valparaiso.

Nile. A court-martial assembled on board the flag ship Impregnable, in Hamoaze, Plymouth, on Monday morning, and adjourned until Tuesday. Rear-Admiral Sir T. Pasley presided, and Mr. William Eastlake officiated as Judge-Advocate. Captain Burnard, of the Nile, prosecuted Mr. J. H. Callaghan, the boatswain of that ship, on charges of drunkenness and indecency, all of which were proved, and he was sentenced to twelve months' imprisonment, to be then dismissed from the Service, and rendered incapable of ever re-entering it. The Nile is expected to go out for a trial trip on the 2nd of April, and go to the American and West India station on the 5th.

Pearl, 21. Letters have been received from Captain John Borlase, C.B., dated Singapore, February 5. They state that she made rather a quick passage out, but the frigate Impérieuse, 51, beat her by about a week. The thermometer was as high as 120 when passing through the Straits of Banca. The paymaster of the Pearl is coming home sick. One of her crew had been injured by a tiger; these animals are, it is said, increasing in the island at the rate of one a-day, in consequence of the reduction of the Government head-money, which is now so low that it offers no temptation for the risk of human life when seeking the destruction of such formidable antagonists. The Pearl will probably take coal on her upper deck, and go with transports in tow to Hongkong.

Plover, constructed to replace the gun-boat of that name sunk at the mouth of the Peiho, steamed down to Chatham from Woolwich on Saturday. Mr. Rigby, of the firm of Messrs. Napier & Co., of Glasgow, who supplied the engines, and Mr. Dinnen, from the department of the Surveyor-General of the Navy, were on board to report on the efficiency of the engines. She is to be coppered and fitted for sea at Chatham.

Porcupine, 3, Captain Henry C. Otter, having been completely repaired and refitted, was hauled out of Keyham basin into Hamoaze on Tuesday.

Prince of Wales, 131, screw, at Portsmouth, has commenced shipping her boilers in the steam basin.

Retribution, 28, steam-vessel, Commodore H. E. Edgell, C.B. By letters received from this ship dated Aden, Feb. 27th, we learn that she was going to Bombay to be docked, and was not expected to be out again until the end of April.

Rhadamanthus, steam vessel, is now unloading timber at Deptford dockyard, for shipbuilding purposes.

Rinaldo, 17, screw-sloop, is to be undocked on Monday next. She is a new vessel, constructed in the dry dock, and her removal will be tantamount to the ceremony of launching.

Royal George. The topmasts were struck on Tuesday at Devonport, and the riggers are stripping her expeditiously.

Supply, Commander Balliston, arrived at Gibraltar on the 9th in six days from Malta.

Terrible is still stationed at Palermo.

Trafalgar 91, Captain Fanshawe, took on board her powder in Hamoaze on Wednesday, and steamed into the Sound, in charge of Mr. Charles Gahan, master of the flag-ship Impregnable.

Trusty, floating battery, which was so severely handled on the recent occasion of the experiments made on her at Shoeburyness with the Armstrong guns, is being thoroughly repaired at Chatham by a large number of shipwrights. The whole of the thick wrought-iron plates with which she is encased, which were shattered and injured by the effects of the shot, are to be replaced by new ones, and these are now being forged at the smithy under the superintendence of Mr. Catsell, the master blacksmith at Chatham. As soon as the defects have been made good, and the battery completed, some further experiments are to be made against the Trusty with the long range Whitworth guns.

Virago, 6, Commander M. Dunn, is appointed to leave Pembroke about the 4th of April for Devonport.

Vulture, 6, Captain George Parker, from Gibraltar, is expected at Plymouth about Monday next.

The Admiralty have forwarded orders to Chatham Dockyard for the following vessels now building at that establishment, to be brought forward for launching during the present year—viz., the Atlas, 91, line-of-battle screw-steamer; the Undaunted, 51, large screw-frigate; and the Orpheus, 22, screw-corvette. All three of these ships are in a very forward state, several hundred hands being employed on each of them. As soon as they are launched, three of the six new line-of-battle and other ships just ordered to be built at Chatham Dockyard will be laid down on the same slips—viz., the Pitt, 91; the Pomona, 51; and the Menai, 22, screw-steamers.

The Duke of Somerset, as First Lord of the Admiralty, held a levee, on Thursday, at the Admiralty.

Orders have been forwarded to all the naval yards to cease working extra hours after the 24th (to day).

The gunnery lieutenants on board the different ships in Portsmouth harbour are undergoing a course of instruction in the working of the Armstrong gun on board Her Majesty's ship Excellent, Captain R. S. Hewlett, C.B., the gunnery ship of the port.

North Star. Another of the Arctic discovery ships has just been broken up at Chatham Dockyard by the shipwrights hired for that purpose. Orders have been given that the men engaged are not to be discharged, but are to be employed in the service of the yard.

MILFORD HAVEN.—The new works along the shores of this haven have been commenced, and are being carried on with vigour; when they are completed this most important harbour may be considered impregnable, as at the first entrance there is a strong battery on Blockhouse Point; immediately after passing this, the batteries of Dale Point and Thorn Island would open their fire, the latter meeting them, and the two former following, as they have guns which would bear up the haven after any ships that might have passed them with impunity, and fire into their sterns. These are the principal available works at present, as Stack Rock is being much enlarged and strengthened. It stands in the very middle of the haven. It is intended to have a three tier of gun battery to mount 52 guns. Before a ship could get up to this it would have to pass the New Fort in course of formation on Popton Point, 21 guns, as well as another not quite so large. Should any vessel have the good fortune to pass these places unscathed, there is still Patu Battery, mounting 22 guns, 32 and 68-pounders; this is close to and adjoins the Dockyard. So, supposing these batteries to be all armed with even the old-fashioned guns, no ship would be able to run the gauntlet, for the water is so narrow that the guns at present in use could fire from side to side of the channel, and there would be altogether about 170 guns, mostly 8-inch; so that we may suppose the dockyard at Pembroke Dock to be perfectly safe; and it would be rash for any fleet to attempt to force the passage, especially as we may be supposed to have a few disposable ships of our own to assist the batteries.

The following officers, who have been studying for steam at the Royal Naval College, Portsmouth, have passed their examination most satisfactorily, and have received certificates:—Commanders H. D. Grant, Hon. A. L. Corry, M. E. Smithett, F. H. Smith, W. C. F. Wilson, John Moresby; Lieutenant C. G. F. Knowles. Mates passed for Lieutenants—C. E. Buckle, E. W. Warren, C. W. Thackeray, W. Parsons, C. G. Harvey, Hardy M'Hardy. Second-Master for Master, J. R. Warren. For Assistant-Clerks—B. F. Meyer, A. G. Roberts, J. D. A. Harvey, F. A. Martin, J. W. Featherstone, W. F. Woods, W. E. Hicks.

The following acting-lieutenants and mates passed at the Royal Naval College, Portsmouth last week:—C. W. Thackeray, C. W. Warren, Hardy McHardy,* W. Parsons, E. E. Harvey.

NAVAL ETIQUETTE.—Commodore's Office, Bombay, Jan. 17.—The following rules for the guidance of officers commanding vessels of the Indian Navy, in company with those of the Royal Navy, are to be strictly carried out:—Whenever an officer commanding a vessel of H.M.'s Indian Navy falls in with a vessel of the Royal Navy, commanded by an officer superior in rank to himself, he is invariably to wait upon such superior officer without loss of time, and pay his respects to him, communicating generally on what service he is employed. Whenever any vessel or vessels of H.M.'s Indian Navy may be in company with vessels of the Royal Navy, the senior officer of which is superior in rank to the senior officer of H.M.'s Indian Navy present, the time of such superior officer is to be kept, and his routine with regard to hoisting colours and firing the morning and evening guns is to be invariably observed and followed.

ROYAL NATIONAL LIFE-BOAT INSTITUTION.—The Annual General Meeting was held at the London Tavern a few days ago, Rear-Admiral the Earl of Shrewsbury and Talbot, C.B., V.P., in the chair; Admiral Sir George Seymour, K.C.B., Thomas Baring, Esq., M.P., Thomas Chapman, Esq., F.R.S., Admiral Sir Thomas Herbert, K.C.B., General Dixon, Captain Sir Edward Perrott, Bart., Captain W. H. Hall, R.N., C.B., and many other gentlemen being present. The chairman spoke in congratulatory terms of the success which had crowned the institution during the past twelve months. The number of life-boats had considerably increased, and a much greater amount of life had been saved from shipwreck than during any previous corresponding period. The institution had special claims upon the mercantile interests, its object being to preserve the lives of those who were engaged in the arduous and dangerous, but at the same time to a commercial country necessary occupation of navigating ships. Mr. Lewis, the secretary, read the report, which stated that the total number of life-boats, including those in course of construction, belonging to the institution, amounted at the present time to one hundred and one. The life-boats of the society had been actively called into operation on sixty-three occasions during the past year. Two hundred and twenty-seven lives had been saved by some of the boats from thirty-nine wrecks, and five vessels had been assisted safely into port. For these valuable exertions, the total sum paid to life-boats' crews was 738*l.* 18*s.* 9*d.* On these occasions, and on those of quarterly exercise, the life-boats were manned by about 4000 persons. The number of wrecks in the seas and on the coasts of the British isles, and the consequent loss of life therefrom, had been unprecedentedly large during the past year, no less than 1646 of our fellow-creatures having met with a watery grave. It was, however, consoling to find that the exertions which had been made in the same period to rescue life from shipwreck had been attended with great and encouraging success, as was shown by the official return of the Board of Trade, 2332 having been thus saved. The total number of persons saved from shipwreck since the first establishment of the National Life-boat Institution, and for rescuing whom the committee had granted honorary and pecuniary rewards, was 11,401. Language failed adequately to describe the amount of happiness which the saving of so many thousands of persons must have conferred. During the past year 1 gold medal, 20 silver medals, 13 votes of thanks, inscribed on vellum, and 1108*l.* 15*s.* 3*d.* had been granted by the Society, for saving the lives of 499 persons on the coasts and outlying banks of the United Kingdom. Many of these services had been of the most gallant and noble character. Since the formation of the Institution, it has expended on life-boat establishments, 36,948*l.* 5*s.* 8*d.*, and had voted 82 gold and 658 silver medals for distinguished services in saving life, besides pecuniary awards amounting to 12,759*l.* 15*s.* 3*d.* During the past year expenses amounting to 11,120*l.* 18*s.* 3*d.* had been incurred on life-boat establishments. This great and national work had, however, only been accomplished by the society incurring liabilities to the extent of a further sum of 3834*l.* Amongst the interesting incidents connected with the receipts, the committee gratefully acknowledged various gifts specially appropriated, at the request of the donors themselves, to the cases of different life-boats. Various legacies had recently been left to the Institution. The report having been moved and unanimously adopted, and various other resolutions having been subsequently passed pledging the meeting to renewed exertions on behalf of the truly benevolent and national objects of the Institution, and the usual complimentary vote of thanks having been given to the Chairman, the proceedings, which were of a very interesting character, terminated.

* This officer received a first-class certificate in the five years' examination, and also for seamanship and gunnery.

THE NAVY.

The following important Warrants have been issued with regard to the pay of masters, second-masters, paymasters, engineers, and chaplains, of Her Majesty's Navy :—

Circular, No. 410. ADMIRALTY, 23rd February, 1860.

(MASTERS, SECOND MASTERS, &c.)

My Lords Commissioners of the Admiralty have been pleased, under the authority of Her Majesty's Order in Council of the 22nd instant, to establish the following regulations with regard to the pay, half-pay, &c. of the masters, second-masters, and master's-assistants of the Royal Navy.

I. FULL AND HALF-PAY.

All time served as acting-master, and four years of time as "second-master qualified for master," will be allowed to reckon towards increase of full and half-pay.

	Full Pay. Per diem. s. d.	Half Pay. Per diem. s. d.
Masters having less than *five* years' service, to receive	10 0	5 0
Masters having more than *five* and less than *ten* years' service, to receive	11 6	6 0
Masters having more than *ten* and less than *fifteen* years' service, to receive	13 0	8 0
Masters having more than *fifteen* and less than *twenty* years' service, provided they shall have passed for line-of-battle ships, to receive	15 0	10 0
Masters having more than *twenty* and less than *twenty-five* years' service, provided they shall have passed for line-of-battle ships, to receive	18 0	13 0
Masters having more than *twenty-five* years' service, to receive	20 0	15 6
"Second Masters qualified for Masters," to receive	7 6	2 6*
Second Masters not so qualified to receive ...	5 0	
Masters' Assistants, when above 17 years of age, and with more than 2 years' service in Navy or Merchant Service, to receive ...	4 0	
All others to receive	3 0	

II. MASTERS-ATTENDANT.

Masters-attendant, assistant-masters-attendant, and Queen's harbour-masters, are to have the permanent rank of commander; no officer is to be continued in these positions after the age of sixty-five; but on retirement they will receive the rank of retired captain; and will be allowed sixpence a day for each complete year's service in such capacities, in addition to their half-pay as masters.

Time served as master-attendant, assistant-master-attendant, and Queen's harbour-master, is to reckon as service towards increase of full and half-pay.

Masters of the Fleet are to have six shillings a-day in addition to the pay they are entitled to as masters, and are to hold the temporary rank of commander, but junior to officers of that rank.

III. PROMOTION.

Masters when recommended for distinguished service are to be considered eligible for promotion to the rank of commander, provided they shall have served two years at sea as master.

Second masters, in similar cases, are to be considered eligible for promotion to the rank of lieutenant, provided they shall have served seven years at sea.

Masters are to be permitted to retire with the rank of commander or captain, under the conditions contained in Her Majesty's Order in Council of the 28th February, 1855.

Those masters only who may have been serving at the date of Her Majesty's Order in Council authorising these regulations, or who may hereafter serve, are to be entitled to the benefit of these regulations.

By command of their Lordships,

C. PAGET.

To all commanders-in-chief, captains, commanders, and commanding officers of Her Majesty's ships and vessels.

Circular, No. 411. ADMIRALTY, 23rd February, 1860.

(PAYMASTERS, &c.)

My Lords Commissioners of the Admiralty have been pleased, under the authority of Her Majesty's Order in Council of the 22nd inst., to establish the following regulations with regard to the pay, half-pay, &c., of the paymasters and assistant-paymasters of the Royal Navy.

I. FULL AND HALF-PAY.

All time served as acting-paymaster, and four years of time served as assistant-paymaster, to reckon towards increase of half-pay.

The full-pay of paymasters is not to be regulated by length of service, but according to the class in which, by standing on the list, the paymaster may be, as settled by Her Majesty's Order in Council of the 28th February, 1855.

The full-pay of assistant-paymasters-in-charge is to be ten shillings a day.

	Half-pay. Per diem. s. d.
Paymasters having less than *three* years' service to receive	5 0
Paymasters having more than *three* and less than *six* years' service to receive	6 0
Paymasters having more than *six* and less than *nine* years' service to receive	7 6
Paymasters having more than *nine* and less than *twelve* years' service to receive	9 0
Paymasters having more than *twelve* and less than *fifteen* years' service to receive	10 6
Paymasters having more than *fifteen* and less than *twenty* years' service to receive	12 0
Paymasters having *twenty* years' service and upwards ...	14 0

With reference to the above rates of half-pay, if a paymaster shall be proved, after the necessary inquiry, to have been negligent of the duties entrusted to him, the Lords Commissioners of the Admiralty reserve to themselves the power to place him on the lowest or any intermediate rate of half-pay they may deem proper.

II. ALLOWANCE IN FLAG SHIPS, TROOP SHIPS, &c.

Paymasters of flag ships, of troop ships when actually conveying troops, and of steam guard-ships, will be allowed, under special circumstances, a sum varying from 2*s.* 6*d.* to 5*s.* a day, in consideration of the extra duty entailed by such service.

* After 3 years' service, when unwell, or unable to obtain employment.

III. RETIREMENT.

All paymasters retiring in future, whether with the rank of paymaster-in-chief or paymaster, are to receive such rate of half-pay only as they may have earned by service, without any addition.

Time served as secretary is to count as time served as paymaster; but secretaries having served twelve years as such, are to be entitled to 12*s.* a day, as at present, unless otherwise entitled to a higher rate.

Those paymasters only who may have been serving at the date of Her Majesty's Order in Council authorising these regulations, or who may hereafter serve, are to be entitled to the benefit of these regulations.

By Command of their Lordships,

C. PAGET.

To all commanders-in-chief, captains, commanders, and commanding officers of Her Majesty's ships and vessels.

Circular No. 412. ADMIRALTY, 23rd February, 1860.

(ENGINEERS.)

My Lords Commissioners of the Admiralty have been pleased, under the authority of Her Majesty's Order in Council of the 22nd inst, to establish the following regulations with regard to the pay, half-pay, &c., of the Engineers of the Royal Navy.

I. FULL AND HALF-PAY.

All time served as acting chief engineer, and four years of time served as assistant engineer will be allowed to reckon towards increase of full and half-pay.

	Full-pay. Per diem. £ s. d.	Half-pay. Per diem. £ s. d.
Inspectors of Machinery Afloat when appointed to take charge of the machinery of a fleet or squadron, to receive ...	1 2 0	Inspectors of Machinery to receive the same rates of Half-pay as Chief Engineers.
Inspectors of machinery under other circumstances, to receive	1 0 0	
Chief Engineers having less than *five* years' service, to receive	0 10 6	0 5 0
Chief Engineers having more than *five* and less than *ten* years' service to receive	0 11 6	0 6 0
Chief Engineers having more than *ten* and less than *fifteen* years' service to receive	0 13 0	0 8 0
Chief Engineers having more than *fifteen* and less than *twenty* years' service, if qualified for first and second rates, to receive	0 15 6	0 10 0
Chief Engineers having more than *twenty* and less than *twenty-five* years' service, if qualified for first and second rates, to receive	0 18 0	0 13 0
Chief Engineers having more than *twenty-five* years' service to receive	1 0 0	0 15 6
Engineers qualified for charge having less than *five* years' service in charge, to receive	0 10 0	
Engineers qualified for charge having more than *five* and less than *ten* years' service in charge, to receive	0 11 0	
Engineers qualified for charge having more than *ten* years' service in charge to receive	0 12 0	
		Harbour Pay.
Assistant Engineers First Class to receive	0 9 0	0 5 6
Assistant Engineers Second Class to receive	0 7 6	0 4 6
Assistant Engineers Third Class to receive	0 6 0	0 3 6

Assistant engineers when in charge of engines are to be allowed one shilling a day in addition to their pay.

The widows of engineers qualified for charge having more than ten years' service in charge, will be granted pensions of forty pounds a year each, provided the usual conditions laid down in the Queen's regulations for the grant of pensions are fulfilled.

Those engineers only who may have been serving at the date of Her Majesty's Order in Council authorising these regulations, or who may hereafter serve, are to be entitled to the benefit of these regulations.

By command of their Lordships,

G. PAGET.

To all commanders-in-chief, captains, commanders, and commanding-officers of Her Majesty's ships and vessels.

Circular, No. 413. ADMIRALTY, 23rd February, 1860.

(CHAPLAINS.)

My Lords Commissioners of the Admiralty have been pleased, under the authority of Her Majesty's Order in Council of the 22nd instant, to establish the following regulations with regard to the pay, half-pay, rank, &c., of the chaplains of the Royal Navy.

I. FULL AND HALF-PAY.

	Full-pay. Per diem. s. d.	Half-pay. Per diem. s. d.
Chaplains having less than *five* years' service, to receive	10 0	5 0 Provided they have served three years
Chaplains having more than *five* and less than *ten* years' service, to receive	11 6	6 0
Chaplains having more than *ten* and less than *fifteen* years' service, to receive	14 0	7 6
Chaplains having more than *fifteen* and less than *twenty* years' service, to receive	1s. a day in addition for each year's service after fifteen years, but not to exceed 16s.	10 6
Chaplains having more than *twenty* years' service, to receive	...	12 0

No alteration is to be made in the present rates of conditional full and half-pay allowed to chaplains of the Royal Navy when holding the office of Naval Instructor.

II. PENSIONS TO WIDOWS.

Pensions at the following rates will be granted to the widows of chaplains, provided the chaplain shall have served for one year after his marriage, and that the other conditions of the Queen's regulations on the subject of pensions, not hereby annulled, shall have been duly fulfilled :

To the Widows of Chaplains under fifteen years' service	£50 a year.
To the Widows of Chaplains above fifteen years' service	£70 ,,
To the Widows of Chaplains drowned on duty	£60 ,,
To the Widows of Chaplains killed in action	£70 ,,

III. RANK.

Chaplains are not to hold any military rank, but they are to be treated with all the consideration due to their sacred office; the senior chaplain of Greenwich Hospital is to be considered as the head of the chaplains.

IV. RETIREMENT.

Chaplains are to be allowed to retire after *fifteen* years from the date of their first appointment, with the half-pay which they may have earned by service, if they have not declined to serve.

Any naval chaplains now on the list who may prefer to remain on their present rates of full-pay, and under the previously existing regulations with regard to half-pay and retirement, are to be allowed so to remain, on signifying such desire to the Lords Commissioners of the Admiralty.

By command of their Lordships, C. PAGET.

To all commanders-in-chief, captains, commanders, and commanding officers of Her Majesty's ships and vessels.

THE MILITIA.

The South Devon Militia, under the command of the Right Hon. Lord Churston, will assemble at Plymouth on the 30th April, for twenty-seven days' training and exercise.

The West Kent Regiment of Light Infantry Militia is ordered to assemble for training on the 27th of April at Maidstone.

The Royal London (City) Militia is ordered to assemble on Monday, the 30th of April, for 27 days' training. The regiment will meet at the Artillery-ground, City Road.

The Northamptonshire Militia has received orders to assemble for 27 days' training and exercise at the Militia Barracks, Northampton, on Wednesday, the 9th of May next, under the command of Lieut.-Colonel Lord Burghley, M.P.

The various Militia regiments in the eastern district are to assemble in the course of the ensuing month for 27 days' training and exercise.

MILITIA GAZETTE.

WAR-OFFICE, PALL-MALL, MARCH 20.

1st Somerset Regiment of Militia—Richard Winsloe, Gent., to be Quartermaster, from the 1st of October, 1859, a new appointment, made under a recent regulation; Oct. 22.

2nd Somerset Regiment of Militia—Michael Brown, Gent., to be Quartermaster, from the 29th day of October, a new appointment, made under a recent regulation; Nov. 10.

5th Regiment of Royal Lancashire Militia—John Witham Sutcliffe Witham, to be Ensign, vice William Edmonstone Lendrick, promoted; March 18.

Royal South Gloucester Light Infantry Regiment of Militia—Ensign John Powell to be Lieutenant, vice Gibson, resigned; March 16.

2nd or Eastern Regiment of Norfolk Militia—Colonel the Hon. Berkeley Wodehouse to be Honorary Colonel; Lieut.-Colonel Sir Edmund Henry Knowles Lacon, Bart., to be Lieut.-Colonel-Commandant; Captain George Grenville Glover to be Major, vice Lacon, promoted; March 16.

WAR-OFFICE, PALL-MALL, MARCH 23.

1st or Royal East Middlesex Regiment of Militia—Captain James Prince, to be Major; March 6.

6th Regiment of West York Militia—Robert Edward Wellington Garnham, Gent., to be Lieutenant; March 7.

Earl of Chester's Regiment of Yeomanry Cavalry—Lieutenant John Coutts Antrobus, to be Captain, vice Antrobus, resigned; Cornet Edward Harrison Solley, to be Lieutenant, vice Antrobus, promoted; William Maysmor Williams, Gent., to be Cornet, vice Warren, promoted; Feb. 15. Henry Jenner Holder Hogg, Gent., to be Cornet, vice Solley, promoted; Feb. 20.

1st Regiment of Royal Cheshire Militia—George Francis Hewson, Gent., to be Ensign, vice Brittain, resigned; March 1.

1st Somerset Regiment of Militia—William Liddon, Gent., to be Assistant-Surgeon, vice Foy, promoted; March 15.

2nd Somerset Regiment of Militia—Thomas Keelinge Bateman, Gent., to be Lieutenant, vice Marker, promoted; March 15. Robert Cecil Attfield, Gent., to be Lieutenant, vice Woodman, promoted; March 16.

North Somerset Regiment of Yeomanry Cavalry—Henry Eden Mynors, Gent., to be Cornet, vice Helbert, promoted; March 21.

Hertfordshire Militia—The Queen has been pleased to accept the resignations of the Commissions held by—Captain Adolphus Meetkerke; Surgeon Charles Robert Thompson.

A circular regulating the entry, examination, &c., of clerks, assistant-clerks, and assistant-paymasters in the Royal Navy, has just been issued. The regulations will come into operation on the 1st of June next, but their application to officers now in the Service is to be limited to assistant-clerks and clerks who shall not have served more than one year in that rating on 1st June, 1860.

Rear-Admiral Richard Devonshire (on the Retired List), died at his residence in St. Andrew's Terrace, Plymouth, on the 19th inst., in the 79th year of his age. This officer, who entered the Navy in 1796 as first-class Volunteer, saw much service during the war with France, and was present at many of the gallant actions of that period. He was present at the reduction of the Cape of Good Hope in 1806, the fall of Monte Video in 1807, and, as First Lieutenant of the Leda (Captain R. Honeyman), was present at the bombardment of Copenhagen. He was also engaged in the Walcheren expedition, and at the taking of Genoa in 1814. Having attained the rank of Commander, August 27, 1814, he was subsequently appointed second Captain, 4th April, 1836, of the Talavera, 74, Captains Thomas Ball Sulivan and William Bowen Mends, on the Mediterranean station. His Captain's commission bore date June 28, 1838, since which period he has been on half-pay. He accepted retirement with the rank of Rear-Admiral, September 10, 1857.

VOLUNTEERS.

METROPOLITAN.

Civil Service Rifle Brigade.—The Post-Office companies of this corps, under the command of Captains Harrington and Taylor, had their first full-dress parade on Friday week, in the large court at the Charter House, the use of which has been kindly granted by Archdeacon Hale. The companies mustered about 70 men, and their appearance showed that the gentlemen of the Civil Service have shown great taste in the selection of their uniform. A few simple manœuvres were executed very steadily. We understand that the ranks of the Post-Office Corps are open to all members of the Civil Service, and it is worthy of consideration whether this is not a favourable opportunity for those members of Government offices in the neighbourhood, who are not sufficiently numerous to form separate corps, to join in this movement.

St. Pancras and North Middlesex Rifle Corps.—At a meeting of the managing committee of this brigade, held at the head-quarters, St. Pancras Vestry Hall, on Monday evening, W. H. Bodkin, Esq., deputy-lieutenant of Middlesex, in the chair, it was announced, amidst applause, that the firm of Messrs. Collard & Collard had paid in a cheque for 115*l.* 10*s.*, for the enrolment of the first company of their *employés*, amounting to 110 effectives. The secretary also announced that he had that day enrolled between thirty and forty additional members. After drill at the Albany Street cavalry barracks, on the same evening, a ballot took place for the selection of commissioned officers of the second company, and of honorary assistant-surgeon, to be recommended by Captain Thomas Ross, the captain-commandant, to the Lord-Lieutenant. For the office of assistant-surgeon there were two candidates—Dr. W. R. Hayne and Dr. Mott. At the conclusion of the ballot Captain Ross took the chair, and the scrutineers having made their report, he declared the number of votes to be—for Dr. Mott, 145; for Dr. Hayne, 98. For the commissioned-officers of the second company there were six gentlemen originally nominated, viz., for captain, D. E. Cameron, Esq., senior churchwarden of St. Pancras, and Captain A. Ridgway, of the 1st Devonshire Militia (the latter gentleman against his consent, as he declined being a competitor with Mr. Cameron); for lieutenant, James M'Swiney, Esq., of 44, Gloucester Road, Regent's Park, and Mr. C. J. Roberts; for ensign, Mr. Huskisson, jun., of Mecklenburgh Square, and Mr. Burr, of Kentish Town. Captain Ridgway being nominated, his name was printed in the balloting-papers, but a foot-note was appended that he declined to stand as a candidate. The numbers stood thus: For captain—Mr. Cameron, 40; Captain Ridgway, 19. For lieutenant—Mr. M'Swiney, 53; Mr. Roberts, 11. For ensign—Mr. Huskisson, 42; Mr. Burr, 22.

The Borough of Lambeth, or 19th Surrey.—On Wednesday evening a public meeting in connection with this Corps was held at the Literary Institution, Carter Street, Walworth. Mr. Frederick Doulton occupied the chair. After some preliminary business had been transacted the following resolutions were carried amidst much enthusiasm:—Moved by Mr. Grady, seconded by Mr. George Harbur, "That this meeting rejoices in the establishment of a Borough of Lambeth Rifle Corps, and pledges itself to use every exertion to secure its complete success." Moved by Mr. John Smithers, and seconded by Mr. John Price:—"That this meeting hears with great satisfaction that the Queen has accepted the services of a battalion of 240 men, and tenders its best thanks to W. Roupell, Esq., for connecting with this corps the men raised by him. Mr. Roupell, M.P., who appeared in uniform as commandant of the corps, then addressed the meeting, and expressed his pleasure at the success which the movement had received. He said that some people were inclined to think it a very folish movement, and laughed at the idea of invasion. No doubt every man who entered into the ranks of a Volunteer corps wished for the blessings of peace; but if there should happen to be war, every man was willing and ready to take his part in the conflict. He was not like some who believed we were quite secure at the present moment. The question of the annexation of Savoy was a master-stroke of policy on the part of the Emperor of the French; and the complication which existed with reference to that had thrown a gloom over the anticipations of many who had the utmost confidence in the peaceful intentions of our great ally. He trusted that the movement instead of flagging would receive an additional stimulus from the present position of affairs; for there was more cause now for such an ebullition of feeling and attachment to the Sovereign and the country than existed when the Volunteer movement first commenced. A vote of thanks to the chairman was followed by a suitable speech in response, and the proceedings terminated.

BEDFORDSHIRE.

Bedford.—On Monday the 1st company of the Bedfordshire Volunteer Rifles mustered at Captain Crosbie's, and marched down to the town-hall to be sworn in before J. Howard, Esq., mayor, and a full bench of magistrates. The corps numbers 68, with three officers and a surgeon. After the swearing in they again met at the Swan Hotel, when about 60, with Captain Polhill Turner, of the Mounted Rifles, and Colonel Harvey, of the Beds Volunteer Rifles, with the Rev. E. Bayley as chaplain, sat down to dinner. During the afternoon and evening the bells of the different churches in the town rang a merry peal. The corps was presented with a bugle by Mrs. Crosbie.

CUMBERLAND.

Third Cumberland Volunteer Rifles (Skiddaw Greys), Keswick.—This Corps is making rapid progress in its drill under Staff-Sergeant J. Atkinson, Royal Cumberland Militia. The Lord-Lieutenant has signified his approval of the uniform, which is a dark heathery grey with a scarlet edging, the belts of brown leather, and the cap-plate a neat device in bronze of a bugle and rifle sword, with the motto, "We guard our own." After field exercise on Monday last, the corps was marched to the County Court, when the commission of the Captain-Commandant was read, and Her Majesty's health drunk with three times three. The Commanding Officer (Major Wake) made a short address, stating that he was fully sensible of the honour and responsibility which had devolved upon him, in assuming the command of so fine a body of men, and that he trusted the experience he had gained during twenty-four years of military service would enable him to maintain discipline, and render the corps one of the most efficient in the county.

GLAMORGANSHIRE.

Glamorgan Artillery.—We understand that two guns, with two ammunition waggons complete in every respect, of one of the 18-pounder batteries for coast defences, have been ordered to proceed immediately from Pembroke Dock to Swansea for the use of the Glamorgan Volunteer Artillery.

HAMPSHIRE.

Southampton Rifle Volunteers. — Last Wednesday evening was fixed upon by Major Lacy, the acting adjutant, for a grand muster of all its members. At 7 o'clock a line of two deep was formed on each side of their magnificent drill room extending through its entire length. Colonel Grimes was introduced in succession to the captains of the various companies, and the corps then went through a series of evolutions, much to their own credit, and to the delight of a large number of ladies and military gentlemen. Colonel Grimes expressed his satisfaction at being nominated to the command, and said, "I have no doubt but that you will equal any corps in the country. I shall do the best I can to bring you forward, and I trust you will use your united exertion to second me. I shall proceed in a few days to the Lord-Lieutenant, and I will have great pleasure in informing him of the steady attention and skill of the body of men whom I have had the pleasure this evening to inspect."

Portsmouth Artillery Volunteers. — A highly respectable body of men belonging to the borough are about to respond to the call of the Government, and form an artillery corps, the Horse Guards circular having strongly advocated the formation of artillery companies in all arsenals and seaport towns. In a large garrison like Portsmouth, with its miles of batteries and bastions, having innumerable guns in position, it becomes a question how they are to be manned, in case of a sudden attack, by the very limited force of royal artillery under the command of the governor of the town. Indeed, the force is so disproportionate to the requirements of the place, that it is the subject of common remark, that in Portsmouth there are about as many gunners as guns. The Volunteers artillery movement is therefore extremely apropos, and will tend to lessen the difficulty of manning the guns in position, and relieve to a certain extent, when required, the regular force of the Crown. For this reason the Portsmouth Volunteer Artillery Corps deserves every encouragement. It is rumoured that Government will on the formation of the corps, permit the men to learn their drill from Armstrong's guns, and for this purpose a couple of these celebrated weapons will be placed at their service. It is desirable that this should be done, for it is felt that Armstrong's guns will sooner or later supersede muzzle-loading cannon, and consequently it would be all but useless to learn the drill appertaining to the old field-gun, which must be discarded as soon as the new weapon becomes the recognised arm of the Service. A public meeting is advertised to take place, when a letter will be read from the Lord-Lieutenant of the county, giving his sanction to a blue-checked uniform, of which a pattern-suit will be exhibited.

KENT.

The Plumstead, or 9th Kent Artillery Volunteers, have suggested the advisability of submitting to the Secretary of State for War a proposal, emanating from their corps, to erect a 2-gun siege battery and shed on the high grounds of Plumstead, overlooking the Thames and commanding a perfect sweep of Woolwich Arsenal. The corps, under an efficient system of training at their own individual expense, have proposed to construct the battery themselves during their leisure hours, on obtaining the sanction of the War Department. Major-General Sir Richard Dacres, K.C.B., commanding the garrison at Woolwich, is favourably impressed with the energy and ready disposition of the corps, on whose assistance he has stated he should be willing to rely in case of emergency, as a subdivision to the Royal Artillery, and is ready to take steps in organising them for that purpose.

Sandwich.—2nd Company of Cinque Ports Artillery Volunteers: Captain, Major Thomson, late 1st Dragoon Guards; 1st Lieutenant, Captain Henry Boys, R.N.; 2nd Lieutenant, James Rae, Esq., late 27th Inniskillings. The drilling of this company is being carried on with great zeal, and rapid progress is being made under a Royal Artillery instructor. The uniform selected by the company and approved by the Lord Warden, is that recommended by the Volunteer Committee, with the exception of the ornaments and buttons, which will have the Cinque Port arms on them. The Sandwich Artillery will probably be attached to No. 2 battery, which is to be re-armed, and a site has been selected nearer the town and approved by Colonel Aylmer, R.A., where guns will be mounted for practice, without shot.

MIDDLESEX.

13th Middlesex (Hornsey) Rifle Volunteers.—This corps having lately received several effective and honorary members from Southgate, marched thither on Saturday last, under Lieutenant Bird, and, preceded by a regimental band, to return thanks. The friendly interest in their proceedings, which had brought together so great a concourse of people in Crouch End, Hornsey, and various parts of the route, was most gratifying to the Volunteers, and no less so were the compliments paid to their dress and soldier-like appearance. The ladies of Hornsey and the neighbourhood have opened a subscription list, for the purpose of presenting the corps with a silver bugle.

SUSSEX.

Crawley.—The Rifle Volunteers have been accepted by Her Majesty, and are styled the 14th Sussex. They mustered at the Station Inn last Tuesday, for the purpose of being sworn in, but owing to the notice having been issued that day only 26 were present to take the oath of allegiance, which was administered by Captain Meek and J. M. Norman, Esq., Justices of the Peace for the county. This ceremony concluded, the corps was invited by its officers, Lieutenant Broadwood and Ensign Lemon, to inaugurate the event, in the drill-room, presided over by Mark Lemon, Esq. In responding to the toast of the County Magistrates, Mr. Norman addressed the Volunteers in a very manly and forcible speech, and Captain Meek complimented them upon their efficiency, remarking that for the time they had been at it, he had not seen better drill anywhere, which reflected great credit upon themselves and their drill-sergeant (Smith), whose health was then proposed and received with enthusiasm. The chairman's ready wit and good humour tended much to the hilarity of the evening. The followng are the names of those who were enrolled:—Mark Lemon, J. Caffin, T. Nelson, Savage, Lillywhite, Mitchell, Bishop, Smith, Hobbs, Gravely, H. Soan, Haylock, Charman, J. Charman, Woodman, Hall, Andrews, Morley, Snelling, Harding, T. Tester, Comber, Webley, Tester, and Foster.—*Brighton Express.*

YORKSHIRE.

Halifax Rifle Corps. — On Tuesday, the Assistant-Inspector for the Northern district, Major G. B. Harman, formerly of the 34th Regiment, visited the town for the purpose of inspecting the Rifle Volunteers for Halifax. In the afternoon he visited the practice ground, below the Victoria reservoir. The attendance of members was not large, but the practice was particularly good, in many individual instances every shot telling with accuracy. In the evening the gallant major attended the weekly drill of the corps, in the riding school. About eighty of the members of the first three companies attended, and about eighty of the 4th company. The fine regimental band was also in attendance. At the close the Inspector addressed a few observations to them. He did not mean to use the compliment merely for the sake of speaking, but he must state that the corps were the best drilled body of Volunteers he had yet inspected. The light infantry drill, and the drill by bugle calls, were especially to be commended. No doubt their present state of efficiency was owing to their possessing such an adjutant as Captain Coates, an advantage which no other corps possessed, and one which, he had no doubt, they all fully appreciated. After paying a further and well merited compliment to the gallant captain, the major addressed a few kindly observations to the 4th company, and impressed upon all the truth of the fact, that to make a good soldier, it was of paramount importance to be well up in the preliminary drill. He alluded to the target practice he had witnessed that day, which had been exceedingly good, and urged upon them the importance of carefully practising the "aiming drill," which, though rather irksome to undergo, was essentially necessary to ensure a steady hand and a good marksman. He could not close his observations without complimenting them upon the splendid band they possessed. At the close of the inspection, the Volunteers, headed by the band, marched through the town.

VOLUNTEER GAZETTE.

March 20.

Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain Edward Kitchen in the Artillery Company of London.

9th Suffolk Volunteers—Her Majesty approves of Nicholas Fenwick Hale to be Assistant-Surgeon.

4th Berwickshire Rifle Volunteers—Robert Macgregor Robertson, to be Honorary Assistant-Surgeon.

17th Company of Cheshire Rifle Volunteers—Henry Coppock, Esq., to be Captain; David McClure, Gent., to be Lieutenant; John McClure, Gent., to be Ensign; March 10.

10th Derbyshire Rifle Volunteers—William Philip Hubbersty, Gent., to be Ensign; March 17.

11th Derbyshire Rifle Volunteers—Sir Joseph Paxton to be Captain; Samuel Prince, Gent., to be Lieutenant; Robert Chadwick, Gent., to be Ensign; March 17.

1st Corps of Northumberland Rifle Volunteers—Jacob Burnett, Gent., to be Ensign; March 9. William Popplewell, Gent., to be Ensign; March 10.

2nd Corps of Northumberland Rifle Volunteers—John Matthew Ridley, Esq., to be Captain; Richard Gibson, Gent., to be Lieutenant; William Beverley Ridley, Gent., to be Ensign; John Nicholson, Gent., M.D., to be Assistant-Surgeon; March 10.

3rd Corps of Northumberland Rifle Volunteers—George Brumell, Esq., to be Captain; March 12.

1st Newcastle-upon-Tyne Rifle Volunteers—John Furness Tone, Esq., to be Captain; William Cheek Bousfield, Esq., to be Captain; William Wilson Smith, Gent., to be Lieutenant; Isaac Temple, Gent., to be Lieutenant; Thomas Mordue, Gent., to be Ensign; Charles Fletcher Richardson, Gent., to be Ensign; March 13.

1st Aberdeenshire Artillery Volunteers—John Hutchison, Esq., to be Captain Commandant; James Arbuthnot, Esq., to be Captain; James Morrison, Gent., to be First Lieutenant; Patrick Jamieson, Gent., to be First Lieutenant; Patrick Irvine, Gent., to be Second Lieutenant; Robert Maitland, Gent., to be Second Lieutenant; March 13.

2nd Subdivision of Aberdeenshire Rifle Volunteers—James Forbes Leith, Esq., to be Lieutenant; Robert Wilson, Gent., to be Ensign; March 12.

19th Aberdeenshire Rifle Volunteers—Robert Simpson, Esq., to be Captain; William Lawson, Gent., to be Lieutenant; Alexander McWilliam, Gent., to be Ensign; March 6.

[The following appointment is substituted for that which appeared in the *Gazette* of the 13th March instant.]

1st Argyllshire Artillery Volunteers—Donald Mackichan, Gent., to be Second Lieutenant; March 7.

MARCH 23.

10th Surrey Rifle Volunteers—John Gooch Hepburn, Gent., to be Lieutenant; March 21.

Inns of Court Rifle Volunteer Corps—Henry Griffith, Gent., to be Lieutenant; Benjamin Babington, Gent., to be Lieutenant; Samuel Brandram, Gent., to be Lieutenant; Richard Ottaway Turner, Gent., to be Lieutenant; Feb. 23. Charles Samuel Bagot, Gent., to be Lieutenant; Arthur Pemberton Lonsdale, Gent., to be Lieutenant; William John Potts, Gent., to be Ensign; James Shiel, Gent., to be Ensign; Cecil Henry Russell, Gent., to be Ensign; the Hon. George Pepys, to be Ensign; Wyndham Holgate, Gent., to be Ensign; Alexander Ogilvie Lloyd, Gent., to be Ensign; Feb. 25.

South Middlesex Rifle Volunteer Corps—The Hon. Anthony Ashley Cooper, M.P., commonly called Lord Ashley, to be Lieutenant; March 16.

20th Middlesex Rifle Volunteers—Horatio Sillifant, Gent., M.R.S.S., to be Assistant-Surgeon; Feb. 23.

31st Middlesex Rifle Volunteers—Tom Taylor, Esq., to be Captain; Richard Mills, Gent., to be Lieuteuant; Frederick William Kirby, Gent., to be Ensign; Feb. 25.

36th Middlesex Rifle Volunteers—Major-General David Downing, Bengal Army, to be Captain-Commandant; Feb. 29.

39th Middlesex Rifle Volunteers—Thomas Harpur Colvill, Esq., late Captain 71st Regiment, to be Captain; March 6.

1st Middlesex Engineer Volunteers—James Reeves Traer, Gent., M.R.C.S., to be Hon. Assistant-Surgeon; March 1.

Haddingtonshire Rifle Volunteers—No. 4 or Aberlady Company—Thomas Maitland Rodney, Esq., to be Captain; Mr. Francis C. Burnet to be Lieutenant; Mr. William Finlayson to be Ensign; March 17.

Kent Artillery Volunteers—5th Company—The Rev. James Saunderson Clarke, M.A., to be Honorary Chaplain; March 16.

11th Company—William Hills, Gent., to be Second Lieutenant; March 20.

Kent Rifle Volunteers—17th Company—Henry Lindsell Sopwith, Gent., to be Hon. Assistant-Surgeon; March 16.

1st Corps—Major Scott, Captain of 1st Corps Kent Rifle Volunteers, to be Captain-Commandant; March 20. Ensign Lewis Davis Wigan to be Lieutenant; William Hoar, Gent., to be Ensign vice Wigan, promoted; Joseph Scratton, Gent., to be Ensign; March 19.

5th Perthshire Rifle Volunteers—John Livington Campbell, Esq., to be Captain; William Shaw Soutar, Esq., to be Lieutenant; Richard Penkeith, Esq., to be Ensign; Rev. William Herdman, to be Hon. Chaplain; Robert Balfour, Esq., to be Hon. Assistant-Surgeon; March 16.

2nd Sussex Artillery Volunteers—William Drew Lucas Shadwell, Esq., to be Captain; William Talbot Agar, Esq., to be First Lieutenant; Rowland Legg, Esq., to be Second Lieutenant; March 13.

13th Sussex Rifle Volunteers—William John Campion, Esq., to be Captain; March 14.

14th Sussex Rifle Volunteers—John Jervis Broadwood, Esq., to be Lieutenant; John Leman, jun., Esq., to be Ensign; March 14.

[The following appointments are substituted for those which appeared in the *Gazette* of the 6th March instant:—]

8th Sussex Rifle Volunteers—Brian Barttelot Barttelot, to be Lieutenant; George Curling Joad, to be Ensign; Feb. 28.

1st West Riding of Yorkshire Rifle Volunteers (York)—The Rev. William Hey, M.A., Prebendary of York, to be Chaplain; March 6.

7th West Riding of Yorkshire Rifle Volunteers—Christopher Kirby, Gent., to be Surgeon; Feb. 24.

10th West Riding of Yorkshire Rifle Volunteers (Huddersfield)—Captain Henry Frederick Beaumont to be Captain-Commandant; Tom Learoyd, Gent., to be Lieutenant; Joshua Day, Gent., to be Ensign; Frederick Greenwood, Gent., to be Assistant-Surgeon; March 5.

20th West Riding of Yorkshire Rifle Volunteers (Doncaster)—Archibald Sturrock, Esq., to be Captain; James Payne, Gent., to be Lieutenant; Richard Cortazzi Hornby, Gent., to be Ensign; March 5.

25th West Riding of Yorkshire Rifle Volunteers (Guiseley)—Matthew William Thompson, Esq., to be Captain; Henry Granville Baker, Gent., to be Lieutenant; Jasper Leavens White, Gent., to be Ensign; March 5.

8th North Riding of Yorkshire Rifle Volunteer Company—Lipton Hutton Potts, Esq., to be Lieutenant; Christopher Clarke, Esq., to be Ensign; Robert Fothergill, Gent., to be Honorary Assistant-Surgeon; March 19.

11th North Riding of Yorkshire Rifle Volunteer Company—Thomas Smurthwaite, Esq., to be Lieutenant; James David Raine Fisher, Esq., to be Ensign; Midgley Cockcroft, Gent., to be Honorary Assistant-Surgeon; March 17.

4th Kidcardineshire Rifle Volunteers (Fettercair Subdivision)—Major McInvoy to be Lieutenant; David Durie, Esq., to be Ensign; March 13.

3rd Lincolnshire Rifle Volunteers—Robert Shipman, Esq., to be Assistant-Surgeon; March 16.

7th Lincolnshire Rifle Volunteers—Henry Holway, Esq., to be Captain; Harwood Mackinder, Gent., to be Lieutenant; John Welby Preston, Gent., to be Ensign; John West Walker, Gent., to be Honorary Assistant-Surgeon; the Rev. William Vlako Turner to be Honorary Chaplain; March 17.

17th Lincolnshire Rifle Volunteers—Richard George Calthorp, Esq., to be Captain; John Holland, Gent., to be Lieutenant; George Casswell, Gent., to be Ensign; Henry Morris, Gent., to be Honorary Assistant-Surgeon; the Rev. John Topham to be Honorary Chaplain; March 17.

73rd Lanarkshire Rifle Volunteers—(Carluke.)—Thomas Matthews, Esq., to be Captain; Andrew Crusoe Selkirk, Gent., to be Lieutenant; William Smith Kerr, Gent., to be Ensign; March 21.

16th Company of Cheshire Rifle Volunteers—Edmund Joseph Tipping, Esq., to be Captain; Aaron Clulow Howard, Gent., to be Lieutenant; Henry Sidney Armitstead, Gent., to be Ensign; March 7.

Erratum—14th Company Cheshire Rifle Volunteers—For A. R. Lingard, Hon. Surgeon, read Hon. Assistant-Surgeon.

8th Gloucestershire Rifle Volunteers—Simon Surman Bowen, M.D., to be Honorary Assistant-Surgeon; March 20.

14th Cornwall Rifle Volunteers—Edward Williams, Esq., to be Captain; William Gostwyck Gard, Esq., to be Lieutenant; John Michael Sellers, M.D., to be Ensign; March 15.

1st Durham Artillery Volunteers—William Joseph Young, Esq., to be Captain-Commandant; Hedworth Williamson, Esq., to be Captain; James Hamilton, Gent., to be First Lieutenant; Charles Strathmore Moore, Gent., to be First Lieutenant; Thomas Crawhall Alcock, Gent., to be Second Lieutenant; Henry Ritson, Gent., to be Second Lieutenant; George Wilford, Gent., to be Assistant-Surgeon; the Rev. Dr. Iliff to be Honorary Chaplain; March 14.

3rd Durham Rifle Volunteers—Thomas Edward Chapman, Esq., to be Captain-Commandant; Edward Temperley Gourley, Esq., to be Captain; Robert Ovington Harrison, Esq., to be Captain; March 6. Thomas Burn, jun., Esq., to be Captain; March 14. Foster Charlton Huntley, Gent., to be Lieutenant; Arthur Woodman Dixon, Gent., to be Lieutenant; Christopher Thomas Potts, Gent. to be Lieutenant; March 6. James Barron, Gent., to be Lieutenant; March 14. Thomas Reed, jun., Gent., to be Ensign; John Smurthwaite, Gent., to be Ensign; Richard Iliff, Gent., to be Ensign; March 6, Samuel Alcock, jun., Gent., to be Ensign; March 14. Frederick Henry Johnson, Gent., to be Surgeon; the Rev. Richard Skipsey, to be Honorary Chaplain; March 6.

2nd Durham Artillery Volunteers—Memorandum—The name of the Gentleman appointed Second Lieutenant in this Corps is Robert Thorman and not Robert Thomson as previously stated.

Warwickshire Rifle Volunteers (Birmingham)—Frederick Elkington, Gent., to be Captain; George Allen Everitt, Gent., to be Captain; Chas. Ratcliff, Gent., to be Captain; Chas. Richards, Gent., to be Captain; Samuel Delagrange Williams, Gent., to be Lieutenant; William Edward Everitt, Gent., to be Lieutenant; Edward Armfield, Gent., to be Lieutenant; Isaac Hollis, Gent., to be Lieutenant; Clement Cotterill Scholefield, Gent., to be Ensign; William Kimberley, Gent., to be Ensign; Thomas Turner Slaney, Gent., to be Ensign; William Francis Richards, Gent., to be Ensign; March 10.

Glastonbury or 19th Somerset Company of Volunteer Rifle Corps—Captain Arthur William Acland Hood, Royal Navy, to be Captain; William George Lax Lovell, Gent., to be Lieutenant; Walter Thomas Swayne, Gent., to be Ensign; March 17.

3rd Cumberland Rifle Volunteers—John Teather, Gent., to be Ensign; David Leitch, M.D., to be Honorary Assistant-Surgeon; March 10.

2nd Derbyshire Rifle Volunteers—The Rev. Henry Holden Bradshaw, Clerk, to be Honorary Chaplain; March 20.

Linlithgowshire Rifle Volunteers—1st or Linlithgow Company—Robert Hathorn Johnston Stewart, Esq., to be Captain; Thomas Chalmers, Gent., to be Lieutenant; Adam Dawson, jun., Gent., to be Ensign; March 19.

2nd or Borrowstowness Company—William Wilson, Esq., to be Captain; Patrick Turnbull, Gent., to be Lieutenant; John Begg, Gent., to be Ensign; March 19.

1st Renfrewshire Rifle Volunteer Corps (consisting of the 1st, 2nd, 13th, and 18th Companies) — Captain David Macduff Latham to be Major; Lieutenant Steward Neill to be Captain of the 1st Company, vice Latham, promoted; Ensign Hugh Spiers to be Lieutenant of the 2nd Company, vice Neill, promoted; James Hunter Crawford, Gent., to be Ensign of the 13th Company, vice Spiers, promoted; William Johnstone Marshall, M.D., to be Surgeon; March 17.

7th Hertfordshire Rifle Volunteers—Arthur Tower, late Commander in Her Majesty's Royal Navy, to be Captain; Brice Hugh Pearse, Gent, to be Lieutenant; March 20.

[The following appointment is submitted for that which appeared in the *Gazette* of the 16th March instant.]

Staffordshire Rifle Volunteers—27th Company—The Right Hon. William Walter, Earl of Dartmouth, to be Ensign; March 7.

[The following appointment is substituted for that which appeared in the *Gazette* of the 16th March instant.]

55th Lancashire Rifle Volunteers—George Edward Jee, Gent., to be Lieutenant; March 3.

The Mid-Lothian Coast Artillery Volunteer Corps, or First Division of the Artillery Volunteer Force in the county of Edinburgh—Major Sir James Gardiner Baird, Bart., to be Lieut.-Colonel; March 10.

The will of the late General Sir William Francis Patrick Napier, K.C.B., late of Scinde House, Clapham Park, was proved in the London Court of Probate, on the 2nd of March, by his relict, Lady Caroline Amelia Napier, the sole executrix, the personalty being sworn under 40,000*l.* He has bequeathed to Lady Napier his real and personal estates in trust, that she should receive the income arising therefrom for her life, and upon her decease the property to be divided among five of his children—namely, his son John, and his daughters, the Countess of Arran, Mrs. Bruce, and Emily and Caroline Napier, but has excepted from any share therein his daughter Mrs. Miles, from her being amply provided for. The will was made on the 9th of April, 1859, and Sir William died on the 12th of February, 1860 aged seventy-four.

MAYALL's PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum.*

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

THE ARMY PRINTING OFFICE, 102 & 114, HIGH STREET, PORTSMOUTH.—Henry Lewis.—Company Ledgers, Pay Books, Order and Day Books, Defaulter Sheets, District and Garrison Forms.

DOUDNEY & SONS' RIFLE SUITS.—1st Surrey, 4*l.* 2*s.*; South Middlesex, 4*l.* 10*s.*; Rifle Brigade, 4*l.*—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s.* Elstob, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—Rudall, Rose, Carte, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S.W.

MAPPINS' DRESSING CASES & DRESSING BAGS.—Mappin Brothers guarantee every article in this department of their manufactures to be of sterling quality, and designed in the most portable and convenient form. Mappins' Gentleman's Guinea Dressing Case. Mappins' Two Guinea Dressing Case, in Solid Leather. Mappins' Four Pound Dressing Bag is recommended for Strong Service. Mappins' Leather Dressing Case for Ladies, 1*l.* 4*s.* Mappins' Leather Dressing Case, lined with silk velvet, lock and key, 2*l.* 12*s.* Mappins' Travelling Dressing Bag for Ladies, 4*l.* 4*s.* The Show Rooms, 67 and 68, King William Street, London Bridge, E.C., are now furnished with an entirely New Stock of Dressing Cases and Dressing Bags to suit every class of buyers. An Illustrated Catalogue sent by post on application. Mappin Brothers, 67 and 68, King William Street, London Bridge, E.C. Manufactory, Queen's Cutlery Works, Sheffield.

HERALDIC STUDIO, 4, Old Cavendish Street, W.—New Designs for Monograms and Armorial Bearings in every style. Arms, Crests, &c., found by sending Name and County. Sketch, 3*s.* 6*d.* Paintings, Seals, Dies, and every kind of Engraving, in a superior style, by D. T. Baker.

N.B. Mr. Baker's ten years' connection with the Heralds' College guarantees correctness and excellence of execution.

UNWIN & ALBERT'S COLUMBIAN HAIR DYE changes red or gray hair to a permanent and natural brown or black. Its application is most easy; it is as harmless as pure water, and yet its extraordinary power upon the hair is so effective, that the hair is coloured permanently the moment it is touched by the dye. In cases at 5*s.* 6*d.*, 10*s.* 6*d.*, and 21*s.* at Unwin & Albert's, 24, Piccadilly, W.—Experienced assistants in attendance to apply the dye.

NEW PAPER FOR THE UNITED SERVICES AND VOLUNTEER CORPS.

THE ARMY AND NAVY GAZETTE AND JOURNAL OF THE MILITIA AND VOLUNTEER FORCES. Edited by W. H. RUSSELL, Esq., LL.D. (Late Special Correspondent of *The Times.*)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and all business letters and advertisements should be addressed to the Publisher, and Post-office orders made payable to Joseph Smith. Advertisements received up to Thursday Evening. The Paper will be published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street (North), Strand, London, W.C.

AGENTS FOR INDIA.

R. C. LEPAGE & CO., CALCUTTA.—Subscription, 20 Rupees per annum, including Postage, payable in advance.

THE ARMY AND NAVY GAZETTE IS SOLD BY J. Menzies, Bookseller, Princes Street, Edinburgh.

ROYAL ITALIAN OPERA, COVENT GARDEN. Under the especial Patronage of Her Most Gracious Majesty THE QUEEN,

A BENEFIT in Aid of the Funds of the ROYAL DRAMATIC COLLEGE will take place at the above Theatre on THURSDAY EVENING, MARCH 29th, 1860,

Mr. FREDERICK GYE having in the most generous spirit gratuitously placed this theatre at the disposal of the Council, the support of the Nobility and the Patrons of the Institution is respectfully solicited.

The following distinguished members of the Dramatic and Musical professions have already proffered their valuable services:—

Mr. B. WEBSTER.	Mr. PHELPS.
Mr. KEELEY.	Mr. CRESWICK.
Mr. BUCKSTONE.	Mr. CHARLES MATHEWS.
Mr. F. ROBSON.	Mr. COMPTON.
Mr. T. P. COOKE.	Mr. J. L. TOOLE.
Mr. DAVID FISHER.	Mr. H. WIDDICOMBE.
Mr. COOPER.	Mr. H. MARSTON.
Mr. F. MATTHEWS.	Mr. CHIPPENDALE.
Mr. WALTER LACY.	Mr. HOWE.
Mr. C. SELBY.	Mr. H. MELLON.
MISS GLYN.	MISS AMY SEDGWICK.
MRS. CHARLES YOUNG.	MISS WOOLGAR (Mrs. A. Mellon).
MISS LOUISE KEELEY	MRS. CHARLES MATHEWS.
MISS SWANBOROUGH.	MRS. WINSTANLEY.
MISS LOUISA PYNE.	MADAME CATHERINE HAYES.
MR. W. HARRISON.	THE CHRISTY'S MINSTRELS. (By Permission of J. W. Raynor, Esq.)

Conductor, Mr. A. MELLON, who, with the entire band of the Royal English Opera, render their gratuitous services. Also the

Stage Manager, Mr. E. STIRLING. Acting Manager, Mr. E. MURRAY.

MR. ALBERT SMITH'S CHINA WILL TERMINATE WITH THE 400TH REPRESENTATION on APRIL 5. It will be given until then EVERY NIGHT (except Saturdays) at Eight o'clock, and TUESDAY and SATURDAY Afternoons at Three o'clock. Stalls 3*s.*, which can be taken at the Box Office, Egyptian Hall; Area 2*s.*; Gallery 1*s.* Mr. Albert Smith's Summer Season will commence on Easter Monday.

MR. AND MRS. GERMAN REED, EVERY EVENING (except Saturday) at 8 o'clock; THURSDAY and SATURDAY AFTERNOONS at Three o'clock, in their POPULAR ILLUSTRATIONS, "OUR HOME CIRCUIT," and "SEASIDE STUDIES," introducing a variety of amusing and interesting SKETCHES FROM REAL LIFE, with characteristic Songs, at THE ROYAL GALLERY OF ILLUSTRATION, 14, REGENT STREET, W. Admission, 1*s.*, 2*s.*; stalls, 3*s.*; secured at the Gallery, and at Cramer, Beale, & Co.'s, 201, Regent Street, W.

FRENCH EXHIBITION, 120, PALL MALL, S.W.—The Seventh Annual Exhibition of Pictures, the contributions of Artists of the French and Flemish Schools, is NOW OPEN. Admission 1*s.*, catalogues 6*d.* Open from Nine till Six daily.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

The Editor begs to return his acknowledgments to the Officers and Secretaries of Volunteers who have so kindly furnished him with information in reference to their respective corps, and invites further communications.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, or to Mr. Joseph Smith, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, MARCH 24, 1860.

Our Transport Service is a remnant of the darker ages; it retains the traditions of the days when whole regiments were penned like sheep in stifling little brigs, and sent to sea to die or drown, or land with scanty numbers, fever stricken and half-starved,—and no questions asked.

We do not impugn the humanity of the officers—we had almost added the excellence of the Regulations of the Service; and we are ready to admit that the horrors into which we have had recently some insight, have run a long career in darkness and obscurity. But knowing them now, it is our duty to declare that the recent occurrences at sea on board some of our transports are odious and disgusting; that their recurrence must be prevented, or that England will be responsible for outrages on decency and Christianity which would disgrace her earliest civilisation. Scarcely has the tale of the poisonings, ruffianisms, immorality, and murder on board the Accrington been told, than we hear of the sufferings and mortality which tracked the course of the Great Tasmania over the ocean from Calcutta to Liverpool; and, at the very same moment, reports reach us from the other side of the world which raise an idea more solid than a suspicion, that the whole system under which we send our troops and their families to sea demands supervision and most rigid investigation. The shocking stories of the debauchery on board the Dalhousie, where, as we hear, the choice made of the matron was by no means justified by antecedents or consequences, are accompanied by details relative to the deaths on board the Dudbrook and the Euxine of a distressing character. In the Dudbrook all the infants died—and the deaths, 43 in number, amounted to 15 per cent. of the number of the passengers. The Euxine lost 76 women and children on her voyage out to Madras. It is not to be denied that women and children are subject to epidemics, which will break out in spite of all our precautions: but making every concession on that point, there is a uniformity of mortality among the families of our troops at sea, which forces on us the conviction that the system under which they are transported is radically wrong.

No officer will go in charge of a transport if he can help it; he will make any pecuniary sacrifice to avoid the trouble and inconvenience to which such a mode of obtaining his passage exposes him. It is the expression of a truth—not the enunciation of any offensive antagonism—to say that the gentlemen who act as medical officers of hired transports are rarely men who could pursue their profession successfully on shore. There is but little discipline among the officers of the ships, and there is less among the men; and there is reason to apprehend that those who are selected to act as matrons are not always suited for their posts. Hence the irregularities which lead to neglect of children, to the spread of disease, and to increased mortality. Early in the war with Russia it was proposed by the correspondent of one of the papers, who was an eye-witness of the inconvenience and disorders of the Merchant Transport Service, that the Government should inaugurate a fleet of steam transports. Subsequently, under the pressure of circumstances, two or three large screw steamers were purchased, and some of them have done signal service since the close of that memorable war, in the conveyance of troops; but the great expense has operated in deterring the authorities to ask for votes for the creation of a regular transport service. The hand-to-mouth system suits them best at present—and our soldiers suffer. But whatever be the evils or advantages of the system, the Great Tasmania calls for such an expression of public opinion as shall prevent the repetition of the criminal neglect and brutal indifference of the Indian authorities on whom alone the blame should fall—as, in the case of our fellow-countrymen, even though they be men who have forfeited their good opinion by an exhibition of independence in which they would have gained larger sympathies had they manifested better feelings and judgment. The officers on whom the heavy censure of the coroner's jury must strike are apparently the under secretaries to the Government at Calcutta, the principal medical officer in the Indian establishment, and the Deputy-Quartermaster-General of the Indian Army, who are responsible for the arrangements for the reception of the men. The officers who examined the provisions must have been utterly incompetent, or very cruel and worthless men. They permitted 1023 men, women, and children to set out on a long voyage with putrid beef, sour beer, mouldy biscuit, adulterated lime juice, bad bread, spoiled flour, cast-iron peas, indifferent sugar; they let them proceed to sea without hammocks, warm clothing, medical comforts, or blankets. It is "against the system" of the Indian Government it seems to furnish blankets or certain other necessaries to the men. They must learn to alter that system. They must know that now and at last they are under the influence of the public opinion of England. In the month of November the Great Tasmania left the Hooghly; in the midst of the Indian winter. Ere she arrived in Liverpool 52 deaths were recorded, and when the ship arrived in the Mersey upwards of 300 of her miserable freight were laid prostrate by scurvy and by scorbutic dysentery—the terrible familiar of starved camps and putrescent transports, which made itself felt at Scutari and before Sebastopol in 1854-55. Death tracked the poor wretches to the hospitals on shore. An attempt was made, at the inquiry to which the deaths of the sufferers gave rise, to show they "had brought it on themselves" by drunkenness and evil-living previous to embarcation. Good Heavens! Was it not enough to cause wonder that so many survived under the dietary, and under the circumstances which were substantiated—not that so many died. The pork was good, we are told, and so were the tea and rice. It would really be an interesting experiment to see how long one of the Calcutta officials would hold out on salt pork, tea, and rice, alone, ere he exhibited symptoms of scurvy. There is one thing which was not explained: when it was found out four days after leaving the Hooghly that the provisions were bad, why did not the captain put into Madras, where he could have procured ample supplies from the Government. Point de Galle lay

Digitized by Google

open to him further on; the Cape of Good Hope was not out of his track; but still, subject of course to the officers on board, he held on his way till he ran into St. Helena, where he could get no adequate supplies of what he needed. It is a sad tale, and when it goes out to India, it is not calculated to soften the feelings with which the remnant of the Europeans in the Indian Army regard their masters. For our part, we think the finding of the coroner's jury furnishes a basis for inquiry, on which the Government ought to take a firm stand in the interests of humanity and Christianity.

The intelligence which has reached England of a fresh trouble in India is so vague that we are not yet in a position to appreciate its exact value. We only know that if the news be true one thousand of the subjects of the British crown have been murdered in a raid by the inhabitants of another district. The ordinary conditions on which the existence of a Government depends have been violated, for we have not protected our subjects, their lives or properties; and there now only remains the fulfilment of the painful duty which devolves upon the State, in punishing those who have broken the peace, and murdered those whom we are bound to protect. The proposition that the Rajah of Independent Tipperah, in whose territories the marauding Kookies are supposed to live, is responsible for their acts, is only tenable provided he has been permitted to retain the means of repressing disorders. Our Government forces these small Rajahs to disband their levies, to give up their weapons, to disarm their followers,—deprives them, in fact, of all means of physical control,—leaves our boundaries and territorial limits, which are oftentimes lines on the map, unprotected—and then, when a horde of ruffians, having exhausted their own territory, rush into our lands to pillage and murder, we talk of "holding the Rajah responsible!" The fact is, we should maintain continuous posts along the borders of these independent states, such as were established along the Nepaulese frontier during the rebellion; more especially where our neighbours are rude and barbarous, and weakly governed, or where there are artificial boundary lines. The question involved in the consideration of that subject is one of our Indian difficulties. If we denude our vast territories of local levies and native troops, we are continually exposed to the risk of such occurrences, and the presence of numerous European troops cantoned in central stations will afford no security to the miserable cultivators who rely on us for protection.

It is with regret we have to state that Colonel Pakenham, Adjutant-General of the Queen's Forces in India, is obliged to abandon his post in consequence of indisposition, or rather, of a painful disease which has attacked his knee-joint. He left Simla on February 5th, in order to take a passage to England.

Colonel Congreve has assumed the charge of the department of the Adjutant-General at Simla, vacated by Colonel Pakenham.

A rumour has got abroad to the effect that some considerable modification of the intentions of the Government respecting the increase of the Military Forces of the Empire, as settled in the Estimates, is likely to take place. Our readers are aware that, in settling the number of troops to be maintained for our Home and ordinary Colonial possessions, the Government has been for the last two or three years very much guided by the probable requirements of the Indian authorities. The last estimates were framed upon a calculation respecting the wants for India, which has been affected by the last two or three mails. The Governor-General finds that the state of India will permit the immediate withdrawal of seven regiments of infantry and two of cavalry, and as this was not expected when the Estimates were framed, it follows that some of the projected augmentations of our forces at home will have to be abandoned. Instead of two new brigades, which it was settled were to be added to the Artillery, but one field brigade will now be formed, together with some augmentation of the new Coast Brigade; while the projected increase of the Royal Engineers is altogether given up, and that corps will remain at its present strength.

According to the latest accounts from India, Lord Clyde has yielded to the pressure of the Governor-General's wishes, and has consented to remain in India for another year. The result will be a general though partial change in the Indian commands. As Sir Hugh Rose retains the Bombay command, Sir William Mansfield intends, it is understood, to proceed to Bombay, and to remain there until the Presidency shall be transferred to him on Lord Clyde's departure for England.

Lieut.-Colonel Pretyman, of the 60th Rifles, has been appointed Lieut.-Colonel of the Depôt Battalion at Walmer, in succession to Lieut.-Colonel Whitmore, who goes to Ireland as Military Secretary to Sir George Brown. Lieut.-Colonel Pretyman, as the junior of his rank in the 60th, would be placed on half-pay on the return home of the 1st battalion of the regiment, in consequence of the reduction of one lieut.-colonel from its strength as on the Indian establishment.

The refusal of Sir W. R. Mansfield to accept the command entrusted to him by the Queen is to be regretted on three grounds; first, because it is injurious to the high reputation of a gallant, zealous, and able officer, and lays his motives open to injurious comment from persons hostile to him; secondly, because it is mischievous in itself, as a precedent set by a distinguished officer, which, if admitted, will cause serious difficulties in reference to the custom of giving local rank to superior officers; thirdly, because it adds another to the number of examples which have been too frequent in the East, of disobedience to orders, of a refractory spirit, and want of military subordination. On examining the grounds of Sir William Mansfield's refusal to accept the post of second in command to Sir Hope Grant, we confess we do not find them valid to justify the General in declining the honour conferred on him by Her Majesty. There is the sole step of local rank in Turkey and in Europe to sustain the objections which have been raised to putting Sir W. Mansfield under the orders of the present Commander-in-Chief of the China Expedition; in all other points Sir Hope Grant has seniority of service. We have reason to think that Sir W. Mansfield's friends regret he has not accepted a command, in which his abilities and military knowledge would assuredly have secured an accession to the reputation he already enjoys.

We have received some communications expressing a not very unnatural alarm at a notification recently issued, to the effect that the new patterns of officers' uniform may be inspected at the Adjutant-General's office. We cannot wonder at a feeling of dismay being created by any announcement portending another change in tailoring arrangements and fresh expense. However, we can quiet all apprehension on this score. The notification in question merely arises from the fact that, for convenience sake, the patterns of officers' uniforms are to be left at the place where officers are most likely to attend upon business, namely, the Adjutant-General's office. No change of uniform or equipment is at present intended.

Rumours have reached us by the last mail that Colonel Sterling, now Military Secretary, is likely to succeed Sir W. R. Mansfield as Chief of the Staff, and that Lieut.-Colonel Metcalfe in that case might have a chance of becoming Military Secretary. These are mere "voices of the camp."

The two camps of the Governor-General and of the Commander-in-Chief move *pari passu* together. The expense of this grand procession will be very great, and it is calculated that of the Viceroy's camp is at least 8000*l.* a month.

Some recent changes of regiments in the North-West and in the Hills have caused considerable irritation, the expression of which has reached us by last mail. The Bengal Fusiliers are among the aggrieved regiments, which are three or four in number. We trust all differences of the kind will soon disappear; but it must be remembered that even the most disagreeable stations must be occupied, if military considerations render it desirable.

The arrangements respecting the locality and Staff of the New School of Musketry are as yet in abeyance, but we believe the probabilities are in favour of Fleetwood as the site.

Although General Gascoigne vacates the command of the Dublin district next week, no nomination of a successor has yet been made. The report to which we alluded last week, that Sir Richard Airey would assume the command of the Dublin district, is very generally credited.

Major the Hon. Hussey Fane Keane, of the Royal Engineers, has been appointed an extra aide-de-camp to His Royal Highness the General Commanding-in-Chief, in succession to Lieut.-Colonel Maude, who has been appointed to the Master of the Horse's department in the Queen's Household.

Lieut.-Colonel J. E. Thackwell, unattached, has been appointed Assistant-Adjutant-General at Portsmouth, in succession to Lieut.-Colonel Conolly.

Sir George Brown's Staff will consist of Lieut.-Colonel Whitmore, as Military Secretary, and Captain Blackett, Rifle Brigade, and Captain Fitzhardinge Kingscote, Rifle Brigade, as aides-de-camp.

At length a Government notification has appeared in India respecting the Army Medical Warrant of October, 1858. It is merely a memorandum detailing the increased rates of English pay in Indian currency, and stating that the "pay proper having been increased," the "allowances would, as is the invariable rule in such cases, be diminished in proportion, so that the total will remain the same." No reference is made to the promotion and increased rank conferred by the Royal Warrant. It has created great disappointment, and steps are being taken to forward a petition to Parliament on the subject.

In addition to the case of the Great Tasmania, we are sorry to hear from India of other instances of mortality on board transport ships, owing, we fear, to a still more dreadful cause. In a Bombay paper we read: "The Dudbrook, just arrived in Bombay harbour, has on board 255 souls. The number embarked at Southampton was 296, and there have been two births on board. The number of deaths, therefore, has been 43—1 adult female, 30 children between 1 and 12 years of age, being 15 per cent. of the whole number, and 6 infants—all the infants, in fact, under one year who were on board. Included in the above 255, are 134 married women and 106 children. The Euxine arrived at Madras the other day, reporting some 76 deaths of women and children in the same day." A correspondent tells us that the Dalhousie, which conveyed out the wives and children of soldiers, was in a condition that reflected anything but credit upon the officers of the ship, whose conduct towards the women was to be made the subject of investigation. On board this ship 19 children died, and on board other vessels to which our correspondent alludes, no less than 65 children shared the same fate.

We have reason to believe that the statements made by some of our contemporaries respecting large Cavalry and Artillery barracks to be erected at Colchester, are, to say the least, premature.

The regiments now on their passage home from India, are—the 14th Light Dragoons, 12th Lancers, 53rd Regiment, and 1st Battalion of the 60th Rifles; and in addition to these the 8th Regiment 1st Battalion, 24th 1st Battalion, 73rd, 6th 1st Battalion, and 37th will probably arrive in England in the course of the summer. Should any more regiments be sent to England, the 5th Fusiliers 1st Battalion, 64th, 70th, and 83rd Regiments are the next on the list.

While the new regulations appear likely to be attended with success in bringing forward a sufficient number of candidates for the Cavalry of the Line, one of the Household regiments appears to be more than ever in want of officers. At the present moment Her Majesty's 2nd Life Guards possesses but two cornets, the complement being eight; and, since the month of January, 1859, no young gentleman appears to have been attracted by the burnished cuirass and nodding plumes which form so prominent a part of the picture on State occasions. There are but ten subalterns available for regimental duty, the proper number being sixteen; and one or two more promotions in the regiment would render the guard and orderly duties still more severe.

It has come to our knowledge that the extraordinary detention of the Artillery in Egypt was not caused by any neglect or mismanagement of the authorities at the War-Office. Their arrangements were complete and perfect as far as Alexandria; but they were obliged to rely on Lord Elphinstone to make provision for the carriage of the men and guns from Suez, and His Excellency was obliged to rely on untrustworthy ships and uncertain resources, which failed him and the Artillery at the last moment. The Auckland broke down, and never passed Aden; a steamer promised by the Peninsular and Oriental Company was not forthcoming, owing to an accident to one of the Company's fleet, which compelled them to employ all their available ships on the postal service; and the only vessel that arrived at Suez was the Berenice, which had been intended as a kind of supplementary vessel.

We have received a communication from a medical officer of the Army in reference to the physical examination undergone by candidates for admission into the department at Chelsea. It appears to us that, if it be indispensable to ascertain that the candidates are fit for duty and regimental work, something more is requisite than an examination down to the waist. Suppose the candidate were afflicted with rupture, or extensive varicosity, or other diseases, which may be readily suggested, will our correspondent contend that he should be admitted into the service?

The next competitive examination of candidates for admission into the Royal Indian Military Academy at Addiscombe is to commence on Wednesday, May 16, when 60 appointments will be competed for. The examination will take place at the Royal Hospital, Chelsea. The Secretary of State for India in Council has determined to allow the sum of 100*l.* to each cadet who may obtain a commission in the Engineers or Artillery after a residence of three terms at the Addiscombe College, in aid of the expenses of his education and residence at that institution.

It appears by a Parliamentary return just printed that on the 31st of March, 1859, there were in the different regimental savings banks 9499 depositors, with 144,276*l.* to their credit in the aggregate. Of this sum the Royal Artillery had 23,012*l.*, the Royal Engineers 11,640*l.*, while of the regiments of the line the three highest in amount were the 26th, 4187*l.*, the 45th, 3599*l.*, and the Canadian Rifles, 2992*l.* In the Cavalry the 2nd Life Guards, 4th Dragoon Guards, and the 15th Hussars, had the largest sums to their credit.

VOLUNTEER ORGANISATION.

The following circulars have been issued from the War Office to the Lord-Lieutenants of Counties :—

War Office, February, 1860.

My Lord,—Having had under my consideration the expediency of the appointment of an adjutant, commissioned by Her Majesty, to every brigade of Artillery and battalion of *Rifle* Volunteers, I have the honour to inform you that I shall be prepared to submit for the Queen's approval the names of such officers as you may recommend for the several corps serving in your county, subject to the following qualifications and conditions of service :—

1st. That the candidate should have served at least four years either in the line, or in the army of the late East India Company, or in Her Majesty's Indian forces, or in the embodied Militia.

2nd. That his application should be accompanied by testimonials as to conduct from his former commanding officer.

3rd. That the candidate shall be subject to an examination at the nearest garrison, as to his fitness to hold the office of adjutant under such regulations as His Royal Highness the General Commanding-in-Chief may, with the concurrence of the Secretary of State for War, be pleased to direct; and that he shall also have passed through a course of instruction in musketry at Hythe; or be prepared to do so when called upon.

4th. The rank of an adjutant is properly that of a subaltern; but if appointed out of Her Majesty's regular forces or Indian Army, or the Militia, he may retain the rank which he held in either of these Services; but no adjutant shall be entitled by virtue of his superior rank to take the command of any company of Volunteers, an officer of the company being present, except for the purpose of instruction drill.

5th. Every officer appointed an adjutant of Volunteers will be required, before receiving his commission, to transmit to the Secretary of State for War the following declaration :—

"I do hereby declare, upon my honour as an officer and a gentleman, that, in order to obtain the appointment of an adjutant in the.....Volunteers, I have not given, paid, received, or promised, and that I do not believe that any one for me has given, paid, received, or promised, directly or indirectly, any recompense, reward, or gratuity to any person or persons whatever.

"Witness (C. D.) (Signed) (A. B.)"

6th. The pay of an adjutant of Volunteers shall be 8*s.* a day, and 2*s.* to cover the forage for a horse, or for travelling expenses, provided the commanding officer has exempted him for the time being from the liability to keep a horse.

Any other incidental expenses must be borne by the corps.

7th. As the public services of an adjutant are to be made fully available at all times, it is necessary that it should be perfectly understood beforehand by candidates, that the Secretary of State will not allow them, if appointed, to follow any other profession, or hold any other appointment, public or private. I have the honour, &c.

Sidney Herbert.

War Office, Pall Mall, March, 1860.

My Lord,—Having had under consideration the expediency of forming the various scattered bodies constituting Volunteer Rifle Corps into Battalions, in order to facilitate the administration of the Volunteer force generally, as well as to increase its efficiency, I have the honour to inform your lordship that, with a view to carry out this organisation, it is proposed to adopt the following principles :—

1st. That a battalion of Volunteers may be formed either as a consolidated body, composed of various companies in densely populated districts, acting together as one corps, in the meaning of the Act of Parliament, 44 Geo. III., cap. 54. ; or,

2nd. It may be a consolidated body for drill and administrative purposes only, being composed of various companies forming in themselves distinct and (financially considered) independent corps, in the meaning of the Act ; or,

3rd. A battalion may be formed for administrative purposes only, from the various corps scattered over a rural or thinly-populated district.

It appears to me, therefore, that in order to meet these several forms of battalion organisation, it is desirable to lay down the following rules :

For a consolidated battalion formed on either of the two first principles, 1 major and 1 adjutant will be allowed to 4 companies of min. strength.

1 lieut.-colonel and 1 adjutant will be allowed to 6 ditto.

1 lieut.-colonel, 1 major, and 1 adjutant will be allowed to 8 ditto.

1 lieut.-colonel, 2 majors, and 1 adjutant, will be allowed to 12 ditto.

When the companies exceed 12, the corps will constitute a regiment, and be formed into two battalions, each with field officers and adjutants in the above proportion ; the whole to be commanded by the senior lieutenant-colonel.

Although I am prepared to sanction the formation of a battalion of 4 companies, it is intended to provide only for cases in which no more than that number of companies can be formed in a town, and where it is not considered advisable to bring in any rural companies ; and it should be understood that no two battalions of this strength can be formed in one place.

With regard to the third principle of formation, which is applicable to rural districts, where the companies, &c., are greatly scattered, I have to explain to your lordship that it is not intended that this formation into battalions should render the separate companies liable to be removed from their own neighbourhood, or brought together at any time when not called out for actual service, except with their own consent, or that the independent existence of the several corps should be in any degree affected ; my object is to accomplish a unity of system in correspondence drill, inspection, and returns throughout the entire force.

The following staff will therefore be allowed for rural battalions :—1 major and 1 adjutant to 4 or 5 companies of min. strength.

1 lieut.-colonel and 1 adjutant to 6, 7, 8, or 9 ditto.

1 lieut.-colonel, 1 major, and 1 adjutant to 10, 11, or 12 ditto.

I have further to state to your lordship—

First. That in effecting the formation of these battalions, the concentration of companies should be considered with reference to locality, and not to their numerical standing in the Army List.

Second. That each company may continue to have its own rendezvous, and drills ; but that there should also be a battalion rendezvous established ; and, where the local distribution and convenience of the different companies will admit of it, certain days set apart for battalion drills.

Third. That, although I have not thought it desirable to insist upon a rigid adherence to that uniformity in the clothing and equipment of corps serving in the same county, which was recommended in article 6 of the memorandum of the 13th July, 1859, I trust that in any future renewal of the clothing, the propriety of adopting a uniform colour for companies belonging to the same battalion will be duly considered.

I beg, therefore, to acquaint your lordship that I am desirous to see the different companies of Volunteers throughout the country united, as far as possible, into battalions under the foregoing rules ; and I shall be glad to be favoured with your lordship's views as to the best means of carrying out the proposed organisation among the companies formed in the county under your charge.

I have the honour, &c. S. Herbert.

THE MORTALITY ON BOARD THE GREAT TASMANIA.

The Great Tasmania transport, as we announced in our last impression, arrived at Liverpool with discharged soldiers on board in a dreadful condition. The circumstance has been the subject of a minute inquiry at Liverpool this week, at which Mr. S. G. Baring, the Under-Secretary for India, was present.

The inquiry into the death of several soldiers on board the ship was opened by the Liverpool borough coroner on Monday, and concluded on Thursday. The vessel left Calcutta on the 9th of last November, with 1023 souls on board. When they reached St. Helena on the 32nd of January, the sick list numbered 892, and there had been 52 deaths. The passengers were principally the soldiers who were disbanded on the extinction of the East India Company. The surgeon who attended them states that they were for the most part sickly when they came on board ; they had sold their clothes to purchase drink. On reaching Liverpool the sufferers were removed to the workhouse hospital. One man died on his way thither. He was so miserably clad that "the clothes on him only weighed one pound six ounces." On the showing of all the witnesses the cause of the great sacrifice of life was, the bad ventilation of the ship, the wretched provision, or rather no provision of clothes and sleeping accommodation for the men, and the bad food which was provided them. The Government authorities did not visit the ship after the men were on board. The bread was condemned before the ship started. When they had been to sea about a fortnight large quantities of biscuit were condemned and thrown overboard. Beef and beer were in the same manner condemned and destroyed. During "all the voyage" the beef was stinking, the biscuit full of maggots ; the milk in the cans bad, and the lime juice was diluted. After the scurvy attacked the men they showed a great disinclination for food. "I had great difficulty," says the medical officer, "to prevent men from dying of starvation." The post-mortem examination of five soldiers exhibited livers "wholesome and healthy. None of them exhibited any signs of having been injured by habitual drinking." Such food as that served on board the Great Tasmania, says a Liverpool surgeon, "would have precipitated the disease of which they died."

A letter from the Governor-General of India states that, "in consequence of the great number of troops proceeding from India to England and elsewhere, it was impossible to supply the transport ships with fresh provisions instead of salt, and consequently salt provisions were issued to the troops.

At the conclusion of the evidence, the coroner exonerated the captain and crew of the ship from all blame, as he did also the owners of the vessel. The jury, after two hours' consultation, returned the following verdict :—

"That Thomas Beach died from natural causes, and that his death was accelerated by necessary removal to the workhouse." In the case of the other six, they found that they "died of scurvy, brought on by bad food and exposure to cold on board ship." The jury further found, "That the provisions supplied by the Government as stores for the use of the troops were bad and unfit for human food, with the exception of the tea, pork, pickles, and rice. That there was an entire absence of proper disinfectants, and that the lime juice had lost its medicinal properties when put on board. That the officers who signed the 'General Inspection Report' are the culpable parties, so far as the quality of the stores is concerned. That the captain and officers of the ship are entirely free from blame, and that the ship's contract was satisfactorily fulfilled. That the military officers and the surgeon did their best, under the circumstances in which they were placed, to promote the health of the men under their charge."

The foreman also made the following presentment on behalf of the jury :—"The jury think it an imperative duty to urge upon the Government the necessity of such a change in the system of military inspection and supply of clothing before soldiers leaving India or any other foreign country, whether they are still in the Service or have had their discharge and are receiving a Government passage home, as shall prevent men in future arriving in cold weather so insufficiently clothed as the men who have arrived by the Great Tasmania."

Sandwich Island advices to January 28 state that the Russian fleet had sailed for Cronstadt, viâ Valparaiso.

From British Columbia we have advices of a new transgression of boundary lines by a detachment of the American army. A squad of men went to Langley, and, seizing a couple of prisoners, carried them off into Washington territory. Much excitement on the subject existed at Victoria.

SMALL-ARM AMMUNITION.

The following General Order to the whole of the Army at home and abroad has been promulgated :—

"His Royal Highness the General Commanding-in-Chief, with the concurrence of the Secretary of State for War, having approved the following rules and regulations, relative to small-arm ammunition for the Army, they are promulgated for the information and guidance of all officers.

"The officer commanding the Royal Artillery with an army, whether in the field, or occupying any garrison, fortress, or district at home or abroad, is to be considered and held entirely responsible to the general, or other superior officer in command, for the preservation and transport of sufficient reserves of small-arm ammunition for the troops.

"For an army in the field the first and second reserves are to be with the Royal Artillery, and the third reserve and great depôt in the charge of officers of the Military Store Department.

"The first reserve is to be conveyed in artillery small-arm ammunition waggons attached to the field batteries with each division, and each of these waggons will be provided with cradles and ladders to admit of the leading horses being made use of in transporting ammunition to such positions as it may be found impracticable to reach with the waggons.

"The second reserve is also to be conveyed in artillery small-arm ammunition waggons by the details of the Royal Artillery, which have the reserve of the gun ammunition in charge.

"These reserves are to be under the immediate orders of the officer commanding the artillery of each division, who will be responsible to the general officer thereof, that the waggons containing the ammunition of the first reserve are from time to time completed, as far as circumstances will permit, from the second reserve ; and that in like manner the second reserve is completed from the third reserve in the keeping of the military store officers.

"Under ordinary circumstances the supply of ammunition in the field is to be made on requisitions of commanding officers of the corps, which are to be sent to the adjutant-general of the division, and, should the general commanding approve, the commanding officer of artillery with the division will be authorised to make the issue ; when, however, the Army or a division is actually engaged, the commanding officer of artillery may issue ammunition on the requisition of any commanding officer applying to him.

"The second reserve should always be up with the Army, but kept as far as practicable from under fire.

"The third reserve should not be more than an ordinary two days' march in the rear of the Army.

"If the base of operations should exceed an ordinary two days' march, additional reserves will be required, but this is a matter that must rest with the general officer commanding, who would direct the commanding officer of artillery to make the necessary arrangements with the chief officer of the Military Store Department for insuring a proper and regular supply of ammunition.

"In fortresses, garrisons, &c., general officers are to hold the commanding officers of artillery responsible for there being a proper reserve of small-arm ammunition, in charge of the military store officers, available at all times for issue. Small-arm ammunition waggons will be attached to the field batteries of artillery at the camps of instruction at home, and the General Commanding-in-Chief desires that the general officers will accustom the troops to obtain small-arm ammunition for exercise when in the field, in the manner that would be followed in actual warfare, in the cases of supply of ball cartridge with the Infantry being exhausted.

"By command,

"G. A. Wetherall, Adjutant-General."

MILITARY PRISONS.

The report on the discipline and management of the military prisons for 1858 has been presented to both Houses of Parliament by command of Her Majesty, and contains the following statistical information :—The military prisons in operation in 1858 were as follows :—England—Chatham, Gosport, Weedon, Devonport, and Aldershot ; Scotland—Greenlaw (near Edinburgh) ; Ireland—Dublin, Cork, Limerick, and Athlone ; abroad—Gibraltar, Quebec, Halifax (Nova Scotia), Bermuda, Vido (Ionian Islands), St. Elmo (Malta), Mauritius, Barbadoes, and Montreal ; making a total of 19 military prisons, of which ten are in the United Kingdom, and nine at different foreign stations, the whole being capable of accommodating about 1500 prisoners. The report exhibits a considerable variation in the prison statistics of 1858 as compared with those of 1857 ; the number of men punished for minor offences in 1858 has, in comparison, been smaller than in any previous year, except 1857, indicating an improvement in discipline, and, it may be hoped, a progressive tendency as regards the moral condition of the soldier. The average length of sentences was 99 days in 1849, and 87 in 1854 ; but it was reduced in 1855 to 77 days, in 1856 to 53 days, in 1857 to 49 days, and in 1858 to 47 days. The statistical tables of the report also announce that although the tendency to desertion has increased, drunkenness and other crimes in the Army have decreased since 1857. The expenditure for military prisons in the year 1858 was no burden to the country, as the amount of unissued pay and beer-money exceeded the prison expenditure by 1,452*l.* ; the total expenditure being 18,125*l.*, and the unissued pay and beer-money, which is stopped when the men are in prison, 19,577*l.* The number of corporal punishments inflicted last year was 918, among 219,739 effective men, being 0·42 per cent.; and the number of deserters branded 2,371, or 1·09 per cent., which unfortunately exhibits an increase for the same offence in 1857, when the numbers were—flogged, 545, or 0·34 per cent.; branded, 1,290, or 0·76 per cent. From the medical returns of the military prisons at home, it appears that the health of the prisoners has improved since 1854. The proportion of numbers treated for sickness to the total numbers in confinement in 1854 was nearly 21 per cent., whereas in 1855 it decreased to about 15 per cent.; in 1856 it was 17 per cent.; in 1857, 16 per cent.; and in 1858, 15 per cent. This result is at least a sufficient proof that the reduced scale of diet adopted in August, 1850, and in general operation throughout the years 1851, 1852, 1853, 1854, 1855, 1856, 1857, 1858,

Digitized by Google

combined with the system of requiring the second and third class prisoners to sleep accoutred as if on guard, although it has increased the loss of weight among the prisoners as shown in the tables, has not as a general rule had any injurious effect on their health. Notwithstanding the apparent effect of the punishment in causing a considerable average loss of weight, it is remarkable and satisfactory that the number treated for sickness during the year 1858 was proportionately less than in any year since 1843, with the exception of the year 1855. The following statistics are then given upon punishments in the Army, and with them the report concludes. In 1843 the number of soldiers imprisoned at any one time under sentence by court martial, in civil prisons, exclusive of those who might be in confinement by order of commanding officers, was in the ratio of 20 in 1000, and at the same time the number of corporal punishments amounted to annually about 5·2, making 25·2 per 1000. In the three years from 1851 to 1854 the number of imprisonments was reduced to 11 per 1000, and in the four years from 1850 to 1854 the average number of corporal punishments had been reduced to 2·5 per 1000, being a little more than one-half in both cases, and making a total of 13·5 as compared with 25·2. During the year 1858 the average number undergoing imprisonment at any one time in the military prisons and barrack cells amounted to 11·9 in 1000, and the total corporal punishments in the year amounted to 4·2, making a total of 16·1 per 1000 for 1858 as compared with 25·2 in 1843.

STRENGTH OF THE INDIAN ARMY.

The following list of the Bengal Army is official, though not signed :—Royal Engineers, 38 men ; two troops Horse Artillery, 389 ; 14 companies Foot Artillery, 2592 ; four Dragoon regiments, 2433 ; 46 Line regiments, 43,058 ; total, 48,510. The local Europeans, though terribly reduced by the strike, still muster—Sappers and Miners, 861 ; three brigades Horse Artillery, 1297 ; nine battalions Foot Artillery, 2115 ; five regiments Bengal European Cavalry, 1044 ; six regiments European Infantry, 1949 ; total 7266. The native troops comprise 15 regiments of Native Infantry, 10,656 ; 14 regiments of Irregular Cavalry, 5914 ; 4 regiments of Sikh Cavalry, 2254 ; 19 Punjab Extra Corps, 16,313 ; the Governor-General's Body Guard, 130 ; 9 battalions of Local Infantry, 8101 ; Khelat-i-Ghilzie, Ferozepore, and Loodiana Regiments, 2778 ; Civil Corps — Allyghur Regiment, 1033 ; Meywar Bheel Corps, 1030 ; Malwa, 539 ; Joudpore Legion, 711 ; Assam Local Artillery, 105 ; Assam Local Militia, 183 ; Darjeeling Sebundees, 315 ; Kooky Levy, 214 ; Nagpore Irregular Cavalry, 554 ; Nagpore H. Field Battery, 109 ; three regiments of Nagpore Irregular Infantry, 2754 ; Pegu Light Infantry, 791 ; Bhopal Levy, 873 ; five regiments of Punjab Cavalry, 2956 ; six regiments of Infantry, 4196 ; Garrison Company Artillery, 81 ; three Punjab Light Field Batteries, 425 ; four regiments Sikh Infantry, 2996 ; Hazara Mountain Train, 68 ; Peshawur ditto, 99 ; Guides Corps, 555 ; Mhairwara Battalion, 755 ; Meena Battalion, 554. Extraordinary —14 Regiments Irregular Cavalry, 7745 ; Lahore Light Horse, 154 ; Camel Corps, 734 ; 15 Levies, 10,397 ; 1st and 2nd Gwalior Infantry, 1163 ; Kamroop Regiment, 912 ; East India Regiment, 310 ; Lucknow Regiment, 820 ; Loyal Poorbeahs, 277 ; total, 90,564. Bengal Military Police, 8000 ; Oude ditto, 12,000 ; North-west Provinces ditto, 27,000 ; Punjab, 10,000 ; total, 57,000. Grand total, 147,564.

Add the armies of Madras and Bombay, and the new military police of the former presidency, and we have a native force of nearly 300,000 men, and a native army, police excluded, of 210,000. The whole of this is to be swept away within the next 12 months. All recruiting is already stopped, and all the levies ordered to be gradually disbanded. India is to be garrisoned by a force of 80,000 Europeans, aided for fatigue duties by half that number of natives, selected from all classes—Goorkhas, hill-men, Madrassees, Jews, Mahrattas, and Hindostanees. The native force will garrison the frontier and a few remote stations unfavourable to European life, and supply sentries and fatigue parties in cantonments. Each Presidency, will, besides, have an armed police, organised precisely like the Irish constabulary, but very strictly limited in numbers, and armed, if with fire-arms at all, only with the lightest of carbines. I need scarcely say if this plan is correct, and I believe it to be so in all essentials, the financial difficulty is at an end, and the empire as safe against revolt as Great Britain. My only doubt is whether the power of Government will be sufficient to sweep away the mass of interests which will resolutely oppose themselves to a reform so wide and so extensive. It will probably irritate every old Indian at home, and though they do not now represent Indian opinion, they do speak the sentiments of a powerful section of the Army. It must not be forgotten in considering the scheme that we have in India no trouble with disbanded soldiery. They subside at once into the population. Lord Hardinge disbanded 50,000 men in a day. The great Sikh army, defeated by Lord Dalhousie, went back to the plough till Sir John Lawrence summoned them to arms to reconquer Hindostan.—*Calcutta Correspondent of the Times.*

The visit of the Prince of Wales to Canada is officially announced. On the 29th of last month a dispatch was received from the Duke of Newcastle, informing the members of the Legislative Assembly that "the Queen expresses her hope that when the time for the opening of the Victoria Bridge is fixed, it will be possible for His Royal Highness the Prince of Wales to attend the ceremony in Her Majesty's name." The squadron ordered to assemble at Spithead for the purpose of conveying His Royal Highness across the Atlantic, will consist of the Hero, 91, Captain George H. Seymour, who will hoist his broad pendant as Commodore of the squadron ; the Ariadne, 26, Captain E. W. Vansittart ; the Flying-fish, 6, Commander Charles W. Hope ; and the Royal paddle-yacht Osborne, Master-Commander George H. K. Bower. His Royal Highness will take his passage out and home in the Hero, one of the finest 91-gun ships in Her Majesty's Navy. The Osborne will be retained for services on the coasts and rivers of Canada during the stay of His Royal Highness in that colony.

INCOME-TAX.

The following circular has been issued :

War Office, Pall Mall, 15th March, 1860.

SIR,—I am directed by the Commissioners for this department to acquaint you that income duty is required on the pay or emoluments of every man in your payment, whose whole income, from whatever source derived, amounts to 100*l.* in the financial year.

The Commissioners have reason to believe that many non-commissioned officers and others, in different departments of the Army, who, by holding clerkships or other employment, whether civil or military, are liable legally to such duty, have nevertheless not been subjected to payment of the duty, because they derive their incomes from issues made to them by more than one accountant. In order to prevent the recurrence of this loss to the revenue, I am to request that in every case where you have any reason to suppose that the man is in receipt of income from any source besides yourself, you will ascertain as far as possible what that income has been for the period to which the payment you are about to make to him has reference ; and if it should appear to you that the man's income would amount during the whole year to 100*l.*, you will deduct from the payment you make the proper amount of duty, and any arrear of income duty which may have been omitted to be deducted, accounting for the same in your return of income duty.

It may happen in some instances that at the end of the financial year the entire income of the man will not have amounted to 100*l.* ; and if so, he is entitled to a refund of the tax which may have been deducted. In such case he will have to make the usual declaration, that he is entitled to exemption ; and if the Commissioners admit his claim, you will be authorised to make the necessary refund.

I am to add that it is not intended that the above instructions should apply to any payments you may make before the 1st April next.—I am, sir, your obedient servant,

(Signed) D. ROBINSON,
For the Commissioners.

The Paymaster or other Military Accountant, Recruiting District, ——.

THE WAR IN MOROCCO.

We have intelligence from the seat of war in Africa to the 13th inst., which, in a military point of view, is somewhat more interesting than that contained in previous accounts.

At Tangier a force of about 15,000 men, chiefly mountaineers, were in occupation of the strong positions at the Fondak, determined to dispute the passage of the Spanish army. It was reported that the Spanish army had, on the 6th inst., encamped in force on the Tangier road at a short distance from Tetuan.

General Echague, with eight battalions of his corps, had marched from the camp of Seralle and joined O'Donnell's force outside the city of Tetuan.

In the engagement of the 11th the Spanish troops were attacked by the Moors, who were in great numbers, and well sheltered by the rocks on the road from Tetuan leading to Tangier. The fight continued for seven hours, when the Spanish remained masters of the positions, which were taken at the point of the bayonet. It was fully believed the Moors were on this occasion commanded by a new Moorish chief who had never before been engaged in the present war. The loss of the Spaniards is reported to be upwards of 200 men *hors de combat ;* that of the Moors is believed to be much less, on account of the shelter the rocks afforded them.

It was positively asserted amongst the officers at the head-quarters of the Spanish army that the Emperor of Morocco had sent an envoy to Marshal O'Donnell declaring that he would prosecute the war to the very last. It was also said that a grand attack was shortly expected to take place.

The *Hoja Suelta*, of Algesiras, gives the following account of the action of the 11th inst. :—

"On the 10th inst. the inhabitants of one of the small villages in the immediate vicinity of Tetuan petitioned the commander-in-chief to afford them protection against the robberies and depredations of certain Kabyles, who were prowling about that neighbourhood. The Duke of Tetuan dispatched General Echague at the head of his division to render the assistance required, and these troops arrived in time to meet the enemy and repulse him after a slight skirmish, during which the Spaniards had a few wounded, and the Moors many killed. Infuriated by this defeat, the Moors prepared to take revenge on the Spaniards on the 11th, by surprising the troops during the celebration of mass ; and, accordingly, while this ceremony was taking place at head-quarters, the Moors suddenly attacked two battalions of Prim's division, stationed in an advanced position to check any attack that might be attempted. The Moors presented a force of 15,000 men—the greater part cavalry—and it became necessary to bring up the first and second divisions, as also the divisions of the reserve, to bear against them. The action lasted some hours, when, finally, the Moors were repulsed with great loss. Special mention is made of the Spanish cavalry, which is said to have distinguished itself by three brilliant charges. The commander of the Albuera regiment of cavalry was taken prisoner by the Moors. The loss of the Spaniards in this affair is said to be 57 killed and 203 wounded ; among the latter eight officers.

"The accounts in the Spanish papers published at Tetuan state that General Prim, who with his corps encamped on the most advanced post, left with two battalions and the Catalan volunteers for the purpose of making a reconnaissance. When about two miles from the camp the troops were harassed by the Moors belonging to a douar composed of from 70 to 80 huts. General Prim immediately rushed upon the enemy, and a brisk fire was then kept up for about an hour-and-a-half. The Spaniards took possession of the village, and as the inhabitants refused to surrender, their dwellings were burnt down, and the troops continued their reconnaissance without further molestation. The Spaniards lost 14 wounded, and the Moors about 27."

Lord Clarence Paget, the Secretary to the Admiralty, has kindly placed at the disposal of the Royal Naval School, New Cross, a navel cadetship for competition amongst the sons and grandsons of naval and marine officers.

THE ROYAL AND MILITIA ARTILLERY.

A conversation took place in the House of Lords on Tuesday evening, respecting the Militia Artillery.

The Earl of Shaftesbury said it was reported on good authority that the Government intended to issue an order for disembodying the Militia Artillery. The Lords-Lieutenant of counties were naturally anxious on this subject, as they had done their utmost to bring the artillery into a state of efficiency ; now they were told it was to be disbanded. He wished to know if there was any foundation for the rumour ?

Earl de Grey and Ripon said the Government proposed to disband the Militia generally ; but up to the present moment no regiment of Militia Artillery had been disbanded. Following out the general plan of the Government, an order had been given by which a certain number of Militia regiments would be disembodied. Among them were four regiments of Artillery, those of Edinburgh, Forfar, and Waterford. He must state that the Government had increased the force of the Royal Artillery by adding a new battalion to the garrison artillery, and 300 men to the coast brigade. There would be a total increase on the four regular regiments of 1509 men. The House would perceive that there was no intention to deprive the country of the services of the Artillery at the present moment.

The Earl of Ellenborough had seen in the newspapers a statement that the Government had intended to increase the strength of the Royal Artillery, but had now abandoned that intention. He would earnestly entreat the Government to consider the state of things at present existing. If, at opening of the session of Parliament, the condition of affairs was such as to justify the Government in proposing very large military and naval estimates, the state of things abroad at present was much more serious. Whatever reasons existed then for a large military force existed now to a greater extent. It was not at a time when there were so many threatening appearances that they had a right to expect Her Majesty's Government would make any new reduction in the armed force of the country.

The Duke of Newcastle could assure the noble earl that no alteration whatever was proposed in the military force as fixed by the estimates. Undoubtedly the disembodying of the Militia might be somewhat hastened by the arrival of regiments expected from India.

The Earl of Malmesbury was aware that four regiments of Militia artillery were to be disembodied ; but he did not understand whether the whole force was to be disembodied in the next year. He warned the noble lord, in the arrangements which the Government had it in contemplation to make, that they ought not to place any dependence on the services of the Volunteer force. Thoroughly as he appreciated the spirit and patriotism which animated the members of that force, he did not believe they could ever compare in efficiency with the Militia. In the first place, it had been found along the coast line that great reluctance existed on the part of Volunteers to become connected with artillery regiments. It seemed to be thought that there was greater interest and more amusement in becoming riflemen than in being artillerists ; though this feeling would cure itself in course of time, for nothing could be more tiresome than the long intervals which men had to wait for their turn of shooting at rifle practice. Even if the Government could be certain of establishing Volunteer corps of artillery, they would never be as useful as Militia regiments of the same kind, which in many places that he could mention had now arrived at great perfection.

Earl Grey expressed a hope that whatever force of artillery the Government might decide to keep permanently embodied would consist entirely of Royal Artillery. The more he heard on the subject, the more he felt satisfied that a great mistake was made in embodying the Militia at all, as by that means it was deprived of its local character ; persons who had business of their own to attend to could not afford the time requisite for acting as officers, and the same observation applied to the men. When regiments of Militia Artillery were only called out for a limited time in each year, for the purposes of drill, a number of artisans earning high wages were very glad to belong to them ; but the moment a corps was permanently embodied, men of that description were driven out of it, and the service became a directly competing one with the Royal Artillery. Only those entered who looked forward to a permanent military career, and in the Militia they had all the annoyances without the advantages of continual service. The cost to the country was the same in each case, and the force at command was by no means equally disposable. With regard to the Volunteer Artillery Corps, he differed in opinion from his noble friend. At the mouth of the Tyne a corps had been formed which was taking great pains with its drill, and it was the opinion of officers of the Royal Artillery that regard being had to the period which had elapsed since its formation, the progress which it had made was highly creditable. He believed that other corps were likewise springing up at different points along the coast.

Earl De Grey and Ripon, with reference to the disembodiment of the Militia, explained that the Act under which that force was maintained would expire in the course of next year, and as it was not the intention of Her Majesty's Government, except an emergency arose, to propose that that Act should be renewed, it followed that the Militia now embodied must be disbanded before that period. The strength of the Volunteer Artillery Corps, he thought, had been somewhat under-rated ; their numbers now amounted to 10,000 or 12,000. The principle on which the Government had acted was not to regard the Volunteers as a substitute, but as a supplement, to the regular Army.

By order of the War Department a series of experiments with the Whitworth gun will be carried out at the Government practice range, Shoeburyness, under the superintendence of Colonel J. W. Mitchell, R.A., commandant of the school of gunnery, and the Ordnance Select committee, comprising Colonel St. George, C.B., president ; Captain Sir W. Wiseman, R.N. ; Colonel Robinson, R.E., Greathead, C.B., D.C.L., and Smythe, R.A.

The unfortunate joiner who met with the serious accident on Monday, in her Majesty's Dockyard, Portsmouth, died soon after reaching Haslar Hospital.

THE CHINA FORCE.

We are at last enabled to give the detail of the China force with some degree of certainty. It will consist of the following troops :—

Artillery. — Two batteries of Royal Artillery from the Bengal Army, and two batteries from England with Armstrong guns. No. 7 Battery, 14th Brigade, Royal Artillery; a Company 5th Battalion Native Artillery, and 1st Supplemental Company (Bullock Battery) from Madras; and No. 3 Battery, 13th Brigade, Royal Artillery, from Bombay.

Engineers.—23rd Company Royal Engineers from Madras, two companies from England, and A and K Companies of Madras Sappers and Miners.

European Infantry. — 3rd Buffs, 31st, 44th, 56th, 66th, 67th, 87th, 99th Foot, and 2nd Battalion 60th Rifles.

Cavalry. — Two Squadrons 1st Dragoon Guards, Fane's Horse, 1st Sikh Cavalry.

Native Infantry.—8th, 11th, 15th, 19th Punjab Infantry; the regiments of Loodianah and Lucknow, 3rd and 5th Bombay Native Infantry, and 21st Madras.

Classifying the force according to the troops furnished respectively by each presidency, it is as follows :—

BOMBAY.

No. 3 Battery, 13th Brigade, R.A.
Her Majesty's 31st and 56th Regiments of Foot.
Her Majesty's 3rd and 5th Regiments Native Infantry (each 1000).

MADRAS.

No. 7 Battery 14th Brigade Royal Artillery.
A Company 5th Battalion Native Artillery.
23rd Company Royal Engineers.
1st Supplemental Company (Bullock Battery).
A and K Companies Sappers and Miners.
1st (King's) Dragoon Guards (detachment).
Her Majesty's 44th and 66th Regiments of Foot.
Her Majesty's 21st Regiment Native Infantry.

BENGAL.

Two Batteries Royal Artillery.
Fane's Horse and 1st Sikh Cavalry.
Her Majesty's 3rd Buffs, 67th, 87th, 99th Foot, and 2nd Battalion 60th Rifles.
Her Majesty's 8th, 11th, 15th, and 19th Punjab Infantry, and the regiments of Loodianah and Lucknow.

ENGLAND (Overland).

Two companies Royal Engineers.
Two batteries Royal Artillery (with Armstrong guns).

Numerous changes have been made in the disposition of the Bengal troops, in pursuance of instructions from home. Sir Hope Grant, by last advices, was expected daily in Calcutta, Sir Robert Napier having superintended the embarkation up to the 10th inst., so far as it had proceeded. Some doubt has been cast by the Calcutta press upon the Lucknow regiment joining the force.

MARINE SOCIETY.—On Wednesday night the anniversary festival of this society was celebrated at the London Tavern, the Duke of Somerset in the chair. Amongst those present were the Lord Mayor, the Earl of Romney, president of the society, Admiral Sir G. Seymour, Admiral Sir Michael Seymour, Admiral Sir Geo. Sartorius, Admiral Gordon, General Sir Charles Pasley, Colonel Stransham, Captain Frederick, Captain Ommaney, &c. The Marine Society was formed in the year 1756, and its object is to support, educate, and train for a sea-life, boys who have been left in a destitute condition. No less than 92,331 boys have been fitted out for sea service in the Royal Navy and Merchant Marine since the establishment of the society. The total number maintained last year on board Her Majesty's frigate Venus, which is moored off Charlton Pier, was 681, of whom 138 were sent to the Royal Navy, 60 to the Indian Navy, 347 to the Merchant Service; 7 were discharged, and 129 remained on board at the beginning of the present year. In the course of the evening the boys were marched round the dining-room, and their healthy and vigorous appearance afforded the most indubitable evidence that they have been well catered for. The noble chairman, in proposing the prosperity of the society, made a brief but pithy appeal on its behalf; and whilst expressing his confident belief in the maintenance of peace, he maintained the necessity of keeping both branches of the Service in an efficient condition as an essential guarantee for the maintenance of peace, and for upholding the honour and independence of the country. The subscriptions of the evening amounted to about 550*l*.

It appears by a Parliamentary return that the Unclaimed Army Prize Money Account, from the 18th January, 1809, to the 31st of December, 1859, shows a debt of 1,458,114*l*. 1*s*. Of this sum, 1,140,216*l*. 0*s*. 8*d*. arose from forfeited and unclaimed shares of prize-money, grants, &c., and 252,400*l*. arising from dividends and interest on moneys invested in the public funds and other Government securities. At the credit side of the account are the following items :—Cash refunded to claimants, 724,814*l*.; expenses in executing acts (of Parliament ?) from January, 1809, to 31st December 1859, 57,903*l*.; paid to Royal Hospital 556,752*l*.; do. 37,499*l*.; transferred to the Exchequer, 41,144*l*.; paid to commissions for works and buildings, Royal Military Asylum, 40,000*l*.

A testimonial, subscribed for by 664 workmen employed at the Royal Arsenal, Woolwich, has been presented to Mr. George Goldsack, on his retirement from the office of examiner of ordnance after 50 years' service.

A dramatic performance, under the direction of Captain and Mrs. Cowper, attracted a numerous audience to the Gallery of Illustration on Saturday evening. The performances consisted of the pieces, entitled, "A Soldier's Courtship," "Delicate Ground," and "Box and Cox." Mrs. Cowper, who appeared in the first and second pieces, and whose spirited acting evoked hearty applause, is the sister of the late Lady Boothby, and some years ago was well known on the London stage as Miss Jane Mordaunt.

We understand the total sum realised by subscription for Sir James Brooke, amounted to 9000*l*. His health is still very indifferent, and Captain Brooke has proceeded to Borneo as chief of the Sarawak government, and representative of Sir James. All efforts to induce the British government to purchase the settlement are now relinquished.

LONDON RIFLE BRIGADE.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,— The London Rifle Brigade is now 1400 strong. Her Majesty accepted the services of the corps in October 28, 1859.

Drill has taken place daily ever since, under the supervision of Lieut.-Colonel Hicks, Adjutant Ewens, and several of the junior officers, ably assisted by the sergeant-major, drill-instructors, and non-commissioned officers. The members have worked hard, have been constant in their attendance, and have become effective. The Volunteers having performed their duties so well, are entitled to have every officer fit for his post, but unfortunately this is not the case.

On Dec. 14, five captains were gazetted, and from that time to the present, with the exception of the senior officer, these captains have seldom been out with the brigade, the majority of them are very rarely seen at the battalion drills, two have never taken the command of companies on these occasions, and some of them are not known to the brigade.

Last Saturday the brigade proceeded to the Crystal Palace for battalion drill, two of the captains started with the command of companies. Previous to the commencement of drill, the captain commanding the 2nd company retired, resigning the command of his company to a lieutenant; another captain on a previous occasion acted in exactly the same manner.

A captain, gazetted three months ago, and nominated four months ago, is not equal to ordinary battalion drill, and a lieutenant, not yet gazetted, is capable of taking his post. What is to be done? Surely, if these gentlemen will not perfect themselves, they should resign. If the Volunteers had the right of electing their own officers, there would be no cause of complaint. The junior officers and non-commissioned officers deserve the thanks of the brigade for the great trouble they have taken in perfecting the men in their drill.

They cannot move in this matter; an alteration must take place; and if gentlemen, who were appointed captains, find they are not fitted for commanders, or cannot give the necessary time to their duties, they should retire in favour of better and abler men, and thus promote the great object we all have in view, the permanency and efficiency of the Volunteers. I am, sir, yours, &c., L. R. B.

The Secretary of State for War, the Right Hon. Sidney Herbert, has issued a circular, by which it appears the Royal Warrant of the 1st of July, 1848, prescribing the periods of service to entitle the well-conducted soldier to obtain the different rates of good conduct pay, is revised, and that from the 1st of this month the period of service to entitle such soldier to the first grant of good conduct pay shall be three years, instead of five years, and that the successive additions shall be as heretofore, after every further period of service of five years, subject, however, to the conditions prescribed by the Royal Warrant above specified.

A letter received by a Calcutta contemporary from Kundul narrates a terrible invasion of our territory by the Kookees, a barbarous tribe inhabiting the hills of independent Tipperah, to the south of the districts of Silhet and Cuchar. We cannot but hope that the atrocities said to have been committed are exaggerated, for anything more terrible than the narrative as it stands is inconceivable. Upwards of a thousand persons are said to have been massacred in two days. A wing of the Nursipore Battalion from Deesa and the clubmen, burkundauzes, and latteeals of the neighbouring Zemindars moved upon the district, but too late to do more than witness the desolation caused by the raid.

On Tuesday afternoon, at four o'clock, two workmen, who were employed upon coppering the Barrosa, screw corvette, at Woolwich, being accidentally struck by a piece of timber, fell from the top to the bottom of the dry dock, a distance of about 18 feet, and sustained very serious fractures of the skull. On Monday, a labourer named John Brown was driving a waggon in the dockyard, when by some means he fell down, and a wheel of the vehicle passed over his face, completely cutting off one of his ears. The sufferers were removed to the Royal Marine Infirmary.

SEBASTOPOL.—A vessel named the Eltham has just arrived at Hull, from Sebastopol. Captain Pollard states that Sebastopol remains in the same forlorn and dilapidated condition as when our troops left Balaklava. Inkermann and the Redan bear the same traces of the besieging forces. A few old houses have been converted into habitable dwellings by the Russian soldiers who resided in them. Lord Raglan's house and the churchyard also remain in the condition in which they were left. One portion of the city, which was rendered not wholly uninhabitable, has been patched up by a few poor Jews, who get their living by going over the desolated fields of battle, picking up the leaden treasure, and shot, and shell. During the captain's stay, one of them, who had picked up a shell, accidentally let it fall, and the missile not having been previously discharged, burst and killed the poor fellow on the spot. Although these men have been engaged for a long time in gathering the shot and shell, and digging the earth for bullets, yet there is an abundance left in all directions. The harbour has been partially filled up. The American Company engaged with the sunken vessels have raised about forty. This work and the making of a patent slip for a dock, are almost the only means of employment for the inhabitants. About the beginning of November 1,000,000 roubles, contributed by the inhabitants of St. Petersburg, were distributed amongst the residents who had had their property destroyed, and with this assistance a few have commenced to either rebuild their old property or erect new buildings, so that another new field for labour may now have sprung up. The Russians have taken away all the guns from Fort Constantine and the batteries. The only things noticeable by way of commendation are the roads made by the allies, those made by the English being in every respect superior to those of the French. [Our road to the front was made at the close of the war by a special corps of artisans directing the labours of our soldiers, for which they were paid extra. The French army made their roads for the occasion, and were not assisted or directed.—ED.]

INDIA.

The Viceroy of India is still on his "progress." On the 6th of February the camp made a grand entry into Umritsur, a distance of 12 miles from the last encampment, the troops halting at the entrance of the station to receive the Viceroy, for which purpose the troops were drawn up in line on the roadside in the following order :—The E troop Royal Horse Artillery, one squadron of the 7th Hussars (the Governor-General's body guard), 1st Punjab Cavalry, the 93rd Highlanders, 1st Sikh Infantry, and a wing of the Kholat-i-Ghilzie Regiment. The show was very inferior to the durbar at Umballah, and the attendance of spectators very small. There were a few elephants and some gold dressing-gown-clad chiefs, and altogether the scene was nothing to compare to the Viceroy's meetings in his early progress. The camp started again, *en route* for Lahore, on the 9th. Great complaints have been made amongst the troops regarding the Viceroy persisting in marching on Sundays. Sir R. Montgomery, after dining with the Governor-General on a Saturday evening, started for the next camping ground almost immediately after dinner, to avoid travelling on the Sabbath.

INDIAN ARMY.—A return, moved for by Lord Ellenborough, has just been issued, and shows the manner in which the officers of the disbanded regiments of the Bengal army are now disposed of. It appears that of the officers disbanded 277 are on furlough; 115 on political and civil employ; 55 on the military staff; 302 serving with irregular regiments; 118 doing duty with Her Majesty's European regiments; 36 doing duty with other corps of the Bengal army; 6 on duty with discharged soldiers proceeding to England; 64 with police corps; 58 with Commissariat and stud; 38 on public works and surveys; 3 studying at Thomason College; 1 in temporary command of station at Barrackpore; 14 doing duty at Saugor, Meeanmeer, Meerut, Mooltan, Delhi, Barrackpore, &c.; and 64 unemployed, including 10 colonels residing in India; making a total of 1151 officers. The total number of privates and non-commissioned officers who took their discharge from the late East India Company's army, in consequence of the transference of the Government of India to the Crown, was 10,185; of which number 6338 were from Bengal, 1739 from Madras, and 2108 from Bombay. The present effective strength of the local European regiments in India is, in Bengal 6324, in Madras 2879, and in Bombay 2676 men; total, 11,879; not including 3303 recruits embarked for India between the 1st of June and 1st of December, 1859, and 1393 recruits for India now at the depôts in England.

COURT-MARTIAL.—A singular court-martial has taken place at Allahabad, to try Captain Griffin, of the 3rd Madras European Regiment, on the charge of forgery. It seems that the captain, on preparing to leave Allahabad, where he had been during the hot season, advertised in the newspapers his furniture, &c., for sale, and circulated catalogues over the station, and one of the lots consisted of a gold watch valued at 180 rupees. A person calling himself Lieutenant Turner, Royal Artillery, called to look at the watch, and, approving of it, offered 160 rupees, which was accepted, Captain Griffin writing a receipt for the money, which Lieutenant Turner promised to send so soon as he reached his quarters. A short time afterwards Captain Griffin received two notes, one of them being addressed to the Delhi Bank, authorising the payment of 160 rupees on presentation, the captain at the same time being in total ignorance of the contents of the note when he presented it for payment; and on receiving the money merely gave a receipt, without making any indorsement to the instrument. It turns out that another person of the name of Griffin, a Lieutenant in the Eurasian Cavalry, had forwarded a hoondee for 167 rupees to the agent of the Delhi bank to be cashed, intimating that Lieutenant Turner, of the Royal Artillery, might draw it. It seems that there is no such man as Lieutenant Turner, and Captain Griffin was placed under arrest for forging the hoondee, and was kept a prisoner for several weeks before he was made acquainted of the exact charges which were intended to be brought against him. Possessing a spotless character, which he maintained through twenty-four years' service, he fearlessly awaited his trial; and upon the facts being ascertained, he was released from arrest. Since his release a Mr. O'Callaghan called upon Captain Griffin upon business. The captain, who thought he recognised in him the person who represented himself as Lieutenant Turner, of the Royal Artillery, had him arrested. The result has been a trial before a justice of the peace; and the evidence adduced having failed to establish the charge against Mr. O'Callaghan, he has been honourably acquitted. The affair is still wrapt in mystery.

ARRIVAL OF TROOPS FROM INDIA.—The hired East India troop-ship, William Prowse, arrived at Gravesend from India on Thursday last, with a large party of sick and disabled troops on board, the whole of whom had been sent home from India on account of their unfitness for further service. The William Prowse sailed from Madras on the 21st of October last, and touched at St. Helena on the 10th of January, the voyage to the Thames being an unusually protracted one of 154 days. The number of troops that embarked was 215 non-commissioned officers and men belonging to the 1st Dragoon Guards, 12th Prince of Wales' Lancers, 1st Royals, 18th Royal Irish, 44th, 60th, 66th, 68th, 69th, and 74th Regiments, the whole of whom have been invalided home to be discharged from the Service. The following officers arrived with the troops, viz., Lieutenant W. T. Hunt, 74th Regiment; Lieutenant J. H. C. Seymour, and Lieutenant G. F. Wilkinson, 68th Regiment; Ensign Daniels, 1st Madras Fusiliers, and Dr. Bell. During the passage six deaths occurred on board. After the troops had disembarked at Gravesend they were conveyed to Chatham, when those requiring medical treatment were taken into hospital at Fort Pitt, and the remainder sent to St. Mary's Barracks. The troop-ship, Nile, also arrived at Gravesend from Madras on Thursday, with a party of troops on board belonging to the Royal Artillery, 12th Lancers, 1st Royals, 44th, 68th, and 69th Regiments, the whole under the command of Lieutenant R. F. Martin, 74th Highlanders. Five soldiers died during the passage. Owing to the large number of invalid troops who have recently arrived from India at St. Mary's Barracks, Chatham, the invalid establishment is now very full.

LATEST INTELLIGENCE.

HOUSE OF LORDS.—FRIDAY.

On the Second Reading of the Mutiny Bill an interesting conversation ensued relative to the projeet of the Government announced by the Secretary for War last week, for abolishing the purchase system in the rank of Lieut.-Colonel in the Army.

Lord Panmure expressed the alarm which he felt at the proposal, and entreated the Government to pause before entering upon a most hazardous experiment. The recommendation of the Commission on which the Government founded their proposal was not agreed to unanimously, but was sanctioned by only 6 votes to 4.

Lord de Grey and Ripon defended the proposal of the Government, and believed that it would naturally conduce to the efficiency of the Service.

The Duke of Cambridge said his opinions were well known, being embodied in the evidence which he gave before the Commission. Whatever might be the decision of the Government and Parliament on this very important subject, he would do his best to carry it into effect frankly and fairly, without favour or affection.

After some observations from the Duke of Somerset and Lords Lucan and Hardinge, the bill was read a second time.

HOUSE OF COMMONS.—FRIDAY.

Sir John Pakington asked the Secretary of the Admiralty, whether it was true, as stated in the *United Service Gazette* of January 21st, that the Assistant Surgeon of H.M.S. Queen was refused a cabin at a time when four cabins were vacant; and whether, if the statement were true, any notice had been taken of it by the Board of Admiralty.

Lord Clarence Paget replied that the Admiralty had received no intelligence of the transaction in question. He had sent a telegram to Portsmouth where the Queen was at the time the event was alledged to have occurred, and the authorities there had heard nothing of it.

Mr. Henry Baillie asked whether the Government had come to any decision with respect to the reorganisation of the Indian Army.

Sir C. Wood replied in the negative.

Captain Archdall called attention to the dreadful occurrences on board the Tasmania, and wished to know whether measures would be taken for bringing to punishment the persons whose misconduct had led to such disastrous results.

Sir C. Wood said he had not yet had time to submit the matter to his council, but he intended to do so forthwith. Great blame appeared to attach to some persons at Calcutta.

Captain Leicester Vernon, referring to Clause 18 of the Warrant of October, 1858, which specifies "that the commands of general officers and other situations on the Staff, both at home and abroad, shall not be held for more than five years, unless by re-appointment under special cases," asked the Secretary of State for War whether it is to be understood that an officer, having held one Staff appointment for the period named, can be considered eligible for immediate nomination to another Staff appointment; and, if so, whether there be any, and what, limitation to such successive appointments.

Mr. Ellice deprecated the practice of giving Staff appointments in succession to particular officers, and referred to the case of Colonel Conolly, who had received three Staff appointments. General Evans declared that the practice referred to was unjust to the officers of the Army generally, and injurious to the public Service. Some fortunate officers seemed to have a life tenure in the Staff appointments at the Horse Guards.

Mr. Sidney Herbert stated that in future the headquarters Staff appointments of the Horse Guards would be open to the Service generally. At the same time, as the present holders of these appointments had taken them on the understanding that they were to be permanent, it was only fair that they should be promoted to other Staff appointments, as opportunity should occur.

Mr. Maguire wished to know why the 2nd Regiment of Staffordshire Militia, stationed in Dublin, had not been disembodied at the same time as the Irish Militia regiments.

Mr. Sidney Herbert stated that the disembodiment of the regiment had been temporarily deferred on account of the depressed condition of the iron manufacture in Staffordshire; under these circumstances it was thought inadvisable to add a number of fresh hands to those already out of employment.

Colonel North referred to a statement in the newspapers of a Rifle Volunteer having shot a lady's dog, and then ran away; and expressed a hope that measures would be taken to prevent the recurrence of such a disgraceful act.

Sir James Fergusson asked the Secretary of State for India whether it was in contemplation to bestow honours or promotion upon any officers who have been recommended for such rewards in consideration of distinguished services in the suppression of the late mutiny in India, but who have not yet been so rewarded; and called his attention particularly to the case of the 2nd Regiment of Bombay-Light Cavalry, whose services he highly eulogised.

Sir C. Wood in reply, stated that every officer recommended for promotion by the Commander-in-Chief had been promoted.

THE LATE SIR JAMES M'GRIGOR.—An obelisk to the memory of the late Sir James M'Grigor has just been erected at Aberdeen, in the quadrangle of the Marischal College, within the venerable walls of which building the deceased baronet was educated. This testimony of respect to his memory is one of a local nature, having no connection whatever with the memorial which owes its origin and much of its success to Sir James M'Grigor's admirers south of the Tweed. The Aberdeen obelisk is 72 feet high, and the material of which it is composed is highly-polished granite of a red colour, with the exception of a slab of gray-coloured granite, which has been introduced in the pedestal for the purpose of containing the following inscription:—"This obelisk is erected to the memory of Sir James M'Grigor, Bart., M.D., K.C.B., F.R.S., &c., for 36 years Director-General of the Army Medical Department, and several times Lord Rector of Marischal College, Aberdeen. He was born in Strathspey, North Britain, on the 9th of April, A.D. 1771. He entered the Army as surgeon of the Connaught Rangers in 1793, and served the two following years in the campaign of Holland. He was afterwards medical chief in the expedition against the Island of Grenada; in the expedition under Sir David Baird, from Bombay through the deserts of Thebes and Suez to Alexandria; and also in the Walcheren expedition. He was chief of the Medical Department of the Army under the Duke of Wellington in the Peninsular war, from the siege of Ciudad Rodrigo in the year 1811 to the final battle of Toulouse in 1814. He was favourably mentioned in the despatches of all the generals under whom he held these responsible posts, and was repeatedly noticed in those of the Duke of Wellington, who, on the 26th of July, 1814, referring to the manner in which Mr. M'Grigor had conducted the department under his direction, wrote thus—'I consider him one of the most industrious, able, and successful public servants I have ever met with.' In the course of 57 years of active service he was exposed to the vicissitudes of war and climate, besides encountering shipwreck and other dangers at sea: yet he lived to attain a tranquil and happy old age. He died in London on the 2nd of April, A.D. 1858. This memorial is erected near the place of his education and the scenes of his youth." The base of the obelisk is surrounded by a platform of gray coloured granite from the neighbourhood of Aberdeen.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BEADNELL—March 15, at Spa, Belgium, the wife of George Beadnell, Esq., Major, Royal Montgomery Rifles, of a daughter.

BLACK—March 19, at 4, Fitzgerald Place, Polygon, Southampton, the wife of Thos. Black, Esq., Commander P. and O. Company's steamship Delta, of a son.

BULWER—March 15, at Quebec House, East Dereham, Norfolk, the wife of Captain Bulwer, of a daughter.

CHEETHAM—March 13, at Westminster, the wife of Major Charles Cheetham, late Royal Artillery, of a daughter.

CHICHESTER—March 14, at Fermoy, the wife of Major Raleigh Chichester, of a daughter.

COOKSON—March 14, at Esher, the wife of Captain James Gathorne Cookson, of the 8th Madras Cavalry, of a son.

FORDYCE—March 21, at 7, Dacre Park Terrace, Blackheath, the wife of Colonel Fordyce, Bengal Horse Artillery, of a son.

GLYN—March 19, at 22, Brunswick Square, Brighton, the wife of Captain Richd. T. Glyn, 24th Regiment, of a daughter.

IMPEY—March 16, at 12, Camden Place, Bath, the lady of Captain H. B. Impey, H.M.'s Bengal Army, of a daughter.

NANGLE—March 13, at Waverley Terrace, Jersey, the wife of Captain Henry Nangle, 15th Regiment, of a daughter.

NEVILLE—March 12, at St. James's Place, Fermoy, Ireland, the wife of Captain Neville, 11th Regiment, of a daughter.

RYND—Feb. 28, at Halifax, Nova Scotia, the wife of Major McKay Rynd, 62nd Regiment, of a son.

SEARLE—March 17, at 13, Wellington Crescent, Ramsgate, the wife of Lieutenant W. L. Searle, H.M.I.N., of a daughter.

TYSSEN—March 15, at Yarmouth, the wife of Commander Tyssen, R.N., of a daughter.

WORTHINGTON—March 17, at 35, St. James's Square, Bath, the wife of Captain Worthington, 67th Regiment, of a daughter.

MARRIAGES.

FELL—GIBBONS—March 15, at the parish church, Kilfirmane, county Limerick, by the Rev. Geo. Wren, vicar, Richard Latham Fell, Esq., of Ballindinisk, county Cork, to Kate, youngest daughter of the late James Gibbons, Esq., of H.M.'s 98th Regiment.

GIBBENS—NAPPER—March 14, at St. Martin's Church, Dorking, by the Rev. W. H. Joyce, vicar, the Rev. Wm. Gibbens, eldest son of the late Captain Gibbens, of H.M.'s 55th Regiment, to Elizabeth, only daughter of Henry Napper, Esq., Dorking.

GOLDSMITH—BULLEN—March 20, at Charlton, Kent, by the Rev. Robert P. Wilkinson, Henry P. Goldsmith, Esq., to Ellen, eldest daughter of Richard Bullen, Esq., and niece of the late Admiral Sir Charles Bullen, G.C.B., G.C.H.

MENDS—JACKSON—Feb. 16, at Barbadoes, West Indies, by the Rev. Allan J. Pile, M.A., William Fisher Mends, Esq., Deputy Commissary-General to Her Majesty's Forces, to Mary Vardon, eldest daughter of the Rev. W. W. Jackson, M.A., Chaplain to Her Majesty's Forces.

PASLEY—LOSH—Feb. 13, at Port of Spain, Trinidad, T. Malcolm Sabine Pasley, Esq., Commander R.N., H.M.S. Atalanta, eldest son of Rear-Admiral Sir Thomas Sabine Pasley, Bart., to Emma Louisa, eldest daughter of the late W. Losh, Esq., of Trinidad.

PEACOCKE—HARDY—March 15, at St. Peter's Church, Dublin, by the Rev. the Provost of Trinity College, assisted by the Rev. George Peacocke, uncle to the bridegroom, Gooderick S. Peacocke, Esq., eldest son of the late Major Peacocke, of Fort Etna, county Limerick, and nephew of Charles Leslie, Esq., Carraignagroine, to Arabella, only daughter of John P. Hardy, Esq., of Fitzwilliam Place.

THOMAS—YOUNGE—Jan. 16, at Lucknow, Major Lancelot F. C. Thomas, Madras Artillery, Commissary of Ordnance, to Mary Anne, daughter of Captain Younge, of the 23rd Royal Welsh Fusiliers.

THORNTON—ROBSON—Feb. 24, at Kingston, Jamaica, Robert Thornton, Esq., Staff-Surgeon, third son of the late Lieut.-Colonel Thornton, of Thornville, county Carlow, to Mary, daughter of the late W. W. Robson, Esq., of Sunderland.

DEATHS.

BAYNES—March 8, at Paris, Captain John Lambert Ed. Baynes, of the 3rd Battalion of the 60th Royal Rifles, aged 31, the only son of his afflicted mother.

DADE—March 15, aged 75, Jane, the wife of the Rev. Thomas Dade, rector of Broadway and Bincombe, Dorset, and youngest daughter of the late Colonel Lloyd, of Bawdeswell Hall, Norfolk.

DALZIEL—March 16, at 5, Crescent, Ardrossan, Lieut.-Colonel John Dalziel, Madras Army, one of the few surviving officers that served under the Duke of Wellington in the Mahratta War of 1803-4, for which he had clasps for the battles of Assaye, Argaum, and Gawilghur, and a medal for general service in India.

FOTHERINGHAM—March 19, after many years of acute suffering, Robert Hamilton Fotheringham, Lieut.-Colonel Engineers, Hon. East India Company, Madras, aged 82, at Kingsbridge House, Southampton, deeply lamented by his beloved wife, affectionate family and friends.

HARVEY—March 10, at Valetta, Malta, Samuel Harvey, Esq., aged 84.

LAMBERT—Feb. 8, at Lima, cruelly assassinated while bathing, Lionel Lambert, R.N., Commander H.M.S. Vixen, second surviving son of Francis J. Lambert, Esq., of 2, Portugal Street, Grosvenor Square, aged 26.

MARTIN—March 21, at 27, Rutland Gate, James Martin, Esq., of Bloomfield, Sligo, late Captain of 3rd Light Dragoons.

MASSIE—March 18, at Gorlston, near Yarmouth, Captain Henry George Massie, R.N., aged 84.

MURRAY—At his residence, Enniskerry Lodge, county Wicklow, Dennis Murray, Esq., M.D., First-Class Staff-Surgeon, late of the 10th Hussars. He served in the campaigns of the Peninsula, Waterloo, and Bhurtpore, in the East Indies, during a period of forty-five years. He gradually sank on the night of the 17th inst., deeply and sincerely regretted by his widow and a numerous circle of friends, aged 67.

ONSLOW—March 17, at Sussex Place, Regent's Park, aged 82, Mrs. Sophia Onslow, widow of the late General Denzil Onslow, of Staughton House, Huntingdonshire, and daughter of the late Sir Stephen Lushington, Bart.

RICKARDS—March 11, at Sherborne, Dorset, Edward Mynors, the youngest son of Lieut.-Colonel J. W. Rickards, aged 4.

RUNDLE—March 7, at Cordova, Spain, John Harness Rundle, Esq., aged 27, respected and beloved by all who knew him.

SWINBURNE—March 10, at 13, Great Stuart Street, Edinburgh, Helen, the beloved wife of Major-General Swinburne, of Marcus and Ponton Hall.

TYSSEN—March 21, at Yarmouth, Eleanor Margaret, wife of Commander Tyssen, R.N., aged 39.

WALLACE—Feb. 21, at Panama, aged 27, Robert John Wallace, Esq., late of H.M.'s 86th Regiment, and only son of Colonel Robert Tierney Wallace, late Madras Army.

INDIA. — OFFICERS IN THE ARMY AND CIVILIANS PROCEEDING TO INDIA, may insure their lives on most favourable terms in the MEDICAL, INVALID, AND GENERAL LIFE ASSURANCE SOCIETY. The rates of this Company, which transacts the business of the Delhi, Simla, North West and other Indian Banks, are lower than those of any other Office, while the Agencies at Calcutta, Madras, Bombay, Ceylon, and about 50 up-country stations in India, afford every possible facility for the transaction of business.

Prospectuses, Forms of Proposals, and every other information, may be obtained of the Secretary, at the Chief Office, 25, Pall Mall, S.W.

C. DOUGLAS SINGER, Secretary.

PERSONS PROCEEDING TO INDIA, or any of the British Colonies, can effect assurances on favourable terms with the COLONIAL LIFE ASSURANCE COMPANY.

Loans given to Civil or Military Officers proceeding to India on Her Majesty's service.

Agents at Calcutta, Madras, and Bombay, and in all the British Colonies, where premiums can be paid and claims settled.

The COLONIAL was established in 1846, and its present income is upwards of 100,000*l.* per annum.

Subscribed capital, 1,000,000*l.* sterling. Constituted by Act of Parliament. SAMUEL R. FERGUSSON, Res. Sec.

LONDON	81, Lombard Street, E.C.
EDINBURGH	(Head Office) 5, George Street.
DUBLIN	65, Upper Sackville Street.
GLASGOW	59, St. Vincent Street.

Funds Invested	£847,000
Annual Income	116,000
Claims paid	1,150,000

BONUS YEAR.—Persons Assuring on or before the 25th March next will be entitled to one full year's share in the profits then to be divided. The Bonuses become vested after payment of the *Third* premium. The Profits will be divided in every *Fifth* year after the 25th March next.

No extra premium is charged for service in any Volunteer Corps within the United Kingdom during peace or war. B. HALL TODD, Secretary and Actuary.

UNITED KINGDOM LIFE ASSURANCE COMPANY.

No. 8, Waterloo Place, Pall Mall, London, S.W.

The Hon. FRANCIS SCOTT, Chairman.

CHARLES BERWICK CURTIS, Esq., Deputy Chairman.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the fourth division of profits to be declared on all policies effected prior to the 31st December next year, should, in order to enjoy the same, make immediate application. There have already been three divisions of profits, and the bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without imparting to the recipients the risk of copartnership, as is the case in mutual societies.

To show more clearly what these bonuses amount to, three following cases are put forth as examples:

Sum Insured.	Bonuses added.	Amount payable up to Dec., 1861.
£5,000	£1,987 10*s.*	£6,987 10*s.*
1,000	397 10*s.*	1,397 10*s.*
100	39 15*s.*	139 15*s.*

Notwithstanding these large additions, the premiums are on the lowest scale compatible with security for the payment of the policy when death arises; in addition to which advantages, one half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, the other half being advanced by the company without security or deposit of the policy.

The Assets of the Company at the 31st December, 1858, exclusive of the large subscribed Capital, amounted to £652,618 3*s.* 10*d.*, all of which has been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy Stamps paid by the Office.

Immediate application should be made to the Resident Director, 8, Waterloo-Place, Pall-mall, S.W. By order,

P. MACINTYRE, Secretary.

BANK OF DEPOSIT (ESTABLISHED A.D. 1844), 3, Pall Mall East, London, S.W.

Capital Stock £100,000.

Parties desirous of investing Money are requested to examine the Plan of the Bank of Deposit, by which a high rate of interest may be obtained with ample security.

Deposits made by special agreement may be withdrawn without notice.

The interest is payable in January and July.

PETER MORRISON, Managing Director.

Forms for opening accounts sent free on application.

INDIA OFFICE, 12th March, 1860.

NOTICE IS HEREBY GIVEN, that the NEXT EXAMINATION OF CANDIDATES for the APPOINTMENT OF ASSISTANT-SURGEON in Her Majesty's Indian Military Forces WILL BE HELD in this Office on MONDAY, the 9th of JULY, 1860, and that the probable number of vacancies to be then filled up will be Twenty-five (25).

W. E. BAKER, Colonel, Military Secretary.

NOTICE.—INDIA-OFFICE, E.C., March 14, 1860.—The NEXT COMPETITIVE EXAMINATION OF CANDIDATES FOR ADMISSION INTO THE ROYAL INDIAN MILITARY COLLEGE, AT ADDISCOMBE, under the 34th Clause of the Act 21 and 22 Vict. cap. 106, will be held at the Royal Hospital, Chelsea, on the 16th of May, 1860, and following days.

The number of appointments to be competed for is 60.

REGULATIONS FOR THE ADMISSION OF GENTLEMEN CADETS TO THE ROYAL INDIAN MILITARY COLLEGE AT ADDISCOMBE.

N.B.—All candidates for commission in Her Majesty's Indian Artillery and Engineers are required to go through a course of instruction at the Royal Indian Military College at Addiscombe.

I. Competitive examinations for admission will be held twice a year, in May and November. They are conducted by examiners appointed for the purpose, in the presence and under the superintendence of the Council of Military Education.

II. The candidates must be between 17 and 19 years of age.

III. The admissions will be determined by the result of a competitive examination, the subjects of which will be as follows, viz.:

		Marks.	
1. Mathematics.	Pure	2,000	
	Mixed—*i. e.*, Statics, Dynamics, and Hydrostatics	1,500	
			3,500
2. English.	Language, Literature, and Composition	1,000	
	History and Geography of England and its dependencies	1,000	
			2,000
3. Classics. Greek Latin	Language & Literature	1,000	
	Geography and History of Ancient Rome ...	500	
	Language & Literature	1,000	
	Geography and History of Ancient Greece ...	500	
			3,000
4. French Language and Literature ... The examination in French and Hindustani will be both written and *viva voce*.			1,000
5. Hindustani Language		1,000	
History of India		1,000	
			2,000
6. Experimental Sciences, *i.e.*, Chemistry, Heat, Electricity, including Magnetism			1,000
7. Natural Sciences, *i. e.*, Mineralogy and Geology			1,000
8. Drawing.	Elementary Geometrical Drawing (including the use of drawing instruments)	500	
	Machinery, Architectural, Topographical, Landscape, or Figure Drawing	500	
			1,000
9. The use of Astronomical and Surveying Instruments			750

IV. No candidate will be allowed to be examined in more than five subjects, of which one must be mathematics, and no one who does not obtain at least 1000 marks in mathematics, of which 700 at least must be in pure mathematics, will be eligible for an appointment.*

From the other subjects of examination, each candidate may select any, not exceeding four in number, in which he desires to be examined; but no one will be allowed to count the marks gained in any such subject, unless those marks shall at least amount to one-sixth of the total number of marks allotted to that subject, or section of a subject.

In English and Hindustani it will be understood that by gaining one-sixth of the marks allotted to language, literature, and composition, a candidate will be entitled to count in the first section of the subject; and, in like manner, by obtaining one-sixth of the marks allotted to history and geography he will be entitled to count in the second; but no amount of marks gained in one section will entitle him to count those gained in the other if below the prescribed minimum.

In Classics, the same rule applies as regards counting on one or other of its two sections (Latin and Greek), as has been explained in reference to the two sections of English; but, in addition, it must be further stated, that, unless one-sixth of the 1000 marks allotted to the Latin language and literature has been gained, a candidate will not be allowed to count the marks gained in Latin history and geography, even though above the required minimum of one-sixth of the 500 marks allotted to them: and similarly as regards the Greek language and literature, and the Greek history and geography.

In drawing also the same rule applies as regards counting as has been already explained in reference to the two sections of English.

In either French or Hindustani, every candidate will be required to obtain at least 100 marks for qualification in the language section, the marks to be gained on translation only, and in geometrical drawing at least 50 marks, whether he takes them up as subjects in which he desires to compete or not.

V. No candidate will be considered qualified unless he attains an aggregate of 2500 marks at least.

The following papers will be required to be transmitted by each candidate to the Under Secretary of State for India, one month previous to the date fixed for each examination:

1. An application for permission to compete.
2. An extract from the register of his baptism, r, in default of that, a certificate of age verified by affidavit.
3. A certificate of good moral character, signed by the clergyman of the parish to which he belongs, and by the tutor or head of the school or college at which he has received his education, for at least two years, or such other proof of good moral character as will be satisfactory to the Secretary of State for India.
4. A statement of subjects of examination, in which (in addition to mathematics) he may desire to be examined.

VI. No person who has been dismissed or obliged to retire from the Army or Navy, the Royal Military College at Sandhurst, the Royal Military Academy at Woolwich, or from any other public institution, will be appointed to the College.

VII. Gentlemen who may be attending the junior division of the College at Addiscombe will be required to submit only the first and fourth of the papers above specified.

The candidates will be inspected by military surgeons on the first day of the examination, that it may be ascertained that they are free from any bodily defects or ailments calculated to interfere with the performance of military duties.

Extreme short sight, or any serious defect of vision, is regarded as a disqualification.

VIII. The period of study at the College will be one year and a half, at the expiration of which the cadets will be publicly examined and posted to the Engineers or Artillery, in the order of their merit, as declared by the public examiners, and according to the wants of the Service.

IX. The parents or guardians of the gentleman cadet are required to pay 50*l.* per term in advance, towards defraying the expense of his board, lodging, and education; also an entrance subscription of 2*l.* 2*s.* to the public library.

They are also required to pay the cost of his uniform clothing, averaging 15*l.* 5*s.* 6*d.* per annum, and of the books required for his use; also pocket-money at the authorised rates, viz., 2*s.* 6*d.* a week, with 1*s.* additional to censors, and 2*s.* 6*d.* additional to sub-officers.

X. Every candidate must deliver the names and addresses of two persons residing in London, or its vicinity, who engage to receive him on application to that effect by the Lieutenant-Governor of the College.

XI. A cadet is chargeable with the full payment for a half-year, however short a portion of it he may be in actual residence.

A cadet resigning or being dismissed during a term cannot lay claim to a return of a portion of the payment.

Cadets are chargeable for loss, damage, and destruction of books and other property.

No portion of their pocket-money may be paid in advance to the cadets.

No person belonging to the College may take charge of money for the private use of the cadets.

XII. Previous to the cadet's admission into the College, his parents or friends are required to furnish him with the following articles, viz.:

Twelve shirts, including three night-shirts.
Twelve pairs of stockings.
Six towels.
Eight pocket-handkerchiefs.
Two pairs of strong half-boots.
Two combs and a brush.
A tooth-brush.
A bible and prayer-book.
One pair of white trowsers.
A flannel jacket and pair of flannel trowsers to be worn when playing at football or cricket.

Case of mathematical instruments and box of scales of an approved pattern. To be seen at Messrs. Troughton & Simms, 138, Fleet Street; and at Mr. Elliot's, 56, Strand.

[To be repaired, or, if necessary, renewed by the parents or friends in the vacation.]

Each article of dress must be marked with the owner's name in full.

XIII. Engineer cadets will go through a further course of training at Chatham for one year as commissioned officers on full pay. Artillery cadets will undergo a professional training at Woolwich for six months as commissioned officers on full pay.

XIV. A cadet of the Senior Department, who, after a residence of one year and a half at the College, shall be reported by the Public Examiners to be not qualified for a commission in the Engineers or Artillery, in mathematics, fortification, civil and military drawing, surveying, and Hindustani, will forfeit his appointment. Also in case of misconduct a cadet will be liable to dismissal on the judgment of the Secretary of State for India in Council.

XV. Cadets of the Senior Department will be allowed to count as service for full-pay pension the time which they may have spent under official instruction at Chatham or Woolwich—but will not be allowed to count as service any part of the time spent in the College at Addiscombe. Their commissions as lieutenants will bear the date of their last public examination.

XVI. Young officers appointed to the Artillery or Engineers will be required to proceed en route to India within three months of the completion, by them, of the prescribed course of professional instruction at Chatham or Woolwich.

Note.—The Secretary of State for India in Council has determined to allow the sum of 100*l.* to each cadet who may obtain a commission in the Engineers or Artillery after a residence of three terms at the Addiscombe College, in aid of the expenses of his education and residence at that institution.

W. E. BAKER, Colonel, Military Secretary.

India Office, March 14, 1860.

* N.B.—The examination in arithmetic, algebra, plane geometry, logarithms, and plane trigonometry will be close and searching.

SAILS FURLED AND REEFED FROM DECK BY FINLAY'S PATENT.

This invention was exhibited and fully explained by Captain Finlay in the News Exchange Room, Liverpool, on the 17th of February, to upwards of 400 Merchants, Shipowners, and Masters, at the conclusion of which Captain Ord, lessee of the Kooria Mooria Islands, publicly congratulated the patentee on producing the most perfect, simple, and practicable invention of the age. Captain George Forrest, of the ARABIA, concurred in this commendation, and gave orders to fit his first-class ship. Captain M'Garry, of the ship HELEN, Captain Jas. Tasker, Captain Roach, and all the members in port of the Mercantile Marine Service Association, have given Captain Finlay leave to use their names in approval of the invention. Seventeen ships out of the Mersey within a few days have left with the intention of fitting their yards and sails with Finlay's Patent at sea. Under this patent, topsails, topgallantsails, and royals are furled by running them into the bunt, and brailing them snugly against the mast by spilling-lines. Courses are reefed by the most perfect method yet known. Topsails also can be rolled round the yard in reefing without a cuddy yard. Captain Finlay has received hundreds of flattering testimonials.

Opinion of Captain Wm. Vincent, Managing Superintendent Royal Mail Company:—

"Southampton, Jan. 21, 1860.

"I consider the invention (Finlay's Patent) a very excellent, simple, and easy method of shortening sail, and well deserving the attention of shipowners generally, but particularly for sailing ships which have to carry a press of canvas to make a passage with comparatively few hands."

Apply to Captain FINLAY, 66, Queen Street, Liverpool; W. H. DOUGLAS, 8, Upper East Smithfield, E.; or to T. MOORE, 33, Regent Circus, Piccadilly, London, W.

DIVING APPARATUS.

C. E. HEINKE, SUBMARINE ENGINEER, 79, Great Portland Street, London, W., begs to call the attention of Shipowners, Merchants, Captains, &c., &c., to the important Improvements made by him in the SUBMARINE HELMET DRESS AND APPARATUS, which enables a Diver to remain any length of time under water, for the recovery of property from wrecks, making and repairing foundations of harbours and bridges, and also for pearl and sponge diving.

DUTY OFF FRENCH PERFUMERY.

ED. PINAUD'S Choice Perfumes, Fancy Soaps, Pomades, Philocomes, Aromatic and Oriental Vinegar, Cosmetics, Elixir, Dentifrice, &c., &c., to be had of all Chemists and Perfumers throughout the Country. Wholesale Depot, and for Export, 27, Cannon Street West, London, E.C.

TO OFFICERS OF HER MAJESTY'S SERVICE, THE NOBILITY, GENTRY, & PUBLIC GENERALLY.

WEST END SATURDAY EARLY CLOSING.

W. JOHNSON, Naval Instructor.

ARMY, INDIA CIVIL SERVICE, &c., EXAMINATIONS.—A Military Tutor, who has several CANDIDATES for the above reading with him for the NEXT EXAMINATION, will be happy to MEET WITH OTHERS, resident or non-resident. His Establishment can be highly recommended by persons of very high standing, whose sons have distinguished themselves. One obtained nearly the highest number of marks at the India Civil Service Examination last year. The best masters on every branch of education are in attendance, and the house, library, and general management afford every facility for rapid progress without cramming. Terms, &c., on application to M. A., GREGG'S, Porchester Library, Queen's Road, Bayswater, W.

MILITARY EDUCATION AT THE SUNBURY PRACTICAL MILITARY COLLEGE.—This Establishment, exclusively military, prepares candidates for the Examinations of the Staff College, Woolwich, Direct Commissions, Sandhurst, and Addiscombe. At three Competitive Examinations for the Staff College, officers who had read at this Establishment have twice come out first on the list.

Apply to Captain LENDY, Sunbury, S.W.

EDUCATION.—BRIGHTON.

FRENCH, GERMAN, AND CLASSICAL SCHOOL, 15, Eaton Place, Kemp Town.

PRINCIPAL—MR. L. W. SCUDAMORE, B.A.

Pupils prepared for the Army, Civil Service, Oxford and Cambridge Examinations, &c. French and German constantly spoken. Terms moderate. References to the friends of pupils, many of whom have taken high places at the above Examinations.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to Major CORTE, The Cedars, Putney, S.W.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor, 57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

COLT'S NEW SPORTING SHOT GUN.—"NEW GUN. — Colonel Colt has invented a Revolving Shot Gun. Upon a late trial of this valuable gun, at a distance of 30 yards, it put 175 pellets in a circle of 12 inches diameter, penetrating 75 sheets of ordinary brown paper, the Shot used being No. 6 Shot, 1¼ ounces and 2 drachms of powder to each charge. The Gun is a Five-Shooter."—*Times.*

COLT'S NEW PISTOL CARBINE.—The advantages of this Breech Attachment to Colt's 7½ inch Repeating Pistol, and its superiority over all others for military and sporting purposes, will be easily understood and appreciated, combining, as it does, *all* the advantages of both Pistol and Carbine, into either of which it can be *instantly* converted.

COLT'S RIFLE (NEW MODEL), 5 and 6 Shots; Large, 56-100th, Medium, 44-100th, and Small, 36-100th, calibre or bore of barrel—18, 21, 24, 27, and 30 inch. With the sights, lever ramrod, and all the late improvements, in cases complete, cartridges, &c.

COLT'S REVOLVER PISTOL for Officers is the 7½-inch rifle barrel, six shots, weight 2lb. 8oz., in case complete. Also 4, 5, and 6 inch barrel Pocket Revolvers for Travellers and House protection.

CARTRIDGES, HOLSTERS, BELTS, and POUCHES, &c.

SAML. COLT, 14, Pall Mall, S.W., or through any respectable Agency.

GUNS, REVOLVERS, RIFLES, &c.

AT WHISTLER'S, 11, STRAND, W.C., you will find a lot of the above, second-hand, by every maker in the world. He will take anything in swap, and for cash will suit your pocket for less money than any other house in London.

11, Strand, opposite Trafalgar Square, W.C.

REVOLVERS, GUNS, & RIFLES OF THE FINEST LONDON MANUFACTURE.

ROBERT ADAMS (Gunmaker to H. R. H. the Prince Consort), 76, King William Street, London, E.C., supplies, wholesale and retail, his PATENT REVOLVER, as exclusively adopted by H. M.'s War Department and the Indian Army; together with Military and Sporting Guns, Rifles, Breech-Loaders, Ammunition, and Appurtenances of every description.—Price Lists by post on application.

TO VOLUNTEER RIFLE CORPS.—Gentlemen are strongly recommended to make trial of the PATENT CIRCULAR TRIGGER LOCK, which combines a LIGHT, SMOOTH, and QUICK pull off with perfect SAFETY.

Apply to B. DE LA COUR, 327, High Street, Chatham.

THE NEW REGULATION BRIDLE.

A. DAVIS,
MILITARY SADDLER,
33, STRAND, W.C., AND AT ALDERSHOT CAMP.

OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfit in Saddlery.

A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

TO OFFICERS IN HER MAJESTY'S ARMY AND NAVY.

MATTHEW WILDSMITH having been favoured with the patronage of many Gentlemen in Her Majesty's Forces has paid special attention to the production of a BOOT that should combine strength with ease and comfort. He is now happy to announce that he has succeeded in obtaining a leather specially prepared which he can with confidence recommend for military use, being light in weight, pliable, and very durable. Indian and Foreign Orders executed with despatch.—1, Sherard Street, Regent Street, W., rear of County Fire Office.

THE ONLY CRACK PATENT MILITARY BOOT MAKER,
STOKES,
27, COVENTRY STREET, HAYMARKET, W.

ELKINGTON & CO. desire respectfully to call the attention of Regimental Messes requiring PLATE to their Manufactures, which may be obtained in great variety from their establishments.

LONDON: 22, Regent St., W., and 45, Moorgate St., E.C.
DUBLIN: College Green.
LIVERPOOL: Church Street.

Manufactory and Show Rooms, Newhall Street, Birmingham.

Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

JOHN SHERWOOD & SONS, LICHFIELD STREET, BIRMINGHAM, SILVERSMITHS AND ELECTRO-PLATE MANUFACTURERS. Estimates for Mess Plate and Canteens supplied by return post. Licensees for the manufacture of the Hydrostatic Urns as in use at the Camp at Aldershot.

MILITARY DECORATIONS, WAR MEDALS, &c.

ORDER OF THE BATH, LEGION D'HONNEUR, and the MEDJIDIE, in all the different Classes and Sizes.

MINIATURE MEDALS, consisting of CRIMEAN, FRENCH, SARDINIAN, CAFFRE, and the whole Indian Series issued to the present time.

Clasps, Bars, Ribbons, &c., and Masonic Jewels of all kinds, manufactured and supplied by

PHILLIPS BROTHERS, Goldsmiths, &c., 22, Cockspur Street, London, S.W.

THE VICTORIA CROSS, OR NEW ORDER OF VALOUR.—The miniature Victoria Cross, made from the Gun-metal taken at Sebastopol, can only be obtained at C. F. HANCOCK'S, Jeweller and Silversmith to the principal Sovereigns and Courts of Europe. P.S. The Miniature Medals of the ORDER OF THE BATH, LEGION OF HONOUR, MEDJEDIE, with all the different clasps; also all the Miniature INDIAN MEDALS to the present time, with their clasps, bars, and ribbons, including the CRIMEAN, FRENCH, SARDINIAN, and CAFFRE.

38 & 39, Bruton Street, W.; and 152, New Bond Street, W.

CHRONOMETERS, WATCHES, CLOCKS, &c.

E. WHITE, for several years principal assistant at Messrs. Dent's, of Cockspur Street, having taken the above premises (formerly occupied by Messrs. Green & Ward), respectfully solicits an inspection of his Stock, comprising a choice selection of CHRONOMETERS, WATCHES, CLOCKS, &c., all of which have been recently manufactured on the most improved principles, by workmen of the first talent.

20, Cockspur Street, Pall Mall, London, S.W.

GOLD WATCHES, CHAINS, AND JEWELLERY, best quality, at moderate prices, at HASELDINE'S (Successor to Young), 3, Coventry Street, Haymarket, W. Diamonds, Pearls, and Plate purchased or exchanged.

BENNETT'S WATCHES, 65 & 64, Cheapside, E.C., in gold and silver, in great variety, of every construction and price, from 3 to 60 guineas. Every watch skilfully examined, and its correct performance guaranteed. Free and safe per post.

Money Orders to JOHN BENNETT, Watch Manufactory, 65 and 64, Cheapside, E.C.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

THE VOLUNTEER'S PATENT CLIP, the INDISPENSABLE, for suspending gloves or any other requisite instantaneously and safely. Send eighteen stamps to the Patentee, and by return of post one of these useful articles will be sent. Every rifleman in the country should have one.

CASTLE & Co., Patentees, 17, Colchester Street, Savage Gardens, E.C., and 3, London Road, Croydon, S.

COLOURED FLANNEL SHIRTS. SOLD BY
THRESHER & GLENNY, 152, STRAND, W.C.

THE GORGET SHIRT, Jos. FRYER & Co., Patentees. 6 for 42*s*. Next door to the Haymarket Theatre, S.W.

HUGHES' "RIFLEMAN'S" Thrice Shrunk, Coloured FLANNEL SHIRTS; also their ANGLO-PARISIAN A 1 SHIRTS, 27*s*., 33*s*., 39*s*., 45*s*., per half-dozen; and FASHIONABLE COLLARS, 8*s*. 6*d*., 9*s*. 6*d*., 12*s*. 6*d*., per dozen, are unrivalled. Samples with infallible measuring instructions forwarded. Army, Navy, and General Outfitters, at SHIPPING PRICES, for India, China, Australia, &c. 203, Regent Street, W.

LAWRANCE PHILLIPS' MILITARY OUTFITTING WAREHOUSE,
London, 28, West Strand, W.C.

UNIFORMS FOR THE ARMY AND NAVY.—An estimate for the outfit of any officer in H. M. Service post free.

VOLUNTEER CORPS.—Contracts entered into for the equipment of entire regiments. Single suits supplied.

PORTABLE FURNITURE.—An Illustrated Catalogue, with design, size, and price of every requisite for the barrack-room forwarded on application.

RIFLE CORPS.—The MATERIALS recommended by Government may be seen at Messrs. NICOLL, Army Depot, Regent Street, London, W. As every suit of uniform will be made from measures taken by skilled foremen, gentlemen are requested to call there in preference to making appointments to be waited on at their own homes. Cash payments being required, the best articles are produced for very moderate prices.—H. J. & D. NICOLL, 114, 116, 118, 120, 142, 144, Regent Street, W.; 22, Cornhill, E.C.; and 10, St. Ann's Square, Manchester.

CHAMBERLAIN'S ROYAL PORCELAIN WORKS.—Admission of Visitors to the Works to be had on application at the Show Rooms, from 9 A.M. to 6 P.M. each day, except Saturday from 9 A.M. to 2 P.M.—W. H. KERR & Co., "Proprietors," Worcester, successors to Messrs. Flight, Barr, & Co., and Messrs. Chamberlain & Co.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

ARMY, NAVY, EAST INDIA, AND COLONIAL AGENCY.

The undersigned act as GENERAL AGENTS in England for Officers and Members of the above services. A detailed Prospectus forwarded on application.

W. R. LOOKER & Co., 12, Pall Mall East, London, S.W.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

THE ROYAL DAMASK TABLE-LINEN MANUFACTORY (Established upwards of a Century), LISBURN, IRELAND, the Proprietors,

JAMES COULSON & Co.,

Beg to intimate that their only London Depôt is at No. 46, PALL MALL, S.W.,

A few doors West of the Army and Navy Club.

RIFLE CORPS PECULIAR OIL specially prepared for Rifles, Watchmakers, Microscopists, Model Machinery, &c.—This Oil, prepared from the decorticated seeds of the Guilandia Moringa, is used especially for the finest and most delicate lubricating purposes, and is superior to all others from its inodorous and uncongealing qualities; it consequently never clogs, is clean in use, and free from the nauseous smell all other oils acquire. No Rifle-kit is complete without this speciality, a judicious use of the Oil saving friction, and keeping the arm in an efficient state.

Prepared by J. CARR, Chemist, 171, High Holborn, London, W.C., in *bottles*, 1*s*. each.

PURE RE-CARBONATED FLUID MAGNESIA (Patent).—As one of the Chemical Directors of the processes recently patented for re-carbonating and saturating the FLUID MAGNESIA of Sir JAMES MURRAY, M.D., I can testify that, as perfected at his London Works (Mr. Linder's, 104, Strand), it forms a sparkling, agreeable, and most effective antacid; and, when taken with the Acidulated Syrup, a gentle aperient. It will also be found useful in the uric acid deposits, so common in cases of Rheumatism, Gout, and Gravel.

ARTHUR HILL HASSALL, M.D.,
Analyst of "The Lancet" Sanatory Commission, Author of "Adulterations Detected," "The Urine in Health and Disease," &c.

Wimpole Street, 20th January, 1860.

CONDY'S PATENT FLUID, OR NATURAL DISINFECTANT,

Not only deodorises but disinfects perfectly, and DESTROYS FOR EVER the cause of infection. Is not poisonous, as it may be used to purify water. Evolves no noxious or unpleasant gas. Cannot be mistaken for any other fluid, thereby preventing death and disease, and is therefore the best, safest, cheapest, and most pleasant disinfectant ever introduced.

Patronised and reported upon by the Board of Health and all the most eminent medical men of the day most satisfactorily.

Sold in Quart Bottles, 4*s*.; Pints, 2*s*.; Half-pints, 1*s*.; and in bulk, 10*s*. per Gallon. Sold by all first-class Chemists.

VINEGAR.—Patronised by Her Majesty's Government.

CONDY'S PATENT PURE CONCENTRATED MALT VINEGAR.

Families, by using this delicious Vinegar, ensure purity, and effect a saving of 50 per cent. See Report of Dr. Letheby, City Officer of Health; Dr. Hassall, of *The Lancet* Commission, and others. Sold by the Trade, in bottles, labelled and capsuled. Wholesale

63, King William Street, London Bridge, E.C.

Sample for Six Quarts, to any Railway, for 3*s*. 6*d*., P. O. O. or Stamps.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND

Are at all times to be obtained of

PHILLIPS AND COMPANY, TEA MERCHANTS, 8, King William Street, City, London, E.C.

Black or Green Tea, 2*s*. 8*d*., 2*s*. 10*d*., 3*s*., 3*s*. 4*d*., to 4*s*.

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

THE GUINEA COAL COMPANY'S WALLSEND COALS, One Guinea per ton "All the Year Round."—Address, HORATIO MORGAN, 17, Wellington Street North, Strand, W.C. (next door to the Office of this Paper).

GAY & SONS' DRESSING-CASES are the best and most reasonable.

113, High Holborn, W.C. Established 1820.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of White Friars, in the city of London, and published by him at the office, No. 16, Wellington Street North, Strand, in the county of Middlesex.—SATURDAY, March 24, 1860.

THE first effect upon the mind of a visitor to our naval arsenals must be one of wonderment as to the principles upon which the Admiralty are at present acting in the construction of men-o'-war. We cannot help thinking that they are entirely "at sea" upon what to construct, and in a state of despair have ordered the Comptroller of the Navy to build anything and everything. All naval men differ as to the comparative importance in a future war of line-of-battle ships, frigates, sloops, gunboats, and iron-sheathed batteries. We might fill folios with the opinions of the most experienced seamen and marines upon not only those points, but even with the questions of armament, equipments, and "*personnel*" of our future fleets. When those who should know most about the matter are puzzled, it would indeed be presumptuous in us to pretend to dictate what ought to be done; but we require those who, by virtue of the authority vested in them by their Sovereign and Parliament, have the power to build whatever description of craft they please, to show us some reason for the course at present pursued; and a better one, too, than that we are to simply imitate Frenchmen and Americans in launching upon the seas first one nautical prodigy and then another. We say imitate advisedly, for during the last two or three sessions of the Imperial Parliament, the only arguments advanced by First Lords and Secretaries were based simply upon the two facts, that the French were constructing screw line-of-battle ships, and the Americans fifty-gun frigates; consequently, we were to build huge carracks to match the one, and "streets of guns" to beat the other! We may be wrong, but our opinion is that, provided we can build something that will catch and capture either, we might well leave the Emperor Napoleon and President Buchanan to follow out the conclusions they have arrived at as to the peculiar vessel each requires. They have sound and good reasons, doubtless, for what they are doing; it is folly for us to copy them without taking those reasons into consideration, and greater folly still not to simply weigh, as they have done in the case of France and America, the requirements of this country, and then, without reference to other nations, adhere to what England really needs to maintain her supremacy upon the seas.

France has excellent reasons for considering a fleet of line-of-battle ships of great size as the vessels best adapted to the wants of a country without colonies or foreign trade, but one that is determined to appear before Europe as a great naval power. Such vessels are peculiarly adapted to the genius and character of her navy. The French sailor, like the French soldier, works and fights best "*en masse*." It is in those great solemn shams that France best conceals her real want, the innate seaman and the sailor-officer. Her small craft are, as a general rule, in shameful order and state of efficiency; her line-of-battle ships quite the reverse. Her frigates and sloops were easily captured in the last war, and will be again (D. V.), but her liners always fought severely, and even as late as the Russian war preserved their excellent reputation. Such are, briefly, French reasons for building these towering vessels of three and four decks, but they in no way apply to the wants of Great Britain.

The Americans, on the other hand, without colonies but an enormous foreign trade, want fast vessels to escort fast-sailing merchantmen; vessels at the same time sufficiently large to keep the sea for very lengthened periods, and such as can run a girdle round the globe without being obliged to approach hostile coasts for provisions, water, or fuel. Unable, by the constitution of their navy, to preserve discipline amongst large bodies of men, line-of-battle ships have, with America, been always failures; whilst, on the other hand, although her corvettes were admirably efficient, they were not sufficiently imposing. The frigate was an American necessity, and, accordingly, she has succeeded in imposing upon the world a set of showy vessels, which require the wide ocean to disport themselves in, admirably adapted to create an effect in peace, a panic in war, but vessels that our screw two-deckers would be more than match for.

Now we have colonies and military posts spread all over the globe, which neither France or America have; and though our commerce on the high seas is as important as that of America, our traders or escorts can run from port to port all the way from Japan to Liverpool, and never be four weeks at sea. By concentrating our Navy into line-of-battle ships, we shall not protect our colonies; and the multiplicity of our places of refuge and military posts renders it unnecessary, as well as bad policy, to have great frigates, which require much sea-room, draw quite as much water as line-of-battle ships, and have no peculiar merit other than that of being able to make an eight months' cruise in consequence of their size and capacity in proportion to their crews. The speed of these frigates is, we grant, an important and valuable qualification; but do not let us run away with the idea that all is gospel that has been written and told of Merrimacs and Minnesotas, any more than we should believe all we hear of French four-deckers and three-deckers. What England wants is a vessel that can compete with either as mere show ships in these parades of naval superiority, and in the event of a war enable us to hold our own ground, until the test of some sea-fight shall really prove, what we cannot but believe to be the case, that in these days of rifled cannon, long ranges, shells filled with molten iron or terribly explosive materials, that it is an error to place a thousand, or five hundred men, in a wooden powder magazine, to be hurled into eternity by a chance missile, when their subdivision into a great number of smaller vessels would increase our powers of aggression or defence, render such catastrophes less likely, and give a far better scope to the genius and gallantry of a race whose home is on the great waters.

It is not yet six years since we saw a war which commenced with proud fleets of line-of-battle ships end in one of gun-boats, mortar-boats, and floating batteries, sheathed with iron. The former very nearly captured Sweaborg; the latter destroyed Kinburn. He would have been a bold man who would then have asked for the public money to build screw three-deckers; time has however rendered us already forgetful of the experience then gained. Subsequent to that Russian war, we have had two more wars at great distances from the mother country,—for our existence in India, for our honour in China. Did the line-of-battle ship or the fifty-gun frigate do any good service there? No; it was in our seamen in India, our small-craft and gun-boats in China, that the Navy of Great Britain again established its pre-eminence and supported its traditionary fame. Since then the rifled cannon and Armstrong shell have still further multiplied the objections to the big ship,—the *lofty target*,—the concentration of guns, and above all of human beings. Are we not therefore justified in sounding a note of warning to those who, ignoring the present requirements of Britain and her colonies, appear to satisfy themselves with picturing future stately fights of line-of-battle ships, and hope to reproduce facsimiles of St. Vincent and Trafalgar, instead of looking alone to the one great result—the destruction of an enemy? And we say, that even as Solferino and Magenta were unlike all previous battles, so will future sea-fights be. Victory, we feel assured, will still be ours, if we consult the genius and self-reliant courage of our seamen and officers; and instead of cramming them together into huge slaughter-houses, let them meet the tall ships of France, or the long frigates of America, in small handy vessels, fleeter and more numerous than either, and armed with the most deadly weapons that this great mechanical country can produce. The "Napoleons" and "Bretagnes" assailed by a swarm of such hornets, with a small, compact squadron of screw two-deckers in reserve, will suffer the fate of a former armada; and we say, God help a vessel like the American Niagara, assailed by a dozen "Vipers" as fleet as herself, each armed with a single Armstrong or Whitworth gun!

It seems that a ship-of-the-line to be plated with steel, to measure 300 feet in length, with an iron spur 30 feet long projecting from her bows, and to be propelled at great velocity by engines of 1200-horse-power, has just been laid down in the dockyard at Cherbourg. We did not require this intelligence to warn us that a new era in naval warfare is fast approaching. Steam-propelled ships, armed with rifled cannon, must necessarily modify the tactics that formerly prevailed. Nevertheless, in attempting to read the future by the light of the past, it is found that new discoveries in the art of war have been but slowly imported into fleets and armies. Every improvement in arms has generally led to counteracting measures in naval and military organisation; so that alterations of tactics have followed at distant intervals the progress that rendered them necessary.

But it is impossible to suppose that this indifference can long exist at the present epoch, particularly in naval warfare. For the new motive power of steam is too vast and important a change not to render an entire revolution in naval tactics imperative. It is, however, difficult to predict what new measures may be adopted to meet the momentous crisis that seems to be at hand. For as yet the nations are in a state of transition, and doubt whether three-deckers, frigates, gun-boats, or iron-cased ships, will play the most important part in future naval campaigns. Are our new implements of war to be met by new modes of resistance? Are Whitworth's and Armstrong's cannon to be resisted by iron-cased ships? These are questions which time alone can answer, for steam warfare upon the ocean has yet to be learnt.

If we look around we find that France is relying very much upon plated ships of war; but independent of these novelties, the steam-fleet of Napoleon III. has made great strides during the last six years, and now assumes formidable dimensions. The Russian Navy again now numbers forty-two sail-of-the-line in the Baltic, which will soon be converted into a screw fleet. The minor navies of Holland, Sweden, Denmark, and the United States, are all in a state of conversion and progression. And if we add to these the steam navy of Great Britain, now fortunately equal to the navies of France and Russia combined, and then recall the changes that political events have produced in the maritime states of Europe, we may infer that the sea will become the theatre of events more important and decisive than any yet witnessed.

This subject is of momentous gravity to us, and should engage us to bring every possible consideration to bear upon the means by which this country may at the outset maintain her superiority at sea; for the fate of a nation may be cast in the die of one hostile collision.

In the House of Commons this week General Peel moved an address for returns of British regimental establishments for 1860-61, of all ranks; of effectives, 1st day of April, 1860, of all ranks; of Indian establishment for 1860-61; of effectives, 1st day of April, 1860; of total number of embodied Militia, 1st of April, 1860, of all ranks; and, of any transfers that might have been made, or of which notice had been given, from Indian establishment to British, not shown in Estimates. Mr. S. Herbert said, that he had no objection to the early part of the returns moved for, and he took this opportunity of stating that owing to the return of some regiments from India, a considerable portion of the augmentation announced would not be carried into effect, because the regiments returning would absorb the number of men so voted, and would constitute a much more effective force than that which had been contemplated, which was merely an augmentation to make shift until these regiments returned.

THE ARMY.

2nd Life Guards. Brevet-Major the Earl of Longford, who had been in this regiment since 1836, died on the 28th, inst., after a lingering illness. Lieut. E. S. Fitzhardinge Berkeley obtains the vacant troop without purchase, and Sub-Lieut. Barrè Cunninghame the lieutenancy. Mr. Cunninghame had been formerly a Lieutenant in the 4th Dragoon Guards, but was transferred as Cornet and Sub-Lieutenant to his present regiment. There is now but one Cornet in the 2nd Life Guards.

1st Dragoon Guards. A Lieutenancy has been for some months vacant in this regiment by the promotion of Captain Gunter.

2nd Dragoon Guards. Captain Ling is on leave from the regiment to Calcutta for two months on medical certificate. Quartermaster Rae is on leave to England until April 30th.

6th Dragoon Guards. Captain Curtis is on his way to England in command of detachments on board the Lady Melville transport.

6th Dragoons. Lieut. John O'Neill is about to retire by the sale of his commission. Captain Chapman of this regiment is the youngest officer of his rank in the Army, his first commission is dated October 23, 1857.

7th Hussars. It is rumoured a portion of this regiment will proceed to China. Lieut. Topham has passed his examination in Hindostanee, &c. There is a lieutenancy vacant by the promotion of Captain the Hon. C. C. Molyneux. Lieut.-Colonel Sir W. Russell has been elected M.P. for Norwich.

9th Lancers. Expected to move shortly to Aldershot. A troop under the command of Captain Ellis and Lieut. Carleton, and consisting of five sergeants and 75 men, left Exeter a day or two since, *en route* for Trowbridge, where they will be stationed.

12th Lancers. Lieut. W. E. Shaw has obtained leave to England on medical certificate.

13th Light Dragoons. From Edinburgh to York, to be stationed.

14th Light Dagoons. Lieut. L. Mackenzie has leave to precede the regiment to England.

16th Lancers. From York to Aldershot.

17th Lancers. A lieutenancy, rendered vacant by the promotion of Captain Waymouth, remains unfilled.

18th Hussars. This regiment, now lying at the camp at Aldershot, was inspected on Tuesday last (the 27th inst.) by Major-General the Earl of Cardigan, K.C.B., who arrived from London at 9·30 a.m., and proceeded to the Long Valley, where the regiment was drawn up for his inspection, and until 1 o'clock were engaged in field manœuvres; during the afternoon he saw "rides" of the officers, non-commissioned officers, and men in the riding-school, and afterwards the regiment on foot parade, at the conclusion of which he caused them to be formed in close column of squadrons, and addressing them, said—that since their formation he had taken great interest in them, and had now much pleasure in offering his cordial congratulations to the officers, n-c officers and men, for the good order and high state of discipline at which the regiment had arrived; he had been greatly pleased with every part of his inspection, and could assure them that a better regiment he had never inspected; they were fit for any duty, and he should not fail to report them such to His Royal Highness the General Commanding-in-Chief. The 18th Hussars have been formed only 2 years.

Royal Artillery.—The following postings of officers recently arrived at Calcutta are officially promulgated:—Lieutenant Douglas to Major Hasting's battery at Peshawur; Lieutenant Evans to Captain Connell's battery at Jhansie; Lieut. Traill to Captain Griffin's battery at Lucknow; Lieutenant A. W. Campbell, to Major Johnson's battery, *en route* to Calcutta. Lieut. Campbell will remain and do duty with the Artillery depôt in Fort William until the arrival of the battery in Calcutta, when he will join. Captain and Adjutant Murray, Surgeon Walsh, Quartermaster W. Hogue, and Paymaster Patterson to the head-quarters 14th brigade; Paymaster H. L. De la Chaumette to head-quarters 11th brigade. Lieutenant Auchinleck, of Brevet-Lieut.-Colonel Smith's battery, will proceed from Futtyghur to Calcutta, to join Captain Pasley's battery, ordered on service to China; Lieut.-Colonel Campbell is to take command of the Royal Artillery at Mooltan. Captain E. Maitland, Lieutenant Biddulph, and Lieutenant H. L. Mitchell have passed an examination in Hindostanee. Lieutenant F. B. Schreiber has leave to May 16th on medical certificate.

Major Henry has arrived home from India in the Marlborough troop-ship.

The annexed information of the changes and appointments in the Royal Artillery are announced in a general regimental order:—Colonel Arthur George Taylor has been appointed Commandant of the School of Gunnery and Superintendant of Experiments at Shoeburyness, vice Mitchell, resigned; Lieut.-Colonel and Brevet-Colonel E. M. Wilmot is appointed to the command of the Royal Artillery in Canada, vice Taylor, appointed Commandant in the School of Gunnery, and while holding the appointment will be placed as Colonel on the Staff of the army in North America. Lieut.-Colonel F. A. Campbell has been appointed a member of the Ordnance Select Committee in the room of Colonel Smythe, who has resigned. An exchange of batteries has been sanctioned between Second Captain and Brevet-Major W. G. Andrews, of Captain Paget's battery, and Second Captain A. Williams, of Captain Johnson's battery, Horse Brigade. Lieutenant H. St. J. V. L. M. Thomas, of the Depot Brigades, vice Maxwell, deceased; Lieutenant G. Deedes, of the 9th Brigade, vice Griffiths, removed to the supernumerary list; Lieutenant G. C. Sartoris, of the Depot brigade, vice Doull, removed to the supernumerary list, are raised to increased pay, and Lieutenant W. H. Graham, of the 1st brigade, has been appointed Acting-Adjutant at Sheerness, vice Doull. The Coast Brigade has been distributed as follows—viz., Division No. 1, Captain M'Kenzie, Eastbourne; No. 2, Captain Sweeney, Folkestone; No. 3, Captain Rogar, Portsmouth; No. 4, Captain A. Henry, Devonport; No. 5, Captain Elliott, Leith; No. 6, Captain M'Gorrery, Tower of London; No. 7, Captain Handyside, Pigeonhouse Fort; and No. 8, Captain W. Henry, Cork Harbour.

Royal Engineers.—Lieutenant Gossett is ordered from Calcutta, and Lieutenant Webber from Allahabad, to Dugshai, to join the 21st Company. Lieutenant G. Berkeley, of the 4th Company, has passed in Hindostanee, &c.; Lieutenant Hamilton, and a detachment of artificers, having completed a course of instruction in the machinery department of the Royal gun factories in Woolwich Arsenal, under the superintendence of Mr. Anderson, are about to take passage for the Mauritius, in charge of various cases of steam machinery, circular saws, turning and boring lathes, and other instruments, intended for that island. Lieutenant Hamilton and his party will erect, repair, and work the whole of the machinery without assistance. Captain G. Longley, who was invalided home from China, after the attack on the Peiho forts, has been ordered to join head-quarters at Chatham.

Scots Fusilier Guards. Two acting field officers of this regiment are on the staff—Lieut.-Colonel Stephenson in China, and Lieut.-Colonel the Hon. R. Charteris at the Horse Guards, which is, we believe, not in accordance with the regulation which places mounted officers of the guards in the same category in this respect as field-officers of the line. Lieutenant C. White is a candidate for the representation of Clare county.

3rd Buffs. By the latest accounts the 1st battalion was in good health at Canton.

5th Fusiliers. Captain Barker has passed in the vernacular. Assistant-Surgeon Whitty is on his way home in medical charge of troops. Captain Cubitt is appointed to the 2nd battalion at the Mauritius.

6th Regiment. Captain Lawrell has been appointed to the 1st battalion in India, Captain Parkinson to the 2nd at Gibraltar, and Lieutenant Howley to the 1st battalion.

7th Fusiliers. Lieutenants Sparks and W. P. Browne have passed in Hindostanee. Captain Lord R. Browne has sick leave to Calcutta to April 30th.

11th Regiment. The 1st battalion, consisting of 30 officers, 817 non-commissioned officers and men, 60 women, and 74 children, left Aldershot Camp on Tuesday, on the arrival of the Rifles, and proceeded by the return special train to Portsmouth.

12th Regiment. An entertainment on a superior scale was given in the Victoria Barracks, Sydney, in December, by the sergeant-major and sergeants of the 1st battalion, 12th Regiment, to Colour-Sergeant and orderly-room clerk James Stewart, on the occasion of his being about to proceed to England, for his discharge from the Service, after being in the regiment upwards of twenty-five years. He was presented with a massive silver tankard.

13th Light Infantry. Assistant-Surgeon O'Brien is on leave to England.

19th Regiment, 1st battalion, is ordered to proceed from Dinapore to Benares to relieve the 6th Regiment. Major Chippindall has extension of leave of absence until October at the recommendation of a medical board. Captain Amos Goren has arrived in England on sick certificate. Lieutenant and Anjutant Thompson left Calcutta on the 18th January by the Hotspur at the recommendation of a medical board; he was seriously ill at the time of his departure. Lieutenant Molesworth is also on the point of returning to Europe for the benefit of his health. The regiment has been very sickly of late. Lieutenant Wells is appointed to the 1st battalion, and Lieutenant Williams to the 2nd.

21st Fusiliers. Embarked on board H.M.S. Himalaya at Malta, on the 17th instant, for Barbadoes, to be stationed.

23rd Fusiliers. Brevet-Lieut.-Colonel Bulwer is appointed to the 2nd battalion, and Major Jervoise and Captain Knight to the 1st battalion. Lieutenant Lilly is on passage home with detachments from India in the Belgravia. Assistant-Surgeon Sylvester is on leave home.

24th Regiment. Ensign Hennessy has passed in Hindostanee.

25th, King's Own Borderers. Lieutenant G. Kirwan has been appointed Assistant Engineer to the Royal Engineers, and is under orders to proceed to Dover, to be employed in carrying out the extensive works in progress there.

27th Regiment. Lieutenaut G. S. White, who has just passed in Hindostanee, is appointed Assistant-Quarter-master-General at Allahabad. Lieutenant A. Clay has also passed in Hindostanee.

30th Regiment. On the departure of Mr. J. W. Hird from the band of the 30th Regiment, he was presented with a valuable silver snuff box, elaborately carved, bearing a suitable inscription, as a token of the respect and esteem in which he is held. During the time he has been with the regiment as Bandmaster, his demeanour has been of so gentlemanly and friendly a disposition that, while he instructed the band in the necessary musical duties, he made these duties a pleasure, and instruction agreeable.

34th Regiment. Brevet-Major Jordan has eighteen months' leave to England. Ensign Murray has leave to England on sick certificate.

35th Regiment. Lieutenant Parsons and Lieutenant Troup have sick leave to England. Lieutenant A. J. Ford has arrived home from Calcutta.

38th Regiment. Ensign W. W. Miller is appointed Regimental Instructor of Musketry, vice Captain Elles, who has resigned that appointment.

42nd Highlanders. Lieutenant G. W. Cockburn has passed in Hindostanee. Captain Moseley has arrived in India to join the regiment. Lieut.-Colonel E. R. Priestley is on two months' leave.

43rd Light Infantry. Captain J. Hudson has passed in Hindostanee.

44th Regiment has sailed from Madras for China in the Punjaub transport. A strong draft, with 3 officers, is under orders at Colchester to reinforce this regiment.

Royal Marine Light Infantry. Lieut.-Colonel J. G. H. Gascoigne, of the Chatham division of Royal Marine Light Infantry, has embarked for China, to take the command of the Royal Marines serving with the squadron under Admiral Hope. About 400 men belonging to various infantry regiments, at present serving in India, have volunteered for the corps of Royal Marines serving in China, and are now on their passage from India to China to join the battalion.

51st Regiment. Captain Read has passed in Hindostanee. Captain P. Chaplin is on leave to the 30th of November.

54th Regiment. Captain C. A. Thompson is doing duty with the Landour depôt, and will continue to do so during the hot season. Surgeon Dowding has leave to England.

56th Regiment. This regiment will not proceed to China as originally intended. Ensign Nuthall has passed in Hindostanee.

60th Rifles. Captain Watts Russell is appointed to the 2nd battalion, and Lieutenant Trotman to the 3rd. The 2nd battalion by the last accounts was at Calcutta, in readiness to embark for China.

67th Regiment was in good health at Canton on the 10th of February.

75th Regiment. Captain W. C. Justice is on passage home to England in command of detachments on board the Belgravia.

79th Highlanders. Lieutenant Mackesy has passed in the vernacular.

80th Regiment. Lieutenants Trevor, Beaumont, and Mortimer have passed in Hindostanee.

81st Regiment. Lieutenant Faircloth has been appointed instructor of musketry, vice Swift, invalided. Captain Woods and Lieutenant Speedy have passed in Hindostanee.

82nd Regiment. Brevet-Major Jarvis has obtained three months' leave to England, under instructions from the Horse Guards. Lieutenant J. A. Brock has arrived from India in the Marlborough troop-ship.

85th Light Infantry.—A valuable silver cup has been purchased by the sergeants of the 85th (King's) Light Infantry to be presented to Serjeant-Major Rook, who is about to be discharged, after long and faithful services. It bears the following inscription:—"85th (King's) Light Infantry.—Presented to Sergeant-Major W. Rook by his brother non-commissioned officers, as a token of their regard and esteem for his kind and gentlemanly conduct during his sojourn among his b

87th Regiment. Lieut.-Colonel Browne is ordered to remain at Calcutta, to join the corps on its arrival *en route* to China.

88th Regiment. Lieutenant Evans, who was Adjutant of the regiment during the greater part of the Indian mutiny, and who was severely wounded at Cawnpore, has been promoted to an unattached company. Lieutenant H. Waring has passed in Hindostanee.

89th Regiment. Ensign Burton has passed in Hindostanee. Captain R. F. Holmes is on his way from India in charge of detachments in the Startled Fawn.

93rd Regiment. Lieutenant Alexander has passed in Hindostanee.

94th Regiment. Lieut.-Colonel Mills has 18 months' leave to England. Lieutenant Ridgway is appointed interpreter to the regiment. This officer and Lieutenant Cox had previously passed in Hindostanee.

98th Regiment. Lieutenant Bingham has passed in Hindostanee. Lieutenant Gardiner is on passage to England in the ship Startled Fawn.

99th Regiment sailed from Calcutta, Feb. 6th, for China, in the ships Walmer Castle, Mars, and Octavia.

Rifle Brigade. The 1st battalion, under the command of Lord Alexander Russell, consisting of 4 field officers, 8 captains, 18 subalterns, and 4 staff, 48 sergeants, 21 drummers, 784 rank and file, 58 women, and 53 children, marched out of Portsmouth garrison on Tuesday morning, and left the Landport Station for Aldershot at 8 a.m. The 1st battalion, by their discipline and good conduct since they have been stationed at Portsmouth, carry with them the esteem and best wishes of the inhabitants. Captain J. Fremantle, 2nd battalion, has passed in Hindostanee. Lieutenant Lascelles, 3rd battalion, has also passed in Hindostanee.

The Right Hon. Sidney Herbert, the Secretary of State for War, has recently issued a Circular embodying a Royal Warrant, wherein it is announced that it has been deemed expedient to extend the grant of medals without gratuities to meritorious and well-conducted soldiers who have fulfilled the conditions of the Royal Warrant of the 13th of April, 1854, but who are precluded from becoming recipients of the medal with a gratuity in consequence of the aggregate amount to be annually awarded being already appropriated. It is determined that medals without gratuities, in addition to those already authorised, shall be granted to such soldiers, whether sergeants, corporals, or privates, as may be selected by the commanding officer for them, on the same conditions as regards the qualifications of the persons to be recommended, in the following proportions in each year—viz., to each cavalry regiment and battalion of the Military Train, 2; to each brigade of Royal Artillery, 3; to every 900 men of the Royal Engineers, 3; to each infantry regiment or battalion, 3. It is further stated that "non-commissioned officers and men who may be qualified before discharge shall be eligible to receive medals without gratuity, if recommended by their former commanding officers within three years after their discharge." Non-commissioned officers on the permanent staff of the Militia who were eligible previously to their discharge from the Army are also eligible to receive medals without gratuities; and no limit is to be placed on the grant as regards the date of discharge in the case of men so serving.

The following memorandum, respecting the sale of their commissions by officers serving in India, has been issued by Lord Clyde's direction:—"In accordance with instructions from the Horse Guards, the Commander-in-Chief directs that in all cases in which an officer, who is not entitled by the established rule to receive the full regulation price of his commission, may apply to retire from the Service; the officer commanding his regiment will forward to the military secretary, with the application to retire, an assurance from the officer concerned that he is prepared to accept whatever sum may be awarded by the Secretary of State for War as the value of his commission. The Commander-in-Chief directs, with reference to returns of officers for purchase, that whenever a commanding officer may have occasion to omit from a return the name of an officer included in previous returns, he will attach a remark that the name has been withdrawn at the officer's own request, or for other cause, in order that H.R.H. the General Commanding-in-Chief may be satisfied that the name has not been inadvertently omitted."

The following medical officers have been ordered to proceed from the head-quarters of the medical establishment,

Fort Pitt, to the stations named :—Staff-Surgeon W. A. Thomson, M.B., to Fermoy; Assistant Staff-Surgeon F. Falwasser, to Woolwich; Assistant Staff-Surgeon T. J. Chappel, to Templemore; Assistant Staff-Surgeon E. D. Tomlinson, to Galway; Assistant Staff-Surgeon J. S. C. Collier, to Walmer; Assistant Staff-Surgeon F. B. Hamilton, to Dublin; Assistant Staff-Surgeon A. Bruen, to Limerick; and Assistant Staff-Surgeon A. Waters, to Buttevant.

The new buildings connected with the Armstrong Gun-Factory department at Woolwich are so far completed as to admit of the employment of upwards of 2600 artisans and labourers, being treble the number employed at the royal gun-factories at the corresponding period of last year. Arrangements are now being carried out under the direction of Mr. John Anderson, superintendent of the department, to commence the manufacture of a number of 100-pounder rifled ordnance, for which purpose one of Nasmyth's steam-hammers, of the enormous weight of twenty tons, recently erected, will be brought into requisition.

A letter from Calcutta, dated February 23, informs us that Sir Hope Grant had not left at that day. He takes with him M. Beato, the photographer, whose pictures of the Malakoff and Great Redan, and other Russian works, taken after the fall of Sebastopol, are so well known in this country. Mr. Fenton, the photographer, left the Crimea before the great fortress was captured, and was succeeded by the artist above-mentioned, who was then in the employment of Mr. Robertson of Constantinople. M. Beato has since been employed with the Army in India; and his pictures, many of which are on a large scale, are said to have realised to him two lacs of rupees. When his work in China shall have terminated, this photographer has arranged to visit Japan.

CANTERBURY.—The metropolitan city is quite alive with military ardour. The Volunteers drill in the precincts, march through the streets, and patronise concerts in the public halls. The troops of the garrison in full strength all furloughs having stopped, march out into the country much to the benefit of the young soldiers, drill hard in the barrack squares and military field, and show by their soldierly bearing the excellence of the system under which they are trained. The citizens have further expressed their good feeling towards the garrison by extending the Soldiers' Institute. Two large rooms have been added, and fitted up with everything that a club room can require. A member pays one penny weekly, but as a sheet of paper, envelope, and penny stamp are provided for a penny; the subscriber who writes two letters during the week recovers the amount of his subscriptions. The depôt of the Cape Mounted Rifles will soon embark for the Cape; about the first week in May, it is thought. Considering that the average age of the lads is only fifteen and a-half years, their conduct has been altogether very praiseworthy. The change in the appearance of many is quite marvellous; the boy who entered the barrack dirty, heavy, and slouching, now walks the city, whip in hand, clean, and with all the air and nattiness of a soldier proud of his calling. Generally speaking, they like the Service. The new order, authorising a good-conduct badge after the first three years is a move in the right direction, and was well received here; but the period should have been two years, as the young soldier with difficulty looks forward so far as three years; and two years are enough to try him well. Sergeant Joy, of the 17th Lancers, has received a reward he well merited. He sounded the Balaklava charge, and gained on that day the decoration for distinguished conduct in the field; and the sergeant is now a messenger at the Horse-Guards, and comfortably settled for life.

Some experiments have been made at Chatham for the purpose of testing a new method of picketing the horses of the Royal Engineer Train. The plan proposed consists of a strong curb fastened to the curb of the horse, and at the end of it a piece of lead about four pounds in weight, which when not required to be used, is fastened in a receptacle made in the saddle. On the rider dismounting, all that is required is to throw the lead on the ground, when the horse, on attempting to move his head, finding there is a pull on the curb, remains quiet. The trials were very satisfactory, several of the horses so left being ridden round and excited to move without the slightest effect.

The first of the brigade field-days of the season took place at Chatham on Wednesday afternoon, when the entire force of the garrison, consisting of the Royal and Indian Engineers, the division of Royal Marine Light Infantry, and the three battalions of infantry were reviewed on Chatham lines by Major-General Eyre, commanding the forces.

The troopship Marlborough arrived at Gravesend on Thursday from Calcutta, with 215 troops on board, belonging to most of the regiments in India, the whole number consisting of men who have completed the term of service for which they enlisted, and are sent home to receive their discharge. The Marlborough has been 117 days on the passage, and during the voyage met with some very severe weather. There has been comparatively little sickness on board, and only two deaths occured during the passage. The men will have the opportunity given them of re-enlisting.

His Royal Highness the General Commanding-in-Chief, held a levee on Thursday afternoon, at the Horse Guards, which was fully attended.

The following circular memorandum, addressed to the army at home and abroad, has been circulated yesterday :—"Horse Guards, March 24, 1860.—It having been brought to the notice of his Royal Highness the General Commanding-in-Chief, that in several instances arms supplied by the War Department to regiments and depôts have been stamped or punched, instead of engraved by armourer sergeants, and the prices specified at pages 98 and 99 of the Queen's Regulations, for marking arms, being based upon the cost of engraving, and not stamping, officers commanding are hereby enjoined to forbid the latter practice, which is often injurious to the arms. The figures on bayonet scabbards should be engraved on the button and not upon the brass mouth-piece, as this latter is more liable to require repair or exchange. To the usual certificate forwarding the claims for payment to the armourer's sergeant, required by paragraph 14, page 99, of the Queen's Regulations, should in future be added that the arms alluded to have been engraved and not stamped.—By command, W. F. Forster, Deputy Adjutant-General."

The following medical officers doing duty at Fort Pitt Hospital have been ordered to proceed to the stations named :—Staff Assistant-Surgeon M. J. E. Fagan, to Portsmouth; Staff Assistant-Surgeon A. W. Beveridge, to Yarmouth; and Staff Assistant-Surgeon J. Miller, to Bristol.

SHORNCLIFFE CAMP.

The 2nd or Royal Cheshire Militia have been engaged during the past week in throwing up a new battery and repairing the old one near the new gun sheds; the position is an admirable one, commanding the chief approach to the camp from Hythe. The batttry will be armed with 18-pounder guns.

A detachment of the Royal Engineers have been engaged for some days surveying the Warren, near Dymchurch, and New Romney. Rumour says it is for the site of the encampment for the troops from Shorncliffe, who are to be moved in the spring, for two or three weeks, and placed under canvas on this spot.

COLCHESTER CAMP.

Both battalions marched out to Middlewick Farm for brigade drill, under Colonel Wood, C.B., commanding on the 27th instant.

Two captains, one ensign, and 90 rank and file of the 44th depôt, attached to the 10th battalion, have received orders to hold themselves in readiness to proceed to join the headquarters of the regiment in China, on the 1st proximo. The officers detailed are Brevet Major Faussett, Captain A. de M. Fleming, and Ensign C. Maguire.

ARMY GAZETTE.

WAR OFFICE, PALL-MALL, MARCH 27.

Her Majesty has been graciously pleased to approve of the following gentlemen being appointed Professors of the new Army Medical School at Chatham :—

Paymaster Edward McMullin, Recruiting District; Jan. 1.
Paymaster Samuel Williams, Depôt Battalion; Jan. 1.
Paymaster George Bodle, Depôt Battalion; Jan. 1.
Paymaster Alexander Fair, Depôt Battalion; Jan. 1.

* The promotion of Paymaster James Twibill, 38th Foot, to the honorary rank of Captain, with the date of 2nd March, 1860, has been cancelled.

Memorandum—In the *London Gazette* of 27th instant, the letters M.D. were erroneously inserted after Deputy-Inspector-General Longmore's name.

WAR OFFICE, PALL-MALL, MARCH 30.

Notice.—From and after the 1st July next, the minimum age of candidates to be examined for direct Commissions in the Army, will be fixed at eighteen years.

THE NAVY.

ADMIRALTY.—MARCH 24.

APPOINTMENTS AND PROMOTIONS.—Master J. H. Ryan, to the Wellington, for service in the Orlando.
Assistant-Surgeon G. Bellamy, to Bermuda Hospital.
Midshipman W. E. Fitzgerald, to the Trafalgar.
Acting Assistant-Surgeon J. C. Grigg, to the Hydra.
Assistant-Paymaster T. O. Joynson, to the Wellington.

MARCH 26.—Lieutenants E. H. Seymour, to the Chesapeake, additional for disposal.
Paymasters W. H. Dutton, to the Formidable; W. Pinhorn, to the Britannia; and D. F. Clow, to the Cambridge.
Midshipman J. C. Best, to the Marlborough.
Engineers C. Wright, confirmed to the rank of chief engineer, and appointed additional in the Cumberland, for service in the Phœnix; and T. J. Sweeny, promoted to the rank of second-class assistant-engineer in the Fisgard, as supernumerary.

MARCH 28.—Lieutenant H. M'Hardy, to the Forte; Paymaster J. Whittall, to the Pearl.

MARCH 29.—APPOINTMENTS.—Lieutenants St. V. D. Lake to the Excellent, and J. A. Vanrenen to be additional to the Forte, for disposal on the Cape of Good Hope station.
Staff-Surgeon Dr. D. G. Miller to the Orion.
Paymaster G. Hickman to the Pearl.
Assistant-Surgeon J. L. Whitney to the Chesapeake.
Masters' Assistants: R. W. Stevens and A. C. Bellamy to the Conqueror; A. G. St. G. Ponsonby to the Nile; H. Smith to the Forte; F. Darbishire to the Royal Albert; R. F. Bellis to the Edgar; T. C. Forte to the Marlborough; H. A. Easther and J. Browne to the Megæra.

MARCH 30.—Lieutenants—James G. Mead, to the Excellent; Henry L. C. Robinson, to the Megæra; Thomas W. Oliver, to the Megæra; Henry N. Knox, to the Edinburgh (additional), per service in the Louisa tender; Charles G. F. Knowles, to the Royal Adelaide; Thomas Hooper to the Marlborough (additional), per disposal. Assistant-Surgeons—William S. Fisher (confirmed), to the James Watt; Charles A. Lees, to the Plymouth Hospital; Jacob E. Dyves, to the Impregnable. Acting Assistant-Surgeon—James F. Fitzgerald (additional), to the Impregnable. Assistant-Paymaster—Frederick Burne, to the Trafalgar. Clerk—Thomas Pulliner, to the Hawke. First-Class Assistant-Engineer—Charles B. Turner, to the Asia, for charge of the machinery of the Rinaldo. Second-Class Assistant-Engineer—William Ross (promoted), to the Fisgard (additional), for gunboats coming forward. Acting Second-Class Assistant-Engineers—Joseph Hughesdon, for temporary service in the Hawke; James Broddie (promoted), to the Terror (additional), for service in the Nettle.

Aboukir was to leave Lisbon on the 26th, arriving at Plymouth about the 5th of April.

Adventure, steam-transport, arrived at Hong Kong on Feb. 12, with Her Majesty's 99th Regiment.

Agamemnon, 91, was at Gibraltar at the departure of the last mail.

Alacrity was about to sail for Corfu from Malta.

Albion. It is reported at Plymouth that this ship is to be converted into a screw.

Amphion, late flag-ship at Queenstown, sailed on Saturday from that port for Malta.

Antelope has been taken into dock at Woolwich for examination and repairs.

Arachne, 18, Commander Montgomerie. The crew were all paid off at Plymouth on Wednesday.

Ariadne left Queenstown on Saturday for Portsmouth.

Avon, steam-tender, Second Master-Commanding Day, arrived at Devonport, from Portsmouth and Portland, on Monday. On her way down Channel a man fell overboard, and was drowned.

Bacchante, 51, screw-frigate, in charge of Captain G. T. Gordon, commanding the steam reserve at Portsmouth, steamed out of the harbour on Wednesday at 1 p.m., and proceeded to the trial ground in Stokes Bay, to test her speed at the measured mile with the leading corners of her propeller cut off, Mr. John Dinnen, Inspector of Machinery to the Admiralty, with Mr. G. Murdoch, Inspector Afloat at Portsmouth, and Mr. Miller, Assistant Chief Engineer of Portsmouth Dockyard, were on board to superintend the trial. Six runs were made on the former trial, and gave the ship a mean speed in knots of 12·049. The same number of runs were made yesterday, and gave the ship a slight increase of speed; nothing, however, of moment, beyond the fact that it was an increase, with less vibration. It is said she is destined for the Pacific station, and will carry the flag of either Vice-Admiral Smart, K.H., or that of Sir T. Maitland, K.C.B.

Bullfinch, screw-gunboat, Lieut.-Commander James, tried an experimental propeller on Wednesday, at the measured mile in Stokes Bay.

Cæsar was at Malta on the 18th inst.

Castor, 36. A party of riggers are ordered to lay down moorings in the river, off Greenhithe, for the Castor, 36, which has been fitted out at Chatham, to be used as a training-ship for the Naval Coast Volunteers.

Centurion, 80, screw, Captain Rogers, arrived at Plymouth, on Monday, from Portland.

Collingwood, 80, belonging to the reserve in ordinary at Chatham, has been sent to Sheerness, where she will be lengthened and converted into a screw-steamer.

Conqueror, 101, screw, Captain Sotheby, arrived at Plymouth on Friday week from Portland. She was to go into harbour to have a leak, discovered near the propeller, stopped.

Diadem, 32, Captain James H. Cockburn, having been fitted with a new bowsprit has left Hamoaze, in charge of Mr. Gahan, Master of the Impregnable, and brought up in Plymouth Sound.

Donegal was to leave Lisbon on the 26th for Plymouth.

Doris, 32, was at Gibraltar at the departure of the last mail.

Dover, steam-vessel, having undergone extensive repairs, has been handed over to the riggers to be got ready for service in the river Gambia.

Duncan, 101, is in the steam basin at Portsmouth, receiving her machinery.

Euryalus, 51, screw. This ship is fast progressing in her repairs. Her false keel having been damaged on her last cruise, it has been found necessary to replace it. This vessel will accompany the Prince of Wales to Canada in the spring.

Firebrand, 6, steam-vessel, Commander J. M. Bruce. Up to the present time none of the bodies of the men accidentally drowned by the upsetting of this vessel's gig at the entrance of Portsmouth harbour have been found. As several versions of this lamentable accident are in circulation, we give the following from a reliable source. The wind on the occasion of the accident was strong in the morning, but freshened considerably towards noon. Previous to the increase of the breeze a signal was made from Portsmouth for a boat from the Firebrand to come ashore. This signal was made at about 11 o'clock. From some cause or other the boat did not leave the ship until near one, when the breeze having freshened considerably, the danger signal was hoisted at the semaphore, forbidding communication with the shore from ships at Spithead. The boat, however, with seven men in her, had previously left the Firebrand without, as it appears, having seen the danger signal flying; and as it was even more difficult to return to the ship than to run for the harbour, she held on until opposite the platform battery, when she was swamped by the confused sea that prevails there when the wind is strong from the southward. Since the accident the "danger flag," which was a very indistinct one, and from its colour blended very easily with a hazy sky, has been changed, and a flag with a blue border substituted.

Firefly, Commander Skead, eight days from Portsmouth, arrived at Gibraltar on the 21st, with supernumeraries for the squadron.

Frederick William, 86, screw. The launch of the Frederick William took place at Portsmouth, on Saturday, under favourable circumstances, with a goodly assemblage to witness the interesting spectacle. The Prussian Ambassador, Count Bernstoff, with his countess, who performed the ceremony of christening, attended by the Commander-in-Chief, Vice-Admiral Bruce, the Rear-Admiral Superintendent, the Hon. G. Grey, &c., were on the platform, immediately in front of the ship, where the Dockyard band performed some excellent pieces. The countess having dashed the bottle at the stem, and wished success to the Frederick William, the shipwrights immediately commenced splitting out the blocks, the signal was given, and the next minute down went the dog-shores, and away the beautiful ship glided, gracefully dipping to the delighted throng. Not an accident occurred to mar the event. The band struck up "Rule Britannia," the multitude heartily cheered, and another splendid two-decker was afloat in Portsmouth Harbour, presenting as handsome a sheer as is possible to witness. The Frederick William is sister-ship to the Queen, and was laid down eighteen years since, soon after the launch of that vessel. She was built as a three-decker to carry 110 guns, but remained on the stocks unfinished until the Board of Admiralty, seeing how successfully the Queen had been converted, determined the same with the Frederick William. She presents a beautiful stern and quarters. Her boilers and engines will be quickly in place, and in the course of two months she will be ready to take her trial under steam. Her dimensions are: length, extreme, 251 ft.; length between perpendiculars, 214 ft.; length of keel for tonnage, 174 ft., ⅜in.; breadth, extreme, 60 ft.; breadth for tonnage, 59 ft., 2 in.; breadth, moulded, 58 ft., 4 in.; depth in hold, 24 ft., 3½ in.; burden in tons, 3240 48·94ths. Armament: lower deck 30 8-inch guns, 65 cwt., 9 ft. 6 in.; main-deck, 32 32-pounders, 56 cwt., 9 ft., 6 in.; quarter and forecastle, 22 32-pounders, 42 cwt., 8 ft., 2 pivot-guns, 95 cwt. Her figure-head is a striking likeness of His Royal Highness Prince Frederick William, and does great credit to the carvers, the Messrs. Hellyer.

Greyhound put into Harwich in the course of last week. She sailed again on Thursday week.

Hannibal, 91, screw, Rear-Admiral G. R. Mundy, C.B., Capt. M'Connolly, arrived at Gibraltar on the 19th from Malta. She was saluted on entering the bay by the Renown with 11 guns, and by the Austrian corvette Dandolo with 13 guns; and on anchoring the garrison also saluted the Admiral with 11 guns. The whole of the salutes were duly returned by the Hannibal. The United States' screw sloop Iroquois also exchanged salutes with the Hannibal on entering the bay.

Hero, 90, screw, Captain Seymour, arrived at Plymouth from Lisbon, has gone into harbour to be fitted for the reception of his Royal Highness the Prince of Wales and suite, whom she is to convey to Canada.

Howe, ship-of-the-line, launched on the 7th inst. at Pembroke dockyard, is in the hands of the seamen riggers, who are actively employed in fitting up jury rigging, preparatory to navigating her round to Plymouth, where she will receive her engines, of 1000-horse power, from the hands of Penn and Sons, of Greenwich. The Howe will not be ready for a fortnight, when she will leave under the charge of Mr. Paul, the Assistant-Master-Attendant of Plymouth, who has 160 seamen landed from the Sanspareil, 70 guns. The Howe is a very handsome ship, built from the designs of Sir Baldwin Walker, K.C.B., and laid down during the Crimean war, when she was put in frame by superannuated shipwrights, temporarily called in. She was then intended as a sailing vessel, but while in frame was lengthened, and otherwise altered to receive the screw; since then she has been pushed forward with all despatch, the workmen being frequently employed until 10 o'clock at night upon her. She is now the largest vessel in the British Navy, and is larger by 100 tons than the Victoria, sister ship, recently launched at Portsmouth. The following is her armament:—Lower deck, 32 guns, 8-in., 65 cwt., 9 ft.; middle deck, 30 guns, 8-in., 65 cwt., 9 ft.; main deck, 32 guns, 32-pounders, 58 cwt., 9 ft. 6 in.; quarter deck and forecastle, 26 guns, 32-pounders, 42 cwt., 8 ft.; pivot gun, 68-pounder, 95 cwt., 10 ft. The figure-head is a three-quarter length figure of Admiral Lord Howe, in the old naval uniform, standing about 15 feet in height.

Immortalité, 51, is having her engines put on board in the steam basin at Portsmouth.

Imperieuse arrived at Hong Kong on the 31st of January.

Industry, iron steam-vessel, Master-Commander Hodges, is daily expected at Woolwich from South America.

Intrepid left Malta a few days since, supposed for Messina.

Digitized by Google

James Watt, 91, was left at Gibraltar by the last Peninsular and Oriental steamer that arrived at Southampton.

Landrail. This screw gun-vessel, sister to the Ranger, was launched on Wednesday afternoon at Deptford Dockyard. The Landrail is a fine specimen of a new class of screw-vessels, between the ordinary gun boats and the steam dispatch or small corvette vessels. She was laid down immediately after the launch of the Ranger in November last, four months only being occupied in her building, and has been constructed under the superintendence of Mr. Chalfield, from a new design, approved by the Admiralty. Her armament will consist of five guns—namely, one 68-pounder 95 cwt. gun, 10 feet in length, and four 24-pounder howitzers.

Lapwing was at Malta on the 18th inst.

Mohawk, 4, was left in Gibraltar bay by the last Peninsula and Oriental steamer.

Nelson, 91, is in the steam basin at Portsmouth, receiving machinery.

Ontario is the name given to a new 21 gun screw-corvette just ordered to be built at Woolwich.

Orion. An accident having occurred to the engine on her voyage to Naples, Mr. Hemshaw, the engineer of Malta dockyard, was sent over in Her Majesty's ship Caradoc to see what it was. It is reported to be the same sort of accident that happened to Her Majesty's ship Royal Albert some years ago, when Captain Mends so gallantly grounded her on one of the islands of the Archipelago.

Osborne, paddle yacht, has been placed in No. 8 Dock at Portsmouth, to clean copper, &c.

Pioneer arrived at Hong Kong on the 31st of January.

Porcupine, 3, paddle, Captain Otter, at Devonport, has made trial of her engines and machinery, after having defects made good.

Prince of Wales, 131, is in the steam basin at Portsmouth, receiving machinery.

Princess Royal, 91, screw. Workmen are very busy in completing the repairs of this ship. The whole of her stern was found to be rotten on her return from the Mediterranean. It is expected that she will be ready to leave the dock in about a fortnight.

Quail, gunboat, was at Gibraltar by the last accounts.

Redpole, 1, was at Gibraltar on March 21.

Rhadamanthus, 4, steam-vessel, Master-Commanding F. R. Sturdee, arrived at Woolwich on Sunday after discharging stores at Deptford, and is ordered to load with machinery and boilers for Portsmouth and Plymouth.

Rinaldo, 17, screw, was on Tuesday at high water, floated out of No. 6 dock at Portsmouth, where she has been constructed. Miss Stewart, sister to the Hon. Mrs. Grey, the wife of Rear-Admiral Superintendent Hon. G. Grey, performed the ceremony of naming the vessel. The Rinaldo was afterwards towed round to the steam basin to receive her machinery.

Royal Albert, flag-ship, was expected to leave Lisbon, for Plymouth, on the 26th instant.

Scourge, 6, was at Gibraltar, on March 21.

Scylla, 21, was at Gibraltar, at the departure of the last mail.

St. Jean d'Acre has arrived at Malta from Corfu, and is refitting.

Supply, Master-Commander William H. Balliston, has arrived at Spithead from Malta and Gibraltar, leaving the Rock on the 20th inst. She brings home as passengers :—Master Thomas Pounds, on promotion; Assistant-Engineers A. Clarke and Thomas Sanders; Boatswain James Stuart; and seven seamen and marines, with a quantity of old stores.

Sutlej, 51, screw. This ship commenced taking in her boilers in the steam basin at Portsmouth, on Thursday morning last.

Trafalgar 90, screw, Captain Fanshawe, made trial of her engines at Plymouth on Wednesday, and now lies in the Sound, waiting orders.

Trident is now in a forward state for recommission, and was undocked at Woolwich on Wednesday.

Victoria and Albert yacht has been undocked and placed in the steam basin at Portsmouth, where she had commenced coaling. Her super-heating gear is shipped, and she is expected to make her steam trial about the 2nd or 3rd proximo.

Victoria, 121, is receiving machinery in the steam basin at Portsmouth.

Victory, 104, flag-ship of [the Commander-in-Chief at Portsmouth, together with the other ships in Portsmouth harbour, have sent up their topmasts, &c., for the summer.

Vixen. A question was put in the House of Commons on Thursday respecting the murder of Captain Lambert, of H.M.S. Vixen, at Lima. Lord John Russell in reply said that the murder appeared to have been committed solely for the purpose of robbery. It bore no political character whatever; and he believed the government of Lima were using their best exertions to detect the perpetrators.

Vulture, 6, paddle, Captain George Parker, arrived at Spithead on Thursday afternoon from Gibralter, whence she sailed on the 21st inst., at 10 p.m. She has brought home several military and naval officer, as passengers from Gibraltar, among whom are Mr. Cartwright, late paymaster of the Tartarus; Mr. Bell, late chief engineer of the St. Jean D'Acre; and three military officers on private leave.

The Duke of Somerset, First Lord of the Admiralty, held a levee at the Admiralty on Thursday, at which the following officers attended :—Admirals Lord William Russell and M'Hardy; Captains J. Adams, C. P. Hamilton, J. Hudson, W. H. Hall, G. Haworth, Hon. R. Moreton, W. C. Chamberlain, A. Heselting, and Boyd; Commanders J. W. Dorville, H. R. Wratislaw, N. B. Bedingfield, H. C. Glynn, W. Greet, W. Swinburne, C. Bromley, H. Crease, C. J. Balfour, A. M. S. Lyons, and W. Hooton; Lieutenants E. G. F. Knowles, C. O. H. P. St. John, G. Marriott, and A. M. Noad; and Dr. J. K. Dunn.

Lieutenant McHardy, who, as wo stated last week passed the three extended examinations for lieutenant with a first-class certificate, has since received a Board promotion and an appointment to the Forte. He served in the Sir Charles Forbes (tender to H.M.S. Raleigh), at Fatscham and Escape Creek fights; was attached to the Naval Brigade at the successful storming of Canton and the Peiho Forts. He commanded the first pinnace of the Calcutta during her operations in China, and captured numerous armed junks. He also served in the Baltic during the late war.

The following naval cadets passed out from Her Majesty's ship Britannia on the 26th inst., for sea-going ships :—Mr. W. H. Roberts, presented with a Colt's revolver (first place in mathematics, navigation, and seamanship combined), also with a telescope (first in seamanship); Mr. G. A. Grey, presented with a telescope (youngest cadet passed with first class); Messrs. C. A. Nicholson, D. Brown, L. L. Bevan, R. B. Evans, J. N. Mercer, T. G. Powell, E. F. Smith, H. H. Gillum, R. R. Jaffray, R. Foster, G. C. Young, J. Brown, K. Garnier, F. R. Kemp, J. E. Sullivan, C. G. Hunt, G. H. Verner, C. E. Napier, A. Hutchinson, T. G. Musters, R. F. Meade, F. G. Dundas, J. W. Jenkins, H. S. Chowne, O. B. Niven, J. H. Hodgson, G. R. Bromley, W. F. Snowden, E. G. Law, A. W. Brabazon, T. D. Maycock, H. R. Welby, J. R. Napier, S. A. Johnson, M. H. Smith, J. L. Smith, F. G. M'Clintock, A. H. Boldero, H. J. Pugh, H. W. Nowell, F. W. Praed, P. H. Gedge, J. J. Campbell, J. King, R. F. Castle, G. Stopford, G. C. St. John, S. J. Wild, H. Smith, A. R. Boddam, W. E. Heathcote, E. J. Calcraft, M. C. Osborn.

THE MILITIA.

The North York Rifle Militia will assemble at Richmond (Yorkshire), for 27 days' training, on Thursday, May 3.

The West Suffolk Regiment of Militia will assemble at Bury St. Edmunds on Monday, the 30th of April, for 27 days' training.

The Dorset Regiment of Militia will assemble at Dorchester on Monday, the 30th of April, for 27 days' training.

1st Devon Militia.—This regiment will assemble for training at Exeter on the 30th of April; Lieut.-Colonel Ferguson Davie has issued the following order to the regiment, on the retirement of Captain and Adjutant Pitman:—"The commanding officer cannot permit Captain Pitman to retire from the regiment without recording the high sense he entertains of the zeal, intelligence, and courtesy, with which, for so many years, he has performed the arduous and important duties of Adjutant of the regiment, with no less credit to himself than advantage to the Service. Lieut.-Colonel Ferguson Davie avails himself of this opportunity of expressing the deep regret he feels, in common with every member of the corps, at the cause of Captain Pitman's retirement, and begs to assure him of their united hearty good wishes for his future happiness, and speedy restoration to health."

The Louth Rifles, under the command of Colonel Sir John Robinson, were to arrive at the Curragh on Thursday, from Kinsale, previous to disembodiment.

Clothing of the Disembodied Militia.—New regulations for the clothing of the disembodied militia have just been issued by Sir Benjamin Hawes, to the following effect:—The permanent staff will be supplied with the following articles—1 chaco every five years; 1 tunic every two years; 1 pair trousers every two years; 1 pair boots every year; 1 fatigue-jacket every two years; ditto trousers every two years; 1 forage cap every two years. Every non-commissioned officer and drummer, on first joining a regiment, will be completed with a full dress and fatigue suit, to last two years. The permanent staff, on enrolment, will be entitled to a full kit of necessaries, as afterwards specified. Volunteers will be allowed, every five years—Tunic, trousers, chaco, 2 fatigue jackets, 2 ditto trousers, and forage cap. Every Volunteer, upon his first joining for training, will be allowed the following articles of necessaries, which, with the exception of boots, socks, and shirts, are to last five years; but it is to be understood that for some time, and until existing stores of necessaries be exhausted, the supply will consist of articles of the old pattern:—1 pair of boots, 1 blacking tin, 1 pair braces, 1 brush button (except in rifle regiments), 1 clothes brush, 1 shaving brush, 1 shoe brush (set), 1 comb, 1 holdall, 1 knife, fork, and spoon (set), 1 pair mitts (except for artillery), 1 razor, 2 cotton shirts, 2 pair worsted socks, 1 sponge, 1 button stick (except for rifles), 1 stock, 2 towels. In addition to the above, Militia Artillery Regiments will receive 1 bag and hooks, 1 shaving bag, 1 pocket knife, 1 plume case, 1 pair leather gloves, 1 hair brush, every five years. All volunteers will receive 1 haversack, 1 knapsack and mess tin *complete every 10 years*. Part-worn articles belonging to men becoming non-effective are to be re-issued, *and are to last the prescribed period in actual wear*. Volunteers who may be enrolled for a second term of five years' service will be provided with a complete new kit, or the value thereof, should the kit in possession, or any portion thereof, be serviceable. Great coats for the permanent staff will be required to last five years, and for enrolled Volunteers 10 years. The officer commanding is to apply for the second suit whenever he may consider the same necessary, it being clearly understood that the articles issued are not to exceed the three suits allowed for five trainings. Requisitions for the clothing must be addressed to the Secretary of State for War seven months before the articles required are likely to be taken into wear. The clothing will be supplied, made up and forwarded to the head-quarters of each regiment, and a sum not exceeding 2*s.* per suit will be allowed for alterations for the permanent staff, and 1*s.* per suit for the enrolled Volunteers The clothing and necessaries will become the property of the men after they have been in wear five trainings, with the exception of shirts, socks, and boots. By a recent circular any schoolmasters are prohibited from engaging in private tuition, excepting by special sanction of the local inspectors.

MILITIA GAZETTE.

WAR-OFFICE, PALL MALL, March 27.

North York Artillery Militia—Henry Thomas Fyers (late Major in the Artillery Regiment of Royal Lancashire Militia), to be Major-Commandant; March 19.

Light Infantry Battalion of Royal Sussex Militia—Ensign Stewart P. Majoribanks, to be Lieutenant, vice Clay, resigned; March 19.

Three companies of Her Majesty's 19th Regiment, under Major Jennings, at Dacca, have been ordered to hold themselves in readiness for a march to the borders of Tipperah, to keep the Kookies in order.

VOLUNTEERS.

METROPOLITAN.

Civil Service Volunteer Brigade, Her Majesty's Customs Corps.—This corps, now numbering about 400, is to have their first public "march out" to-day. The assembly is to be in the Long room at 4 precisely, to march to the Fenchurch Street station, *en route* for Highbury, whence they will march into the country, preceded by the famous band of the Coldstream Guards. The Commandant, Major Grey (one of the Commissioners), being absent, the senior captain, Mr. Hamel, will be in command. Previous to going on leave, the commandant, by written regimental order, expressed his approval of the bearing and conduct of the corps, and how indebted they were to the authorities of the Tower, and to the officers of the Coldstream Guards for their kindness and attention. Public thanks were thereby offered them in the name of the corps, and high eulogiums passed on the drill-sergeants Fletcher and Bird (of the Coldstreams), Sergeant-Armourer Higgs (formerly of the Fusiliers), and the Regimental Sergeant-Major of the corps, Mr. Freelove (formerly of the Life Guards), who, it is hoped, will be the paid Adjutant of the regiment), to whose excellent drilling and to the attention of the present Adjutant, Lieutenant Bernard, and the other officers of the corps, they are indebted for their proficiency. As the Queen's birthday is a general Civil Service holiday, it is rumoured that the Civil Service Brigade will be honoured by being allowed to march past the Commander-in-Chief and Staff after the household troops on that day, when it is proposed to have a Civil Service Volunteer Brigade dinner with friends at the Freemasons' Tavern, or other suitable place, and annually to keep up the recollection of the event upon that appropriate day, which Her Most Gracious Majesty's civil servants annually hold as a day of rejoicing. The Customs Corps have taken steps for the formation of a band, Mr. Christian being appointed band-master. On Tuesday the corps are to assemble at 9 o'clock, to form a "guard of honour," and to salute the Coldstreams on their march from the Tower to Windsor.

London Brigade.—At a meeting of the council, held at head-quarters, on Wednesday, Mr. Alderman Rose, vice-president, in the chair, it was agreed "That the best thanks of the council be conveyed to the authorities of Sion College for their liberality in having placed the grounds of the college at the service of the brigade." It was further resolved, "That in future no nomination for officers' commissions, or for promotions, can be made to the court of lieutenancy, unless the candidate can produce a certificate as to competency for such appointment or promotion signed by two field-officers and the adjutant of this brigade." The chairman reported that 1440 effective members had enrolled up to the present. Several additional subscriptions were announced.

London Irish.—The usual drill of this corps took place at Hungerford Hall on Saturday evening, from five till seven o'clock. The manner in which the members go through their drill drew warm encomiums from those present who were acquainted with military evolutions. On Tuesday the Irish Brigade meets at Burlington House, Piccadilly, for *open air drill at five* P.M.; on Thursday, at Hungerford Hall; and on Saturday, at a quarter to five, at Wellington Barracks—the use of which has been granted for the purpose by the authorities. Among those who joined the brigade on Saturday were Sir C. Coote, Bart., and C. S. Fortescue, Esq., M.P., as honorary members, and T. Connolly, Esq., M.P., as an active member. The brigade is rapidly increasing in numbers, and gaining in efficiency. From some unaccountable delay at the War Office the brigade has not yet received the Government allowance of rifles.

St. George's Rifles.—Lieut.-Colonel the Hon. C. H. Lindsay (late of the Grenadier Guards), commanding the St. George's Rifles,—(11th Middlesex), has taken the initiative in the task of rendering the commissioned officers of that corps really efficient and fully adequate to their important duties, by attaching them to the 1st battalion of the Grenadier Guards at the Wellington Barracks, where they undergo the same course of training as officers of the line. It would be well were commanding officers of other corps to adopt similar steps. We may add, now that we are touching upon matters relative to the St. George's corps, that the current reports as to the heavy expenses attendant upon joining are much exaggerated; the whole outfit (the Government Enfield being supplied free) not amounting to ten pounds.

Queen's Westminster Rifle Volunteers.—A member of this corps writes:—"Allow me to call your attention to a want that is felt by every member of this corps, viz., a band. This corps now musters nearly 1600 effective members. I think there is not one of those members who would refuse to subscribe to a "band fund," which ought to be "second to none."

Honourable Artillery Company.—A guard of honour, consisting of 100 rank and file, under the command of Captain Jordan and Lieutenants Fox and Blockley, was furnished by the Hon. Artillery Company, on the occasion of His Royal Highness the Prince Consort, Captain-General and Colonel of the corps, visiting the Clothworkers' Hall on Tuesday. The field officer and adjutant-in-waiting were Major Robinson and Captain Brinewood Botts.

The Six Feet Volunteer Guard (32nd Middlesex).—This corps will drill at Allen's Riding-School every Monday evening until further notice. The great average height of the members of this corps gives it an imposing appearance on parade. The Captain-Commandant, the Hon. T. C. Bruce, a brother of the Earl of Elgin, has decided that the simplest manœuvres only shall be practised.

CARNARVONSHIRE.

On Monday, the 26th inst., the Third or Carnarvon Company of the Rifle Volunteers of Carnarvonshire were formally enrolled. The members of the company, under Captain H. R. Williams, mustered at eleven in the morning at the Guildhall, Carnarvon, where the efficient brass band of the Royal Carnarvon Rifle Regiment of Militia, under Mr. Watts, the bandmaster, was in attendance. The Volunteers then marched, with the band at their head, into the magnificent square of Carnarvon Castle. Here the oath of allegiance was administered by the Mayor of Carnarvon, assisted by the officers of the company, in the presence of a large and enthusistic assemblage. The whole of the proceedings, which caused much excitement and interest in the town and neighbourhood, passed off in the most satisfactory manner. This company has been for a considerable period under drill, their instructor being Sergeant-Major Harwood of the Royal Carnarvon Rifles, and it is hoped that they will soon form an efficient body of Volunteers.

HAMPSHIRE.

The Winchester Volunteers.—There is something radically wrong in the Volunteer movement in this county. It does not thrive. It was the subject of remark at the Volunteer Levee that the patriotism of Hampshire shone the dimmest of all the English counties. This is not owing to any want of spirit on the part of the people, particularly in the old cathedral town of Winchester. Plenty of good men are to be found willing to aid the noble cause, and yet the muster gets thinner day after day, and we fear that the following notices which have been served on many of the members will soon reduce the corps to a skeleton:—

"1. Resolved, that the secretary write to all members, who, having been sworn in, have since resigned, requesting payment of their subscriptions by the end of March, informing them at the same time of the provisions of the Act, and stating that payment will be enforced.

"2. The 51st section of the 44th Geo. III., cap. 54, provides that if subscriptions or fines be not paid on demand, a justice of the peace may direct double the amount to be paid, which may be levied by distress."

The above shows a very unpleasant state of things at Winchester, and the explanation of the whole affair may be summed up in one word—uniform. The Lord-Lieutenant has his own views upon the subject of dress, which it seems have been at variance with the wishes of the Volunteers.

Fareham Rifles.—We understand that the command of the Lord-Lieutenant of the county, that the Volunteers of this town should, after each day's drill, march to Porchester Castle, and deposit their arms for safe custody, has not been complied with. The distance the Volunteers would have to march to carry out this vexatious order is nearly four miles.

Portsmouth Artillery Volunteers.—A meeting of the influential members of this corps took place at the guildhall in this borough on Tuesday last. It is proposed to limit the number of Volunteers for the present to 50 members; and as 47 have spontaneously come forward, the first company may be said to be in a fair way of being completed. A second company will be organised as soon as certain preliminaries have been arranged. At the next meeting it is expected that the officers will be elected, and then an official notice of the proceedings will be forwarded to the Marquis of Winchester, the Lord-Lieutenant of the county.

KENT.

Woolwich Dockyard.—A meeting of the members of the Dockyard Volunteer Artillery Corps was held on Monday evening, when a communication was received to the effect that Her Majesty had accepted the services of the corps, and the appointment of officers had been confirmed. The corps assembled on Tuesday evening at the Dockyard for drill.

Woolwich Arsenal.—The Volunteer Artillery Corps belonging to the the carriage department of this Arsenal gave a concert on Saturday in the lecture-hall of the Literary and Scientific Institution, to promote the funds of the band committee. The hall was well filled with members of the corps and their friends, to the number of about 600 persons. The concert was under the special patronage of the Commandant, Sir T. M. Wilson, Deputy-Lieutenant of the county; Sir William Armstrong, Mr. Anderson, Superintendent of the Royal Gun Factories; Alderman Salomons and Mr. Angerstein, the borough members, &c. The 4th company, commanded by Colonel Thorold, were last week supplied with the Enfield rifle, by order of the War Department, and at the request of the Commandant they have been granted permission once a week to perform a course of rifle practice in the racket-court. Every available spot in the Arsenal was on Saturday crowded with squads, under the instruction of the drill sergeants, all of whom display the most laudable willingness, and devote the greater portion of each Saturday afternoon (the usual holiday) to the Volunteer movement. The total effective force of the several rifle and artillery companies now amounts to 1600; and several of the companies have yet to be completed.

26th Corps Kent Rifle Volunteers, 2nd Battalion. *Royal Gun Factories Department.*—Lieut.-Colonel, J. Anderson. 1st Company: W. J. Elliott, Captain; R. McGrath, Lieutenant; W. Home, Ensign. 2nd Company: R. S. Frazer, Captain; T. Santon, Lieutenant; W. Shackle, Ensign. 3rd Company: J. A. Cameron Hay, Captain; W. Sandeman, Lieutenant; R. Mackenzie, Ensign. 4th Company: J. H. Murk, Captain; M. McDaniel, Lieutenant; G. Sutherland, Ensign. *Military Store Department.* — 5th Company: Travers, Captain; Martin, Lieutenant; Thompson, Ensign.

4th Kent, Woolwich.—This rifle corps, by permission of the War Department, assembles for practice at the Government practice range on Tuesdays and Thursdays, and the majority of the members have become highly efficient.

Greenwich and Blackheath Artillery.—The officers and members of this corps assembled at Greenwich on Saturday afternoon, and marched, preceded by a military band, to Blackheath, for the purpose of holding the first meeting at the new head-quarters of the corps, formerly Dartmouth Row Chapel. The proceedings terminated by a dinner, given by the commanding-officer of the corps.

The Folkestone, or No. 4 Company, Artillery Volunteers have commenced gun drill at the Folkestone Battery. It is intended to have gun drill every evening from 6 to 7, except Tuesday and Thursday evenings, when company drill will be carried out.

LANCASHIRE.

It is proposed by some of the Liverpool Volunteer Corps to camp out on the Crosby Sands some time during the summer.

LINCOLNSHIRE.

7th Lincolnshire.—The name of Lieutenant Hollway of this corps was erroneously spelled Holway in the official gazette last week.

Digitized by Google

SURREY.

CROYDON.—2d Surrey Rifle Volunteers. Formed 16th June 1859. 1st Company — Captain-Commandant J. H. Campbell, late Colonel, Bengal Artillery. Lieutenant J. T. Hyde. Ensign, J. M. Eastly. Assistant-Surgeon, A. Carpenter, M.D. 2nd Company—Captain A. Steuart. Lieutenant, H. Bonus. Ensign, J. Allen. Arms—Short Lancaster Rifle with sword-bayonet. Accoutrements — Black enamelled Leather same as Rifle Brigade (worn both with full and undress). Uniform— Full dress, green; undress, grey, War-Office pattern. Strength—120. 3rd Company forming. Drill ground—Government Riding School at the Barracks in Windsor. Practise ground—Short range of 200 yards at Mr. Weaver's Chalk Pit. Long Range 1000 yards, at Riddlesdown, near the Caterham Station. Drill Instructors—non-commissioned officer of the Guards Depôt.

SURREY RIFLE CORPS.—In the House of Commons on Thursday, Lord Ashley asked the Home Secretary whether his attention had been directed to a letter, signed "E. G.," which appeared in the *Times* of Thursday last, complaining that on the 20th of March four persons, dressed in the uniform of a rifle corps, while practising on Wandsworth Common, aimed at and shot the favourite dog of the writer's sister, immediately upon which fatal catastrophe they all ran away; and whether it would not be advisable to authorise the police to put a stop to sharp-shooting upon public footpaths. Sir G. C. Lewis said that as the noble lord had asked this question he found it necessary to answer it. He understood that the Surrey Rifle Volunteers had been on the day in question drilling in that neighbourhood, and that four men in their uniform were seen near the spot where the dog was killed, but that the police could not discover who was the person who had fired the shot. He understood that no sharp-shooting had taken place near any public footpath.

VOLUNTEER GAZETTE.

WAR OFFICE, PALL-MALL, MARCH 27.

5th Company Ayrshire Rifle Volunteers—Robert Girvan, M.D., to be Honorary Assistant-Surgeon; Rev. John Thomson, to be Honorary Chaplain; March 19.

5th Westmoreland Rifle Volunteers—Robert Jefferson,

Digitized by Google

Gent., to be Lieutenant; John Bolton, Gent., to be Ensign.

3rd Company Hampshire Rifle Volunteers — Edward Chinery, Gent., to be Honorary Assistant-Surgeon; March 27.

Shropshire Regiment of Militia—Lieut. Frederick Henry Mainwaring, to be Captain, vice Cotton, resigned; March 28.

2nd Berwickshire Rifle Volunteers—Sir John Majoribanks, Bart., to be Captain; Matthew Desart Hunter, to be Lieutenant; Thomas Hood to be Ensign; Alexander Brown, to be Honorary Assistant-Surgeon.

MILITIA SURGEONS.

The following petition is understood to have received a large number of signatures, and we trust it will make its appearance in the House with proper weight attached to it:—

"We, the undersigned members of the House of Commons, and Colonels of Militia Regiments, beg respectfully to direct the attention of the Secretary of State for War, to the present unsatisfactory position of Militia surgeons.

"In consideration of the valuable services rendered from time to time by these officers, during the embodiment of their regiments, and in consequence of the continued duties required of them, during the disembodiment of their corps; being also compelled by Act of Parliament, to reside at their respective head-quarters, and unable (as they have proved before the Royal Militia Commission) to obtain any public appointments, or any amount of private practice, owing to their liability at all times to be called away for active service; a majority of these gentlemen having also served during two embodiments, extending over a period of from four to five years, which, in the regular service would entitle them to permanent half-pay *; and as the remuneration at present granted to them is insufficient in amount and uncertain in its character; and having carefully considered their case, we respectfully urge upon you the justice and propriety of introducing into the contemplated Bill for improving and re-organising the Militia, a clause placing these officers upon a more permanent and remunerative footing."

* This is an exaggeration. It is only in case of wounds, &c., that permanent half-pay is granted in the Regular Service to officers after five years.—Ed.

Our Military friends within reach of London will find a rich musical treat during the approaching season of the Royal Italian Opera, Covent Garden—now *the* Opera House, par excellence—of which the programme will be found in another column.

The Junior United Service Club will cease their occupation of the Colonnade Hotel on the 1st of April (to-morrow), and trnsfer their meetings to the Thatched House Tavern, St. James's-street, until their own club-house is fit for their reception, which many suppose will be about the 1st of May next.

MAYALL's PHOTOGRAPHIC PORTRAIT GALLERIES, 224 & 226, Regent Street, W.—Photographic and Daguerreotype Miniatures, plain or highly finished in colours, taken daily.

"Mr. Mayall stands supreme in portraits, and is unrivalled for breadth, manner, and finish. Either from the character of his sitters, or the taste of his compositions, his portraits appear more dignified, self-possessed, and aristocratic than those of any other photographer."—*Athenæum.*

Specimens (including the Generals and Crimean Heroes taken for Her Majesty's private collection) may be seen in the galleries, from nine till dusk.

DOUDNEY & SONS' RIFLE SUITS.—1st Surrey, *4l. 2s.*; South Middlesex, *4l. 10s.*; Rifle Brigade, *4l.*—17, Old Bond Street, W.

THE NEW BELT FOR MILITARY MEN, VOLUNTEER, AND RIFLE CORPS.—Every Military Man, every Volunteer or Rifleman, Hunter or Rider, should wear this Belt, especially those who are Corpulent, as it gives great support to the Back, and wonderfully improves the Figure.

"For comfort and support 'Elstob's' Belt is without a parallel."—*United Service Gazette, Nov.* 12.

Price 21*s.* Elstob, Military Belt and Trouser Maker, 12, Avery Row, Grosvenor Street, W., and New Bond Street, W. Circulars forwarded. Gentlemen attended.

RUDALL, ROSE, CARTE, & CO.'S NEW PATENT OPEN DRUMS, with Tubular Pillars instead of Shells (adopted by the Coldstream Guards). Side Drums, Bass Drums, Cavalry or Kettle Drums, and Orchestral Drums.

The advantages secured by this Patent, are:

1. Extreme lightness; the heads being supported by slight tubular metal pillars, in place of the heavy old shell. The advantage in this respect is obvious, whether the Drum be carried by a drummer or on horseback.

2. The tone is much more sonorous, free, and vibratory than that of the Shell Drum; this superiority of tone resulting from the fact, now first discovered, that Shells, instead of aiding in the formation of the tone in the Drum, have the effect of confining and muffling it.

Patentees—Rudall, Rose, Carte, & Co., Military Musical Instrument Manufacturers to Her Majesty, and the British and Indian Armies, Makers of the Patterns of the new Regulation Flutes, Bugles, Drums, &c., 20, Charing Cross, S. W.
